COMPUTING

Basic 3 — Illustrated Learning Workbook

Learn • Explore • Practise • Play • Challenge

15 lessons | 75 Play questions | 150 Challenge questions

Basic 1–3: supplementary digital literacy progression, not an official NaCCA Computing syllabus.

Course guide and lesson list

Start with the picture and five important ideas. Read the Ghanaian example, complete the practice activity and answer the quizzes. An adult should supervise device use and online activities.

01. Input, Output and Storage — Computing Systems

02. Typing Accurately — Computing Systems

03. Working With Desktop Icons — Computer Applications

04. Organising Files and Folders — Computer Applications

05. Recording Survey Results — Data and Information

06. Using Tables and Charts — Data and Information

07. Finding Totals and Averages — Data and Information

08. Creating a Neat Document — Word Processing

09. Designing Two Clear Slides — Presentation

10. Researching Carefully Online — Internet and Communication

11. Understanding Email — Internet and Communication

12. Digital Footprints and Good Manners — Digital Citizenship

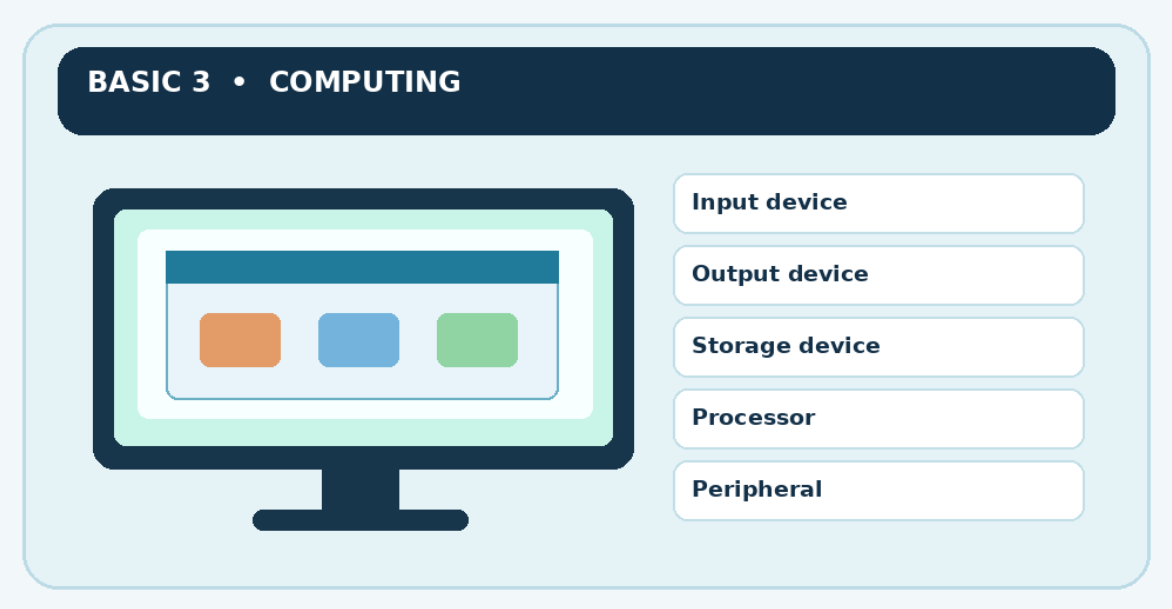

13. Algorithms as Everyday Instructions — Programming and Databases

14. My First Block Program — Programming and Databases

15. Design a Digital Safety Poster — Digital Creation

Lesson 1: Input, Output and Storage

We will learn to: Identify, explain and apply the important ideas behind input, output and storage.

Five important ideas

Input device: sends information into a computer.

Output device: shows or plays results.

Storage device: keeps digital files.

Processor: helps follow computing instructions.

Peripheral: is an extra device connected to a computer.

Our Ghanaian story

During a tour of the computer room, Kojo had a question about input, output and storage. The group discovered that input device sends information into a computer, while output device shows or plays results. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of input device, output device and storage device. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches input, output and storage. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-01

Lesson 1: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that sends information into a computer.

A. Peripheral B. Input device C. Processor D. Output device

2. Your friend says, "This shows or plays results." What is the friend describing?

A. Storage device B. Processor C. Peripheral D. Output device

3. Which idea from input, output and storage matches the clue "keeps digital files"?

A. Peripheral B. Input device C. Output device D. Storage device

4. The teacher asks for an example that helps follow computing instructions. Which answer fits?

A. Input device B. Storage device C. Peripheral D. Processor

5. Can you identify the term described here: is an extra device connected to a computer?

A. Output device B. Storage device C. Input device D. Peripheral

CHALLENGE — Think and apply.

1. A group makes a display on input, output and storage. Their first clue is "shows or plays results". Which label is correct?

A. Storage device B. Processor C. Peripheral D. Output device

2. A classmate confuses several ideas about input, output and storage. Which one actually shows or plays results?

A. Storage device B. Processor C. Peripheral D. Output device

3. At the community learning centre, someone describes a tool or idea that is an extra device connected to a computer. Which one is it?

A. Storage device B. Input device C. Output device D. Peripheral

4. During a school ICT lesson, Yaw wants to show something that sends information into a computer. Which idea should be labelled?

A. Processor B. Peripheral C. Output device D. Input device

5. Imagine helping a younger pupil understand something that keeps digital files. Which term would you teach?

A. Output device B. Peripheral C. Storage device D. Input device

6. Which answer would fit on a poster beside the words "sends information into a computer"?

A. Output device B. Processor C. Input device D. Peripheral

7. Which concept matches the explanation "is an extra device connected to a computer" when you review input, output and storage?

A. Peripheral B. Storage device C. Input device D. Output device

8. At home, Yaw remembers a class rule or concept that helps follow computing instructions. What was it called?

A. Processor B. Peripheral C. Storage device D. Input device

9. Your class is solving a practical problem. One useful thing helps follow computing instructions. What is its name?

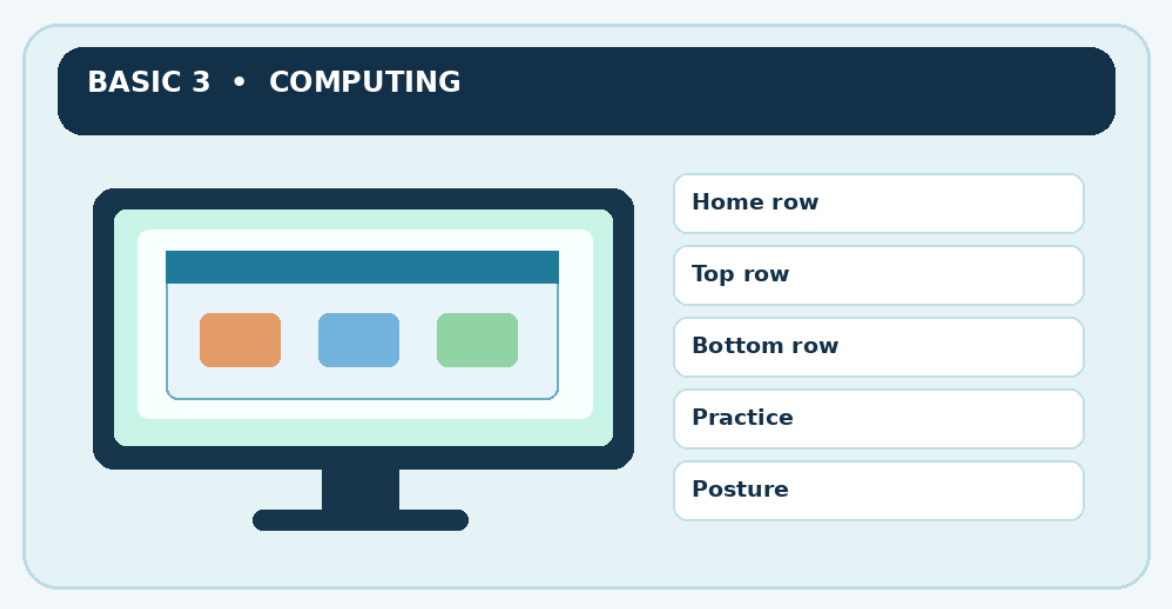

A. Storage device B. Input device C. Peripheral D. Processor

10. For a short demonstration, the teacher needs an example that keeps digital files. Which choice would you select?

A. Peripheral B. Input device C. Output device D. Storage device

Lesson 2: Typing Accurately

We will learn to: Identify, explain and apply the important ideas behind typing accurately.

Five important ideas

Home row: is the resting row for touch typing.

Top row: contains letters Q through P.

Bottom row: contains letters Z through M.

Practice: helps develop accuracy before speed.

Posture: keeps shoulders relaxed while typing.

Our Ghanaian story

At an ICT typing competition, Esi had a question about typing accurately. The group discovered that home row is the resting row for touch typing, while top row contains letters Q through P. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise home row and top row using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches typing accurately. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-02

Lesson 2: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that is the resting row for touch typing.

A. Top row B. Bottom row C. Home row D. Posture

2. Your friend says, "This contains letters Q through P." What is the friend describing?

A. Practice B. Bottom row C. Top row D. Home row

3. Which idea from typing accurately matches the clue "contains letters Z through M"?

A. Posture B. Bottom row C. Practice D. Home row

4. The teacher asks for an example that helps develop accuracy before speed. Which answer fits?

A. Practice B. Posture C. Bottom row D. Home row

5. Can you identify the term described here: keeps shoulders relaxed while typing?

A. Practice B. Top row C. Posture D. Bottom row

CHALLENGE — Think and apply.

1. At the community learning centre, someone describes a tool or idea that keeps shoulders relaxed while typing. Which one is it?

A. Practice B. Top row C. Bottom row D. Posture

2. Which answer would fit on a poster beside the words "is the resting row for touch typing"?

A. Posture B. Home row C. Top row D. Bottom row

3. Which concept matches the explanation "keeps shoulders relaxed while typing" when you review typing accurately?

A. Posture B. Practice C. Top row D. Bottom row

4. A classmate confuses several ideas about typing accurately. Which one actually contains letters Q through P?

A. Home row B. Top row C. Bottom row D. Practice

5. For a short demonstration, the teacher needs an example that contains letters Z through M. Which choice would you select?

