## For teachers and families

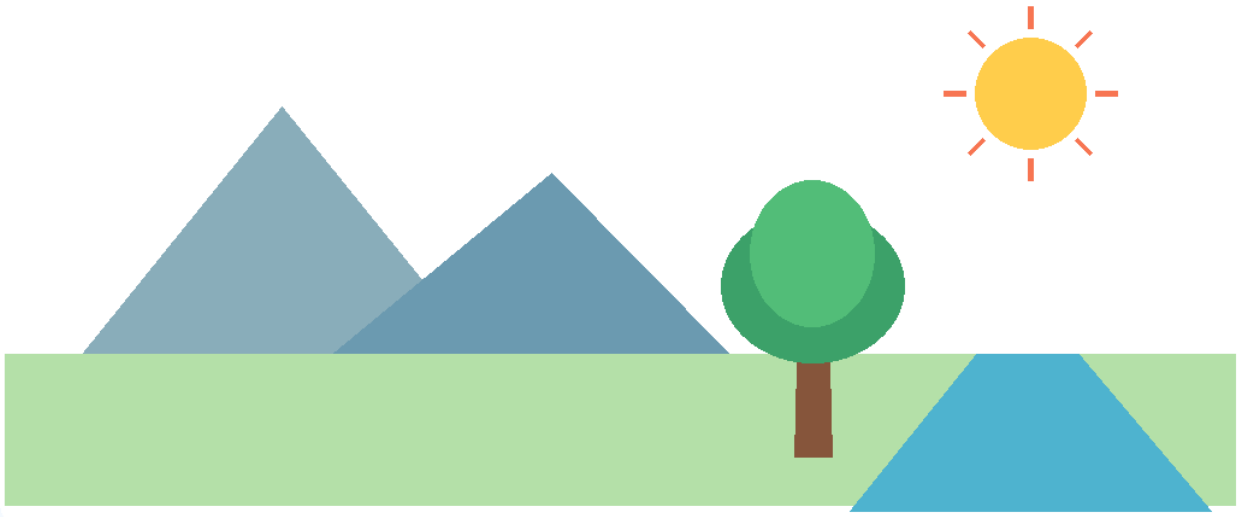

This book is an original educational companion aligned to the uploaded NaCCA curriculum. It is not an official NaCCA or GES publication. All rights in the original curriculum remain with their owners. Observe children during map-drawing, nature walks, discussions and role-play; automatically scored quiz items alone cannot assess those skills.

LESSON 01 • ALL ABOUT US

# The World Around Us

Learning goal: Notice and appreciate the natural world while listening respectfully to creation stories from different traditions.

EXPLORE • ALL ABOUT US

## Discover and understand

- The natural world includes rivers, hills, trees, people, birds and stars.
- People tell creation stories to explain their beliefs about how the world began.
- We can care for the world by keeping places clean and protecting living things.

## Try it in the real world

Go outdoors with an adult. Sketch two natural things and explain one way to care for each. Invite classmates to share family stories respectfully.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 01 — Activity Time

## PLAY • Five guided questions

1. Which item is part of the natural world?
2. Which living thing grows leaves?
3. Which object can be seen in the night sky?
4. What can we do after listening to a classmate's story?
5. What helps keep a stream clean?

## CHALLENGE • Ten new situations

1. A class sees a hill behind the school. How should they describe it?
2. Kofi sees a bird trapped in plastic. What is a caring first step?
3. Two children tell different creation stories. What should the class show?
4. A visitor wants to know what grows near your home. What could you show?
5. A pupil finishes a picture of trees and water. What title fits?
6. Which school project helps protect plants?
7. Ama notices rubbish beside a pond. What is the safest helpful response?
8. Why might a child make a model of a mountain?
9. A friend says a story is special to their family. What is a kind reply?
10. A group wants to show ways to care for the world. Which poster works?

## Check your learning

Play: 1. A river • 2. A tree • 3. A star • 4. Thank them politely • 5. Putting waste in a bin

Challenge: 1. A natural landform • 2. Tell a trusted adult • 3. Respect for both speakers • 4. A drawing of nearby plants • 5. Things in nature • 6. Watering a class garden • 7. Ask an adult to organise a clean-up • 8. To show part of the environment • 9. I would like to listen • 10. Keep water and land clean

Hands-on check: Go outdoors with an adult. Sketch two natural things and explain one way to care for each. Invite classmates to share family stories respectfully.

LESSON 02 • ALL ABOUT US

# Wonderful Me

Learning goal: Describe personal qualities and accept similarities and differences without judging appearance.

## EXPLORE • ALL ABOUT US

### Discover and understand

- Everyone has qualities, interests and talents.
- Being different does not make anyone less important.
- Kindness, honesty and confidence help us grow.

### Try it in the real world

Draw a self-portrait and tell a partner two things you do well and one skill you want to practise.

### Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 02 — Activity Time

## PLAY • Five guided questions

1. Which sentence shows confidence?
2. What quality means telling the truth?
3. What quality helps a classmate who falls?
4. Do all friends have to enjoy the same game?
5. What should we say about our own strengths?

## CHALLENGE • Ten new situations

1. Two learners have different heights. What matters most?
2. Esi loves drawing but Yaw loves football. What does this show?
3. A classmate has difficulty reading. What is a helpful response?
4. Akosua learns a new song slowly. What should she do?
5. A pupil makes a mistake during a game. Which thought helps?
6. Your new friend speaks differently. How should you behave?
7. A group chooses a leader. Which quality should they value?
8. Why might a pupil write three strengths in a notebook?
9. Someone laughs at a child's appearance. What should a bystander do?
10. Your friend wins a race you also entered. What is a good reply?

## Check your learning

Play: 1. I can learn new things • 2. Honesty • 3. Kindness • 4. No, people like different things • 5. We can be proud of them

Challenge: 1. Treating both with respect • 2. People have different interests • 3. Offer patient support • 4. Keep practising • 5. I can try again • 6. Welcome them warmly • 7. Fairness • 8. To appreciate themselves • 9. Ask them to stop kindly • 10. Congratulate the friend

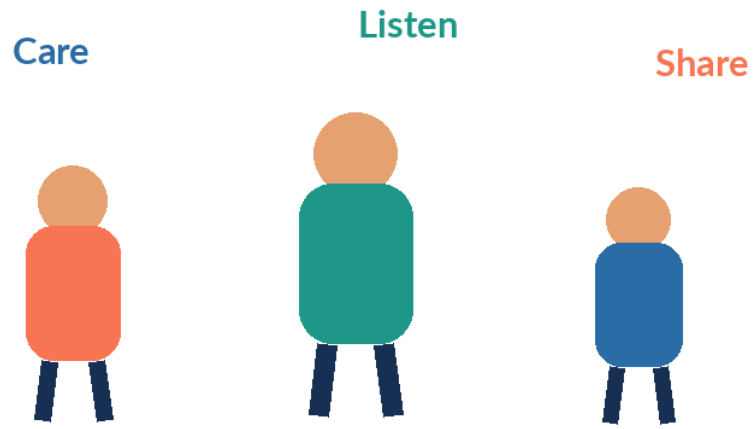

Hands-on check: Draw a self-portrait and tell a partner two things you do well and one skill you want to practise.

LESSON 03 • ALL ABOUT US

# People Who Care for Us

Learning goal: Identify close relationships and ways of building kind relationships at home and school.

EXPLORE • ALL ABOUT US

## Discover and understand

- Families can include parents, grandparents, guardians, siblings and other caring people.
- Friends, teachers and neighbours can support one another.
- Listening, sharing and respect help relationships.

## Try it in the real world

Make a people-who-help-me circle with the names or roles of three trusted people. Do not share private addresses.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 03 — Activity Time

## PLAY • Five guided questions

1. Who can help a pupil learn at school?
2. Who could be a family member?
3. What action shows care for a friend?
4. What helps two people solve a disagreement?
5. What should we do when someone speaks?

## CHALLENGE • Ten new situations

1. Your cousin visits with an unfamiliar game. How can you welcome them?
2. A younger child cannot tie a shoe. What is a caring choice?
3. One pupil has a different family arrangement. What should peers do?
4. Two friends want the same storybook. How can they act fairly?
5. A neighbour brings back a lost ball. What should you say?
6. A child is lost on a school trip. Whom should they approach?
7. A pupil is asked to give a stranger their home address. What should they do?
8. Your classmate is sad after an argument. What helps rebuild trust?
9. Which activity strengthens a family bond?
10. Why draw a circle of trusted helpers?

