Basic 4

Illustrated lessons · Practical activities · Play and Challenge questions

Independently authored learning companion aligned to selected NaCCA 2019 topics. This is not an official NaCCA publication.

LESSON 01: The difference between slow and fast, heavy and light, hard and

Goal: Demonstrate the difference between slow and fast, heavy and light, hard and soft while moving.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Demonstrate the difference between slow and fast, heavy and light, hard and soft while moving.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 01: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The difference between slow and fast, heavy and light, hard and: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Practise unsafe tricks without learning the basic skill

C. Demonstrate the difference between slow and fast, heavy and light, hard and soft while moving.

D. Rush into a demanding activity without warming up

2. [Play] The difference between slow and fast, heavy and light, hard and: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. space markers and suitable lightweight equipment

C. heavy unsafe equipment in a crowded space

D. a sharp object placed on the sports ground

3. [Play] The difference between slow and fast, heavy and light, hard and: Which action should come first?

A. Finish before looking at the instructions.

B. Ignore the main task and do something unrelated.

C. Set up a safe activity space using space markers and suitable lightweight equipment.

D. Skip all practice and guess the result.

4. [Play] The difference between slow and fast, heavy and light, hard and: Which setting does this grade use?

A. team games, body control and health

B. an unrelated imagined city

C. a topic unrelated to the current class

D. only a future space colony

5. [Play] The difference between slow and fast, heavy and light, hard and: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. a demonstrated movement or fitness task with self-assessment

C. an unsupported claim with no classroom practice

D. an unrelated picture with no explanation

6. [Challenge] The difference between slow and fast, heavy and light, hard and: Which action comes after the opening step?

A. Only watch others without trying

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Practise the skill slowly: Demonstrate the difference between slow and fast, heavy and light, hard and soft while moving.

7. [Challenge] The difference between slow and fast, heavy and light, hard and: Which practice completes the three lesson stages?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Stop after reading the title

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] The difference between slow and fast, heavy and light, hard and: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. careful, safe movement

D. an opinion without observation or practice

9. [Challenge] The difference between slow and fast, heavy and light, hard and: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] The difference between slow and fast, heavy and light, hard and: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Complete a different lesson instead

C. Copy another learner’s response without trying

D. Observe a demonstration, practise slowly, then reflect on one improvement.

11. [Challenge] The difference between slow and fast, heavy and light, hard and: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] The difference between slow and fast, heavy and light, hard and: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can finish without showing your work

C. Whether you can ignore the agreed task

D. Whether your work demonstrates careful, safe movement.

13. [Challenge] The difference between slow and fast, heavy and light, hard and: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] The difference between slow and fast, heavy and light, hard and: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen careful, safe movement.

D. Change answers randomly without a reason

15. [Challenge] The difference between slow and fast, heavy and light, hard and: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

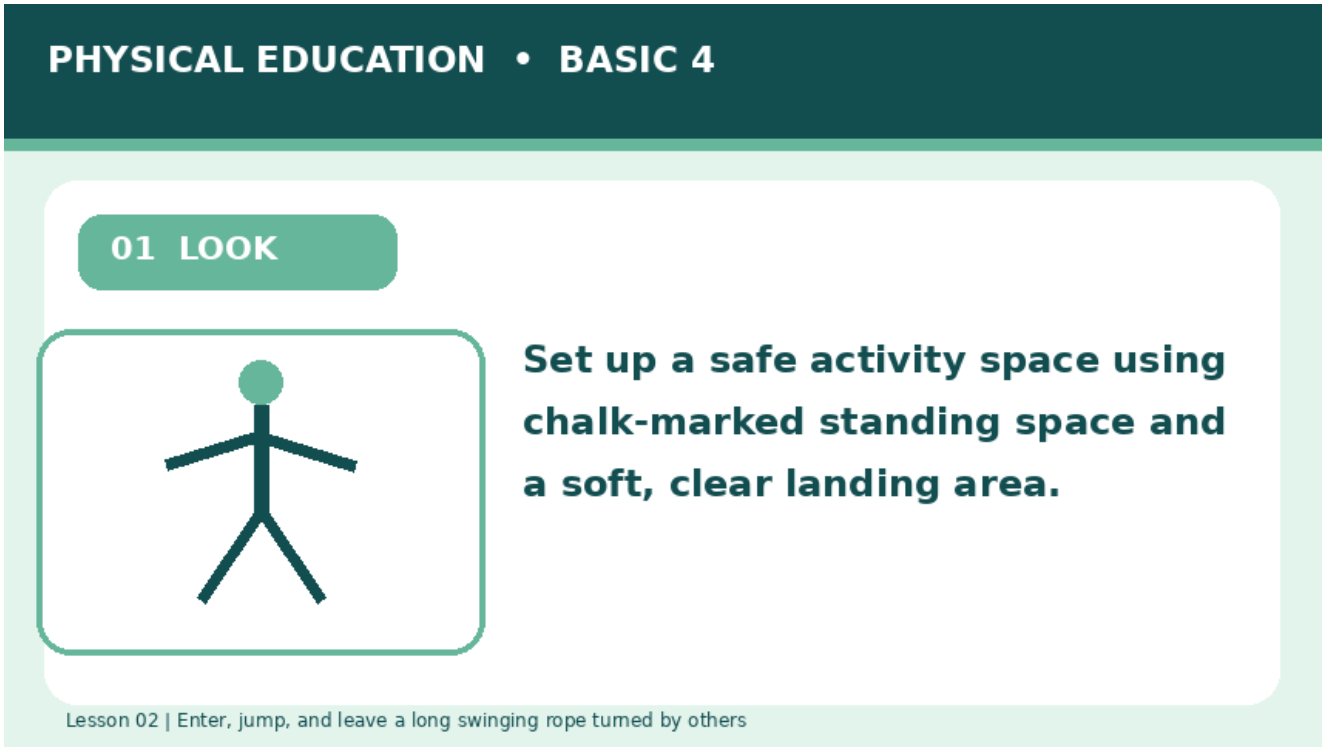

B. Apply the lesson about demonstrate the difference between slow and fast, heavy and light, hard and soft while moving to a suitable real-life situation.

C. Use the topic to mislead others

D. Claim expertise without trying the skill

LESSON 02: Enter, jump, and leave a long swinging rope turned by others

Goal: Enter, jump, and leave a long swinging rope turned by others repeatedly.

Learn it

A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

Useful material: chalk-marked standing space and a soft, clear landing area

Do it in three steps

1. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

2. Practise the skill slowly: Enter, jump, and leave a long swinging rope turned by others repeatedly.

3. Practise take-off, landing, then describe which landing felt more balanced.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

Try this: Practise take-off, landing, then describe which landing felt more balanced.

Show your learning: controlled take-off and safe landing. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 02: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Enter, jump, and leave a long swinging rope turned by others: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Rush into a demanding activity without warming up

C. Enter, jump, and leave a long swinging rope turned by others repeatedly.

D. Ignore the movement task and do only an unrelated game

2. [Play] Enter, jump, and leave a long swinging rope turned by others: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. chalk-marked standing space and a soft, clear landing area

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Enter, jump, and leave a long swinging rope turned by others: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

C. Finish before looking at the instructions.

D. Ignore the main task and do something unrelated.

4. [Play] Enter, jump, and leave a long swinging rope turned by others: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. team games, body control and health

D. an unrelated imagined city

5. [Play] Enter, jump, and leave a long swinging rope turned by others: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. an unsupported claim with no classroom practice

6. [Challenge] Enter, jump, and leave a long swinging rope turned by others: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Practise the skill slowly: Enter, jump, and leave a long swinging rope turned by others repeatedly.

C. Only watch others without trying

D. Skip to marking before learning

7. [Challenge] Enter, jump, and leave a long swinging rope turned by others: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Practise take-off, landing, then describe which landing felt more balanced.

D. Leave the task unfinished without explaining

8. [Challenge] Enter, jump, and leave a long swinging rope turned by others: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. controlled take-off and safe landing

C. a random answer with no supporting detail

D. an unrelated example that does not test the skill

9. [Challenge] Enter, jump, and leave a long swinging rope turned by others: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Enter, jump, and leave a long swinging rope turned by others: Which classroom activity helps apply the lesson?

A. Practise take-off, landing, then describe which landing felt more balanced.

B. Complete a different lesson instead

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] Enter, jump, and leave a long swinging rope turned by others: Which explanation best supports this lesson?

A. A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

B. Learning means only guessing and never checking

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] Enter, jump, and leave a long swinging rope turned by others: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether your work demonstrates controlled take-off and safe landing.

13. [Challenge] Enter, jump, and leave a long swinging rope turned by others: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Make up results instead of practising

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Stop immediately without reflection

14. [Challenge] Enter, jump, and leave a long swinging rope turned by others: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Ignore all comments and leave the task incomplete

C. Revisit the steps and strengthen controlled take-off and safe landing.

D. Change answers randomly without a reason

15. [Challenge] Enter, jump, and leave a long swinging rope turned by others: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

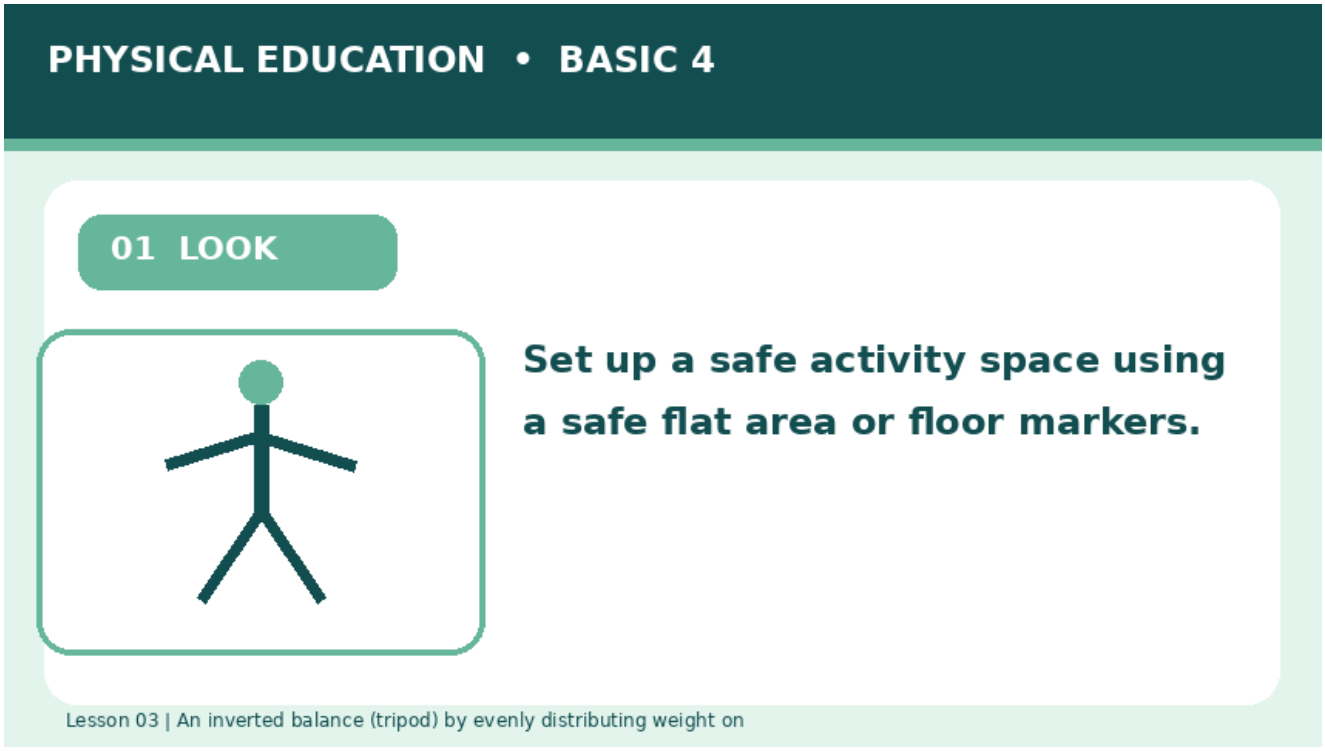

B. Apply the lesson about enter, jump, and leave a long swinging rope turned by others repeatedly to a suitable real-life situation.