A. Practice B. Bottom row C. Posture D. Home row

6. Imagine helping a younger pupil understand something that contains letters Z through M. Which term would you teach?

A. Home row B. Practice C. Posture D. Bottom row

7. During a school ICT lesson, Kofi wants to show something that is the resting row for touch typing. Which idea should be labelled?

A. Home row B. Top row C. Bottom row D. Posture

8. At home, Kofi remembers a class rule or concept that helps develop accuracy before speed. What was it called?

A. Home row B. Posture C. Bottom row D. Practice

9. A group makes a display on typing accurately. Their first clue is "contains letters Q through P". Which label is correct?

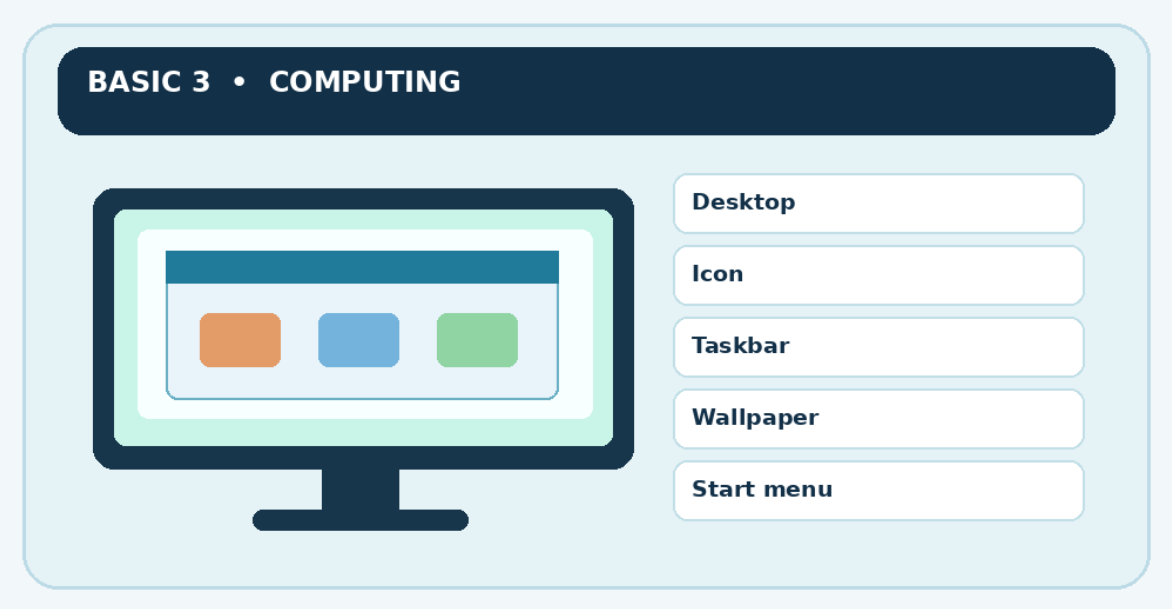

A. Home row B. Top row C. Bottom row D. Practice

10. Your class is solving a practical problem. One useful thing helps develop accuracy before speed. What is its name?

A. Home row B. Posture C. Practice D. Bottom row

Lesson 3: Working With Desktop Icons

We will learn to: Identify, explain and apply the important ideas behind working with desktop icons.

Five important ideas

Desktop: is a main computer work area.

Icon: is a small picture representing an item.

Taskbar: helps find open apps and tools.

Wallpaper: is the desktop background picture.

Start menu: offers a way to open programs.

Our Ghanaian story

When the computer starts, Yaw had a question about working with desktop icons. The group discovered that desktop is a main computer work area, while icon is a small picture representing an item. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise desktop and icon using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches working with desktop icons. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-03

Lesson 3: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that is a main computer work area.

A. Desktop B. Icon C. Wallpaper D. Start menu

2. Your friend says, "This is a small picture representing an item." What is the friend describing?

A. Desktop B. Icon C. Start menu D. Wallpaper

3. Which idea from working with desktop icons matches the clue "helps find open apps and tools"?

A. Desktop B. Icon C. Taskbar D. Wallpaper

4. The teacher asks for an example that is the desktop background picture. Which answer fits?

A. Start menu B. Desktop C. Taskbar D. Wallpaper

5. Can you identify the term described here: offers a way to open programs?

A. Desktop B. Start menu C. Icon D. Wallpaper

CHALLENGE — Think and apply.

1. A classmate confuses several ideas about working with desktop icons. Which one actually is a small picture representing an item?

A. Icon B. Wallpaper C. Start menu D. Desktop

2. During a school ICT lesson, Akosua wants to show something that is a main computer work area. Which idea should be labelled?

A. Start menu B. Desktop C. Icon D. Wallpaper

3. At home, Akosua remembers a class rule or concept that is the desktop background picture. What was it called?

A. Wallpaper B. Desktop C. Taskbar D. Start menu

4. Which concept matches the explanation "offers a way to open programs" when you review working with desktop icons?

A. Wallpaper B. Start menu C. Desktop D. Icon

5. A group makes a display on working with desktop icons. Their first clue is "is a small picture representing an item". Which label is correct?

A. Icon B. Start menu C. Desktop D. Wallpaper

6. At the community learning centre, someone describes a tool or idea that offers a way to open programs. Which one is it?

A. Start menu B. Desktop C. Icon D. Wallpaper

7. For a short demonstration, the teacher needs an example that helps find open apps and tools. Which choice would you select?

A. Wallpaper B. Desktop C. Icon D. Taskbar

8. Which answer would fit on a poster beside the words "is a main computer work area"?

A. Desktop B. Icon C. Wallpaper D. Start menu

9. Imagine helping a younger pupil understand something that helps find open apps and tools. Which term would you teach?

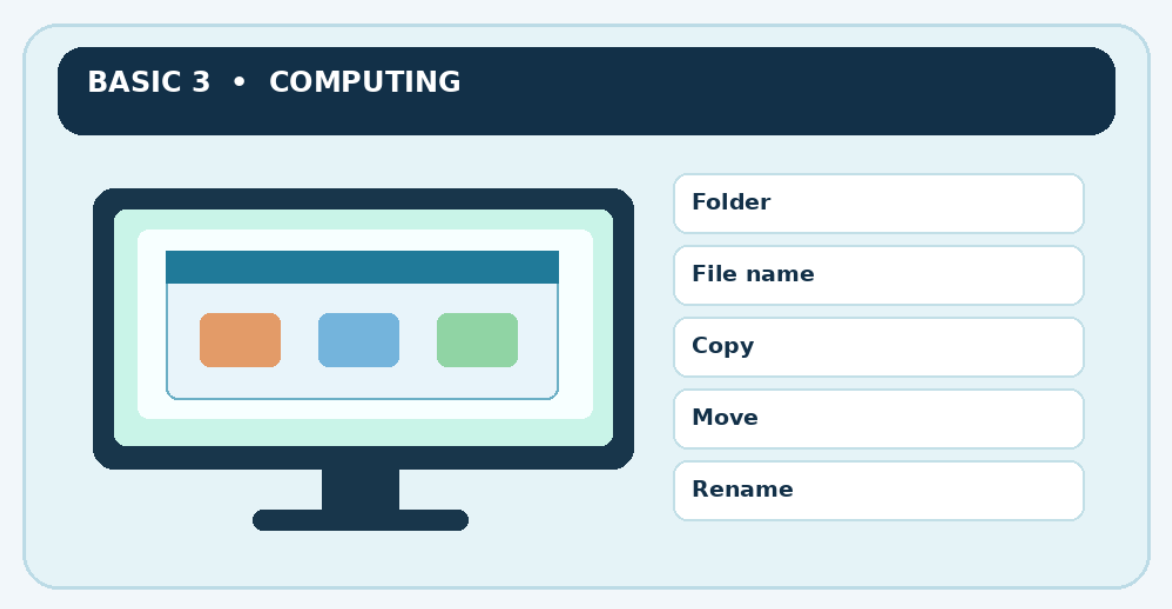

A. Taskbar B. Desktop C. Wallpaper D. Icon

10. Your class is solving a practical problem. One useful thing is the desktop background picture. What is its name?

A. Desktop B. Taskbar C. Wallpaper D. Start menu

Lesson 4: Organising Files and Folders

We will learn to: Identify, explain and apply the important ideas behind organising files and folders.

Five important ideas

Folder: organises related digital files.

File name: helps identify a saved item.

Copy: makes a second version of an item.

Move: changes where an item is stored.

Rename: changes the label without changing the file content.

Our Ghanaian story

While organising class projects, Abena had a question about organising files and folders. The group discovered that folder organises related digital files, while file name helps identify a saved item. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise folder and file name using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches organising files and folders. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-04

Lesson 4: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that organises related digital files.

A. Move B. Folder C. Copy D. Rename

2. Your friend says, "This helps identify a saved item." What is the friend describing?

A. Move B. File name C. Copy D. Folder

3. Which idea from organising files and folders matches the clue "makes a second version of an item"?

A. Rename B. File name C. Copy D. Move

4. The teacher asks for an example that changes where an item is stored. Which answer fits?

A. Folder B. File name C. Move D. Copy

5. Can you identify the term described here: changes the label without changing the file content?

A. Folder B. Move C. Copy D. Rename

CHALLENGE — Think and apply.

1. A classmate confuses several ideas about organising files and folders. Which one actually helps identify a saved item?

A. Copy B. Folder C. File name D. Move

2. For a short demonstration, the teacher needs an example that makes a second version of an item. Which choice would you select?

A. Move B. File name C. Copy D. Rename

3. Which answer would fit on a poster beside the words "organises related digital files"?

A. Copy B. Folder C. Move D. Rename

4. Which concept matches the explanation "changes the label without changing the file content" when you review organising files and folders?

A. Move B. Copy C. Rename D. Folder

5. During a school ICT lesson, Esi wants to show something that organises related digital files. Which idea should be labelled?

A. Move B. Copy C. Rename D. Folder

6. At home, Esi remembers a class rule or concept that changes where an item is stored. What was it called?

A. File name B. Move C. Copy D. Folder

7. Your class is solving a practical problem. One useful thing changes where an item is stored. What is its name?

A. File name B. Copy C. Folder D. Move

8. Imagine helping a younger pupil understand something that makes a second version of an item. Which term would you teach?

