COMPUTING

Basic 6 — Illustrated Learning Workbook

Learn • Explore • Practise • Play • Challenge

35 lessons | 175 Play questions | 350 Challenge questions

Basic 4–6: independent adaptation of selected indicators in the 2019 NaCCA Computing curriculum; not an exhaustive mapping.

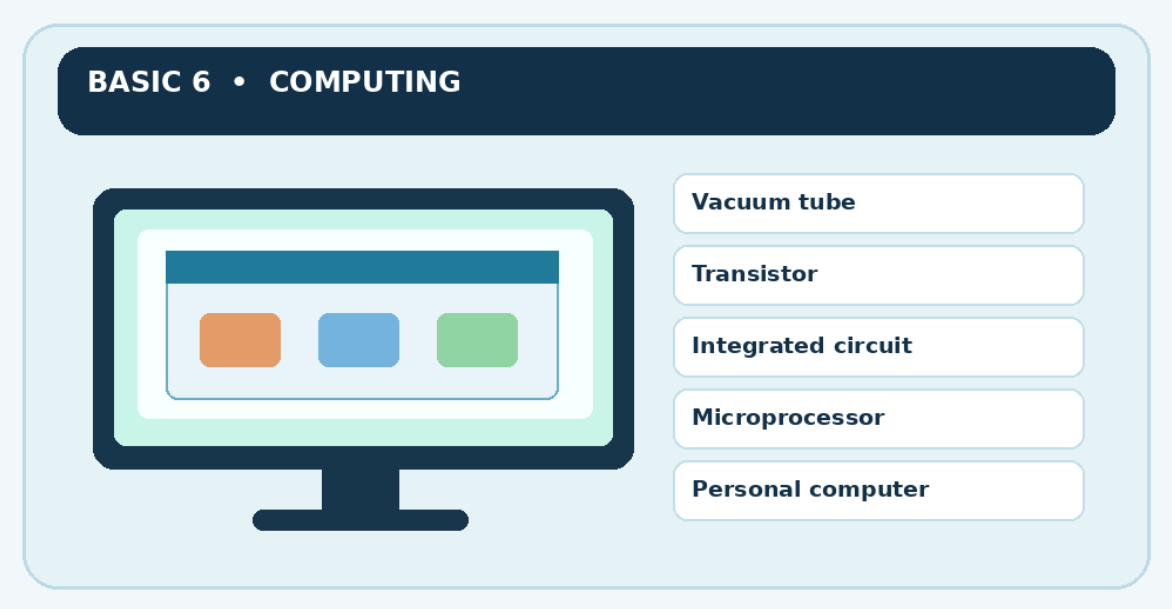

Course guide and lesson list

Start with the picture and five important ideas. Read the Ghanaian example, complete the practice activity and answer the quizzes. An adult should supervise device use and online activities.

01. Computer Generations and Devices — Computing Systems
02. Hardware, Software and People — Computing Systems
03. Refined Mouse Skills — Computing Systems
04. Faster and Accurate Typing — Computing Systems
05. Early Computer Generations — Computing Systems
06. Windows Themes and Accounts — Computer Applications
07. Using the Recycle Bin — Computer Applications
08. Copy Paste and Delete Folders — Computer Applications
09. Working in File Explorer — Computer Applications
10. Finding Storage Drives — Computer Applications
11. Different Types of Data — Data and Information
12. Sorting and Calculating With Data — Data and Information
13. Plan a Survey — Data and Information
14. Interpreting Data — Data and Information
15. Presenting Data in Tables and Charts — Data and Information
16. Sum Mean Minimum and Maximum — Data and Information
17. Communication in Our Community — Internet and Communication
18. More Communication Technologies — Technology in Society
19. Presentation File and Design Tools — Presentation
20. PowerPoint Text and Insert Tools — Presentation
21. Five-Slide Class Presentation — Presentation
22. Word Processing File and Layout — Word Processing
23. Insert Text Features — Word Processing
24. Produce a Polished Paragraph — Word Processing
25. Build a Spreadsheet — Programming and Databases
26. Worksheet Calculations — Programming and Databases
27. Edit a Worksheet — Programming and Databases
28. Manage Workbooks — Computer Applications
29. Understanding URLs — Internet and Communication
30. Find Information on a Page — Internet and Communication
31. Setting Bookmarks — Internet and Communication
32. Reply and Forward Emails — Internet and Communication
33. Email Attachments — Internet and Communication
34. Connected Devices and Sensors — Technology in Society
35. IoT in Farms and Businesses — Technology in Society