C. Avoid explaining how the skill could be used

D. Use the topic to mislead others

LESSON 03: An inverted balance (tripod) by evenly distributing weight on body

Goal: Perform an inverted balance (tripod) by evenly distributing weight on body parts.

Learn it

Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

Useful material: a safe flat area or floor markers

Do it in three steps

1. Set up a safe activity space using a safe flat area or floor markers.

2. Practise the skill slowly: Perform an inverted balance (tripod) by evenly distributing weight on body parts.

3. Hold a comfortable balance briefly and explain what made it steady.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

Try this: Hold a comfortable balance briefly and explain what made it steady.

Show your learning: stable body position. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 03: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] An inverted balance (tripod) by evenly distributing weight on body: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Perform an inverted balance (tripod) by evenly distributing weight on body parts.

D. Ignore the movement task and do only an unrelated game

2. [Play] An inverted balance (tripod) by evenly distributing weight on body: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a safe flat area or floor markers

D. a slippery or obstructed practice area

3. [Play] An inverted balance (tripod) by evenly distributing weight on body: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Finish before looking at the instructions.

D. Set up a safe activity space using a safe flat area or floor markers.

4. [Play] An inverted balance (tripod) by evenly distributing weight on body: Which setting does this grade use?

A. only a future space colony

B. team games, body control and health

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] An inverted balance (tripod) by evenly distributing weight on body: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] An inverted balance (tripod) by evenly distributing weight on body: Which action comes after the opening step?

A. Only watch others without trying

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Practise the skill slowly: Perform an inverted balance (tripod) by evenly distributing weight on body parts.

7. [Challenge] An inverted balance (tripod) by evenly distributing weight on body: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Give a guess without trying the activity

C. Hold a comfortable balance briefly and explain what made it steady.

D. Stop after reading the title

8. [Challenge] An inverted balance (tripod) by evenly distributing weight on body: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. stable body position

D. a random answer with no supporting detail

9. [Challenge] An inverted balance (tripod) by evenly distributing weight on body: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

C. Take unnecessary risks to finish first.

D. Ignore the teacher’s safety instructions.

10. [Challenge] An inverted balance (tripod) by evenly distributing weight on body: Which classroom activity helps apply the lesson?

A. Hold a comfortable balance briefly and explain what made it steady.

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Avoid the stated task and its materials

11. [Challenge] An inverted balance (tripod) by evenly distributing weight on body: Which explanation best supports this lesson?

A. Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

B. The lesson has no connection to life or skills

C. The topic can be completed without observing or practising

D. Learning means only guessing and never checking

12. [Challenge] An inverted balance (tripod) by evenly distributing weight on body: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can finish without showing your work

C. Whether your work demonstrates stable body position.

D. Whether you can ignore the agreed task

13. [Challenge] An inverted balance (tripod) by evenly distributing weight on body: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] An inverted balance (tripod) by evenly distributing weight on body: How should a learner improve after feedback?

A. Revisit the steps and strengthen stable body position.

B. Change answers randomly without a reason

C. Skip a difficult part without asking for help

D. Ignore all comments and leave the task incomplete

15. [Challenge] An inverted balance (tripod) by evenly distributing weight on body: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

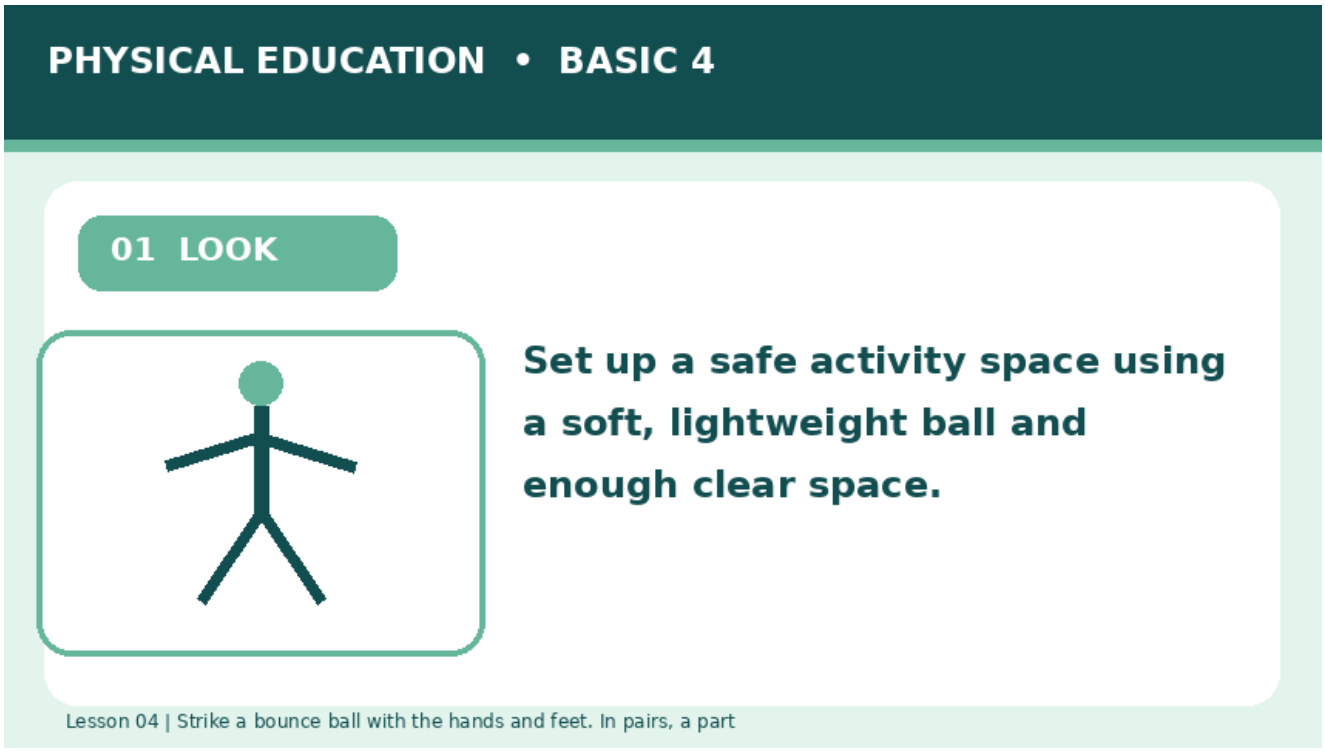

B. Use the topic to mislead others

C. Apply the lesson about perform an inverted balance (tripod) by evenly distributing weight on body parts to a suitable real-life situation.

D. Claim expertise without trying the skill

LESSON 04: Strike a bounce ball with the hands and feet. In pairs, a partner

Goal: Strike a bounce ball with the hands and feet. In pairs, a partner tosses a lightweight ball to a colleague to hit over

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Strike a bounce ball with the hands and feet. In pairs, a partner tosses a lightweight ball to a colleague to hit over.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 04: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Strike a bounce ball with the hands and feet. In pairs, a partner: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Rush into a demanding activity without warming up

C. Strike a bounce ball with the hands and feet. In pairs, a partner tosses a lightweight ball to a colleague to hit over

D. Ignore the movement task and do only an unrelated game

2. [Play] Strike a bounce ball with the hands and feet. In pairs, a partner: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a sharp object placed on the sports ground

C. heavy unsafe equipment in a crowded space

D. a soft, lightweight ball and enough clear space

3. [Play] Strike a bounce ball with the hands and feet. In pairs, a partner: Which action should come first?

A. Finish before looking at the instructions.

B. Set up a safe activity space using a soft, lightweight ball and enough clear space.

C. Skip all practice and guess the result.

D. Ignore the main task and do something unrelated.

4. [Play] Strike a bounce ball with the hands and feet. In pairs, a partner: Which setting does this grade use?

A. team games, body control and health

B. an unrelated imagined city

C. a topic unrelated to the current class

D. only a future space colony

5. [Play] Strike a bounce ball with the hands and feet. In pairs, a partner: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a response that does not show the lesson skill

C. an unrelated picture with no explanation

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] Strike a bounce ball with the hands and feet. In pairs, a partner: Which action comes after the opening step?

A. Only watch others without trying

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Practise the skill slowly: Strike a bounce ball with the hands and feet. In pairs, a partner tosses a lightweight ball to a colleague to hit over.

7. [Challenge] Strike a bounce ball with the hands and feet. In pairs, a partner: Which practice completes the three lesson stages?

A. Practise at a short distance; check your direction and try again with feedback.

B. Give a guess without trying the activity

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] Strike a bounce ball with the hands and feet. In pairs, a partner: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. a random answer with no supporting detail

D. accurate controlled ball movement

9. [Challenge] Strike a bounce ball with the hands and feet. In pairs, a partner: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

B. Ignore the teacher’s safety instructions.

C. Take unnecessary risks to finish first.

D. Do the activity without considering other people.

10. [Challenge] Strike a bounce ball with the hands and feet. In pairs, a partner: Which classroom activity helps apply the lesson?

A. Practise at a short distance; check your direction and try again with feedback.

B. Complete a different lesson instead

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] Strike a bounce ball with the hands and feet. In pairs, a partner: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. The lesson has no connection to life or skills

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] Strike a bounce ball with the hands and feet. In pairs, a partner: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can ignore the agreed task

C. Whether you can finish without showing your work

D. Whether you can avoid answering questions

13. [Challenge] Strike a bounce ball with the hands and feet. In pairs, a partner: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Stop immediately without reflection

C. Make up results instead of practising

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Strike a bounce ball with the hands and feet. In pairs, a partner: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Ignore all comments and leave the task incomplete

D. Skip a difficult part without asking for help

15. [Challenge] Strike a bounce ball with the hands and feet. In pairs, a partner: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