A. Move B. File name C. Rename D. Copy

9. A group makes a display on organising files and folders. Their first clue is "helps identify a saved item". Which label is correct?

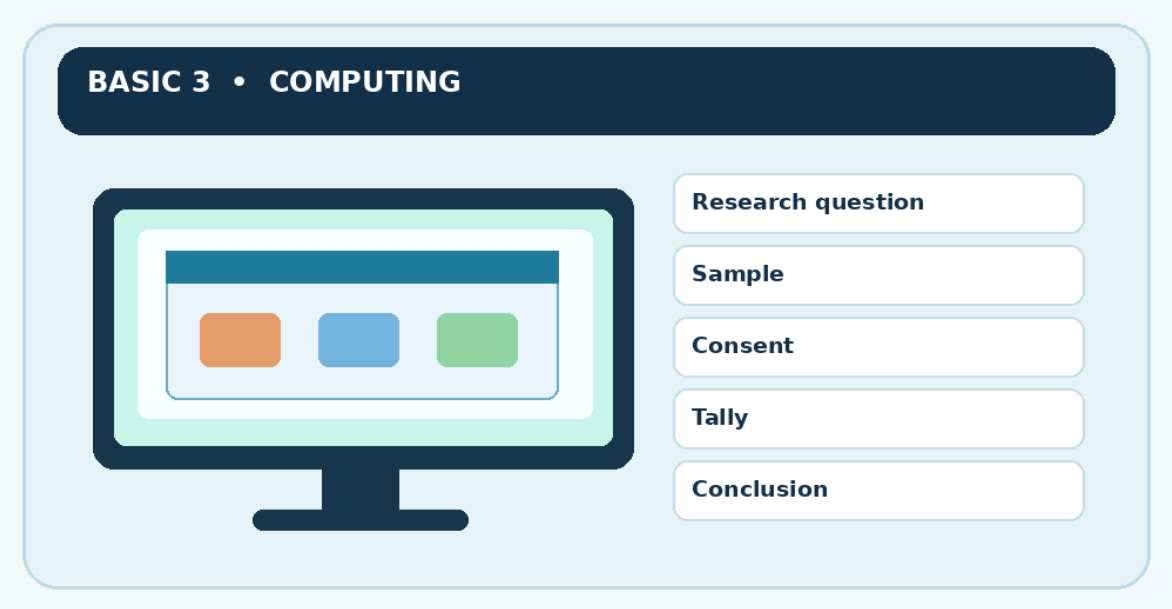

A. File name B. Move C. Copy D. Folder

10. At the community learning centre, someone describes a tool or idea that changes the label without changing the file content. Which one is it?

A. Rename B. Folder C. Move D. Copy

Lesson 5: Recording Survey Results

We will learn to: Identify, explain and apply the important ideas behind recording survey results.

Five important ideas

Research question: states what we want to discover.

Sample: is a smaller selected group.

Consent: means someone agrees to participate.

Tally: records counts using marks.

Conclusion: explains what the collected results suggest.

Our Ghanaian story

When interviewing classmates about favourite fruits, Kofi had a question about recording survey results. The group discovered that research question states what we want to discover, while sample is a smaller selected group. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Research question, Sample and Consent; explain what each means.

Create and share

Make a colourful, labelled poster that teaches recording survey results. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-05

Lesson 5: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that states what we want to discover.

A. Research question B. Conclusion C. Sample D. Consent

2. Your friend says, "This is a smaller selected group." What is the friend describing?

A. Consent B. Research question C. Sample D. Tally

3. Which idea from recording survey results matches the clue "means someone agrees to participate"?

A. Tally B. Consent C. Research question D. Conclusion

4. The teacher asks for an example that records counts using marks. Which answer fits?

A. Sample B. Consent C. Research question D. Tally

5. Can you identify the term described here: explains what the collected results suggest?

A. Sample B. Tally C. Consent D. Conclusion

CHALLENGE — Think and apply.

1. Your class is solving a practical problem. One useful thing records counts using marks. What is its name?

A. Sample B. Consent C. Research question D. Tally

2. At home, Ama remembers a class rule or concept that records counts using marks. What was it called?

A. Research question B. Sample C. Consent D. Tally

3. Imagine helping a younger pupil understand something that means someone agrees to participate. Which term would you teach?

A. Research question B. Tally C. Conclusion D. Consent

4. During a school ICT lesson, Ama wants to show something that states what we want to discover. Which idea should be labelled?

A. Sample B. Research question C. Conclusion D. Consent

5. For a short demonstration, the teacher needs an example that means someone agrees to participate. Which choice would you select?

A. Research question B. Conclusion C. Tally D. Consent

6. A group makes a display on recording survey results. Their first clue is "is a smaller selected group". Which label is correct?

A. Consent B. Sample C. Tally D. Research question

7. Which concept matches the explanation "explains what the collected results suggest" when you review recording survey results?

A. Tally B. Sample C. Conclusion D. Consent

8. A classmate confuses several ideas about recording survey results. Which one actually is a smaller selected group?

A. Research question B. Sample C. Tally D. Consent

9. Which answer would fit on a poster beside the words "states what we want to discover"?

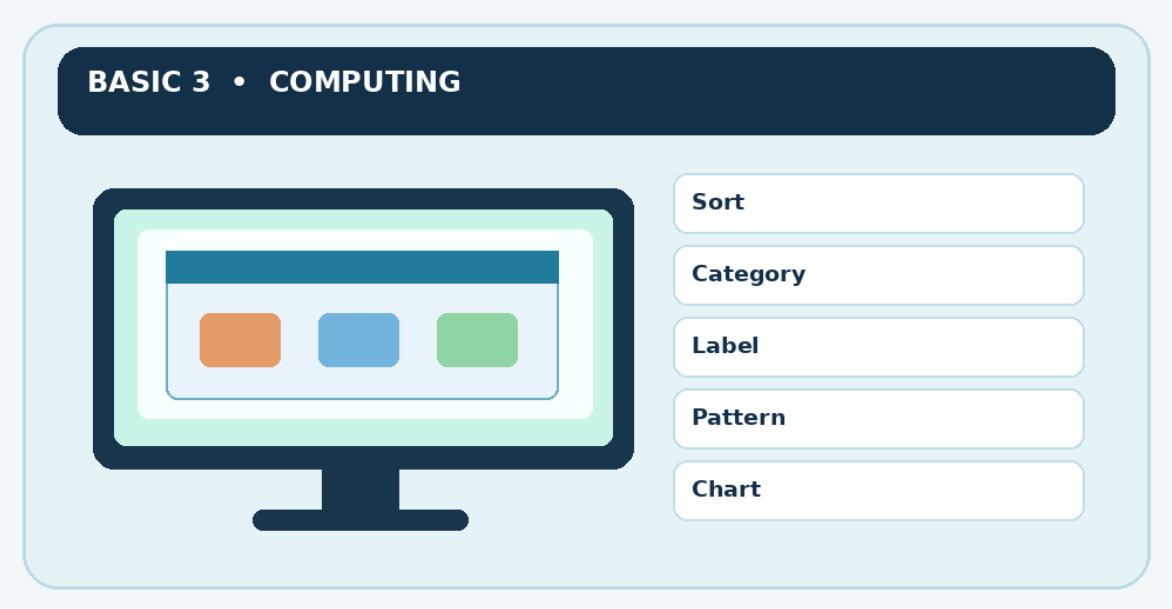

A. Conclusion B. Consent C. Sample D. Research question

10. At the community learning centre, someone describes a tool or idea that explains what the collected results suggest. Which one is it?

A. Sample B. Tally C. Conclusion D. Consent

Lesson 6: Using Tables and Charts

We will learn to: Identify, explain and apply the important ideas behind using tables and charts.

Five important ideas

Sort: arranges data into an order.

Category: groups items sharing a feature.

Label: gives a clear name to a group.

Pattern: is a regular feature seen in data.

Chart: shows data visually.

Our Ghanaian story

When sorting market-day information, Ama had a question about using tables and charts. The group discovered that sort arranges data into an order, while category groups items sharing a feature. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Sort, Category and Label; explain what each means.

Create and share

Make a colourful, labelled poster that teaches using tables and charts. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-06

Lesson 6: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that arranges data into an order.

A. Chart B. Sort C. Pattern D. Label

2. Your friend says, "This groups items sharing a feature." What is the friend describing?

A. Sort B. Chart C. Category D. Label

3. Which idea from using tables and charts matches the clue "gives a clear name to a group"?

A. Sort B. Category C. Chart D. Label

4. The teacher asks for an example that is a regular feature seen in data. Which answer fits?

A. Chart B. Pattern C. Category D. Label

5. Can you identify the term described here: shows data visually?

A. Pattern B. Chart C. Sort D. Label

CHALLENGE — Think and apply.

1. A classmate confuses several ideas about using tables and charts. Which one actually groups items sharing a feature?

A. Category B. Label C. Sort D. Chart

2. Which concept matches the explanation "shows data visually" when you review using tables and charts?

A. Chart B. Pattern C. Sort D. Label

3. Your class is solving a practical problem. One useful thing is a regular feature seen in data. What is its name?

A. Category B. Chart C. Label D. Pattern

4. Imagine helping a younger pupil understand something that gives a clear name to a group. Which term would you teach?

A. Category B. Sort C. Label D. Chart

5. For a short demonstration, the teacher needs an example that gives a clear name to a group. Which choice would you select?

A. Chart B. Label C. Sort D. Category

6. Which answer would fit on a poster beside the words "arranges data into an order"?

A. Chart B. Pattern C. Label D. Sort

7. At the community learning centre, someone describes a tool or idea that shows data visually. Which one is it?

A. Label B. Sort C. Chart D. Pattern

8. At home, Yaw remembers a class rule or concept that is a regular feature seen in data. What was it called?

A. Category B. Chart C. Label D. Pattern

9. A group makes a display on using tables and charts. Their first clue is "groups items sharing a feature". Which label is correct?