Lesson 1: Computer Generations and Devices

We will learn to: Identify, explain and apply the important ideas behind computer generations and devices.

Five important ideas

Vacuum tube: was used in many first-generation computers.

Transistor: replaced vacuum tubes in many later machines.

Integrated circuit: combined electronic parts on a chip.

Microprocessor: puts processing circuitry onto a chip.

Personal computer: is designed for use by an individual.

Our Ghanaian story

While looking at old and new computer photographs, Kojo had a question about computer generations and devices. The group discovered that vacuum tube was used in many first-generation computers, while transistor replaced vacuum tubes in many later machines. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of vacuum tube, transistor and integrated circuit. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches computer generations and devices. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.1.1.1

Lesson 1: Play & Challenge

PLAY — Choose one best answer for each question.

1. Computer Generations and Devices — Choose the correct name for something that was used in many first-generation computers.

A. Vacuum tube B. Transistor C. Personal computer D. Microprocessor

2. Computer Generations and Devices — Your friend says, "This replaced vacuum tubes in many later machines." What is the friend describing?

A. Personal computer B. Microprocessor C. Vacuum tube D. Transistor

3. Computer Generations and Devices — Which idea from computer generations and devices matches the clue "combined electronic parts on a chip"?

A. Microprocessor B. Transistor C. Integrated circuit D. Vacuum tube

4. Computer Generations and Devices — The teacher asks for an example that puts processing circuitry onto a chip. Which answer fits?

A. Microprocessor B. Vacuum tube C. Personal computer D. Transistor

5. Computer Generations and Devices — Can you identify the term described here: is designed for use by an individual?

A. Integrated circuit B. Transistor C. Vacuum tube D. Personal computer

CHALLENGE — Think and apply.

1. Computer Generations and Devices — Your class is solving a practical problem. One useful thing puts processing circuitry onto a chip. What is its name?

A. Microprocessor B. Vacuum tube C. Personal computer D. Transistor

2. Computer Generations and Devices — A classmate confuses several ideas about computer generations and devices. Which one actually replaced vacuum tubes in many later machines?

A. Transistor B. Personal computer C. Vacuum tube D. Microprocessor

3. Computer Generations and Devices — At the community learning centre, someone describes a tool or idea that is designed for use by an individual. Which one is it?

A. Vacuum tube B. Personal computer C. Transistor D. Integrated circuit

4. Computer Generations and Devices — At home, Yaw remembers a class rule or concept that puts processing circuitry onto a chip. What was it called?

A. Microprocessor B. Vacuum tube C. Transistor D. Personal computer

5. Computer Generations and Devices — A group makes a display on computer generations and devices. Their first clue is "replaced vacuum tubes in many later machines". Which label is correct?

A. Personal computer B. Vacuum tube C. Transistor D. Microprocessor

6. Computer Generations and Devices — During a school ICT lesson, Yaw wants to show something that was used in many first-generation computers. Which idea should be labelled?

A. Microprocessor B. Transistor C. Personal computer D. Vacuum tube

7. Computer Generations and Devices — Which concept matches the explanation "is designed for use by an individual" when you review computer generations and devices?

A. Transistor B. Vacuum tube C. Personal computer D. Integrated circuit

8. Computer Generations and Devices — For a short demonstration, the teacher needs an example that combined electronic parts on a chip. Which choice would you select?