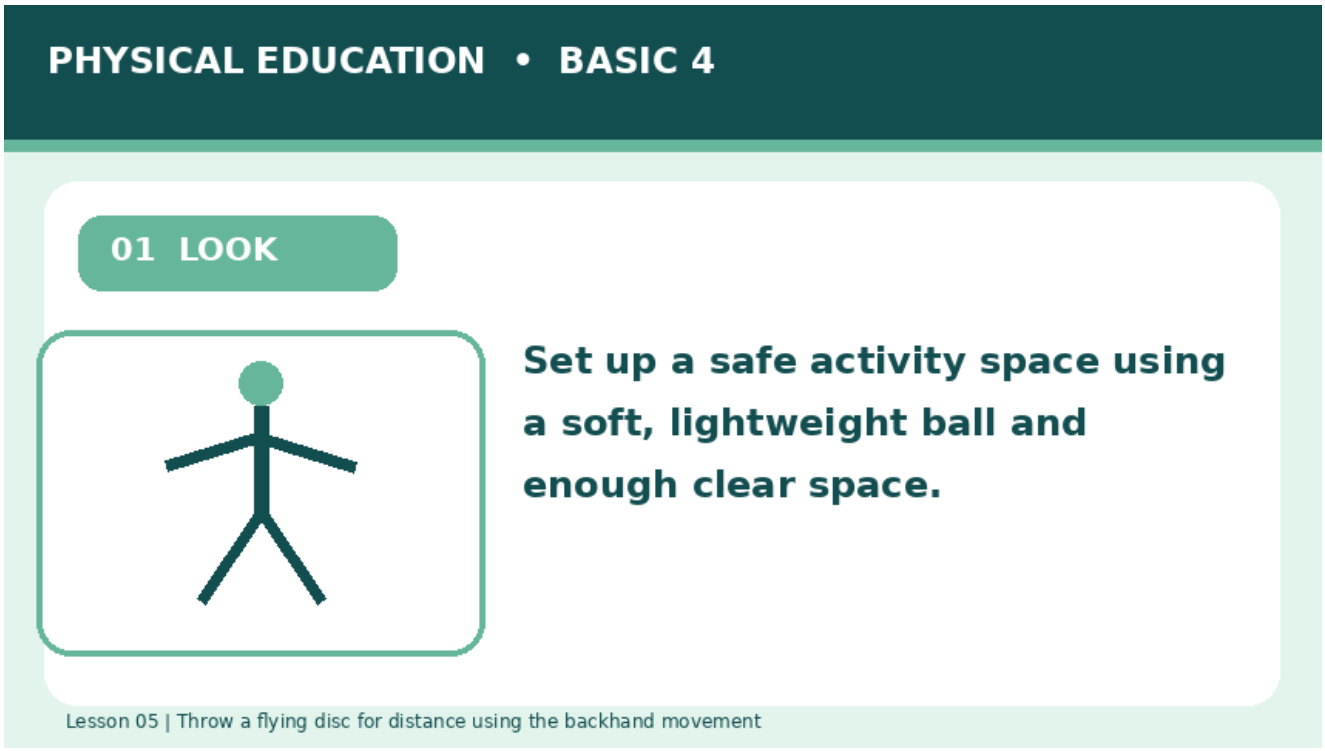

B. Claim expertise without trying the skill

C. Apply the lesson about strike a bounce ball with the hands and feet. in pairs, a partner tosses a lightweight ball to a colleague to hit over to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 05: Throw a flying disc for distance using the backhand movement

Goal: Throw a flying disc for distance using the backhand movement pattern. Throw a tennis ball to a partner over a distance using the overhand throw

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Throw a flying disc for distance using the backhand movement pattern. Throw a tennis ball to a partner over a distance using the overhand throw.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 05: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Throw a flying disc for distance using the backhand movement: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Practise unsafe tricks without learning the basic skill

C. Throw a flying disc for distance using the backhand movement pattern. Throw a tennis ball to a partner over a distance using the overhand throw

D. Rush into a demanding activity without warming up

2. [Play] Throw a flying disc for distance using the backhand movement: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a slippery or obstructed practice area

D. a soft, lightweight ball and enough clear space

3. [Play] Throw a flying disc for distance using the backhand movement: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Skip all practice and guess the result.

D. Set up a safe activity space using a soft, lightweight ball and enough clear space.

4. [Play] Throw a flying disc for distance using the backhand movement: Which setting does this grade use?

A. only a future space colony

B. team games, body control and health

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] Throw a flying disc for distance using the backhand movement: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a response that does not show the lesson skill

C. an unsupported claim with no classroom practice

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] Throw a flying disc for distance using the backhand movement: Which action comes after the opening step?

A. Practise the skill slowly: Throw a flying disc for distance using the backhand movement pattern. Throw a tennis ball to a partner over a distance using the overhand throw.

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Only watch others without trying

7. [Challenge] Throw a flying disc for distance using the backhand movement: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Leave the task unfinished without explaining

D. Practise at a short distance; check your direction and try again with feedback.

8. [Challenge] Throw a flying disc for distance using the backhand movement: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. accurate controlled ball movement

D. an opinion without observation or practice

9. [Challenge] Throw a flying disc for distance using the backhand movement: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Throw a flying disc for distance using the backhand movement: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Practise at a short distance; check your direction and try again with feedback.

C. Complete a different lesson instead

D. Copy another learner’s response without trying

11. [Challenge] Throw a flying disc for distance using the backhand movement: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] Throw a flying disc for distance using the backhand movement: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether your work demonstrates accurate controlled ball movement.

C. Whether you can ignore the agreed task

D. Whether you can avoid answering questions

13. [Challenge] Throw a flying disc for distance using the backhand movement: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Stop immediately without reflection

C. Make up results instead of practising

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Throw a flying disc for distance using the backhand movement: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Ignore all comments and leave the task incomplete

D. Change answers randomly without a reason

15. [Challenge] Throw a flying disc for distance using the backhand movement: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

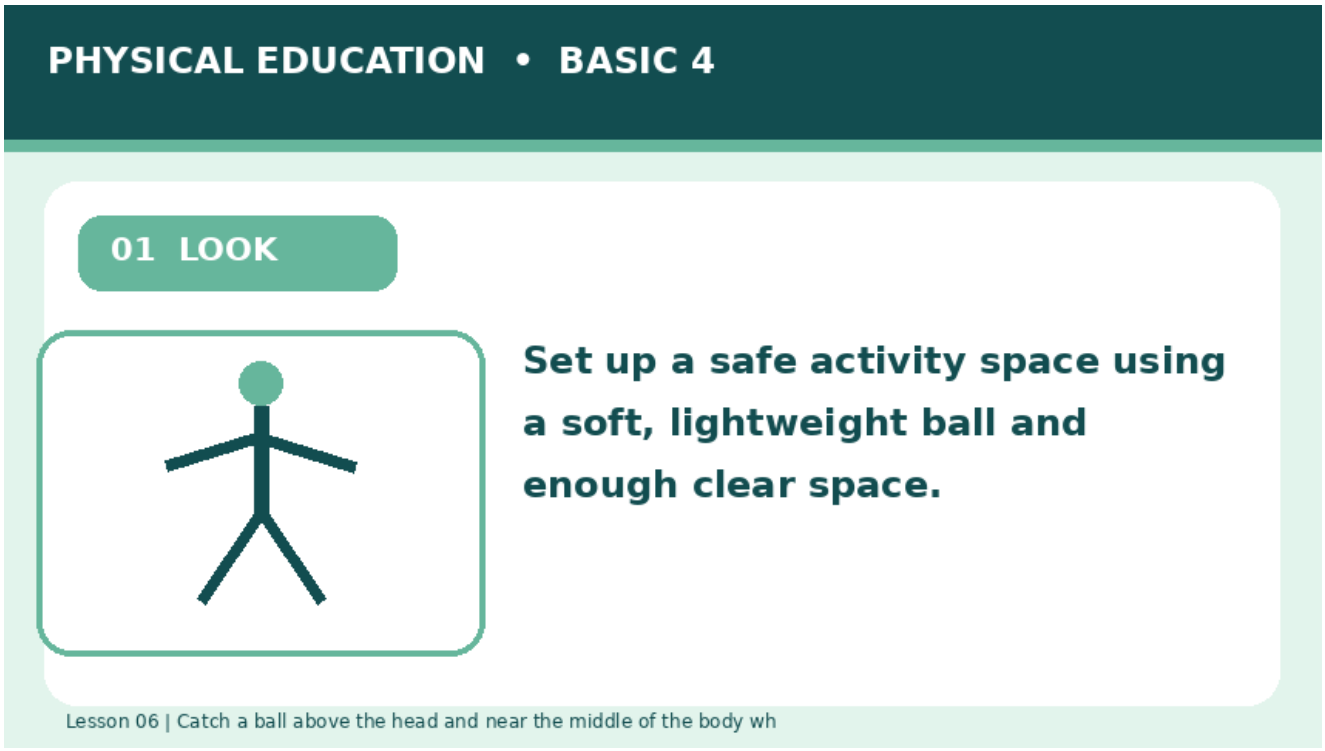

B. Claim expertise without trying the skill

C. Apply the lesson about throw a flying disc for distance using the backhand movement pattern. throw a tennis ball to a partner over a distance using the overhand throw to a suitable real-life situation.

D. Use the topic to mislead others

LESSON 06: Catch a ball above the head and near the middle of the body while

Goal: Catch a ball above the head and near the middle of the body while jogging and running. After general and specific warm up

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Catch a ball above the head and near the middle of the body while jogging and running. After general and specific warm up.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 06: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Catch a ball above the head and near the middle of the body while: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Catch a ball above the head and near the middle of the body while jogging and running. After general and specific warm up

D. Practise unsafe tricks without learning the basic skill

2. [Play] Catch a ball above the head and near the middle of the body while: What useful learning material or support is listed?

A. a soft, lightweight ball and enough clear space

B. a sharp object placed on the sports ground

C. a slippery or obstructed practice area

D. heavy unsafe equipment in a crowded space

3. [Play] Catch a ball above the head and near the middle of the body while: Which action should come first?

A. Set up a safe activity space using a soft, lightweight ball and enough clear space.

B. Finish before looking at the instructions.

C. Ignore the main task and do something unrelated.

D. Skip all practice and guess the result.

4. [Play] Catch a ball above the head and near the middle of the body while: Which setting does this grade use?

A. a topic unrelated to the current class

B. an unrelated imagined city

C. team games, body control and health

D. only a future space colony

5. [Play] Catch a ball above the head and near the middle of the body while: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. a response that does not show the lesson skill

C. an unsupported claim with no classroom practice

D. an unrelated picture with no explanation

6. [Challenge] Catch a ball above the head and near the middle of the body while: Which action comes after the opening step?

A. Only watch others without trying

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Catch a ball above the head and near the middle of the body while jogging and running. After general and specific warm up.

D. Skip to marking before learning

7. [Challenge] Catch a ball above the head and near the middle of the body while: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Practise at a short distance; check your direction and try again with feedback.

C. Stop after reading the title

D. Give a guess without trying the activity

8. [Challenge] Catch a ball above the head and near the middle of the body while: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. accurate controlled ball movement

C. a random answer with no supporting detail

D. an unrelated example that does not test the skill

9. [Challenge] Catch a ball above the head and near the middle of the body while: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Do the activity without considering other people.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Take unnecessary risks to finish first.

10. [Challenge] Catch a ball above the head and near the middle of the body while: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Practise at a short distance; check your direction and try again with feedback.

C. Avoid the stated task and its materials

D. Copy another learner’s response without trying

11. [Challenge] Catch a ball above the head and near the middle of the body while: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. The topic can be completed without observing or practising

C. Learning means only guessing and never checking

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] Catch a ball above the head and near the middle of the body while: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can finish without showing your work

C. Whether you can avoid answering questions

D. Whether you can ignore the agreed task

13. [Challenge] Catch a ball above the head and near the middle of the body while: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] Catch a ball above the head and near the middle of the body while: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Ignore all comments and leave the task incomplete

C. Skip a difficult part without asking for help

D. Revisit the steps and strengthen accurate controlled ball movement.

15. [Challenge] Catch a ball above the head and near the middle of the body while: Which choice would show responsible use of today’s skill?

A. Apply the lesson about catch a ball above the head and near the middle of the body while jogging and running. after general and specific warm up to a suitable real-life situation.