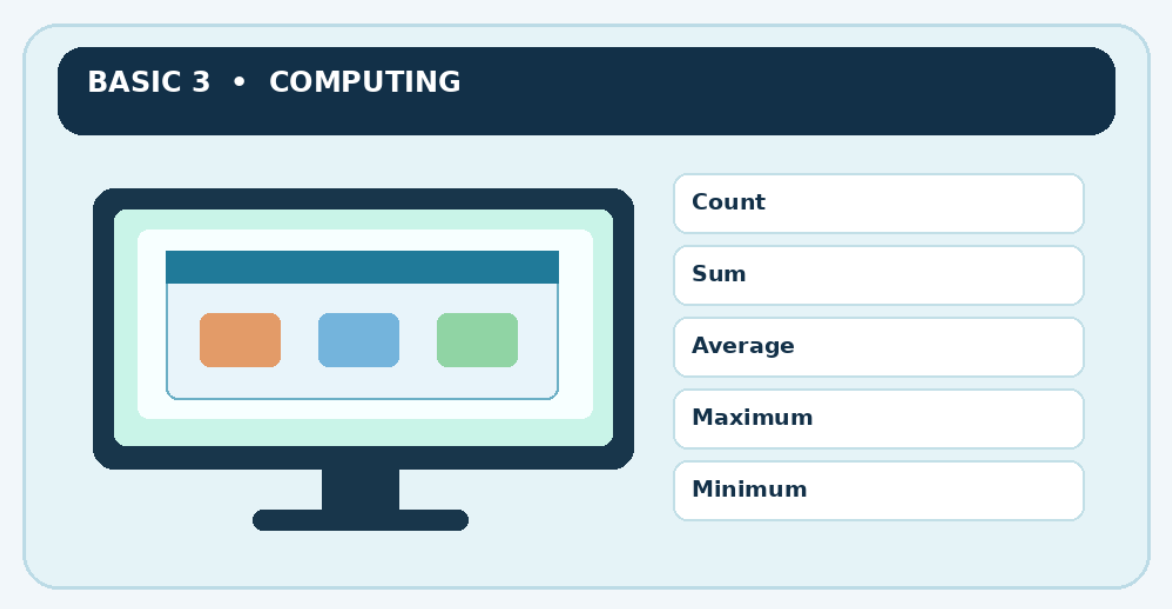

A. Sort B. Label C. Chart D. Category

10. During a school ICT lesson, Yaw wants to show something that arranges data into an order. Which idea should be labelled?

A. Sort B. Pattern C. Label D. Chart

Lesson 7: Finding Totals and Averages

We will learn to: Identify, explain and apply the important ideas behind finding totals and averages.

Five important ideas

Count: tells how many items are present.

Sum: adds numbers together.

Average: shares a total evenly across the number of values.

Maximum: is the largest value.

Minimum: is the smallest value.

Our Ghanaian story

While calculating scores for sports day, Kojo had a question about finding totals and averages. The group discovered that count tells how many items are present, while sum adds numbers together. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Count, Sum and Average; explain what each means.

Create and share

Make a colourful, labelled poster that teaches finding totals and averages. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-07

Lesson 7: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that tells how many items are present.

A. Sum B. Maximum C. Minimum D. Count

2. Your friend says, "This adds numbers together." What is the friend describing?

A. Sum B. Maximum C. Minimum D. Count

3. Which idea from finding totals and averages matches the clue "shares a total evenly across the number of values"?

A. Average B. Count C. Sum D. Maximum

4. The teacher asks for an example that is the largest value. Which answer fits?

A. Maximum B. Average C. Count D. Sum

5. Can you identify the term described here: is the smallest value?

A. Minimum B. Maximum C. Count D. Sum

CHALLENGE — Think and apply.

1. Which concept matches the explanation "is the smallest value" when you review finding totals and averages?

A. Minimum B. Maximum C. Sum D. Count

2. A group makes a display on finding totals and averages. Their first clue is "adds numbers together". Which label is correct?

A. Sum B. Maximum C. Minimum D. Count

3. During a school ICT lesson, Kofi wants to show something that tells how many items are present. Which idea should be labelled?

A. Maximum B. Count C. Sum D. Minimum

4. Imagine helping a younger pupil understand something that shares a total evenly across the number of values. Which term would you teach?

A. Count B. Maximum C. Average D. Sum

5. Your class is solving a practical problem. One useful thing is the largest value. What is its name?

A. Count B. Sum C. Average D. Maximum

6. Which answer would fit on a poster beside the words "tells how many items are present"?

A. Sum B. Maximum C. Count D. Minimum

7. A classmate confuses several ideas about finding totals and averages. Which one actually adds numbers together?

A. Maximum B. Count C. Sum D. Minimum

8. For a short demonstration, the teacher needs an example that shares a total evenly across the number of values. Which choice would you select?

A. Count B. Sum C. Maximum D. Average

9. At home, Kofi remembers a class rule or concept that is the largest value. What was it called?

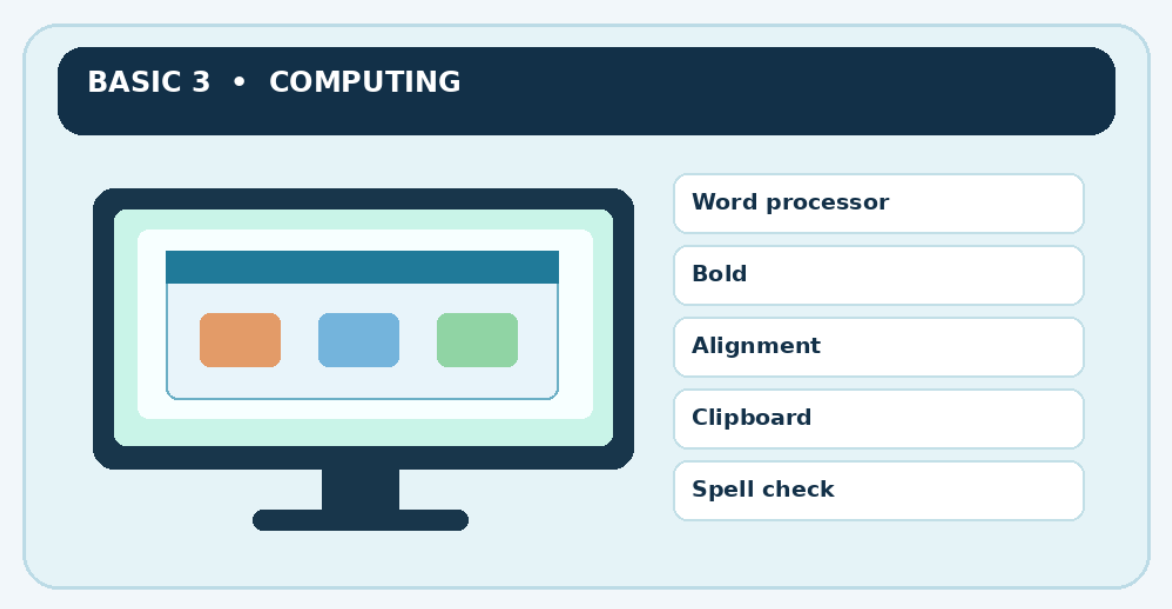

A. Average B. Maximum C. Sum D. Count

10. At the community learning centre, someone describes a tool or idea that is the smallest value. Which one is it?

A. Minimum B. Sum C. Maximum D. Count

Lesson 8: Creating a Neat Document

We will learn to: Identify, explain and apply the important ideas behind creating a neat document.

Five important ideas

Word processor: creates and edits text documents.

Bold: makes important words stand out.

Alignment: positions text on the page.

Clipboard: temporarily holds copied material.

Spell check: helps find possible spelling mistakes.

Our Ghanaian story

While typing a school announcement, Esi had a question about creating a neat document. The group discovered that word processor creates and edits text documents, while bold makes important words stand out. They drew an example and explained it to their classmates.

Try it!

Make a one-page paper example about your school or a Ghanaian festival. Include word processor, bold and alignment; present it clearly to a partner.

Create and share

Make a colourful, labelled poster that teaches creating a neat document. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-08

Lesson 8: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that creates and edits text documents.

A. Bold B. Spell check C. Word processor D. Clipboard

2. Your friend says, "This makes important words stand out." What is the friend describing?

A. Word processor B. Clipboard C. Spell check D. Bold

3. Which idea from creating a neat document matches the clue "positions text on the page"?

A. Alignment B. Clipboard C. Spell check D. Bold

4. The teacher asks for an example that temporarily holds copied material. Which answer fits?

A. Clipboard B. Spell check C. Bold D. Word processor

5. Can you identify the term described here: helps find possible spelling mistakes?

A. Bold B. Alignment C. Spell check D. Clipboard

CHALLENGE — Think and apply.

1. Which answer would fit on a poster beside the words "creates and edits text documents"?

A. Clipboard B. Bold C. Word processor D. Spell check

2. A group makes a display on creating a neat document. Their first clue is "makes important words stand out". Which label is correct?

A. Word processor B. Clipboard C. Bold D. Spell check

3. Imagine helping a younger pupil understand something that positions text on the page. Which term would you teach?

A. Alignment B. Clipboard C. Spell check D. Bold

4. During a school ICT lesson, Akosua wants to show something that creates and edits text documents. Which idea should be labelled?

A. Word processor B. Bold C. Clipboard D. Spell check

5. At the community learning centre, someone describes a tool or idea that helps find possible spelling mistakes. Which one is it?

A. Bold B. Spell check C. Alignment D. Clipboard

6. Which concept matches the explanation "helps find possible spelling mistakes" when you review creating a neat document?

A. Spell check B. Alignment C. Bold D. Clipboard

7. At home, Akosua remembers a class rule or concept that temporarily holds copied material. What was it called?

A. Clipboard B. Spell check C. Bold D. Word processor

8. A classmate confuses several ideas about creating a neat document. Which one actually makes important words stand out?