A. Vacuum tube B. Integrated circuit C. Transistor D. Microprocessor

9. Computer Generations and Devices — Which answer would fit on a poster beside the words "was used in many first-generation computers"?

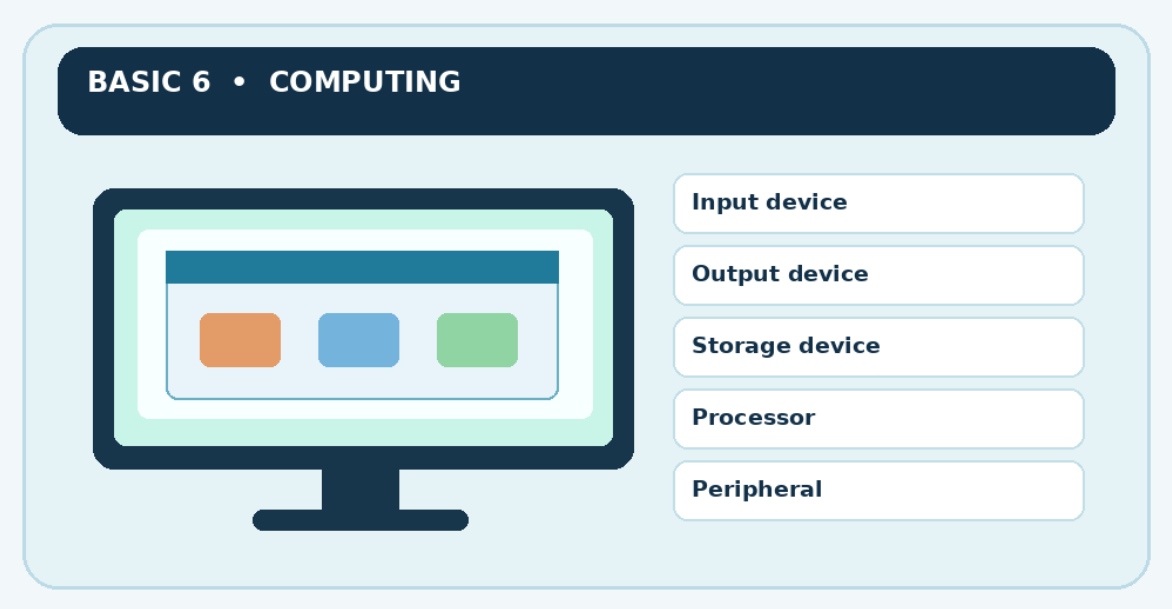

A. Microprocessor B. Transistor C. Personal computer D. Vacuum tube

10. Computer Generations and Devices — Imagine helping a younger pupil understand something that combined electronic parts on a chip. Which term would you teach?

A. Vacuum tube B. Integrated circuit C. Transistor D. Microprocessor

Lesson 2: Hardware, Software and People

We will learn to: Identify, explain and apply the important ideas behind hardware, software and people.

Five important ideas

Input device: sends information into a computer.

Output device: shows or plays results.

Storage device: keeps digital files.

Processor: helps follow computing instructions.

Peripheral: is an extra device connected to a computer.

Our Ghanaian story

During a tour of the computer room, Esi had a question about hardware, software and people. The group discovered that input device sends information into a computer, while output device shows or plays results. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of input device, output device and storage device. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches hardware, software and people. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.1.1.2

Lesson 2: Play & Challenge

PLAY — Choose one best answer for each question.

1. Hardware, Software and People — Choose the correct name for something that sends information into a computer.

A. Input device B. Processor C. Storage device D. Output device

2. Hardware, Software and People — Your friend says, "This shows or plays results." What is the friend describing?

A. Storage device B. Processor C. Output device D. Input device

3. Hardware, Software and People — Which idea from hardware, software and people matches the clue "keeps digital files"?

A. Output device B. Input device C. Storage device D. Peripheral

4. Hardware, Software and People — The teacher asks for an example that helps follow computing instructions. Which answer fits?