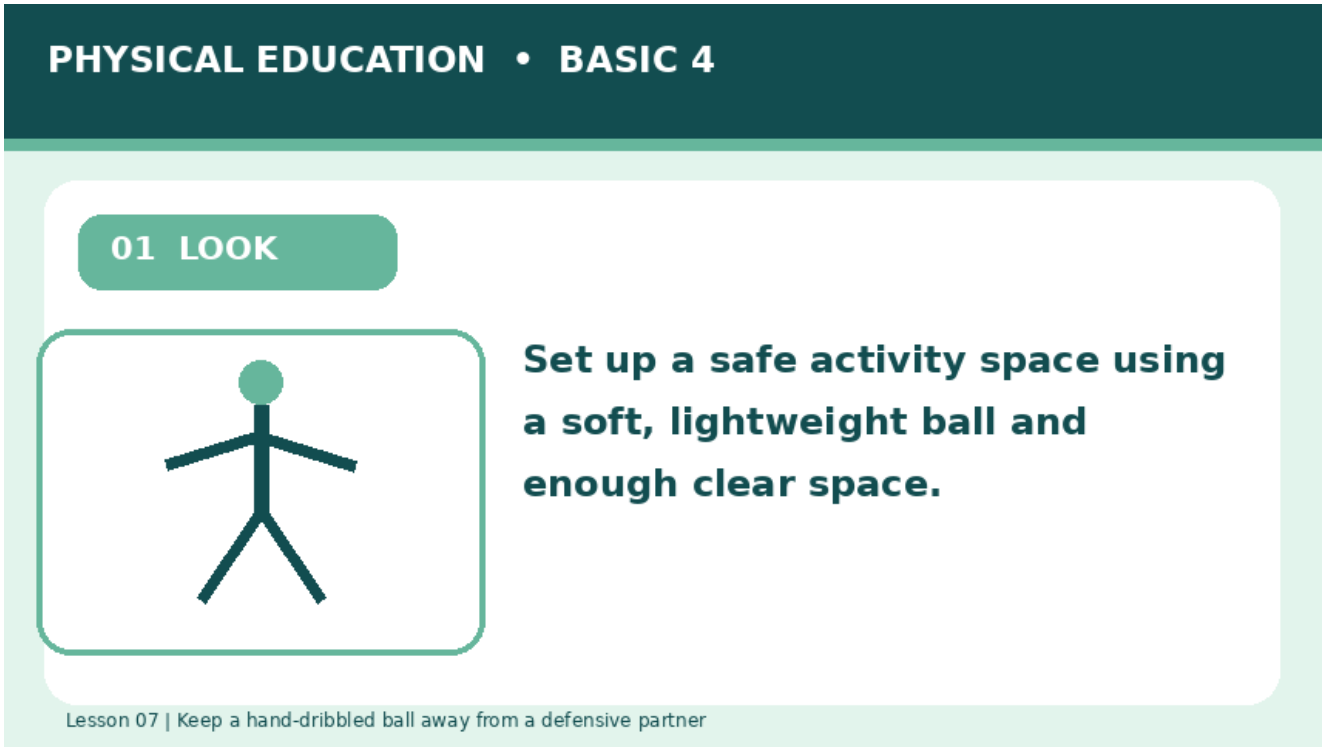

B. Avoid explaining how the skill could be used

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 07: Keep a hand-dribbled ball away from a defensive partner

Goal: Keep a hand-dribbled ball away from a defensive partner.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Keep a hand-dribbled ball away from a defensive partner.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 07: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Keep a hand-dribbled ball away from a defensive partner: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Rush into a demanding activity without warming up

C. Keep a hand-dribbled ball away from a defensive partner.

D. Practise unsafe tricks without learning the basic skill

2. [Play] Keep a hand-dribbled ball away from a defensive partner: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a slippery or obstructed practice area

C. a soft, lightweight ball and enough clear space

D. a sharp object placed on the sports ground

3. [Play] Keep a hand-dribbled ball away from a defensive partner: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Set up a safe activity space using a soft, lightweight ball and enough clear space.

D. Finish before looking at the instructions.

4. [Play] Keep a hand-dribbled ball away from a defensive partner: Which setting does this grade use?

A. an unrelated imagined city

B. team games, body control and health

C. a topic unrelated to the current class

D. only a future space colony

5. [Play] Keep a hand-dribbled ball away from a defensive partner: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] Keep a hand-dribbled ball away from a defensive partner: Which action comes after the opening step?

A. Only watch others without trying

B. Practise the skill slowly: Keep a hand-dribbled ball away from a defensive partner.

C. Change to an unrelated lesson immediately

D. Skip to marking before learning

7. [Challenge] Keep a hand-dribbled ball away from a defensive partner: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Stop after reading the title

C. Practise at a short distance; check your direction and try again with feedback.

D. Give a guess without trying the activity

8. [Challenge] Keep a hand-dribbled ball away from a defensive partner: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. a random answer with no supporting detail

C. accurate controlled ball movement

D. an unrelated example that does not test the skill

9. [Challenge] Keep a hand-dribbled ball away from a defensive partner: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

C. Do the activity without considering other people.

D. Take unnecessary risks to finish first.

10. [Challenge] Keep a hand-dribbled ball away from a defensive partner: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Practise at a short distance; check your direction and try again with feedback.

11. [Challenge] Keep a hand-dribbled ball away from a defensive partner: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] Keep a hand-dribbled ball away from a defensive partner: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can finish without showing your work

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can ignore the agreed task

13. [Challenge] Keep a hand-dribbled ball away from a defensive partner: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Keep a hand-dribbled ball away from a defensive partner: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Change answers randomly without a reason

C. Revisit the steps and strengthen accurate controlled ball movement.

D. Ignore all comments and leave the task incomplete

15. [Challenge] Keep a hand-dribbled ball away from a defensive partner: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

B. Claim expertise without trying the skill

C. Apply the lesson about keep a hand-dribbled ball away from a defensive partner to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 08: Keep a foot-dribbled ball away from a defensive partner. In pairs,

Goal: Keep a foot-dribbled ball away from a defensive partner. In pairs, foot-dribble a ball away from partner. Alternate the foot used in the

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Keep a foot-dribbled ball away from a defensive partner. In pairs, foot-dribble a ball away from partner. Alternate the foot used in the.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 08: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Keep a foot-dribbled ball away from a defensive partner. In pairs,: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Rush into a demanding activity without warming up

C. Keep a foot-dribbled ball away from a defensive partner. In pairs, foot-dribble a ball away from partner. Alternate the foot used in the

D. Practise unsafe tricks without learning the basic skill

2. [Play] Keep a foot-dribbled ball away from a defensive partner. In pairs,: What useful learning material or support is listed?

A. a soft, lightweight ball and enough clear space

B. heavy unsafe equipment in a crowded space

C. a sharp object placed on the sports ground

D. a slippery or obstructed practice area

3. [Play] Keep a foot-dribbled ball away from a defensive partner. In pairs,: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using a soft, lightweight ball and enough clear space.

C. Finish before looking at the instructions.

D. Ignore the main task and do something unrelated.

4. [Play] Keep a foot-dribbled ball away from a defensive partner. In pairs,: Which setting does this grade use?

A. an unrelated imagined city

B. a topic unrelated to the current class

C. team games, body control and health

D. only a future space colony

5. [Play] Keep a foot-dribbled ball away from a defensive partner. In pairs,: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. a response that does not show the lesson skill

C. an unsupported claim with no classroom practice

D. an unrelated picture with no explanation

6. [Challenge] Keep a foot-dribbled ball away from a defensive partner. In pairs,: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Skip to marking before learning

C. Practise the skill slowly: Keep a foot-dribbled ball away from a defensive partner. In pairs, foot-dribble a ball away from partner. Alternate the foot used in the.

D. Only watch others without trying

7. [Challenge] Keep a foot-dribbled ball away from a defensive partner. In pairs,: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Give a guess without trying the activity

C. Stop after reading the title

D. Practise at a short distance; check your direction and try again with feedback.

8. [Challenge] Keep a foot-dribbled ball away from a defensive partner. In pairs,: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. an opinion without observation or practice

D. accurate controlled ball movement

9. [Challenge] Keep a foot-dribbled ball away from a defensive partner. In pairs,: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Keep a foot-dribbled ball away from a defensive partner. In pairs,: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy another learner’s response without trying

C. Avoid the stated task and its materials

D. Practise at a short distance; check your direction and try again with feedback.

11. [Challenge] Keep a foot-dribbled ball away from a defensive partner. In pairs,: Which explanation best supports this lesson?

A. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

B. Learning means only guessing and never checking

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] Keep a foot-dribbled ball away from a defensive partner. In pairs,: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates accurate controlled ball movement.

C. Whether you can finish without showing your work

D. Whether you can avoid answering questions

13. [Challenge] Keep a foot-dribbled ball away from a defensive partner. In pairs,: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Make up results instead of practising

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Keep a foot-dribbled ball away from a defensive partner. In pairs,: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Change answers randomly without a reason

D. Ignore all comments and leave the task incomplete

15. [Challenge] Keep a foot-dribbled ball away from a defensive partner. In pairs,: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

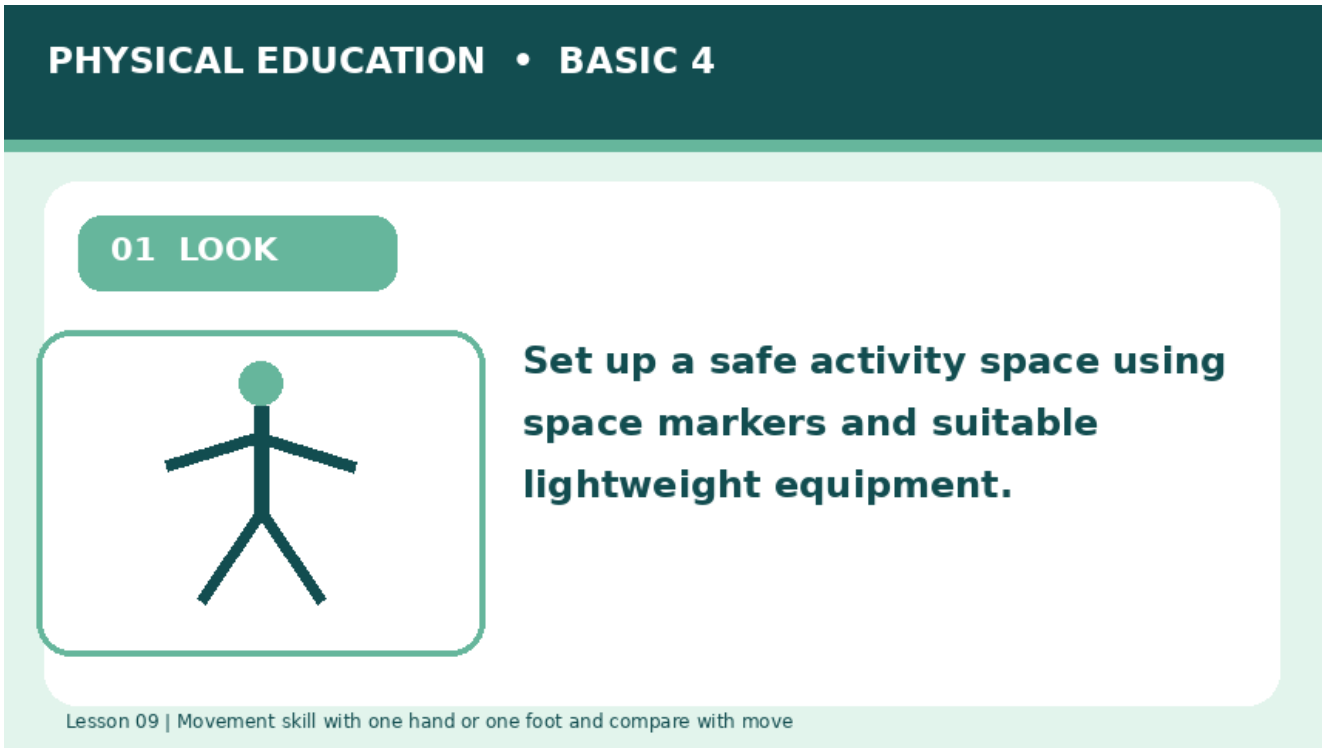

B. Claim expertise without trying the skill

C. Apply the lesson about keep a foot-dribbled ball away from a defensive partner. in pairs, foot-dribble a ball away from partner. alternate the foot used in the to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 09: Movement skill with one hand or one foot and compare with movement

Goal: Perform movement skill with one hand or one foot and compare with movement skill with two hands and two feet.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Perform movement skill with one hand or one foot and compare with movement skill with two hands and two feet.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 09: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Movement skill with one hand or one foot and compare with movement: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Perform movement skill with one hand or one foot and compare with movement skill with two hands and two feet.