A. Spell check B. Bold C. Clipboard D. Word processor

9. Your class is solving a practical problem. One useful thing temporarily holds copied material. What is its name?

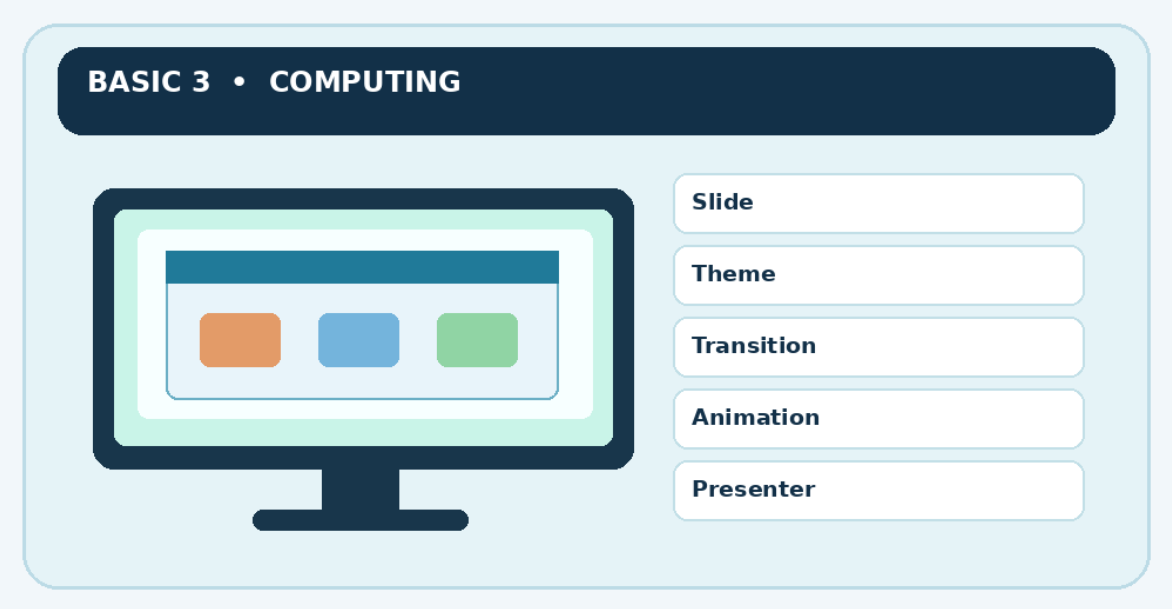

A. Spell check B. Word processor C. Clipboard D. Bold

10. For a short demonstration, the teacher needs an example that positions text on the page. Which choice would you select?

A. Bold B. Alignment C. Clipboard D. Spell check

Lesson 9: Designing Two Clear Slides

We will learn to: Identify, explain and apply the important ideas behind designing two clear slides.

Five important ideas

Slide: is one screen of a presentation.

Theme: gives slides a coordinated design.

Transition: controls how one slide changes to another.

Animation: makes an object appear or move.

Presenter: speaks clearly while showing the slides.

Our Ghanaian story

While preparing a school assembly talk, Yaw had a question about designing two clear slides. The group discovered that slide is one screen of a presentation, while theme gives slides a coordinated design. They drew an example and explained it to their classmates.

Try it!

Make a one-page paper example about your school or a Ghanaian festival. Include slide, theme and transition; present it clearly to a partner.

Create and share

Make a colourful, labelled poster that teaches designing two clear slides. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-09

Lesson 9: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that is one screen of a presentation.

A. Transition B. Theme C. Animation D. Slide

2. Your friend says, "This gives slides a coordinated design." What is the friend describing?

A. Theme B. Animation C. Transition D. Slide

3. Which idea from designing two clear slides matches the clue "controls how one slide changes to another"?

A. Theme B. Transition C. Slide D. Animation

4. The teacher asks for an example that makes an object appear or move. Which answer fits?

A. Presenter B. Theme C. Animation D. Transition

5. Can you identify the term described here: speaks clearly while showing the slides?

A. Theme B. Transition C. Presenter D. Slide

CHALLENGE — Think and apply.

1. Which answer would fit on a poster beside the words "is one screen of a presentation"?

A. Slide B. Theme C. Animation D. Transition

2. During a school ICT lesson, Esi wants to show something that is one screen of a presentation. Which idea should be labelled?

A. Animation B. Theme C. Slide D. Transition

3. At the community learning centre, someone describes a tool or idea that speaks clearly while showing the slides. Which one is it?

A. Theme B. Transition C. Presenter D. Slide

4. At home, Esi remembers a class rule or concept that makes an object appear or move. What was it called?

A. Theme B. Animation C. Transition D. Presenter

5. For a short demonstration, the teacher needs an example that controls how one slide changes to another. Which choice would you select?

A. Animation B. Slide C. Transition D. Theme

6. A classmate confuses several ideas about designing two clear slides. Which one actually gives slides a coordinated design?

A. Transition B. Theme C. Slide D. Animation

7. Imagine helping a younger pupil understand something that controls how one slide changes to another. Which term would you teach?

A. Slide B. Theme C. Animation D. Transition

8. Your class is solving a practical problem. One useful thing makes an object appear or move. What is its name?

A. Presenter B. Theme C. Animation D. Transition

9. A group makes a display on designing two clear slides. Their first clue is "gives slides a coordinated design". Which label is correct?

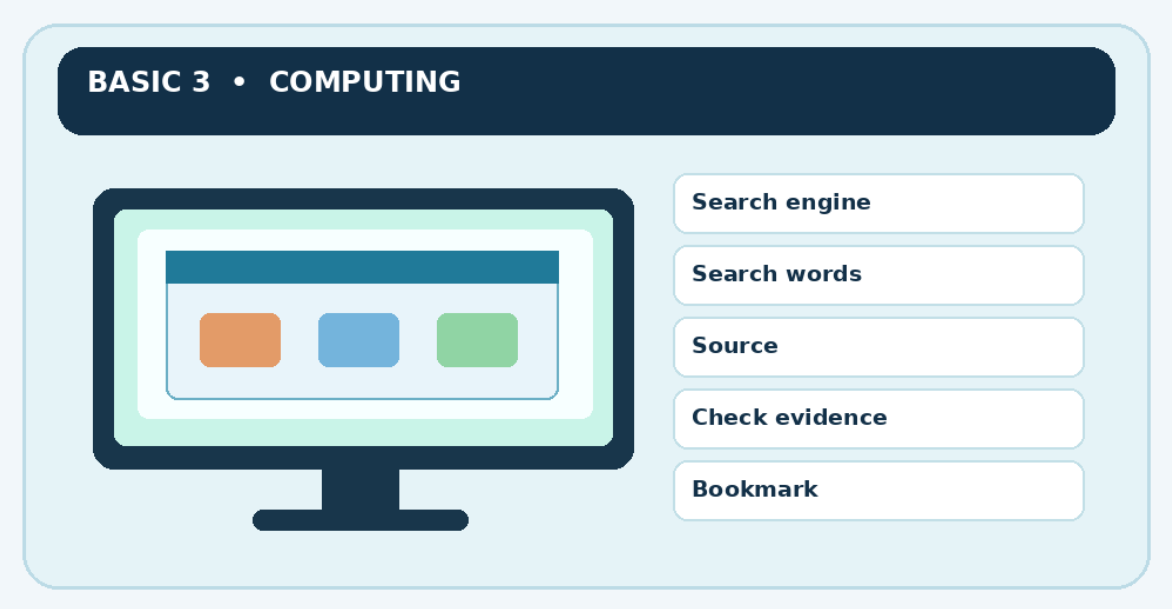

A. Transition B. Theme C. Slide D. Animation

10. Which concept matches the explanation "speaks clearly while showing the slides" when you review designing two clear slides?

A. Presenter B. Slide C. Theme D. Transition

Lesson 10: Researching Carefully Online

We will learn to: Identify, explain and apply the important ideas behind researching carefully online.

Five important ideas

Search engine: helps find pages about a topic.

Search words: describe what information is needed.

Source: is where information comes from.

Check evidence: helps judge whether information is reliable.

Bookmark: saves a link for later.

Our Ghanaian story

When researching Ghanaian wildlife, Abena had a question about researching carefully online. The group discovered that search engine helps find pages about a topic, while search words describe what information is needed. They drew an example and explained it to their classmates.

Try it!

Use an imaginary example or a teacher-approved offline screenshot. Discuss when to use search engine and search words. Never enter a real password or share private details in this activity.

Create and share

Make a colourful, labelled poster that teaches researching carefully online. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-10

Lesson 10: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that helps find pages about a topic.

A. Bookmark B. Search engine C. Source D. Check evidence

2. Your friend says, "This describe what information is needed." What is the friend describing?

A. Check evidence B. Search words C. Search engine D. Source

3. Which idea from researching carefully online matches the clue "is where information comes from"?

A. Check evidence B. Source C. Bookmark D. Search words

4. The teacher asks for an example that helps judge whether information is reliable. Which answer fits?

A. Search engine B. Search words C. Check evidence D. Bookmark

5. Can you identify the term described here: saves a link for later?

A. Search engine B. Search words C. Bookmark D. Source

CHALLENGE — Think and apply.

1. During a school ICT lesson, Ama wants to show something that helps find pages about a topic. Which idea should be labelled?

A. Search engine B. Bookmark C. Source D. Check evidence

2. For a short demonstration, the teacher needs an example that is where information comes from. Which choice would you select?

A. Bookmark B. Source C. Search words D. Check evidence

3. Your class is solving a practical problem. One useful thing helps judge whether information is reliable. What is its name?

A. Check evidence B. Search engine C. Search words D. Bookmark

4. Which concept matches the explanation "saves a link for later" when you review researching carefully online?

A. Bookmark B. Source C. Search words D. Search engine

5. A group makes a display on researching carefully online. Their first clue is "describe what information is needed". Which label is correct?

A. Source B. Check evidence C. Search engine D. Search words

6. Which answer would fit on a poster beside the words "helps find pages about a topic"?

A. Search engine B. Check evidence C. Source D. Bookmark

7. A classmate confuses several ideas about researching carefully online. Which one actually describe what information is needed?

A. Check evidence B. Search words C. Source D. Search engine

8. Imagine helping a younger pupil understand something that is where information comes from. Which term would you teach?