## Check your learning

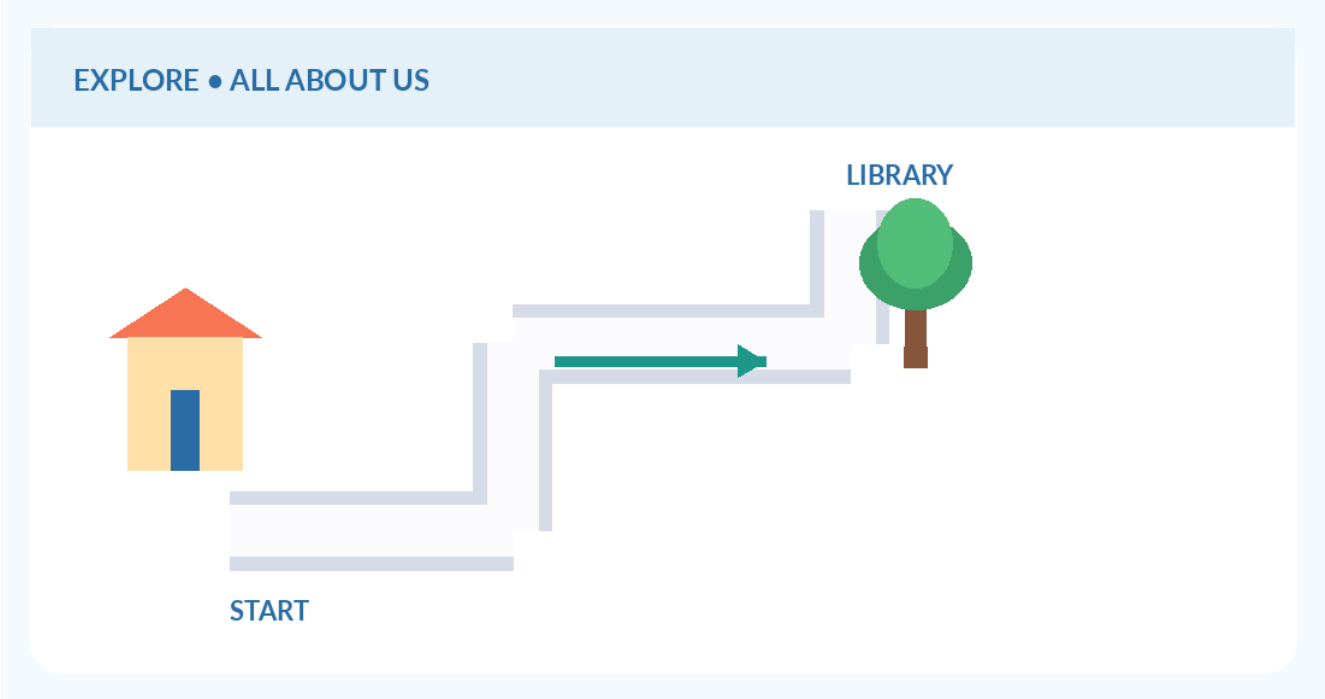

Play: 1. A teacher • 2. A grandparent • 3. Checking if they are well • 4. Listening to each other • 5. Wait for our turn

Challenge: 1. Invite them to teach the rules • 2. Offer help if wanted • 3. Respect their family • 4. Agree to take turns • 5. Thank you • 6. A trusted teacher • 7. Ask a trusted adult first • 8. Speak kindly and apologise when needed • 9. Sharing a meal and conversation • 10. To know who can support you

Hands-on check: Make a people-who-help-me circle with the names or roles of three trusted people. Do not share private addresses.

# Finding My Way Home

Learning goal: Describe familiar surroundings and draw simple directions without disclosing private personal details.

## Discover and understand

- A sketch map uses pictures and simple symbols to show places.
- Landmarks such as shops, trees and schools can help explain a route.
- A trusted adult should help children travel safely.

## Try it in the real world

Draw a pretend route from a school to a library using three landmarks and arrows. Keep real personal addresses private.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 04 — Activity Time

## PLAY • Five guided questions

1. What helps show a route on a sketch?
2. Which is a useful landmark?
3. What should a map have at the beginning of a route?
4. Which mark can stand for a school?
5. Who should guide a young learner on an unfamiliar journey?

## CHALLENGE • Ten new situations

1. A route passes a market before the clinic. What can show that order?
2. Kwame's friend cannot understand a sketch. What could he add?
3. A pupil draws a road but not its destination. What is missing?
4. You need to show a left turn on paper. What could you draw?
5. An adult asks for a safe classroom mapping activity. What should pupils map?
6. A footpath splits near a big tree. What can the sketch include?
7. How can a learner explain a route without sharing a home address publicly?
8. A class draws the same place with different symbols. What would improve their maps?
9. A learner wants to show where the school gate is. What is useful?
10. A route sketch confuses north and south. What can help?

## Check your learning

Play: 1. Arrows • 2. A bridge • 3. A starting point • 4. A labelled school symbol • 5. A trusted adult

Challenge: 1. Two symbols in sequence • 2. Clear place names • 3. An ending point • 4. A left-pointing arrow • 5. A pretend neighbourhood • 6. The tree as a landmark • 7. Use a fictional route • 8. A shared symbol key • 9. A labelled gate icon • 10. A simple compass mark

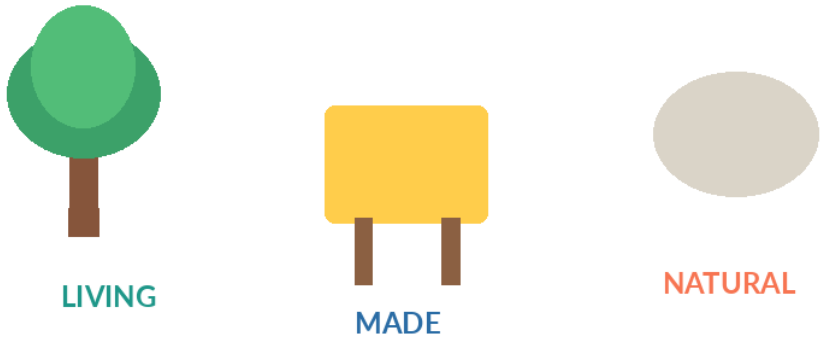

Hands-on check: Draw a pretend route from a school to a library using three landmarks and arrows. Keep real personal addresses private.

LESSON 05 • ALL AROUND US

# Things in Our Environment

Learning goal: Observe nearby objects, identify living and non-living things, and discuss uses and care.

EXPLORE • ALL AROUND US

## Discover and understand

- Living things grow and need resources.
- Non-living things include rocks, tables and cups.
- Some things occur naturally; others are made by people.

## Try it in the real world

Take a supervised nature walk. Sort six observed things into living and non-living, then draw a care symbol.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 05 — Activity Time

## PLAY • Five guided questions

1. Which item is living?
2. Which item is made by people?
3. Which object is usually natural?
4. What does a chair help us do?
5. What does a tree need to stay healthy?

## CHALLENGE • Ten new situations

1. A class finds ants under a log. How should they classify ants?
2. A child sees a glass bottle on the ground. What should they do?
3. You see a clay pot and a mango tree. Which is man-made?
4. Two classmates want to protect a school flowerbed. What helps?
5. A pupil says every non-living thing is man-made. Which example shows this is wrong?
6. Where might you find a computer in your surroundings?
7. A bee is visiting a flower. Which two living things are involved?
8. What is a responsible way to use school furniture?
9. Your class lists grass, pebbles and a bicycle. Which is a plant?
10. Which question helps investigate an unfamiliar object?

## Check your learning

Play: 1. A goat • 2. A desk • 3. A stone • 4. Sit comfortably • 5. Water and sunlight

Challenge: 1. Living animals • 2. Tell an adult about the litter • 3. The clay pot • 4. Avoid stepping on plants • 5. A mountain • 6. A school or office • 7. The bee and the flower • 8. Handle it carefully • 9. Grass • 10. Is it living, natural or made?