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] Movement skill with one hand or one foot and compare with movement: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a slippery or obstructed practice area

D. space markers and suitable lightweight equipment

3. [Play] Movement skill with one hand or one foot and compare with movement: Which action should come first?

A. Set up a safe activity space using space markers and suitable lightweight equipment.

B. Finish before looking at the instructions.

C. Ignore the main task and do something unrelated.

D. Skip all practice and guess the result.

4. [Play] Movement skill with one hand or one foot and compare with movement: Which setting does this grade use?

A. only a future space colony

B. team games, body control and health

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] Movement skill with one hand or one foot and compare with movement: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a demonstrated movement or fitness task with self-assessment

C. a response that does not show the lesson skill

D. an unsupported claim with no classroom practice

6. [Challenge] Movement skill with one hand or one foot and compare with movement: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Only watch others without trying

D. Practise the skill slowly: Perform movement skill with one hand or one foot and compare with movement skill with two hands and two feet.

7. [Challenge] Movement skill with one hand or one foot and compare with movement: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] Movement skill with one hand or one foot and compare with movement: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. careful, safe movement

C. a random answer with no supporting detail

D. an opinion without observation or practice

9. [Challenge] Movement skill with one hand or one foot and compare with movement: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Movement skill with one hand or one foot and compare with movement: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Avoid the stated task and its materials

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Complete a different lesson instead

11. [Challenge] Movement skill with one hand or one foot and compare with movement: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. The lesson has no connection to life or skills

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] Movement skill with one hand or one foot and compare with movement: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can finish without showing your work

C. Whether you can avoid answering questions

D. Whether your work demonstrates careful, safe movement.

13. [Challenge] Movement skill with one hand or one foot and compare with movement: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Movement skill with one hand or one foot and compare with movement: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Revisit the steps and strengthen careful, safe movement.

C. Change answers randomly without a reason

D. Ignore all comments and leave the task incomplete

15. [Challenge] Movement skill with one hand or one foot and compare with movement: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

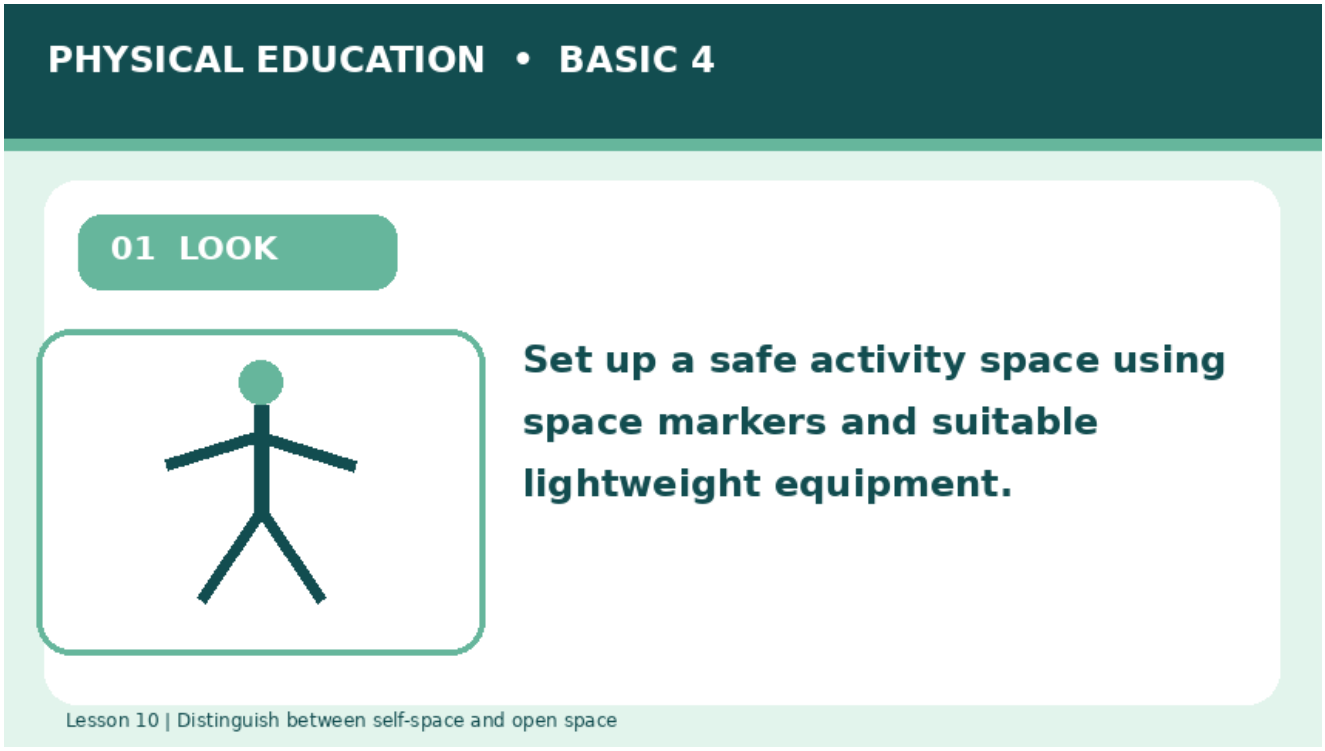

B. Use the topic to mislead others

C. Apply the lesson about perform movement skill with one hand or one foot and compare with movement skill with two hands and two feet to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 10: Distinguish between self-space and open space

Goal: Distinguish between self-space and open space.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Distinguish between self-space and open space.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 10: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Distinguish between self-space and open space: What is this lesson mainly about?

A. Distinguish between self-space and open space.

B. Rush into a demanding activity without warming up

C. Practise unsafe tricks without learning the basic skill

D. Ignore the movement task and do only an unrelated game

2. [Play] Distinguish between self-space and open space: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. a sharp object placed on the sports ground

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] Distinguish between self-space and open space: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Finish before looking at the instructions.

D. Ignore the main task and do something unrelated.

4. [Play] Distinguish between self-space and open space: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. team games, body control and health

D. an unrelated imagined city

5. [Play] Distinguish between self-space and open space: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. an unsupported claim with no classroom practice

6. [Challenge] Distinguish between self-space and open space: Which action comes after the opening step?

A. Practise the skill slowly: Distinguish between self-space and open space.

B. Only watch others without trying

C. Change to an unrelated lesson immediately

D. Skip to marking before learning

7. [Challenge] Distinguish between self-space and open space: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Leave the task unfinished without explaining

D. Give a guess without trying the activity

8. [Challenge] Distinguish between self-space and open space: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. careful, safe movement

D. a random answer with no supporting detail

9. [Challenge] Distinguish between self-space and open space: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Ignore the teacher’s safety instructions.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Do the activity without considering other people.

10. [Challenge] Distinguish between self-space and open space: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Avoid the stated task and its materials

11. [Challenge] Distinguish between self-space and open space: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. Learning means only guessing and never checking

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] Distinguish between self-space and open space: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether your work demonstrates careful, safe movement.

C. Whether you can ignore the agreed task

D. Whether you can avoid answering questions

13. [Challenge] Distinguish between self-space and open space: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Make up results instead of practising

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Stop immediately without reflection

14. [Challenge] Distinguish between self-space and open space: How should a learner improve after feedback?

A. Revisit the steps and strengthen careful, safe movement.

B. Ignore all comments and leave the task incomplete

C. Change answers randomly without a reason

D. Skip a difficult part without asking for help

15. [Challenge] Distinguish between self-space and open space: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

B. Use the topic to mislead others

C. Apply the lesson about distinguish between self-space and open space to a suitable real-life situation.

D. Claim expertise without trying the skill

LESSON 11: Body parts that are used for kicking a ball

Goal: Identify body parts that are used for kicking a ball.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Identify body parts that are used for kicking a ball.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 11: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Body parts that are used for kicking a ball: What is this lesson mainly about?

A. Identify body parts that are used for kicking a ball.

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] Body parts that are used for kicking a ball: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a soft, lightweight ball and enough clear space

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] Body parts that are used for kicking a ball: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Set up a safe activity space using a soft, lightweight ball and enough clear space.

D. Skip all practice and guess the result.

4. [Play] Body parts that are used for kicking a ball: Which setting does this grade use?

A. only a future space colony

B. an unrelated imagined city

C. team games, body control and health

D. a topic unrelated to the current class

5. [Play] Body parts that are used for kicking a ball: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] Body parts that are used for kicking a ball: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Identify body parts that are used for kicking a ball.

D. Only watch others without trying

7. [Challenge] Body parts that are used for kicking a ball: Which practice completes the three lesson stages?

A. Practise at a short distance; check your direction and try again with feedback.

B. Give a guess without trying the activity

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] Body parts that are used for kicking a ball: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. accurate controlled ball movement

D. a random answer with no supporting detail

9. [Challenge] Body parts that are used for kicking a ball: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

C. Do the activity without considering other people.

D. Take unnecessary risks to finish first.

10. [Challenge] Body parts that are used for kicking a ball: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Avoid the stated task and its materials

C. Practise at a short distance; check your direction and try again with feedback.

D. Copy another learner’s response without trying

11. [Challenge] Body parts that are used for kicking a ball: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Learning means only guessing and never checking

C. The topic can be completed without observing or practising

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] Body parts that are used for kicking a ball: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether your work demonstrates accurate controlled ball movement.

13. [Challenge] Body parts that are used for kicking a ball: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] Body parts that are used for kicking a ball: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen accurate controlled ball movement.

D. Change answers randomly without a reason

15. [Challenge] Body parts that are used for kicking a ball: Which choice would show responsible use of today’s skill?