A. Search words B. Bookmark C. Check evidence D. Source

9. At the community learning centre, someone describes a tool or idea that saves a link for later. Which one is it?

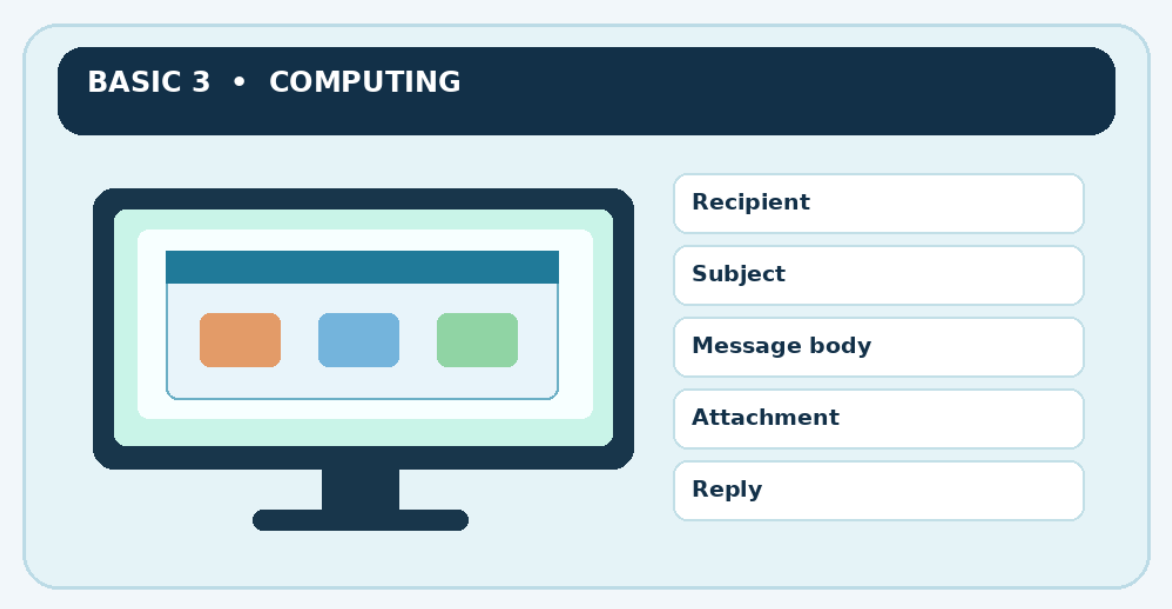

A. Search engine B. Bookmark C. Source D. Search words

10. At home, Ama remembers a class rule or concept that helps judge whether information is reliable. What was it called?

A. Bookmark B. Check evidence C. Search words D. Search engine

Lesson 11: Understanding Email

We will learn to: Identify, explain and apply the important ideas behind understanding email.

Five important ideas

Recipient: is the person meant to receive an email.

Subject: says briefly what the message is about.

Message body: contains the main written information.

Attachment: is a file sent with a message.

Reply: sends a response to a received message.

Our Ghanaian story

When writing a supervised class message, Kofi had a question about understanding email. The group discovered that recipient is the person meant to receive an email, while subject says briefly what the message is about. They drew an example and explained it to their classmates.

Try it!

Use an imaginary example or a teacher-approved offline screenshot. Discuss when to use recipient and subject. Never enter a real password or share private details in this activity.

Create and share

Make a colourful, labelled poster that teaches understanding email. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-11

Lesson 11: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that is the person meant to receive an email.

A. Attachment B. Recipient C. Message body D. Reply

2. Your friend says, "This says briefly what the message is about." What is the friend describing?

A. Recipient B. Subject C. Reply D. Attachment

3. Which idea from understanding email matches the clue "contains the main written information"?

A. Message body B. Recipient C. Reply D. Subject

4. The teacher asks for an example that is a file sent with a message. Which answer fits?

A. Subject B. Recipient C. Message body D. Attachment

5. Can you identify the term described here: sends a response to a received message?

A. Message body B. Reply C. Subject D. Attachment

CHALLENGE — Think and apply.

1. A classmate confuses several ideas about understanding email. Which one actually says briefly what the message is about?

A. Subject B. Reply C. Attachment D. Recipient

2. A group makes a display on understanding email. Their first clue is "says briefly what the message is about". Which label is correct?

A. Recipient B. Subject C. Reply D. Attachment

3. At home, Yaw remembers a class rule or concept that is a file sent with a message. What was it called?

A. Subject B. Attachment C. Message body D. Recipient

4. At the community learning centre, someone describes a tool or idea that sends a response to a received message. Which one is it?

A. Subject B. Attachment C. Reply D. Message body

5. Which answer would fit on a poster beside the words "is the person meant to receive an email"?

A. Recipient B. Attachment C. Reply D. Message body

6. During a school ICT lesson, Yaw wants to show something that is the person meant to receive an email. Which idea should be labelled?

A. Attachment B. Recipient C. Reply D. Message body

7. Which concept matches the explanation "sends a response to a received message" when you review understanding email?

A. Message body B. Reply C. Attachment D. Subject

8. Your class is solving a practical problem. One useful thing is a file sent with a message. What is its name?

A. Message body B. Subject C. Attachment D. Recipient

9. Imagine helping a younger pupil understand something that contains the main written information. Which term would you teach?

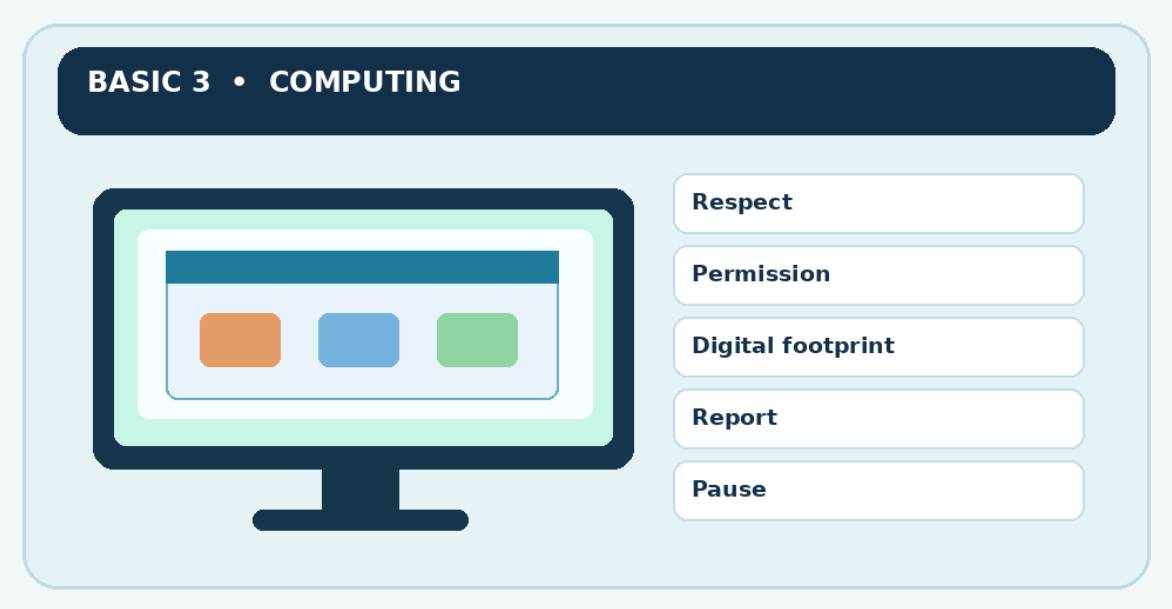

A. Reply B. Subject C. Recipient D. Message body

10. For a short demonstration, the teacher needs an example that contains the main written information. Which choice would you select?

A. Subject B. Recipient C. Reply D. Message body

Lesson 12: Digital Footprints and Good Manners

We will learn to: Identify, explain and apply the important ideas behind digital footprints and good manners.

Five important ideas

Respect: means communicating without insults.

Permission: is needed before sharing another person's photo.

Digital footprint: is information left by online activity.

Report: tells a trusted adult about online harm.

Pause: means thinking before posting.

Our Ghanaian story

During online safety week, Ama had a question about digital footprints and good manners. The group discovered that respect means communicating without insults, while permission is needed before sharing another person's photo. They drew an example and explained it to their classmates.

Try it!

Use an imaginary example or a teacher-approved offline screenshot. Discuss when to use respect and permission. Never enter a real password or share private details in this activity.

Create and share

Make a colourful, labelled poster that teaches digital footprints and good manners. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-12

Lesson 12: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that means communicating without insults.

A. Respect B. Digital footprint C. Permission D. Report

2. Your friend says, "This is needed before sharing another person's photo." What is the friend describing?

A. Respect B. Pause C. Permission D. Digital footprint

3. Which idea from digital footprints and good manners matches the clue "is information left by online activity"?

A. Digital footprint B. Respect C. Pause D. Report

4. The teacher asks for an example that tells a trusted adult about online harm. Which answer fits?

A. Report B. Digital footprint C. Permission D. Pause

5. Can you identify the term described here: means thinking before posting?

A. Respect B. Digital footprint C. Report D. Pause

CHALLENGE — Think and apply.

1. Your class is solving a practical problem. One useful thing tells a trusted adult about online harm. What is its name?

A. Pause B. Digital footprint C. Report D. Permission

2. During a school ICT lesson, Kofi wants to show something that means communicating without insults. Which idea should be labelled?

A. Permission B. Report C. Digital footprint D. Respect

3. At home, Kofi remembers a class rule or concept that tells a trusted adult about online harm. What was it called?

A. Report B. Digital footprint C. Permission D. Pause

4. A group makes a display on digital footprints and good manners. Their first clue is "is needed before sharing another person's photo". Which label is correct?

A. Digital footprint B. Permission C. Respect D. Pause

5. A classmate confuses several ideas about digital footprints and good manners. Which one actually is needed before sharing another person's photo?

A. Permission B. Pause C. Digital footprint D. Respect

6. At the community learning centre, someone describes a tool or idea that means thinking before posting. Which one is it?

A. Digital footprint B. Respect C. Report D. Pause

7. Which answer would fit on a poster beside the words "means communicating without insults"?

A. Permission B. Digital footprint C. Respect D. Report

8. Which concept matches the explanation "means thinking before posting" when you review digital footprints and good manners?

A. Pause B. Respect C. Digital footprint D. Report

9. For a short demonstration, the teacher needs an example that is information left by online activity. Which choice would you select?