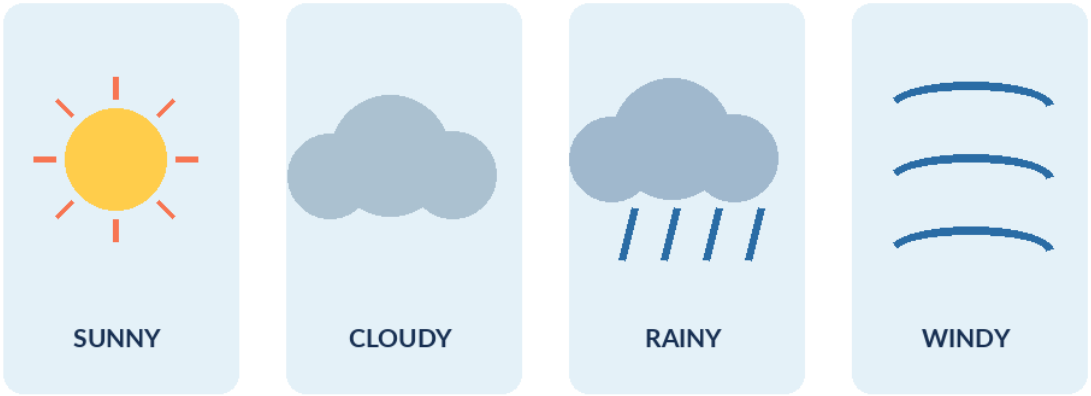

Hands-on check: Take a supervised nature walk. Sort six observed things into living and non-living, then draw a care symbol.

LESSON 06 • ALL AROUND US

# What Is the Weather?

Learning goal: Recognise and describe sunny, rainy, windy and cloudy conditions.

EXPLORE • ALL AROUND US

## Discover and understand

- Weather can change from day to day.
- Sun, clouds, rain and wind are simple weather clues.
- We can choose safe clothes and activities for each condition.

## Try it in the real world

Keep a weather chart for five days. Draw one weather symbol each day and say how it affected your plans.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 06 — Activity Time

## PLAY • Five guided questions

1. What falls from clouds in rainy weather?
2. Which weather often has strong moving air?
3. What might you see in a cloudy sky?
4. Which day usually has bright sunshine?
5. What can help keep you dry in the rain?

## CHALLENGE • Ten new situations

1. You see tree leaves bending and flags moving. What is a likely condition?
2. A pupil notices dark clouds before break. What might happen?
3. A class plans outdoor painting in heavy rain. What is safer?
4. Esi wants to record today's weather. What should she do first?
5. The sun shines but clouds are also visible. What could a weather report say?
6. A friend asks why the playground is wet. What clue could explain it?
7. On a very hot sunny day, how can learners stay comfortable?
8. A dust cloud blows across the path. What should a pupil avoid?
9. What tool-like drawing could stand for a sunny day on a class chart?
10. After five days of recording, what could learners compare?

## Check your learning

Play: 1. Rain • 2. Windy • 3. Many clouds • 4. Sunny • 5. A raincoat

Challenge: 1. Windy weather • 2. It may rain • 3. Move activity indoors • 4. Observe the sky safely • 5. Partly cloudy • 6. Rain fell earlier • 7. Rest in shade and drink water • 8. Standing in flying dust • 9. A sun symbol • 10. How many days were rainy

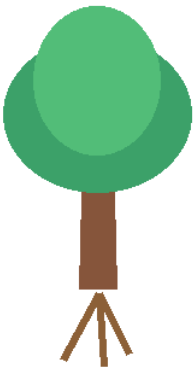

Hands-on check: Keep a weather chart for five days. Draw one weather symbol each day and say how it affected your plans.

LESSON 07 • ALL AROUND US

# Plants Help Us

Learning goal: Identify common plants and describe how people and animals benefit from them.

## EXPLORE • ALL AROUND US

ROOTS

MAIZE

### Discover and understand

- Plants include grasses, food crops, fruit trees and shade trees.
- Plants may provide food, shade, building materials and materials for clothing.
- Different plants grow in different places.

### Try it in the real world

Draw a mango tree, maize plant and grass. Match each to a benefit and discuss safe plant care.

### Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 07 — Activity Time

## PLAY • Five guided questions

1. Which plant grows mango fruits?
2. Which crop produces maize cobs?
3. What do tree branches and leaves often provide?
4. Which part of a plant takes in water from the soil?
5. What should young learners do with unknown wild plants?

## CHALLENGE • Ten new situations

1. A gardener wants to keep a seedling alive. What should they provide?
2. A family needs food from a farm. Which plant could help?
3. An animal rests under a tree at noon. What is it using?
4. You see a grass field and a cocoa farm. What do both contain?
5. A pupil pulls leaves off a school tree for fun. What is a better choice?
6. Why might someone plant trees near a home?
7. A child finds a small plant beside a road. How can they record it without damage?
8. How do plants help many animals?
9. A seedling droops in dry soil. What question should you ask?
10. A class is comparing banana and mango plants. What can it observe?

## Check your learning

Play: 1. A mango tree • 2. Maize • 3. Shade • 4. Roots • 5. Ask an adult before touching

Challenge: 1. Suitable water and light • 2. Cassava • 3. The tree's shade • 4. Plants • 5. Leave the leaves to grow • 6. To give shade and improve surroundings • 7. Draw it in a notebook • 8. They provide food and shelter • 9. Does it need water? • 10. Differences in leaves and fruit

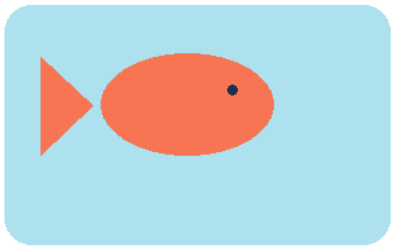

Hands-on check: Draw a mango tree, maize plant and grass. Match each to a benefit and discuss safe plant care.

LESSON 08 • ALL AROUND US

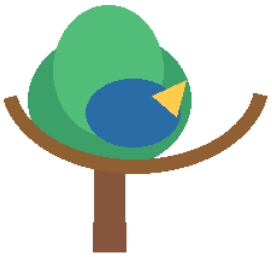

# Animals and Their Homes

Learning goal: Identify animals in different environments and discuss respectful animal care.

## EXPLORE • ALL AROUND US

WATER

NEST

### Discover and understand

- Animals include birds, fish, insects and mammals.
- Animals have habitats where they find food, water and shelter.
- We should not disturb wild animals or their homes.

### Try it in the real world

Match drawings of a fish, bird, ant and goat to suitable habitats; observe from a safe distance.

### Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 08 — Activity Time

## PLAY • Five guided questions

1. Which animal lives in water?
2. Where might a bird keep its eggs?
3. Which creature is an insect?
4. Which farm animal may eat grass?
5. What should learners do near an unfamiliar wild animal?

## CHALLENGE • Ten new situations

1. A child wants to draw a tilapia in its home. What should be in the picture?
2. A bird is gathering twigs. What might it be building?
3. Someone finds an anthill. What is a respectful action?
4. A pet needs care during a hot day. What is important?
5. A frog is seen near a pond. Which place supports it?
6. A pupil sees butterfly wings and fish fins. What can be compared?
7. A friend wants to take a bird egg home. What should you advise?
8. Why are different habitats important?
9. A class studies animal homes using pictures. Which image pairs correctly?
10. A village family keeps sheep. What must they provide?

## Check your learning

Play: 1. A fish • 2. A nest • 3. An ant • 4. A goat • 5. Keep a safe distance

Challenge: 1. Water • 2. A nest • 3. Leave it undisturbed • 4. Clean drinking water • 5. A wet habitat • 6. How the animals move • 7. Do not remove eggs from nests • 8. Animals need suitable places to live • 9. A bird with a nest • 10. Food, water and shelter

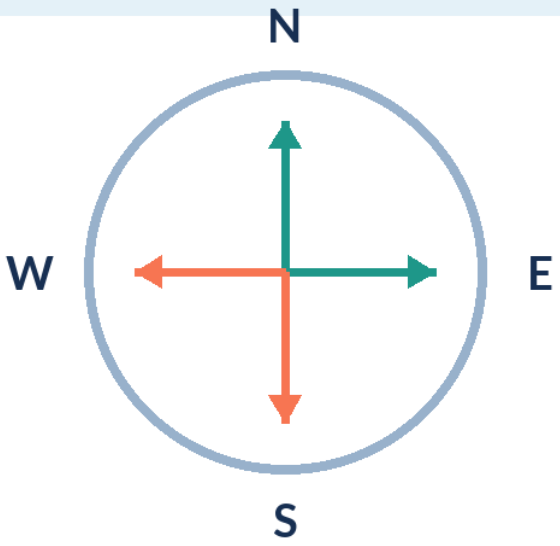

Hands-on check: Match drawings of a fish, bird, ant and goat to suitable habitats; observe from a safe distance.