A. Processor B. Peripheral C. Storage device D. Output device

5. Hardware, Software and People — Can you identify the term described here: is an extra device connected to a computer?

A. Input device B. Processor C. Output device D. Peripheral

CHALLENGE — Think and apply.

1. Hardware, Software and People — A classmate confuses several ideas about hardware, software and people. Which one actually shows or plays results?

A. Output device B. Storage device C. Input device D. Processor

2. Hardware, Software and People — At home, Kofi remembers a class rule or concept that helps follow computing instructions. What was it called?

A. Output device B. Processor C. Peripheral D. Storage device

3. Hardware, Software and People — For a short demonstration, the teacher needs an example that keeps digital files. Which choice would you select?

A. Input device B. Output device C. Storage device D. Peripheral

4. Hardware, Software and People — Imagine helping a younger pupil understand something that keeps digital files. Which term would you teach?

A. Output device B. Storage device C. Input device D. Peripheral

5. Hardware, Software and People — During a school ICT lesson, Kofi wants to show something that sends information into a computer. Which idea should be labelled?

A. Processor B. Output device C. Input device D. Storage device

6. Hardware, Software and People — A group makes a display on hardware, software and people. Their first clue is "shows or plays results". Which label is correct?

A. Output device B. Processor C. Storage device D. Input device

7. Hardware, Software and People — At the community learning centre, someone describes a tool or idea that is an extra device connected to a computer. Which one is it?

A. Peripheral B. Output device C. Processor D. Input device

8. Hardware, Software and People — Which answer would fit on a poster beside the words "sends information into a computer"?

A. Storage device B. Processor C. Input device D. Output device

9. Hardware, Software and People — Your class is solving a practical problem. One useful thing helps follow computing instructions. What is its name?

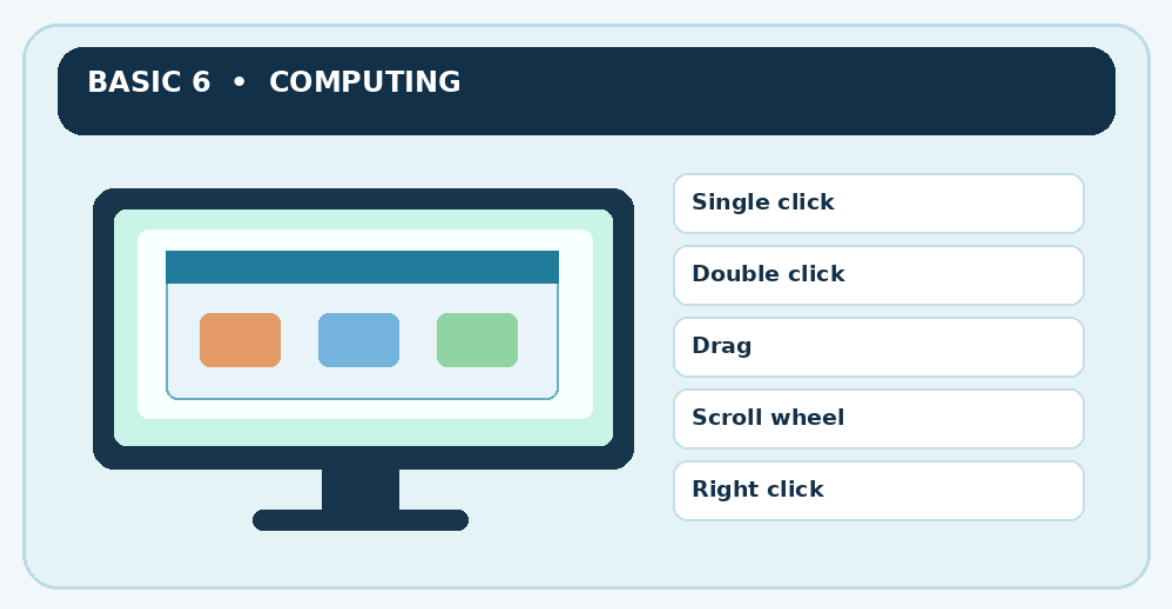

A. Processor B. Storage device C. Output device D. Peripheral

10. Hardware, Software and People — Which concept matches the explanation "is an extra device connected to a computer" when you review hardware, software and people?