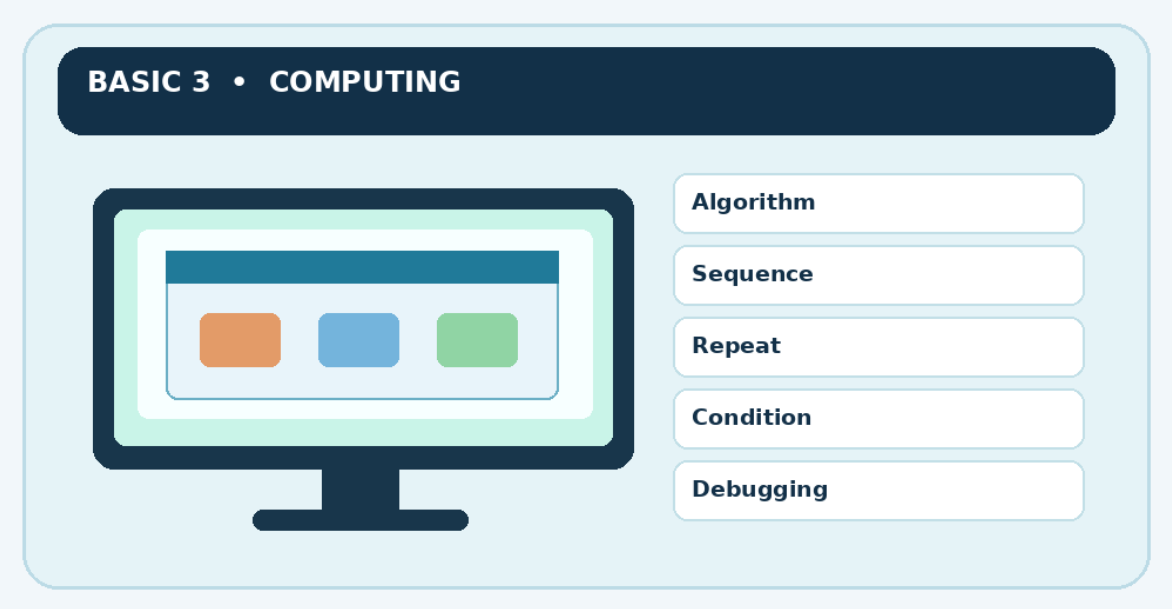

A. Pause B. Respect C. Digital footprint D. Report

10. Imagine helping a younger pupil understand something that is information left by online activity. Which term would you teach?

A. Respect B. Pause C. Report D. Digital footprint

Lesson 13: Algorithms as Everyday Instructions

We will learn to: Identify, explain and apply the important ideas behind algorithms as everyday instructions.

Five important ideas

Algorithm: is an ordered set of steps to solve a task.

Sequence: puts instructions in the right order.

Repeat: does an instruction again.

Condition: chooses an action based on a test.

Debugging: looks for and fixes errors in instructions.

Our Ghanaian story

When giving a robot simple directions, Kojo had a question about algorithms as everyday instructions. The group discovered that algorithm is an ordered set of steps to solve a task, while sequence puts instructions in the right order. They drew an example and explained it to their classmates.

Try it!

Design a simple paper model explaining algorithm, sequence and repeat. Trade models with a classmate and explain how your design works.

Create and share

Make a colourful, labelled poster that teaches algorithms as everyday instructions. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-13

Lesson 13: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that is an ordered set of steps to solve a task.

A. Debugging B. Repeat C. Condition D. Algorithm

2. Your friend says, "This puts instructions in the right order." What is the friend describing?

A. Algorithm B. Repeat C. Sequence D. Debugging

3. Which idea from algorithms as everyday instructions matches the clue "does an instruction again"?

A. Algorithm B. Repeat C. Sequence D. Condition

4. The teacher asks for an example that chooses an action based on a test. Which answer fits?

A. Condition B. Sequence C. Algorithm D. Debugging

5. Can you identify the term described here: looks for and fixes errors in instructions?

A. Debugging B. Condition C. Algorithm D. Sequence

CHALLENGE — Think and apply.

1. For a short demonstration, the teacher needs an example that does an instruction again. Which choice would you select?

A. Sequence B. Algorithm C. Condition D. Repeat

2. Which answer would fit on a poster beside the words "is an ordered set of steps to solve a task"?

A. Repeat B. Algorithm C. Debugging D. Condition

3. A classmate confuses several ideas about algorithms as everyday instructions. Which one actually puts instructions in the right order?

A. Algorithm B. Repeat C. Sequence D. Debugging

4. At the community learning centre, someone describes a tool or idea that looks for and fixes errors in instructions. Which one is it?

A. Algorithm B. Debugging C. Condition D. Sequence

5. At home, Akosua remembers a class rule or concept that chooses an action based on a test. What was it called?

A. Condition B. Debugging C. Algorithm D. Sequence

6. Imagine helping a younger pupil understand something that does an instruction again. Which term would you teach?

A. Sequence B. Repeat C. Condition D. Algorithm

7. A group makes a display on algorithms as everyday instructions. Their first clue is "puts instructions in the right order". Which label is correct?

A. Sequence B. Debugging C. Repeat D. Algorithm

8. During a school ICT lesson, Akosua wants to show something that is an ordered set of steps to solve a task. Which idea should be labelled?

A. Algorithm B. Debugging C. Condition D. Repeat

9. Your class is solving a practical problem. One useful thing chooses an action based on a test. What is its name?

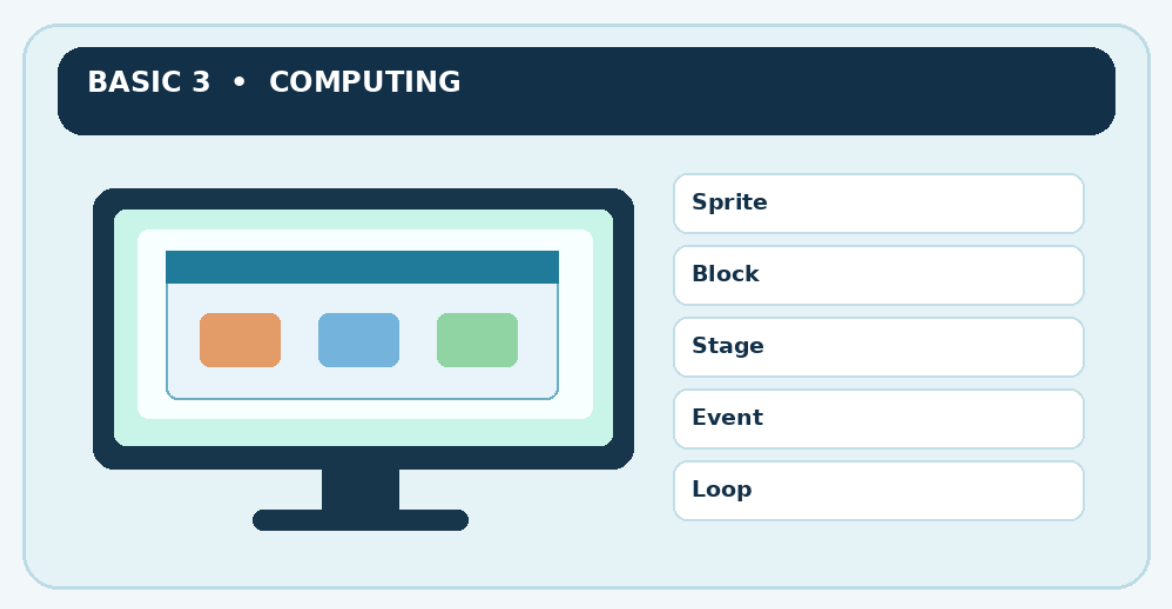

A. Debugging B. Algorithm C. Sequence D. Condition

10. Which concept matches the explanation "looks for and fixes errors in instructions" when you review algorithms as everyday instructions?

A. Debugging B. Sequence C. Condition D. Algorithm

Lesson 14: My First Block Program

We will learn to: Identify, explain and apply the important ideas behind my first block program.

Five important ideas

Sprite: is a character or object in a block program.

Block: is a drag-and-drop coding instruction.

Stage: is where sprites perform actions.

Event: starts a program when something happens.

Loop: repeats instructions.

Our Ghanaian story

While building a small block-program story, Esi had a question about my first block program. The group discovered that sprite is a character or object in a block program, while block is a drag-and-drop coding instruction. They drew an example and explained it to their classmates.

Try it!

Design a simple paper model explaining sprite, block and stage. Trade models with a classmate and explain how your design works.

Create and share

Make a colourful, labelled poster that teaches my first block program. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-14

Lesson 14: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that is a character or object in a block program.

A. Loop B. Block C. Event D. Sprite

2. Your friend says, "This is a drag-and-drop coding instruction." What is the friend describing?

A. Stage B. Block C. Sprite D. Event

3. Which idea from my first block program matches the clue "is where sprites perform actions"?

A. Stage B. Event C. Loop D. Sprite

4. The teacher asks for an example that starts a program when something happens. Which answer fits?

A. Stage B. Event C. Block D. Loop

5. Can you identify the term described here: repeats instructions?

A. Block B. Loop C. Event D. Stage

CHALLENGE — Think and apply.

1. Your class is solving a practical problem. One useful thing starts a program when something happens. What is its name?

A. Loop B. Block C. Event D. Stage

2. A classmate confuses several ideas about my first block program. Which one actually is a drag-and-drop coding instruction?

A. Event B. Block C. Sprite D. Stage

3. At home, Esi remembers a class rule or concept that starts a program when something happens. What was it called?

A. Stage B. Block C. Event D. Loop

4. Imagine helping a younger pupil understand something that is where sprites perform actions. Which term would you teach?

A. Sprite B. Stage C. Loop D. Event

5. For a short demonstration, the teacher needs an example that is where sprites perform actions. Which choice would you select?

A. Sprite B. Loop C. Event D. Stage

6. Which answer would fit on a poster beside the words "is a character or object in a block program"?

A. Block B. Sprite C. Event D. Loop

7. A group makes a display on my first block program. Their first clue is "is a drag-and-drop coding instruction". Which label is correct?

A. Block B. Event C. Stage D. Sprite

8. During a school ICT lesson, Esi wants to show something that is a character or object in a block program. Which idea should be labelled?