LESSON 09 • ALL AROUND US

# The Four Directions

Learning goal: Identify north, south, east and west on a simple compass diagram.

EXPLORE • ALL AROUND US

## Discover and understand

- A compass rose shows the four cardinal directions.
- On a classroom map with north at the top, east is right, west is left and south is bottom.
- Directions help us explain where things are.

## Try it in the real world

Make a floor compass from four paper arrows; turn your body with the teacher and say the directions.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 09 — Activity Time

## PLAY • Five guided questions

1. Which direction is opposite north?
2. On a north-up map, which direction is right?
3. Which direction is opposite east?
4. What name is given to N, S, E and W?
5. What diagram shows north and other directions?

## CHALLENGE • Ten new situations

1. A school map has north at the top. Where is the bottom?
2. A book is marked to the west of a desk. On a north-up map, where is it?
3. An arrow points up on a north-up map. What does it show?
4. A classmate faces north. What direction is behind them?
5. You start facing east. Which direction is opposite you?
6. Your diagram has E on the left and W on the right. What should you fix?
7. An object is located south of the library. Where should you draw it?
8. A map shows a well east of a house. Which side is the well?
9. A pupil labels a four-point compass. Which labels are needed?
10. Why practise directions in the classroom?

## Check your learning

Play: 1. South • 2. East • 3. West • 4. Cardinal directions • 5. A compass rose

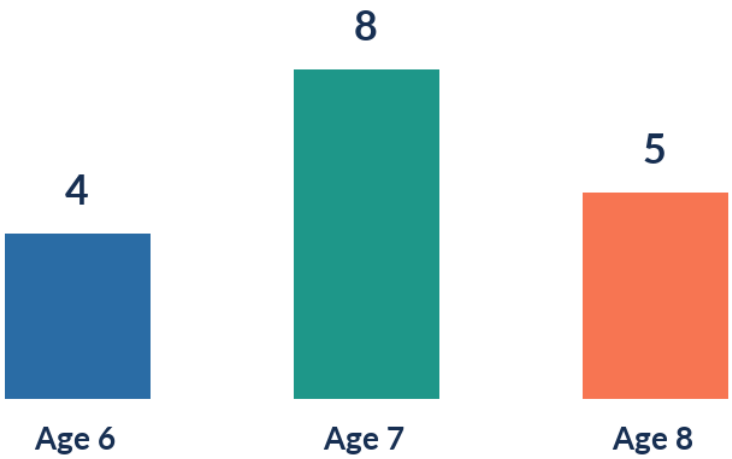

Challenge: 1. South • 2. To the left • 3. North • 4. South • 5. West • 6. Swap east and west • 7. Below the library on a north-up map • 8. Right of the house • 9. N, S, E and W • 10. To describe locations clearly

Hands-on check: Make a floor compass from four paper arrows; turn your body with the teacher and say the directions.

# Our Class at a Glance

Learning goal: Make simple counts by age group and discuss respect for all learners.

## EXPLORE • ALL AROUND US

### Discover and understand

- A class population is the group of learners in the class.
- Counting learners by age or other recorded groups helps us describe the class.
- Numbers describe groups; every person deserves equal respect.

### Try it in the real world

With the teacher, create a tally chart for the number of learners aged six, seven and eight; use fictional counts if privacy is a concern.

### Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 10 — Activity Time

## PLAY • Five guided questions

1. What does class population mean?
2. What can a tally mark help us do?
3. Which number is an age?
4. What do we call a display made of labelled bars?
5. Should classmates be respected regardless of age?

## CHALLENGE • Ten new situations

1. A teacher counts six seven-year-olds. What should she record?
2. In a chart one block equals one learner. What do four blocks mean?
3. The eight-year-old bar is taller than the six-year-old bar. What can it mean?
4. A new learner joins the class. What happens to class population?
5. Two learners are the same age but have different hobbies. How should they be treated?
6. A class table has no headings. What should pupils add?
7. A learner uses five tally strokes for a group of five. Is that a useful method?
8. One age group has two learners and another has five. Which is larger?
9. A child is excluded because they are younger. What should peers do?
10. Why would a teacher make a class population chart?

## Check your learning

Play: 1. All learners in the class • 2. Count people • 3. Seven years • 4. A bar chart • 5. Yes, everyone deserves respect

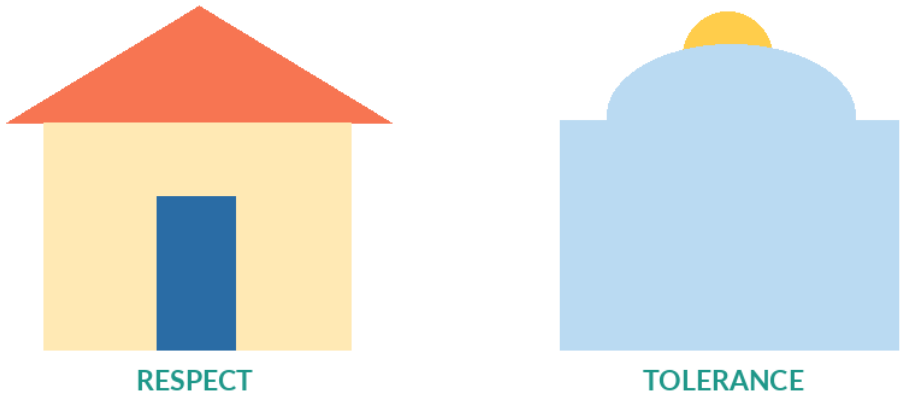

Challenge: 1. Six in the seven-year-old group • 2. Four learners • 3. More eight-year-olds were counted • 4. It increases by one • 5. With equal respect • 6. Clear group labels • 7. Yes, five marks show five • 8. The group with five learners • 9. Include them kindly • 10. To compare group counts

Hands-on check: With the teacher, create a tally chart for the number of learners aged six, seven and eight; use fictional counts if privacy is a concern.

# Worship and Respect

Learning goal: Recognise forms of worship in Ghana and respect people who practise different faiths.

## EXPLORE • OUR BELIEFS AND VALUES

RESPECT TOLERANCE

### Discover and understand

- In Ghana, people practise Christianity, Islam, African Traditional Religion and other beliefs.
- Worship may include prayer, song, reflection or ceremonies.
- Respectful learners do not mock or disturb another person's worship.

### Try it in the real world

With guidance, draw respectful examples of people gathering peacefully. Discuss how classmates can show tolerance.

### Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 11 — Activity Time

## PLAY • Five guided questions

1. Where might Christians worship together?
2. Where might Muslims gather for prayer?
3. What value helps neighbours with different beliefs?
4. Which is an example of worship?
5. How should we behave when someone is praying?

## CHALLENGE • Ten new situations

1. A visitor describes an unfamiliar religious custom. What should the class do?
2. Two friends follow different religions. What can they still share?
3. A family is attending a worship service. What action shows courtesy?
4. Someone laughs at a traditional prayer. What should classmates encourage?
5. A class poster shows three Ghanaian worship traditions. What message suits it?
6. At a community ceremony, a pupil is unsure about a custom. What is best?
7. A new learner follows no religion. How should the class treat them?
8. What should happen when children share religious stories?
9. During a lesson, two stories about belief differ. What response is fair?
10. Why learn about worship in your community?

## Check your learning

Play: 1. A church • 2. A mosque • 3. Respect • 4. Prayer • 5. Avoid disturbing them

Challenge: 1. Listen politely • 2. Friendship and kindness • 3. Speak softly when appropriate • 4. Religious tolerance • 5. Different beliefs deserve respect • 6. Ask a trusted adult respectfully • 7. With equal kindness • 8. Everyone gets a fair turn • 9. Acknowledge that beliefs vary • 10. To understand neighbours better

Hands-on check: With guidance, draw respectful examples of people gathering peacefully. Discuss how classmates can show tolerance.

# Festivals We Celebrate

Learning goal: Recognise Christian, Muslim and Ghanaian traditional festivals and show tolerance at celebrations.