A. Apply the lesson about identify body parts that are used for kicking a ball to a suitable real-life situation.

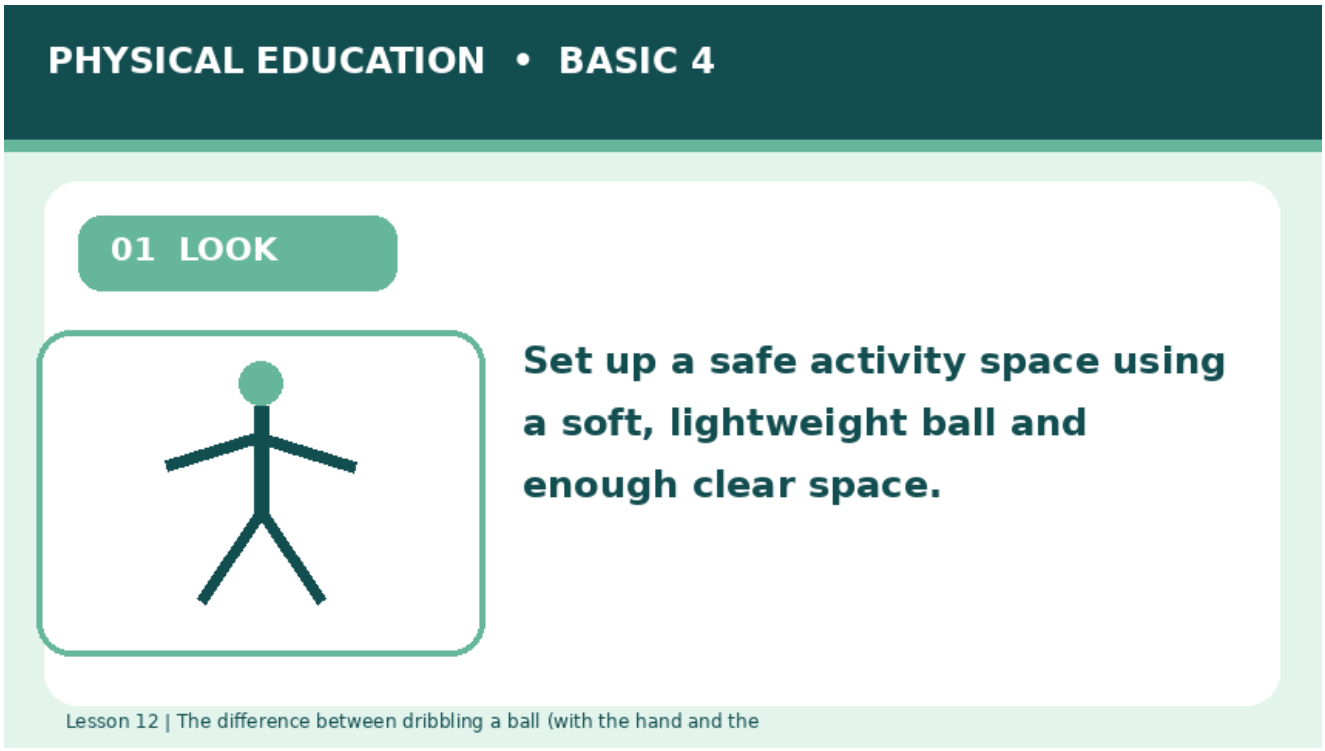

B. Avoid explaining how the skill could be used

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 12: The difference between dribbling a ball (with the hand and the

Goal: Identify the difference between dribbling a ball (with the hand and the foot, separately) while moving forward and when changing

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Identify the difference between dribbling a ball (with the hand and the foot, separately) while moving forward and when changing.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 12: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The difference between dribbling a ball (with the hand and the: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Rush into a demanding activity without warming up

C. Practise unsafe tricks without learning the basic skill

D. Identify the difference between dribbling a ball (with the hand and the foot, separately) while moving forward and when changing

2. [Play] The difference between dribbling a ball (with the hand and the: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a soft, lightweight ball and enough clear space

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] The difference between dribbling a ball (with the hand and the: Which action should come first?

A. Finish before looking at the instructions.

B. Set up a safe activity space using a soft, lightweight ball and enough clear space.

C. Ignore the main task and do something unrelated.

D. Skip all practice and guess the result.

4. [Play] The difference between dribbling a ball (with the hand and the: Which setting does this grade use?

A. team games, body control and health

B. an unrelated imagined city

C. only a future space colony

D. a topic unrelated to the current class

5. [Play] The difference between dribbling a ball (with the hand and the: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. an unrelated picture with no explanation

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] The difference between dribbling a ball (with the hand and the: Which action comes after the opening step?

A. Only watch others without trying

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Identify the difference between dribbling a ball (with the hand and the foot, separately) while moving forward and when changing.

D. Skip to marking before learning

7. [Challenge] The difference between dribbling a ball (with the hand and the: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Practise at a short distance; check your direction and try again with feedback.

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] The difference between dribbling a ball (with the hand and the: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. an opinion without observation or practice

D. accurate controlled ball movement

9. [Challenge] The difference between dribbling a ball (with the hand and the: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] The difference between dribbling a ball (with the hand and the: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy another learner’s response without trying

C. Practise at a short distance; check your direction and try again with feedback.

D. Avoid the stated task and its materials

11. [Challenge] The difference between dribbling a ball (with the hand and the: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The lesson has no connection to life or skills

C. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

D. The topic can be completed without observing or practising

12. [Challenge] The difference between dribbling a ball (with the hand and the: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can avoid answering questions

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can ignore the agreed task

13. [Challenge] The difference between dribbling a ball (with the hand and the: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] The difference between dribbling a ball (with the hand and the: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Change answers randomly without a reason

D. Revisit the steps and strengthen accurate controlled ball movement.

15. [Challenge] The difference between dribbling a ball (with the hand and the: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Apply the lesson about identify the difference between dribbling a ball (with the hand and the foot, separately) while moving forward and when changing to a suitable real-life situation.

LESSON 13: Continuous ‘v’ push-up

Goal: Perform continuous ‘v’ push-up

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Perform continuous ‘v’ push-up.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 13: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Continuous ‘v’ push-up: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Practise unsafe tricks without learning the basic skill

C. Perform continuous ‘v’ push-up

D. Rush into a demanding activity without warming up

2. [Play] Continuous ‘v’ push-up: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. space markers and suitable lightweight equipment

C. heavy unsafe equipment in a crowded space

D. a sharp object placed on the sports ground

3. [Play] Continuous ‘v’ push-up: Which action should come first?

A. Finish before looking at the instructions.

B. Ignore the main task and do something unrelated.

C. Set up a safe activity space using space markers and suitable lightweight equipment.

D. Skip all practice and guess the result.

4. [Play] Continuous ‘v’ push-up: Which setting does this grade use?

A. only a future space colony

B. team games, body control and health

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] Continuous ‘v’ push-up: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. a response that does not show the lesson skill

6. [Challenge] Continuous ‘v’ push-up: Which action comes after the opening step?

A. Practise the skill slowly: Perform continuous ‘v’ push-up.

B. Change to an unrelated lesson immediately

C. Only watch others without trying

D. Skip to marking before learning

7. [Challenge] Continuous ‘v’ push-up: Which practice completes the three lesson stages?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Leave the task unfinished without explaining

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] Continuous ‘v’ push-up: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. a random answer with no supporting detail

C. careful, safe movement

D. an unrelated example that does not test the skill

9. [Challenge] Continuous ‘v’ push-up: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Ignore the teacher’s safety instructions.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Do the activity without considering other people.

10. [Challenge] Continuous ‘v’ push-up: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Avoid the stated task and its materials

C. Complete a different lesson instead

D. Observe a demonstration, practise slowly, then reflect on one improvement.

11. [Challenge] Continuous ‘v’ push-up: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] Continuous ‘v’ push-up: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can finish without showing your work

C. Whether your work demonstrates careful, safe movement.

D. Whether you can ignore the agreed task

13. [Challenge] Continuous ‘v’ push-up: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Make up results instead of practising

14. [Challenge] Continuous ‘v’ push-up: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen careful, safe movement.

D. Change answers randomly without a reason

15. [Challenge] Continuous ‘v’ push-up: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Apply the lesson about perform continuous ‘v’ push-up to a suitable real-life situation.

LESSON 14: Two sets of eight continuous ‘v’ push-ups

Goal: Perform two sets of eight continuous ‘v’ push-ups.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Perform two sets of eight continuous ‘v’ push-ups.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 14: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Two sets of eight continuous ‘v’ push-ups: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Practise unsafe tricks without learning the basic skill

C. Perform two sets of eight continuous ‘v’ push-ups.

D. Rush into a demanding activity without warming up

2. [Play] Two sets of eight continuous ‘v’ push-ups: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. space markers and suitable lightweight equipment

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Two sets of eight continuous ‘v’ push-ups: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Finish before looking at the instructions.

D. Ignore the main task and do something unrelated.

4. [Play] Two sets of eight continuous ‘v’ push-ups: Which setting does this grade use?

A. team games, body control and health

B. a topic unrelated to the current class

C. only a future space colony

D. an unrelated imagined city

5. [Play] Two sets of eight continuous ‘v’ push-ups: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] Two sets of eight continuous ‘v’ push-ups: Which action comes after the opening step?

A. Practise the skill slowly: Perform two sets of eight continuous ‘v’ push-ups.

B. Skip to marking before learning

C. Only watch others without trying

D. Change to an unrelated lesson immediately

7. [Challenge] Two sets of eight continuous ‘v’ push-ups: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] Two sets of eight continuous ‘v’ push-ups: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. careful, safe movement

C. a random answer with no supporting detail

D. an unrelated example that does not test the skill

9. [Challenge] Two sets of eight continuous ‘v’ push-ups: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Do the activity without considering other people.

10. [Challenge] Two sets of eight continuous ‘v’ push-ups: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy another learner’s response without trying

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Avoid the stated task and its materials

11. [Challenge] Two sets of eight continuous ‘v’ push-ups: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] Two sets of eight continuous ‘v’ push-ups: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether your work demonstrates careful, safe movement.

13. [Challenge] Two sets of eight continuous ‘v’ push-ups: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Stop immediately without reflection

C. Make up results instead of practising

D. Repeat the same error without checking feedback

14. [Challenge] Two sets of eight continuous ‘v’ push-ups: How should a learner improve after feedback?

A. Revisit the steps and strengthen careful, safe movement.

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Change answers randomly without a reason

15. [Challenge] Two sets of eight continuous ‘v’ push-ups: Which choice would show responsible use of today’s skill?

A. Apply the lesson about perform two sets of eight continuous ‘v’ push-ups to a suitable real-life situation.

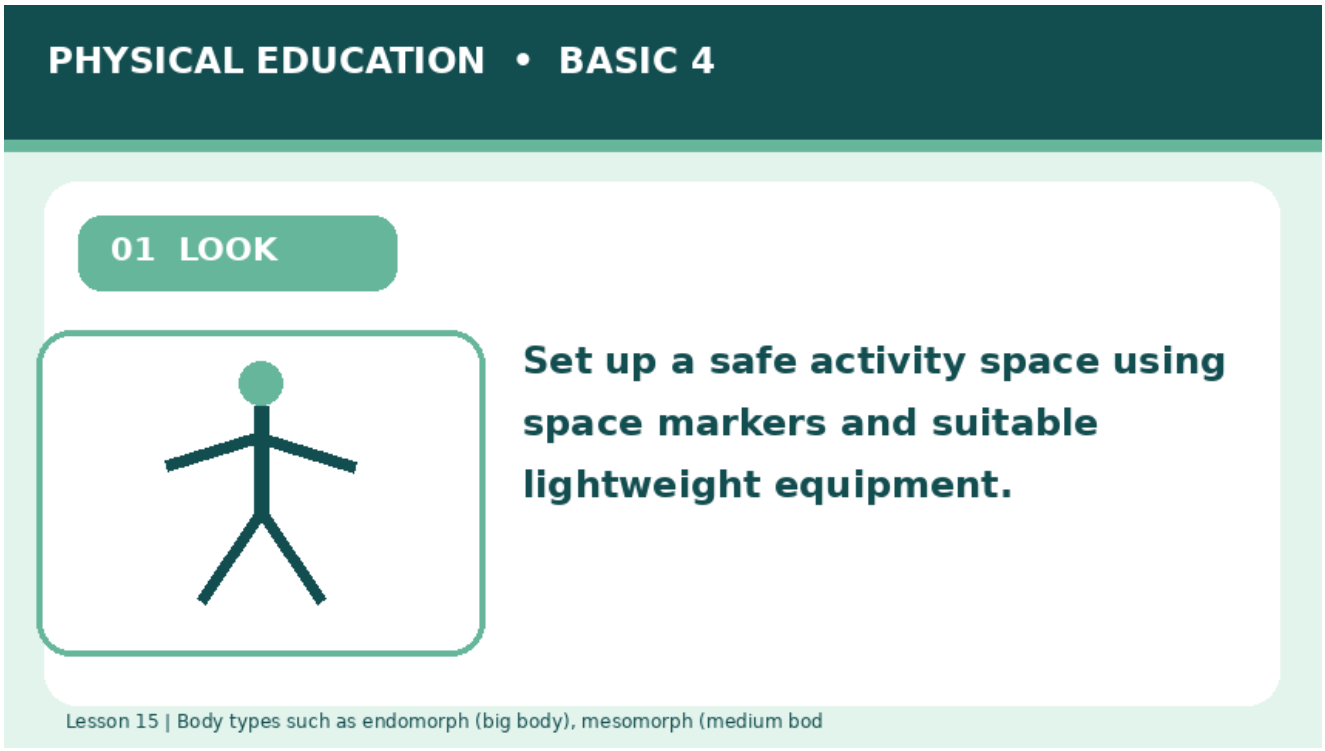

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Avoid explaining how the skill could be used

LESSON 15: Body types such as endomorph (big body), mesomorph (medium body)

Goal: Identify body types such as endomorph (big body), mesomorph (medium body) and ectomorph (slim Body)

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify body types such as endomorph (big body), mesomorph (medium body) and ectomorph (slim Body).