A. Event B. Block C. Sprite D. Loop

9. At the community learning centre, someone describes a tool or idea that repeats instructions. Which one is it?

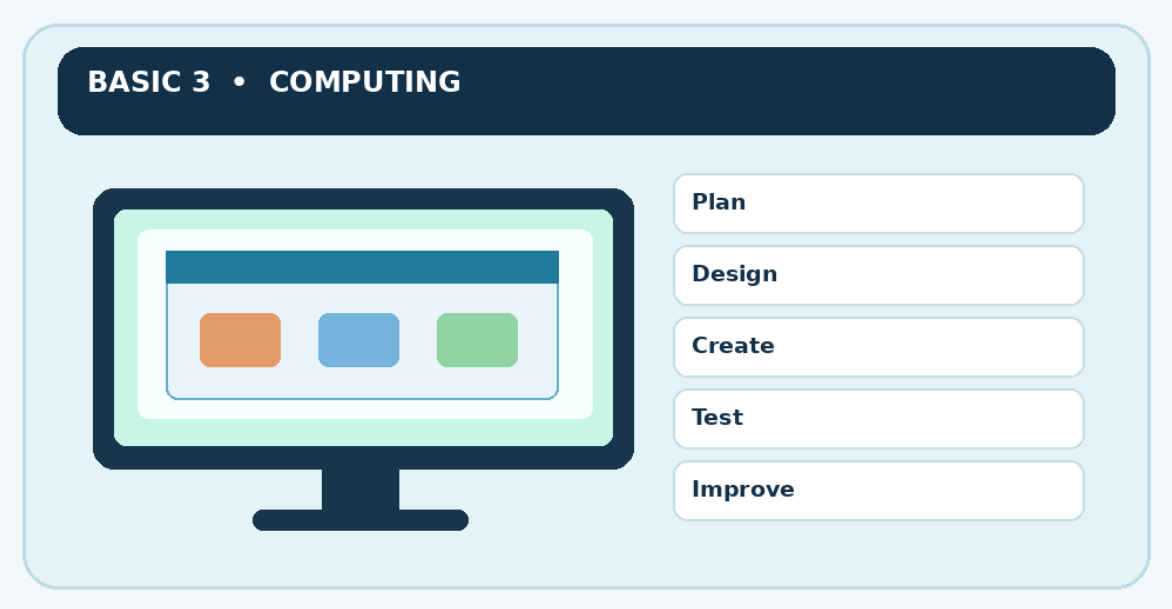

A. Block B. Loop C. Event D. Stage

10. Which concept matches the explanation "repeats instructions" when you review my first block program?

A. Event B. Block C. Loop D. Stage

Lesson 15: Design a Digital Safety Poster

We will learn to: Identify, explain and apply the important ideas behind design a digital safety poster.

Five important ideas

Plan: identifies steps and materials before work.

Design: shows how the finished result should look.

Create: builds the digital product.

Test: checks that the product works as intended.

Improve: makes changes using feedback.

Our Ghanaian story

At the start of a class project, Yaw had a question about design a digital safety poster. The group discovered that plan identifies steps and materials before work, while design shows how the finished result should look. They drew an example and explained it to their classmates.

Try it!

Design a simple paper model explaining plan, design and create. Trade models with a classmate and explain how your design works.

Create and share

Make a colourful, labelled poster that teaches design a digital safety poster. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B3-15

Lesson 15: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that identifies steps and materials before work.

A. Design B. Improve C. Test D. Plan

2. Your friend says, "This shows how the finished result should look." What is the friend describing?

A. Plan B. Design C. Create D. Improve

3. Which idea from design a digital safety poster matches the clue "builds the digital product"?

A. Test B. Plan C. Create D. Improve

4. The teacher asks for an example that checks that the product works as intended. Which answer fits?

A. Design B. Plan C. Test D. Create

5. Can you identify the term described here: makes changes using feedback?

A. Improve B. Design C. Test D. Create

CHALLENGE — Think and apply.

1. During a school ICT lesson, Ama wants to show something that identifies steps and materials before work. Which idea should be labelled?

A. Improve B. Design C. Test D. Plan

2. Your class is solving a practical problem. One useful thing checks that the product works as intended. What is its name?

A. Plan B. Test C. Create D. Design

3. Which answer would fit on a poster beside the words "identifies steps and materials before work"?

A. Improve B. Design C. Plan D. Test

4. Imagine helping a younger pupil understand something that builds the digital product. Which term would you teach?

A. Improve B. Test C. Create D. Plan

5. A classmate confuses several ideas about design a digital safety poster. Which one actually shows how the finished result should look?

A. Plan B. Improve C. Create D. Design

6. At the community learning centre, someone describes a tool or idea that makes changes using feedback. Which one is it?

A. Improve B. Test C. Create D. Design

7. Which concept matches the explanation "makes changes using feedback" when you review design a digital safety poster?

A. Design B. Improve C. Test D. Create

8. At home, Ama remembers a class rule or concept that checks that the product works as intended. What was it called?

A. Test B. Design C. Create D. Plan

9. For a short demonstration, the teacher needs an example that builds the digital product. Which choice would you select?

A. Improve B. Create C. Plan D. Test

10. A group makes a display on design a digital safety poster. Their first clue is "shows how the finished result should look". Which label is correct?

A. Plan B. Improve C. Design D. Create

Teacher answer guide

Review the correct term and ask each learner to explain why it fits.

Lesson 1 — Input, Output and Storage

Play: 1. Input device | 2. Output device | 3. Storage device | 4. Processor | 5. Peripheral

Challenge: 1. Output device | 2. Output device | 3. Peripheral | 4. Input device | 5. Storage device | 6. Input device | 7. Peripheral | 8. Processor | 9. Processor | 10. Storage device

Lesson 2 — Typing Accurately

Play: 1. Home row | 2. Top row | 3. Bottom row | 4. Practice | 5. Posture

Challenge: 1. Posture | 2. Home row | 3. Posture | 4. Top row | 5. Bottom row | 6. Bottom row | 7. Home row | 8. Practice | 9. Top row | 10. Practice

Lesson 3 — Working With Desktop Icons

Play: 1. Desktop | 2. Icon | 3. Taskbar | 4. Wallpaper | 5. Start menu

Challenge: 1. Icon | 2. Desktop | 3. Wallpaper | 4. Start menu | 5. Icon | 6. Start menu | 7. Taskbar | 8. Desktop | 9. Taskbar | 10. Wallpaper

Lesson 4 — Organising Files and Folders

Play: 1. Folder | 2. File name | 3. Copy | 4. Move | 5. Rename

Challenge: 1. File name | 2. Copy | 3. Folder | 4. Rename | 5. Folder | 6. Move | 7. Move | 8. Copy | 9. File name | 10. Rename

Lesson 5 — Recording Survey Results

Play: 1. Research question | 2. Sample | 3. Consent | 4. Tally | 5. Conclusion

Challenge: 1. Tally | 2. Tally | 3. Consent | 4. Research question | 5. Consent | 6. Sample | 7. Conclusion | 8. Sample | 9. Research question | 10. Conclusion

Lesson 6 — Using Tables and Charts

Play: 1. Sort | 2. Category | 3. Label | 4. Pattern | 5. Chart

Challenge: 1. Category | 2. Chart | 3. Pattern | 4. Label | 5. Label | 6. Sort | 7. Chart | 8. Pattern | 9. Category | 10. Sort

Lesson 7 — Finding Totals and Averages

Play: 1. Count | 2. Sum | 3. Average | 4. Maximum | 5. Minimum

Challenge: 1. Minimum | 2. Sum | 3. Count | 4. Average | 5. Maximum | 6. Count | 7. Sum | 8. Average | 9. Maximum | 10. Minimum

Lesson 8 — Creating a Neat Document

Play: 1. Word processor | 2. Bold | 3. Alignment | 4. Clipboard | 5. Spell check

Challenge: 1. Word processor | 2. Bold | 3. Alignment | 4. Word processor | 5. Spell check | 6. Spell check | 7. Clipboard | 8. Bold | 9. Clipboard | 10. Alignment

Lesson 9 — Designing Two Clear Slides

Play: 1. Slide | 2. Theme | 3. Transition | 4. Animation | 5. Presenter

Challenge: 1. Slide | 2. Slide | 3. Presenter | 4. Animation | 5. Transition | 6. Theme | 7. Transition | 8. Animation | 9. Theme | 10. Presenter

Lesson 10 — Researching Carefully Online

Play: 1. Search engine | 2. Search words | 3. Source | 4. Check evidence | 5. Bookmark

Challenge: 1. Search engine | 2. Source | 3. Check evidence | 4. Bookmark | 5. Search words | 6. Search engine | 7. Search words | 8. Source | 9. Bookmark | 10. Check evidence

Lesson 11 — Understanding Email

Play: 1. Recipient | 2. Subject | 3. Message body | 4. Attachment | 5. Reply

Challenge: 1. Subject | 2. Subject | 3. Attachment | 4. Reply | 5. Recipient | 6. Recipient | 7. Reply | 8. Attachment | 9. Message body | 10. Message body

Lesson 12 — Digital Footprints and Good Manners

Play: 1. Respect | 2. Permission | 3. Digital footprint | 4. Report | 5. Pause

Challenge: 1. Report | 2. Respect | 3. Report | 4. Permission | 5. Permission | 6. Pause | 7. Respect | 8. Pause | 9. Digital footprint | 10. Digital footprint

Lesson 13 — Algorithms as Everyday Instructions

Play: 1. Algorithm | 2. Sequence | 3. Repeat | 4. Condition | 5. Debugging

Challenge: 1. Repeat | 2. Algorithm | 3. Sequence | 4. Debugging | 5. Condition | 6. Repeat | 7. Sequence | 8. Algorithm | 9. Condition | 10. Debugging

Lesson 14 — My First Block Program

Play: 1. Sprite | 2. Block | 3. Stage | 4. Event | 5. Loop

Challenge: 1. Event | 2. Block | 3. Event | 4. Stage | 5. Stage | 6. Sprite | 7. Block | 8. Sprite | 9. Loop | 10. Loop

Lesson 15 — Design a Digital Safety Poster

Play: 1. Plan | 2. Design | 3. Create | 4. Test | 5. Improve

Challenge: 1. Plan | 2. Test | 3. Plan | 4. Create | 5. Design | 6. Improve | 7. Improve | 8. Test | 9. Create | 10. Design