## EXPLORE • OUR BELIEFS AND VALUES

CHRISTMAS

EID

HOMOWO

### Discover and understand

- Christmas and Easter are Christian celebrations.
- Eid al-Fitr and Eid al-Adha are Muslim celebrations.
- Homowo, Odwira, Damba and Hogbetsotso are Ghanaian traditional or cultural festivals with their own communities and histories.

### Try it in the real world

Make an original three-column festival poster with drawings of safe, respectful ways to celebrate.

### Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 12 — Activity Time

## PLAY • Five guided questions

1. Which celebration marks Christmas?
2. Which festival comes at the end of Ramadan?
3. What kind of festival is Homowo?
4. Which faith celebrates Easter?
5. What behaviour suits a neighbour's festival?

## CHALLENGE • Ten new situations

1. A Muslim friend celebrates Eid. What could you say?
2. A school is preparing a display on Odwira. What should pupils research?
3. During a celebration, music is loud near a resting neighbour. What is considerate?
4. A child assumes all Ghanaian festivals are identical. What could they learn?
5. A friend invites you to a festival you do not know. What is a good first step?
6. Why do communities hold festivals?
7. How can pupils learn the meaning of Damba?
8. A class makes one page for Christmas and one for Eid. What are they comparing?
9. Someone wants to mock another group's festival dress. What should classmates say?
10. What makes a school festival exhibition fair?

## Check your learning

Play: 1. A Christian festival • 2. Eid al-Fitr • 3. A Ghanaian traditional festival • 4. Christianity • 5. Respectful participation when invited

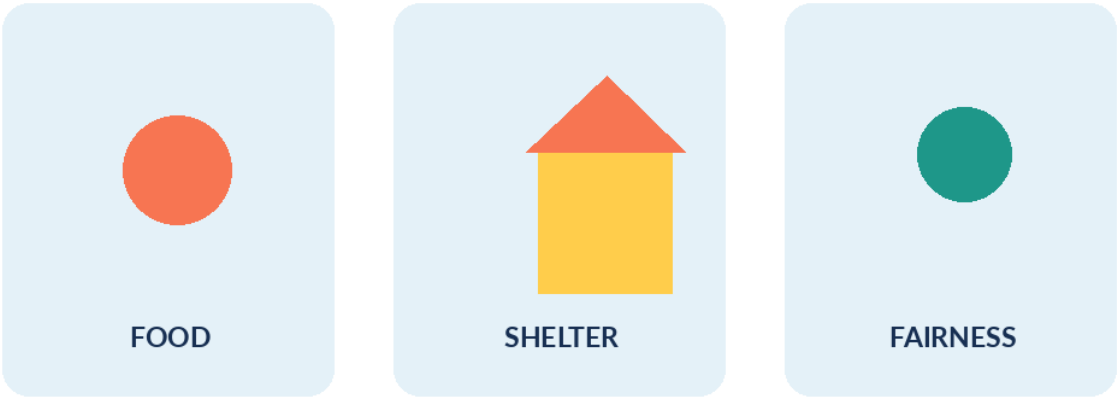

Challenge: 1. Best wishes for the celebration • 2. Its community and traditions • 3. Follow community rules and be mindful • 4. Festivals have different customs • 5. Ask respectfully what happens there • 6. To remember events and strengthen bonds • 7. Ask knowledgeable community members • 8. Two religious celebrations • 9. Treat cultural clothing respectfully • 10. Showing different traditions accurately

Hands-on check: Make an original three-column festival poster with drawings of safe, respectful ways to celebrate.

# Needs, Rights and Care

Learning goal: Distinguish essential needs from basic rights and discuss care for every person.

## EXPLORE • OUR BELIEFS AND VALUES

### Discover and understand

- People need food, clean water, clothing, shelter and safety.
- Human rights include life, dignity and fair treatment.
- Children can speak to a trusted adult when they feel unsafe.

### Try it in the real world

Make two cards: Things people need and How people deserve to be treated. Share examples with a teacher.

### Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 13 — Activity Time

## PLAY • Five guided questions

1. Which is a basic physical need?
2. Which item helps protect someone from rain?
3. What does fair treatment mean?
4. Who should a child tell if they feel unsafe?
5. Which action respects another person's dignity?

## CHALLENGE • Ten new situations

1. A pupil is thirsty after exercise. What basic need is most urgent?
2. A family has nowhere dry to sleep. Which need is missing?
3. Someone is excluded because of their disability. What should peers do?
4. Two children want to share a drinking cup safely. What should they consider?
5. A learner hears someone threatened at school. What is a safe response?
6. A child is laughed at for their clothes. What right-related value matters?
7. Which class rule supports everyone's learning?
8. A school club refuses to listen to young members. What should it improve?
9. A neighbour needs food after a flood. What can families do safely?
10. Why learn about both needs and rights?

## Check your learning

Play: 1. Food • 2. Shelter • 3. Respecting everyone equally • 4. A trusted adult • 5. Speaking kindly

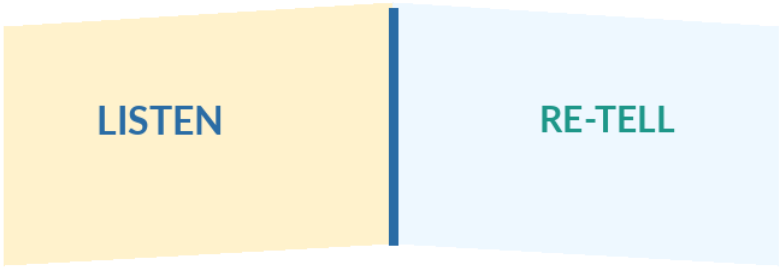

Challenge: 1. Safe drinking water • 2. Safe shelter • 3. Include the person fairly • 4. Hygiene and clean water • 5. Tell a teacher promptly • 6. Dignity • 7. Give all learners a fair turn • 8. Respectful participation • 9. Help through trusted community adults • 10. To care for ourselves and others

Hands-on check: Make two cards: Things people need and How people deserve to be treated. Share examples with a teacher.

# Stories of Religious Leaders

Learning goal: Listen to age-appropriate accounts of religious leaders while distinguishing a respectful story from a personal birth record.

EXPLORE • OUR BELIEFS AND VALUES

## Discover and understand

- Religious traditions tell stories about leaders that are important to followers.
- Family members may share dates and places of birth.
- We should not invent details about another person's religious story or private history.

## Try it in the real world

Ask a trusted adult about your own birth month or town if comfortable; share only information you wish to share. Listen to a teacher-selected story.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 14 — Activity Time

## PLAY • Five guided questions

1. What does a birth date tell us?
2. What is a birthplace?
3. Who can help explain a family birth story?
4. How should pupils listen to a religious birth story?
5. What should we do if we do not know a story detail?

## CHALLENGE • Ten new situations

1. A teacher reads a tradition's account of a leader's birth. What should pupils notice?
2. Two pupils remember different versions of a story. What can help?
3. A child does not want to share their birthday. What should the class do?
4. A story uses words unfamiliar to the class. What helps understanding?
5. A visitor tells a community history. What is a good listening habit?
6. Why might pupils draw a scene from a story?
7. A pupil confuses birth month and birth town. Which tells location?
8. A friend says their faith's account matters deeply to them. What is an appropriate reply?
9. How can a group retell a story without mocking it?
10. If adults disagree about a personal birth record, what can a child do?

## Check your learning

Play: 1. When someone was born • 2. The place where someone was born • 3. A trusted family adult • 4. With respect • 5. Ask instead of guessing

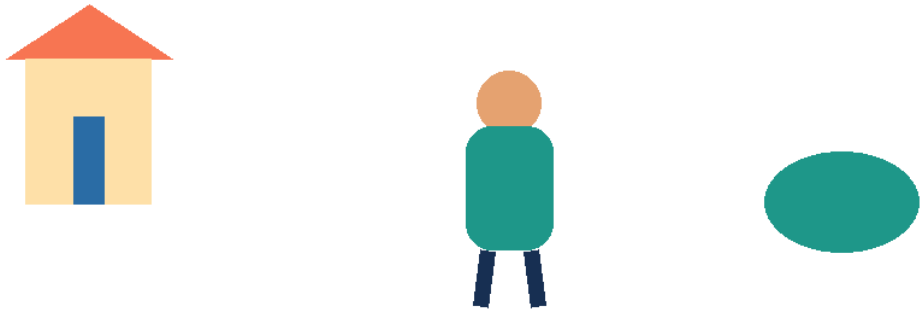

Challenge: 1. The events described in the story • 2. Check the shared source together • 3. Respect their privacy • 4. Ask for their meanings • 5. Wait until the visitor finishes • 6. To show their understanding • 7. Birth town • 8. Thank you for sharing • 9. Use careful, respectful words • 10. Ask family members to check records

Hands-on check: Ask a trusted adult about your own birth month or town if comfortable; share only information you wish to share. Listen to a teacher-selected story.