A. Output device B. Processor C. Input device D. Peripheral

Lesson 3: Refined Mouse Skills

We will learn to: Identify, explain and apply the important ideas behind refined mouse skills.

Five important ideas

Single click: selects an item.

Double click: opens many files or apps.

Drag: holds the button while moving an item.

Scroll wheel: moves through a page.

Right click: opens a context menu in many systems.

Our Ghanaian story

At a shared classroom computer, Yaw had a question about refined mouse skills. The group discovered that single click selects an item, while double click opens many files or apps. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise single click and double click using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches refined mouse skills. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.1.1.3

Lesson 3: Play & Challenge

PLAY — Choose one best answer for each question.

1. Refined Mouse Skills — Choose the correct name for something that selects an item.

A. Scroll wheel B. Single click C. Right click D. Drag

2. Refined Mouse Skills — Your friend says, "This opens many files or apps." What is the friend describing?

A. Right click B. Scroll wheel C. Double click D. Drag

3. Refined Mouse Skills — Which idea from refined mouse skills matches the clue "holds the button while moving an item"?

A. Drag B. Single click C. Scroll wheel D. Double click

4. Refined Mouse Skills — The teacher asks for an example that moves through a page. Which answer fits?

A. Drag B. Scroll wheel C. Double click D. Right click

5. Refined Mouse Skills — Can you identify the term described here: opens a context menu in many systems?

A. Single click B. Drag C. Double click D. Right click

CHALLENGE — Think and apply.

1. Refined Mouse Skills — Which answer would fit on a poster beside the words "selects an item"?

A. Right click B. Drag C. Single click D. Scroll wheel

2. Refined Mouse Skills — At the community learning centre, someone describes a tool or idea that opens a context menu in many systems. Which one is it?

A. Drag B. Right click C. Single click D. Double click

3. Refined Mouse Skills — At home, Akosua remembers a class rule or concept that moves through a page. What was it called?

A. Drag B. Scroll wheel C. Double click D. Right click

4. Refined Mouse Skills — Which concept matches the explanation "opens a context menu in many systems" when you review refined mouse skills?

A. Single click B. Double click C. Drag D. Right click

5. Refined Mouse Skills — For a short demonstration, the teacher needs an example that holds the button while moving an item. Which choice would you select?

A. Scroll wheel B. Double click C. Single click D. Drag

6. Refined Mouse Skills — Your class is solving a practical problem. One useful thing moves through a page. What is its name?

A. Scroll wheel B. Right click C. Drag D. Double click

7. Refined Mouse Skills — Imagine helping a younger pupil understand something that holds the button while moving an item. Which term would you teach?

A. Double click B. Single click C. Drag D. Scroll wheel

8. Refined Mouse Skills — During a school ICT lesson, Akosua wants to show something that selects an item. Which idea should be labelled?

A. Scroll wheel B. Single click C. Drag D. Right click

9. Refined Mouse Skills — A group makes a display on refined mouse skills. Their first clue is "opens many files or apps". Which label is correct?