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 15: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Body types such as endomorph (big body), mesomorph (medium body): What is this lesson mainly about?

A. Identify body types such as endomorph (big body), mesomorph (medium body) and ectomorph (slim Body)

B. Rush into a demanding activity without warming up

C. Practise unsafe tricks without learning the basic skill

D. Ignore the movement task and do only an unrelated game

2. [Play] Body types such as endomorph (big body), mesomorph (medium body): What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a slippery or obstructed practice area

D. space markers and suitable lightweight equipment

3. [Play] Body types such as endomorph (big body), mesomorph (medium body): Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Set up a safe activity space using space markers and suitable lightweight equipment.

D. Finish before looking at the instructions.

4. [Play] Body types such as endomorph (big body), mesomorph (medium body): Which setting does this grade use?

A. an unrelated imagined city

B. team games, body control and health

C. a topic unrelated to the current class

D. only a future space colony

5. [Play] Body types such as endomorph (big body), mesomorph (medium body): What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. an unsupported claim with no classroom practice

6. [Challenge] Body types such as endomorph (big body), mesomorph (medium body): Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Practise the skill slowly: Identify body types such as endomorph (big body), mesomorph (medium body) and ectomorph (slim Body).

C. Skip to marking before learning

D. Only watch others without trying

7. [Challenge] Body types such as endomorph (big body), mesomorph (medium body): Which practice completes the three lesson stages?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Leave the task unfinished without explaining

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] Body types such as endomorph (big body), mesomorph (medium body): What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. careful, safe movement

D. a random answer with no supporting detail

9. [Challenge] Body types such as endomorph (big body), mesomorph (medium body): Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

C. Take unnecessary risks to finish first.

D. Do the activity without considering other people.

10. [Challenge] Body types such as endomorph (big body), mesomorph (medium body): Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Complete a different lesson instead

D. Avoid the stated task and its materials

11. [Challenge] Body types such as endomorph (big body), mesomorph (medium body): Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] Body types such as endomorph (big body), mesomorph (medium body): What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can finish without showing your work

C. Whether your work demonstrates careful, safe movement.

D. Whether you can ignore the agreed task

13. [Challenge] Body types such as endomorph (big body), mesomorph (medium body): Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Repeat the same error without checking feedback

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] Body types such as endomorph (big body), mesomorph (medium body): How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen careful, safe movement.

D. Ignore all comments and leave the task incomplete

15. [Challenge] Body types such as endomorph (big body), mesomorph (medium body): Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Apply the lesson about identify body types such as endomorph (big body), mesomorph (medium body) and ectomorph (slim body) to a suitable real-life situation.

LESSON 16: How prolong physical activity increases endurance, allowing

Goal: Discuss how prolong physical activity increases endurance, allowing movement to occur for longer periods of time.

Learn it

Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

Useful material: a clock or timer and drinking water

Do it in three steps

1. Set up a safe activity space using a clock or timer and drinking water.

2. Practise the skill slowly: Discuss how prolong physical activity increases endurance, allowing movement to occur for longer periods of time.

3. Try a gentle activity, check how you feel, and talk about an appropriate rest.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

Try this: Try a gentle activity, check how you feel, and talk about an appropriate rest.

Show your learning: a safe personal activity plan. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 16: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] How prolong physical activity increases endurance, allowing: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Practise unsafe tricks without learning the basic skill

C. Discuss how prolong physical activity increases endurance, allowing movement to occur for longer periods of time.

D. Rush into a demanding activity without warming up

2. [Play] How prolong physical activity increases endurance, allowing: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. heavy unsafe equipment in a crowded space

C. a clock or timer and drinking water

D. a slippery or obstructed practice area

3. [Play] How prolong physical activity increases endurance, allowing: Which action should come first?

A. Skip all practice and guess the result.

B. Finish before looking at the instructions.

C. Set up a safe activity space using a clock or timer and drinking water.

D. Ignore the main task and do something unrelated.

4. [Play] How prolong physical activity increases endurance, allowing: Which setting does this grade use?

A. only a future space colony

B. team games, body control and health

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] How prolong physical activity increases endurance, allowing: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] How prolong physical activity increases endurance, allowing: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Skip to marking before learning

C. Practise the skill slowly: Discuss how prolong physical activity increases endurance, allowing movement to occur for longer periods of time.

D. Only watch others without trying

7. [Challenge] How prolong physical activity increases endurance, allowing: Which practice completes the three lesson stages?

A. Try a gentle activity, check how you feel, and talk about an appropriate rest.

B. Give a guess without trying the activity

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] How prolong physical activity increases endurance, allowing: What counts as good evidence of learning here?

A. a safe personal activity plan

B. an unrelated example that does not test the skill

C. a random answer with no supporting detail

D. an opinion without observation or practice

9. [Challenge] How prolong physical activity increases endurance, allowing: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

C. Take unnecessary risks to finish first.

D. Do the activity without considering other people.

10. [Challenge] How prolong physical activity increases endurance, allowing: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Complete a different lesson instead

C. Try a gentle activity, check how you feel, and talk about an appropriate rest.

D. Avoid the stated task and its materials

11. [Challenge] How prolong physical activity increases endurance, allowing: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] How prolong physical activity increases endurance, allowing: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can avoid answering questions

C. Whether you can finish without showing your work

D. Whether your work demonstrates a safe personal activity plan.

13. [Challenge] How prolong physical activity increases endurance, allowing: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] How prolong physical activity increases endurance, allowing: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen a safe personal activity plan.

D. Ignore all comments and leave the task incomplete

15. [Challenge] How prolong physical activity increases endurance, allowing: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

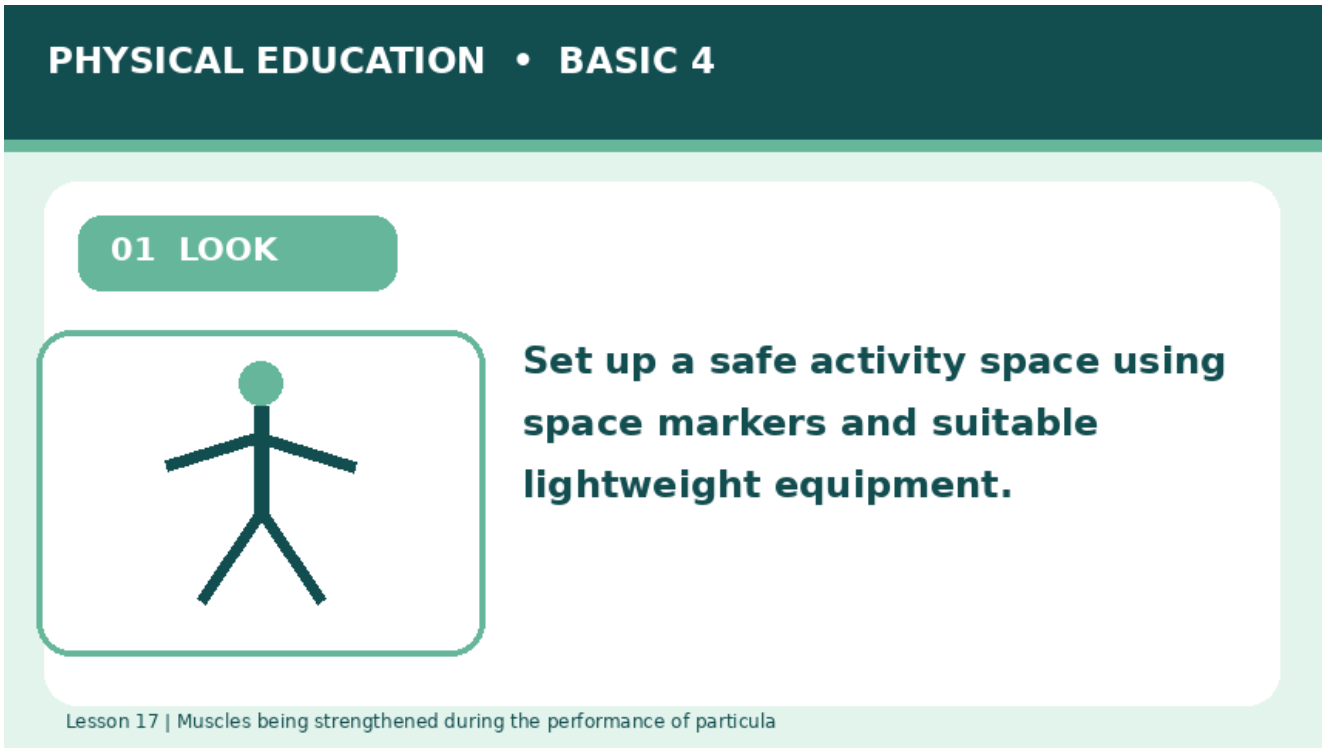

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Apply the lesson about discuss how prolong physical activity increases endurance, allowing movement to occur for longer periods of time to a suitable real-life situation.

LESSON 17: Muscles being strengthened during the performance of particular

Goal: Identify muscles being strengthened during the performance of particular physical activities. Push-ups strengthen the biceps muscles and muscles of the

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify muscles being strengthened during the performance of particular physical activities. Push-ups strengthen the biceps muscles and muscles of the.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 17: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Muscles being strengthened during the performance of particular: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Identify muscles being strengthened during the performance of particular physical activities. Push-ups strengthen the biceps muscles and muscles of the

D. Ignore the movement task and do only an unrelated game

2. [Play] Muscles being strengthened during the performance of particular: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a sharp object placed on the sports ground

C. heavy unsafe equipment in a crowded space

D. space markers and suitable lightweight equipment

3. [Play] Muscles being strengthened during the performance of particular: Which action should come first?

A. Set up a safe activity space using space markers and suitable lightweight equipment.

B. Finish before looking at the instructions.

C. Skip all practice and guess the result.

D. Ignore the main task and do something unrelated.

4. [Play] Muscles being strengthened during the performance of particular: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. team games, body control and health

D. an unrelated imagined city

5. [Play] Muscles being strengthened during the performance of particular: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. an unrelated picture with no explanation

C. a response that does not show the lesson skill

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] Muscles being strengthened during the performance of particular: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Identify muscles being strengthened during the performance of particular physical activities. Push-ups strengthen the biceps muscles and muscles of the.

D. Only watch others without trying

7. [Challenge] Muscles being strengthened during the performance of particular: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Give a guess without trying the activity

D. Observe a demonstration, practise slowly, then reflect on one improvement.

8. [Challenge] Muscles being strengthened during the performance of particular: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. an unrelated example that does not test the skill

C. careful, safe movement

D. a random answer with no supporting detail

9. [Challenge] Muscles being strengthened during the performance of particular: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Do the activity without considering other people.

10. [Challenge] Muscles being strengthened during the performance of particular: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Complete a different lesson instead

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Avoid the stated task and its materials

11. [Challenge] Muscles being strengthened during the performance of particular: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Learning means only guessing and never checking

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. The topic can be completed without observing or practising

12. [Challenge] Muscles being strengthened during the performance of particular: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates careful, safe movement.