# Good Citizens Every Day

Learning goal: Identify responsibilities at home, in school and in the community.

EXPLORE • OUR NATION GHANA

CARE HELP BE FAIR

## Discover and understand

- Responsible citizens respect people and fair rules.
- Caring for school property and public places helps everyone.
- Honesty and kindness make communities stronger.

## Try it in the real world

Role-play returning a found item and choosing a safe way to keep the classroom clean.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 15 — Activity Time

## PLAY • Five guided questions

1. What should pupils do with school rules?
2. How can learners care for their classroom?
3. Which word describes telling the truth?
4. What is a polite way to greet an elder?
5. What should we do with a borrowed library book?

## CHALLENGE • Ten new situations

1. A child finds a classmate's pencil case. What is responsible?
2. A pupil spills water in a corridor. What should they do?
3. Someone scratches a classroom desk. What value is missing?
4. During a queue, a learner wants to push ahead. What is fair?
5. A group plans to plant trees at school. What citizenship value do they show?
6. A child makes a mistake and wants to blame a friend. What is better?
7. Your friend has difficulty hearing instructions. What can help?
8. A playground rule is confusing. What should pupils do?
9. A neighbour has a different language. How can a child be welcoming?
10. Why do citizens protect shared spaces?

## Check your learning

Play: 1. Follow fair rules • 2. Keep it tidy • 3. Honesty • 4. Greet with respect • 5. Return it carefully

Challenge: 1. Give it to the owner or teacher • 2. Tell an adult and help make it safe • 3. Care for shared property • 4. Wait for their turn • 5. Care for the environment • 6. Admit the mistake • 7. Ensure the friend can participate • 8. Ask a teacher to explain it • 9. Use friendly, respectful words • 10. Everyone uses and benefits from them

Hands-on check: Role-play returning a found item and choosing a safe way to keep the classroom clean.

LESSON 16 • OUR NATION GHANA

# Symbols of Ghana

Learning goal: Recognise Ghana's flag, anthem, pledge and coat of arms and discuss respectful treatment.

EXPLORE • OUR NATION GHANA

## Discover and understand

- The Ghana national flag has red, gold and green horizontal stripes and a black star.
- Other national symbols include the national anthem, pledge and coat of arms.
- Symbols represent the nation and should be treated respectfully.

## Try it in the real world

Draw the national flag with colours in the correct order. Identify another Ghanaian symbol using a classroom picture.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 16 — Activity Time

## PLAY • Five guided questions

1. What symbol appears in the centre of Ghana's flag?
2. Which colour is the top stripe of Ghana's flag?
3. Which colour forms the middle stripe?
4. Which colour is the bottom stripe?
5. What song is an official national symbol?

## CHALLENGE • Ten new situations

1. A pupil draws Ghana's flag with green on top. What should be corrected?
2. A school raises the flag during assembly. How should pupils behave?
3. An artist needs a symbol for a Ghana poster. What could they draw?
4. A learner wants to identify Ghana's emblem on a document. What should they look for?
5. Which activity helps pupils understand the flag design?
6. If a flag becomes damaged, what should a school do?
7. A pupil confuses the pledge with the anthem. Which one is sung?
8. What does a national symbol stand for?
9. A child sees a black star on red, gold and green. Which country's flag is that?
10. How can a class care for national symbols in a display?

## Check your learning

Play: 1. A black star • 2. Red • 3. Gold • 4. Green • 5. The national anthem

Challenge: 1. Put red at the top • 2. Follow the school's respectful ceremony • 3. The national flag • 4. The coat of arms • 5. Colour its stripes in order • 6. Ask responsible adults to replace it respectfully • 7. The anthem • 8. The nation and its identity • 9. Ghana • 10. Keep them clean and undamaged

Hands-on check: Draw the national flag with colours in the correct order. Identify another Ghanaian symbol using a classroom picture.

LESSON 17 • OUR NATION GHANA

# People Who Lead and Help

Learning goal: Identify roles of trusted leaders at home, school, in communities and in Ghana.

EXPLORE • OUR NATION GHANA

## Discover and understand

- Adults and elected or recognised leaders have different responsibilities.
- Teachers and headteachers guide learning and school safety.
- Community leaders and public officials serve different local and national roles.

## Try it in the real world

Create a four-part chart: home, school, community, nation. Draw one helping or leadership role in each.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 17 — Activity Time

## PLAY • Five guided questions

1. Who usually leads the day-to-day work of a school?
2. Who teaches a class lesson?
3. Which elected person represents a constituency in Parliament?
4. Who helps make decisions in a district assembly?
5. Which office leads Ghana's national executive?

## CHALLENGE • Ten new situations

1. A pupil loses a school notebook. Who is a first trusted helper?
2. A community path is damaged. Which local representative might help raise the issue?
3. During a school emergency, whose instructions should pupils follow?
4. A village meeting is guided by a traditional leader. Who could that be?
5. A learner thinks all leaders work in the same place. What is true?
6. What should children do if an adult's instruction is unsafe?
7. Why might a school have class prefects?
8. A family is planning household chores. What is helpful?
9. A learner wants to know who represents Ghana abroad officially. What should they ask?
10. How should leaders treat people who seek help?

## Check your learning

Play: 1. The headteacher • 2. A class teacher • 3. A Member of Parliament • 4. An assembly member • 5. The President

Challenge: 1. A class teacher • 2. An assembly member • 3. Responsible school staff • 4. A chief or queen mother • 5. Roles differ by place and duty • 6. Seek help from another trusted adult • 7. To help organise class duties • 8. Share duties fairly • 9. Which national official has that role? • 10. Fairly and respectfully

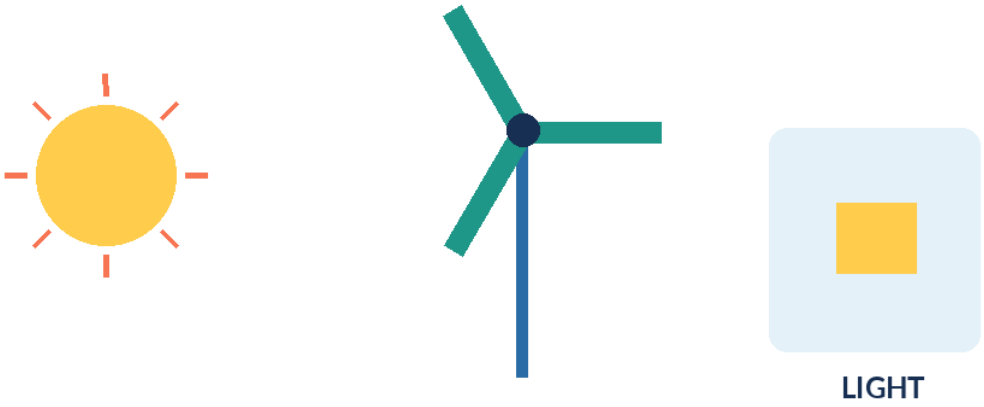

Hands-on check: Create a four-part chart: home, school, community, nation. Draw one helping or leadership role in each.

LESSON 18 • OUR NATION GHANA

# Energy Around Us

Learning goal: Recognise common energy sources and their uses while practising safety and conservation.

EXPLORE • OUR NATION GHANA

## Discover and understand

- Sunlight and wind are natural energy sources.
- Homes may use electricity, firewood, charcoal or gas for tasks.
- Young children should not handle flames, fuel or electrical sockets.

## Try it in the real world

Make a picture chart linking sunlight to drying clothes and electricity to lighting; ask an adult about energy-saving habits.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 18 — Activity Time

## PLAY • Five guided questions

1. What natural source gives us daylight?
2. Which moving air can turn a windmill?
3. What source can light a bulb in many homes?
4. What should young learners avoid touching?
5. Which action saves electricity?

## CHALLENGE • Ten new situations

1. Clothes dry outside on a sunny day. What helps them dry?
2. A cook uses a gas stove. Who should handle it?
3. A room is empty but its lights are on. What is sensible?
4. A lamp glows when connected safely. What is supplying energy?
5. A pupil sees smoke near a charcoal stove. What should they do?
6. A class compares the Sun and a torch. What do both provide?
7. A farmer dries maize in sunshine. What energy source is used?
8. Why should a school not waste energy?
9. A child wants to test a wall socket with metal. What is the safe response?
10. Which home task might use a small battery?

## Check your learning

Play: 1. The Sun • 2. Wind • 3. Electricity • 4. Live electrical sockets • 5. Switching off unused lights

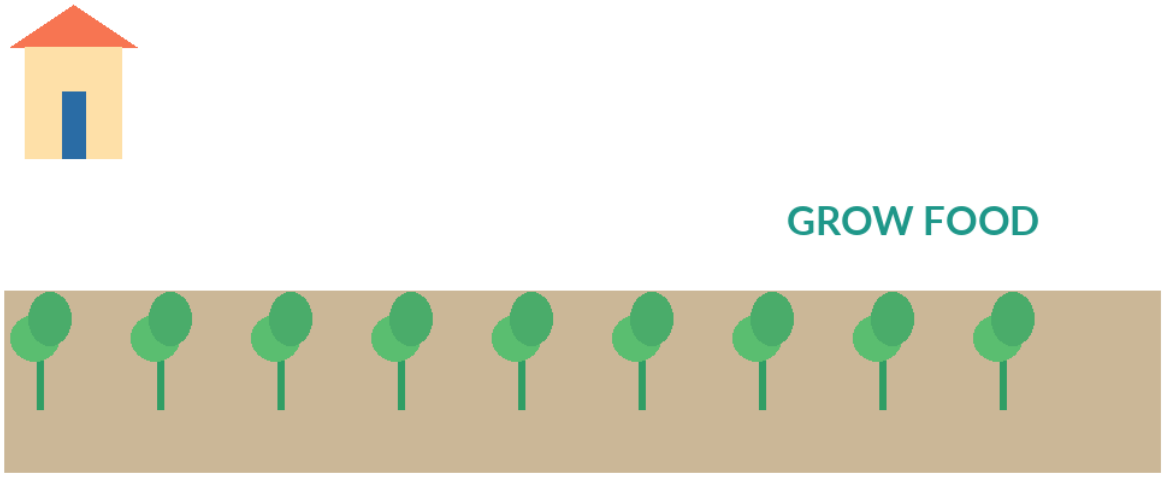

Challenge: 1. Sunshine • 2. A responsible adult • 3. Ask an adult to turn them off • 4. Electricity • 5. Keep away and alert an adult • 6. Light • 7. Solar energy • 8. Resources should be used wisely • 9. Never insert objects into sockets • 10. Powering a flashlight

Hands-on check: Make a picture chart linking sunlight to drying clothes and electricity to lighting; ask an adult about energy-saving habits.

# Farms Feed Communities

Learning goal: Describe crop growing and animal rearing in Ghanaian communities.

## EXPLORE • OUR NATION GHANA

### Discover and understand

- Farmers grow crops such as maize, vegetables and cassava.
- Some farmers rear poultry, goats, sheep or cattle.
- Food production needs care for soil, plants, animals and people.

### Try it in the real world

Draw two scenes: a farmer watering vegetables and a farmer feeding animals. Label what each is doing.

### Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 19 — Activity Time

## PLAY • Five guided questions

1. Which activity is crop farming?
2. Which activity is animal rearing?
3. Which food is a farm crop?
4. What do young plants often need?
5. Which animal may be raised for eggs?

## CHALLENGE • Ten new situations

1. A farmer places maize seeds in soil. What activity is this?
2. A child sees someone collecting ripe tomatoes. What is happening?
3. A goat farmer fills the water trough. What need is being met?
4. A farmer wants healthy vegetables. What helps?
5. A group plans a school container garden. What should they plant?
6. The dry season makes crops wilt. What could help?
7. A family buys eggs from a farm. Which farm activity produced them?
8. A class visits a farm. How should pupils act around machinery?
9. What could farmers sell at a local market?
10. Why is farming important to communities?

## Check your learning

Play: 1. Growing maize • 2. Keeping goats • 3. Cassava • 4. Water • 5. A hen

Challenge: 1. Planting crops • 2. Harvesting • 3. Drinking water for animals • 4. Good soil and proper care • 5. Suitable safe vegetable seeds • 6. Careful watering • 7. Poultry keeping • 8. Stay with the adult guide • 9. Fresh produce • 10. It helps supply food

Hands-on check: Draw two scenes: a farmer watering vegetables and a farmer feeding animals. Label what each is doing.

# Tools Farmers Use

Learning goal: Identify common agricultural tools and choose safe uses for each.

EXPLORE • OUR NATION GHANA

WATER RAKE TROWEL

## Discover and understand

- A watering can helps give plants water.
- A rake can gather loose leaves and smooth soil; a trowel helps with small digging.
- Sharp tools such as cutlasses and axes are for trained adults.

## Try it in the real world

Match pictures of a watering can, rake, hoe and hand trowel to uses. Use only child-safe tools under adult guidance.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 20 — Activity Time

## PLAY • Five guided questions

1. Which tool pours water gently on seedlings?
2. Which tool gathers fallen leaves?
3. Which tool helps dig small holes in soil?
4. Which tool is commonly used to loosen soil?
5. Who should handle a sharp cutlass?

## CHALLENGE • Ten new situations

1. A child wants to water a small garden without damaging seedlings. What helps?
2. Dry leaves cover a garden path. Which tool could an adult use?
3. A young gardener needs a small planting hole. What tool is suitable with supervision?
4. Someone leaves a sharp tool on a walkway. What should a child do?
5. A class is drawing farming tools. Which should be labelled as sharp?
6. Why is it unsafe to swing a hoe near classmates?
7. Which tool should be stored securely after use?
8. What should learners do before using any classroom garden tool?
9. A vegetable bed needs gentle watering. Which tool gives controlled water?
10. A farmer smooths loose topsoil with a long-toothed tool. What is it?

## Check your learning

Play: 1. Watering can • 2. Rake • 3. Hand trowel • 4. Hoe • 5. A trained adult

Challenge: 1. A watering can • 2. A rake • 3. A hand trowel • 4. Keep away and inform an adult • 5. A cutlass • 6. Someone may get hurt • 7. An axe • 8. Listen to safety instructions • 9. A watering can with a spout • 10. A rake

Hands-on check: Match pictures of a watering can, rake, hoe and hand trowel to uses. Use only child-safe tools under adult guidance.

# Ghana and Her Neighbours

Learning goal: Name Ghana's land neighbours and the Atlantic Ocean to the south.

## EXPLORE • MY GLOBAL COMMUNITY

### Discover and understand

- Côte d'Ivoire is west of Ghana.
- Togo is east of Ghana.
- Burkina Faso is north of Ghana; the Atlantic Ocean is along Ghana's southern coast.

### Try it in the real world

Label Ghana, Côte d'Ivoire, Togo, Burkina Faso and the Atlantic Ocean on a simplified map.

### Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 21 — Activity Time

## PLAY • Five guided questions

1. Which country lies west of Ghana?
2. Which country lies east of Ghana?
3. Which country lies north of Ghana?
4. What large body of water lies south of Ghana?
5. How many countries share a land border with Ghana?

## CHALLENGE • Ten new situations

1. A class map puts Togo on the left of north-up Ghana. What should be fixed?
2. A bus travels west from Ghana into a neighbour. Which country is it entering?
3. A teacher asks for Ghana's northern land neighbour. What should pupils name?
4. Pupils point toward the coast from southern Ghana. What body of water are they approaching?
5. Why is the sea not counted as a neighbouring country?
6. A sketch has Ghana in the centre. Where should Togo be drawn?
7. Someone labels the north side of Ghana as Togo. Which label belongs there?
8. Which coastal direction is opposite north?
9. A learner needs to show all three land borders. What should they write?
10. How can children practise the positions of neighbours?