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Muscles being strengthened during the performance of particular: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Muscles being strengthened during the performance of particular: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Revisit the steps and strengthen careful, safe movement.

C. Ignore all comments and leave the task incomplete

D. Skip a difficult part without asking for help

15. [Challenge] Muscles being strengthened during the performance of particular: Which choice would show responsible use of today’s skill?

A. Apply the lesson about identify muscles being strengthened during the performance of particular physical activities. push-ups strengthen the biceps muscles and muscles of the to a suitable real-life situation.

B. Avoid explaining how the skill could be used

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 18: The effects of drugs use for physical activities

Goal: Identify the effects of drugs use for physical activities.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify the effects of drugs use for physical activities.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 18: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The effects of drugs use for physical activities: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Identify the effects of drugs use for physical activities.

D. Ignore the movement task and do only an unrelated game

2. [Play] The effects of drugs use for physical activities: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a sharp object placed on the sports ground

C. heavy unsafe equipment in a crowded space

D. space markers and suitable lightweight equipment

3. [Play] The effects of drugs use for physical activities: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Finish before looking at the instructions.

D. Ignore the main task and do something unrelated.

4. [Play] The effects of drugs use for physical activities: Which setting does this grade use?

A. team games, body control and health

B. a topic unrelated to the current class

C. an unrelated imagined city

D. only a future space colony

5. [Play] The effects of drugs use for physical activities: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] The effects of drugs use for physical activities: Which action comes after the opening step?

A. Only watch others without trying

B. Practise the skill slowly: Identify the effects of drugs use for physical activities.

C. Skip to marking before learning

D. Change to an unrelated lesson immediately

7. [Challenge] The effects of drugs use for physical activities: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Leave the task unfinished without explaining

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Stop after reading the title

8. [Challenge] The effects of drugs use for physical activities: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. an opinion without observation or practice

D. careful, safe movement

9. [Challenge] The effects of drugs use for physical activities: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Do the activity without considering other people.

10. [Challenge] The effects of drugs use for physical activities: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] The effects of drugs use for physical activities: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The lesson has no connection to life or skills

C. The topic can be completed without observing or practising

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] The effects of drugs use for physical activities: What should a partner help you check?

A. Whether your work demonstrates careful, safe movement.

B. Whether you can finish without showing your work

C. Whether you can avoid answering questions

D. Whether you can ignore the agreed task

13. [Challenge] The effects of drugs use for physical activities: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Make up results instead of practising

D. Stop immediately without reflection

14. [Challenge] The effects of drugs use for physical activities: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Change answers randomly without a reason

C. Revisit the steps and strengthen careful, safe movement.

D. Skip a difficult part without asking for help

15. [Challenge] The effects of drugs use for physical activities: Which choice would show responsible use of today’s skill?

A. Apply the lesson about identify the effects of drugs use for physical activities to a suitable real-life situation.

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Avoid explaining how the skill could be used

LESSON 19: Participate in a variety of group settings (e.g., partners, small

Goal: . Participate in a variety of group settings (e.g., partners, small groups and large groups) without interfering with others.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: . Participate in a variety of group settings (e.g., partners, small groups and large groups) without interfering with others.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 19: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Participate in a variety of group settings (e.g., partners, small: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Ignore the movement task and do only an unrelated game

C. . Participate in a variety of group settings (e.g., partners, small groups and large groups) without interfering with others.

D. Rush into a demanding activity without warming up

2. [Play] Participate in a variety of group settings (e.g., partners, small: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Participate in a variety of group settings (e.g., partners, small: Which action should come first?

A. Set up a safe activity space using space markers and suitable lightweight equipment.

B. Ignore the main task and do something unrelated.

C. Skip all practice and guess the result.

D. Finish before looking at the instructions.

4. [Play] Participate in a variety of group settings (e.g., partners, small: Which setting does this grade use?

A. an unrelated imagined city

B. a topic unrelated to the current class

C. team games, body control and health

D. only a future space colony

5. [Play] Participate in a variety of group settings (e.g., partners, small: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a demonstrated movement or fitness task with self-assessment

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which action comes after the opening step?

A. Practise the skill slowly: . Participate in a variety of group settings (e.g., partners, small groups and large groups) without interfering with others.

B. Skip to marking before learning

C. Only watch others without trying

D. Change to an unrelated lesson immediately

7. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Leave the task unfinished without explaining

8. [Challenge] Participate in a variety of group settings (e.g., partners, small: What counts as good evidence of learning here?

A. careful, safe movement

B. a random answer with no supporting detail

C. an opinion without observation or practice

D. an unrelated example that does not test the skill

9. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

B. Take unnecessary risks to finish first.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Complete a different lesson instead

C. Copy another learner’s response without trying

D. Observe a demonstration, practise slowly, then reflect on one improvement.

11. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. Learning means only guessing and never checking

C. The lesson has no connection to life or skills

D. The topic can be completed without observing or practising

12. [Challenge] Participate in a variety of group settings (e.g., partners, small: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether your work demonstrates careful, safe movement.

C. Whether you can finish without showing your work

D. Whether you can ignore the agreed task

13. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] Participate in a variety of group settings (e.g., partners, small: How should a learner improve after feedback?

A. Revisit the steps and strengthen careful, safe movement.

B. Ignore all comments and leave the task incomplete

C. Change answers randomly without a reason

D. Skip a difficult part without asking for help

15. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

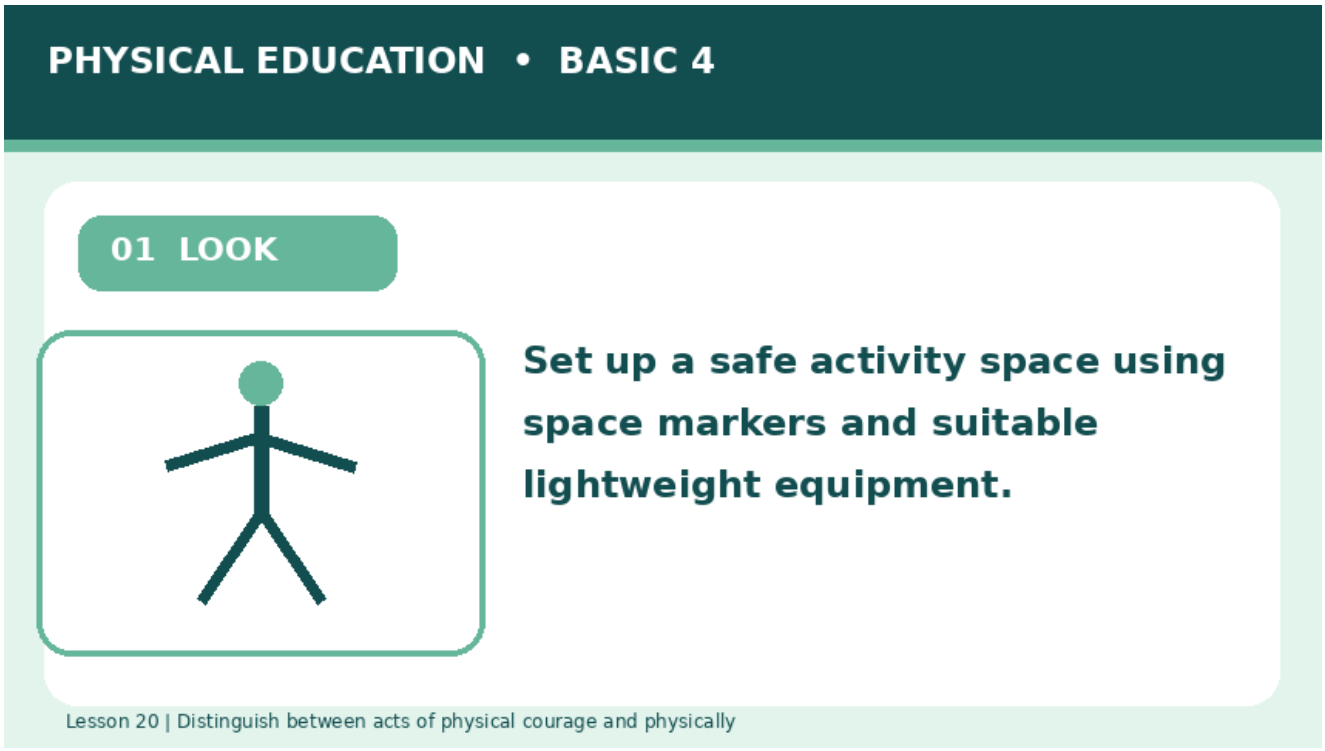

B. Apply the lesson about . participate in a variety of group settings (e.g., partners, small groups and large groups) without interfering with others to a suitable real-life situation.

C. Avoid explaining how the skill could be used

D. Claim expertise without trying the skill

LESSON 20: Distinguish between acts of physical courage and physically

Goal: Distinguish between acts of physical courage and physically reckless acts and explain the key characteristics of each.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Distinguish between acts of physical courage and physically reckless acts and explain the key characteristics of each.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 20: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Distinguish between acts of physical courage and physically: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Distinguish between acts of physical courage and physically reckless acts and explain the key characteristics of each.

C. Ignore the movement task and do only an unrelated game

D. Practise unsafe tricks without learning the basic skill

2. [Play] Distinguish between acts of physical courage and physically: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a sharp object placed on the sports ground

C. space markers and suitable lightweight equipment

D. heavy unsafe equipment in a crowded space

3. [Play] Distinguish between acts of physical courage and physically: Which action should come first?

A. Finish before looking at the instructions.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Ignore the main task and do something unrelated.

D. Skip all practice and guess the result.

4. [Play] Distinguish between acts of physical courage and physically: Which setting does this grade use?

A. an unrelated imagined city

B. team games, body control and health

C. only a future space colony

D. a topic unrelated to the current class

5. [Play] Distinguish between acts of physical courage and physically: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a response that does not show the lesson skill

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] Distinguish between acts of physical courage and physically: Which action comes after the opening step?

A. Skip to marking before learning

B. Only watch others without trying

C. Change to an unrelated lesson immediately

D. Practise the skill slowly: Distinguish between acts of physical courage and physically reckless acts and explain the key characteristics of each.

7. [Challenge] Distinguish between acts of physical courage and physically: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] Distinguish between acts of physical courage and physically: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an opinion without observation or practice

C. careful, safe movement

D. an unrelated example that does not test the skill

9. [Challenge] Distinguish between acts of physical courage and physically: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Distinguish between acts of physical courage and physically: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Avoid the stated task and its materials

C. Copy another learner’s response without trying

D. Observe a demonstration, practise slowly, then reflect on one improvement.

11. [Challenge] Distinguish between acts of physical courage and physically: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. Learning means only guessing and never checking

12. [Challenge] Distinguish between acts of physical courage and physically: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether your work demonstrates careful, safe movement.

C. Whether you can finish without showing your work

D. Whether you can ignore the agreed task

13. [Challenge] Distinguish between acts of physical courage and physically: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Make up results instead of practising

C. Stop immediately without reflection

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Distinguish between acts of physical courage and physically: How should a learner improve after feedback?

A. Revisit the steps and strengthen careful, safe movement.

B. Ignore all comments and leave the task incomplete

C. Skip a difficult part without asking for help

D. Change answers randomly without a reason

15. [Challenge] Distinguish between acts of physical courage and physically: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

B. Use the topic to mislead others

C. Apply the lesson about distinguish between acts of physical courage and physically reckless acts and explain the key characteristics of each to a suitable real-life situation.

D. Claim expertise without trying the skill