## Check your learning

Play: 1. Côte d'Ivoire • 2. Togo • 3. Burkina Faso • 4. Atlantic Ocean • 5. Three

Challenge: 1. Move Togo to the east • 2. Côte d'Ivoire • 3. Burkina Faso • 4. The Atlantic Ocean • 5. It is water, not a country • 6. To the right • 7. Burkina Faso • 8. South • 9. Togo, Côte d'Ivoire and Burkina Faso • 10. Make a labelled map with arrows

Hands-on check: Label Ghana, Côte d'Ivoire, Togo, Burkina Faso and the Atlantic Ocean on a simplified map.

LESSON 22 • MY GLOBAL COMMUNITY

# Meet the Computer

Learning goal: Identify basic computer parts and describe how they work together.

EXPLORE • MY GLOBAL COMMUNITY

## Discover and understand

• A monitor shows information.

• A keyboard helps enter letters and numbers; a mouse helps point and select.

• The system unit processes data, and cables connect some parts; pupils should not rearrange powered cables without a teacher.

## Try it in the real world

Label a picture of a monitor, keyboard, mouse and system unit. Practise pointing with a disconnected or teacher-supervised mouse.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 22 — Activity Time

## PLAY • Five guided questions

1. Which computer part shows pictures and words?
2. Which part has letter keys?
3. Which part helps move a pointer?
4. Which part contains important processing components?
5. Who should supervise connecting computer cables?

## CHALLENGE • Ten new situations

1. A pupil wants to type their name. Which device should they use?
2. A cursor must move to an icon. Which tool could help?
3. A class watches a drawing appear on a screen. What part displays it?
4. A keyboard key has the letter A on it. What happens when typed in a text box?
5. A child pulls a cable out of a running computer. What is safer?
6. A monitor is switched off. Can it display the computer image?
7. Two pupils compare a mouse and keyboard. What is a difference?
8. Why should computers be handled with clean hands?
9. A device uses a touchscreen instead of a mouse. What still happens?
10. Which group lists only common computer parts?

## Check your learning

Play: 1. Monitor • 2. Keyboard • 3. Mouse • 4. System unit • 5. A teacher or trained adult

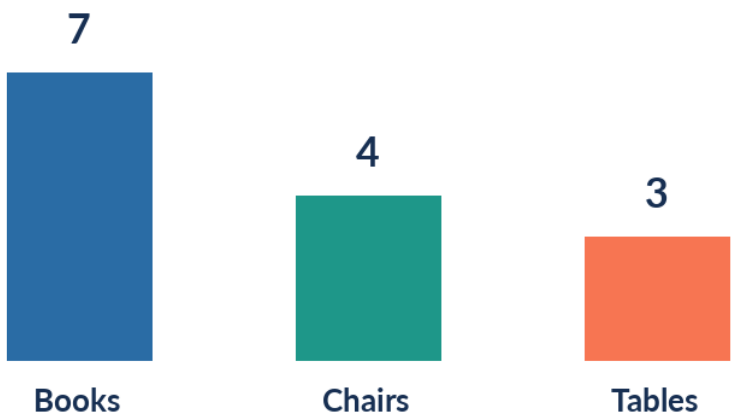

Challenge: 1. The keyboard • 2. The mouse • 3. The monitor • 4. The letter A can appear • 5. Ask the teacher before touching cables • 6. Not while turned off • 7. One points; one enters keys • 8. To keep equipment safe and usable • 9. A learner can select items • 10. Monitor, keyboard, mouse and system unit

Hands-on check: Label a picture of a monitor, keyboard, mouse and system unit. Practise pointing with a disconnected or teacher-supervised mouse.

# Collect and Count Information

Learning goal: Collect simple classroom data and organise observations into a table or tally.

EXPLORE • MY GLOBAL COMMUNITY

## Discover and understand

- Data are recorded pieces of information, such as counts.
- We can count chairs, books and tables, then use a tally or table.
- A clear heading tells readers what was counted.

## Try it in the real world

Count classroom books and chairs with a teacher. Record totals in two rows of a data table and draw a bar for each.

## Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 23 — Activity Time

## PLAY • Five guided questions

1. What is a count of classroom chairs?
2. Which mark is useful when counting items?
3. What belongs at the top of a data table?
4. What should a table row identify?
5. Which task collects numerical information?

## CHALLENGE • Ten new situations

1. A class counts nine desks. What number should be written?
2. Three groups count pencils. How can results be compared?
3. A pupil counts a chair twice. What should they do?
4. A drawing has five bars for five books. What does one bar show?
5. Someone records table legs instead of tables by mistake. What will help?
6. Why might children count chairs before an event?
7. The tally for books is longer than for rulers. What might this mean?
8. A teacher asks for a data source inside the classroom. What is suitable?
9. A table has no total. What could a pupil add?
10. What helps another pupil understand a chart?

## Check your learning

Play: 1. Data • 2. A tally • 3. A clear heading • 4. What was counted • 5. Counting books

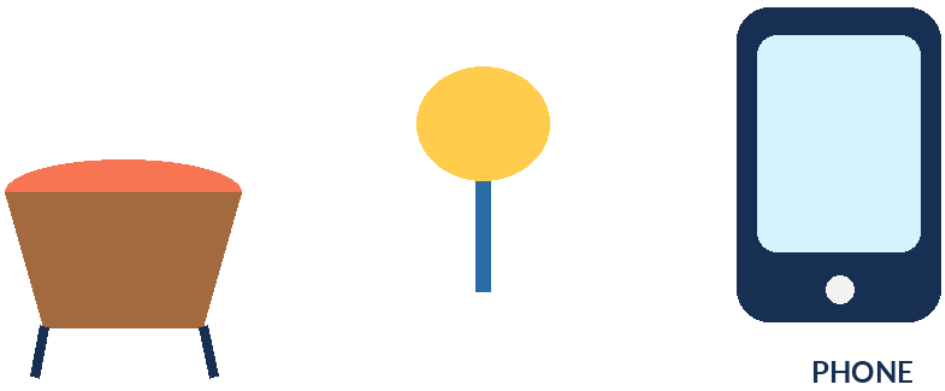

Challenge: 1. 9 • 2. Put the totals in one table • 3. Check and correct the tally • 4. One book • 5. State the counting rule clearly • 6. To know how many seats are available • 7. More books were counted • 8. Observing and counting objects • 9. The final count • 10. Labels for each group

Hands-on check: Count classroom books and chairs with a teacher. Record totals in two rows of a data table and draw a bar for each.

# Ways We Send Messages

Learning goal: Identify communication tools used in Ghanaian communities and choose safe ways to share information.

## EXPLORE • MY GLOBAL COMMUNITY

### Discover and understand

- A bell, drum and gong-gong can signal or gather people.
- Phones and community information centres can share messages over distances.
- We should send clear messages and keep personal information private.

### Try it in the real world

Draw two communication tools—one traditional and one modern. Role-play asking an adult to share a safe community notice.

### Talk and reflect

Tell a partner what you noticed. Give one example from your school, family or community. If the activity needs tools, travel or online sharing, ask a trusted adult first.

# Lesson 24 — Activity Time

## PLAY • Five guided questions

1. Which tool can ring to signal an assembly?
2. Which traditional instrument can give a community signal?
3. Which device can carry a voice call?
4. Where might a public notice be announced?
5. What should a good message be?

## CHALLENGE • Ten new situations

1. A school uses a bell before lessons. What does it communicate?
2. A village uses a drum signal for an event. What does the drum help do?
3. A family member lives far away. What could help them talk?
4. A stranger asks for your phone password. What should you do?
5. Two friends want to announce a clean-up safely. What might they prepare?
6. A community message is too quiet to hear. What might organisers adjust?
7. Why might a market use a mobile announcement van?
8. A learner sends a confusing message. What could they improve?
9. Which communication tool does not need electricity to sound?
10. A pupil wants to use a neighbour's phone. What must happen first?

## Check your learning

Play: 1. A bell • 2. A gong-gong • 3. A telephone • 4. A community information centre • 5. Clear and respectful

Challenge: 1. Time to gather or change activity • 2. Alert community members • 3. A phone call • 4. Keep it private and tell an adult • 5. A short clear notice • 6. Make the announcement audible • 7. To reach many people nearby • 8. Add the important details • 9. A hand-held bell • 10. Ask permission from the owner

Hands-on check: Draw two communication tools—one traditional and one modern. Role-play asking an adult to share a safe community notice.