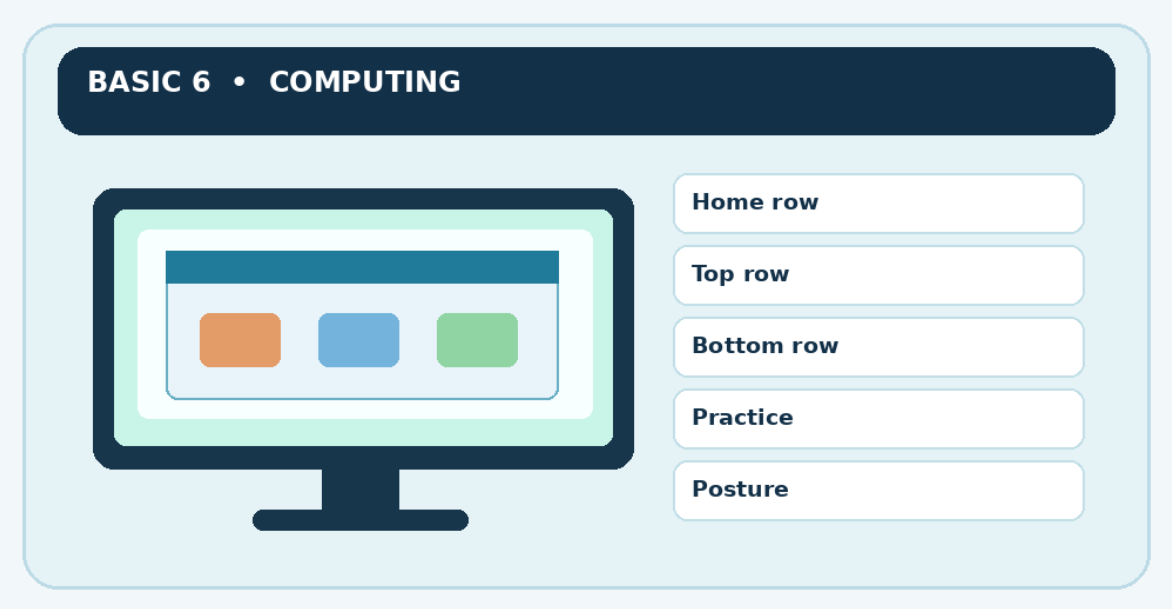

A. Right click B. Double click C. Drag D. Scroll wheel

10. Refined Mouse Skills — A classmate confuses several ideas about refined mouse skills. Which one actually opens many files or apps?

A. Right click B. Scroll wheel C. Drag D. Double click

Lesson 4: Faster and Accurate Typing

We will learn to: Identify, explain and apply the important ideas behind faster and accurate typing.

Five important ideas

Home row: is the resting row for touch typing.

Top row: contains letters Q through P.

Bottom row: contains letters Z through M.

Practice: helps develop accuracy before speed.

Posture: keeps shoulders relaxed while typing.

Our Ghanaian story

At an ICT typing competition, Abena had a question about faster and accurate typing. The group discovered that home row is the resting row for touch typing, while top row contains letters Q through P. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise home row and top row using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches faster and accurate typing. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.1.1.4

Lesson 4: Play & Challenge

PLAY — Choose one best answer for each question.

1. Faster and Accurate Typing — Choose the correct name for something that is the resting row for touch typing.

A. Top row B. Practice C. Posture D. Home row

2. Faster and Accurate Typing — Your friend says, "This contains letters Q through P." What is the friend describing?

A. Top row B. Bottom row C. Home row D. Posture

3. Faster and Accurate Typing — Which idea from faster and accurate typing matches the clue "contains letters Z through M"?

A. Posture B. Practice C. Bottom row D. Home row

4. Faster and Accurate Typing — The teacher asks for an example that helps develop accuracy before speed. Which answer fits?

A. Bottom row B. Home row C. Posture D. Practice

5. Faster and Accurate Typing — Can you identify the term described here: keeps shoulders relaxed while typing?

A. Posture B. Practice C. Top row D. Home row

CHALLENGE — Think and apply.

1. Faster and Accurate Typing — Which answer would fit on a poster beside the words "is the resting row for touch typing"?

A. Top row B. Posture C. Practice D. Home row

2. Faster and Accurate Typing — A group makes a display on faster and accurate typing. Their first clue is "contains letters Q through P". Which label is correct?

A. Home row B. Bottom row C. Top row D. Posture

3. Faster and Accurate Typing — Which concept matches the explanation "keeps shoulders relaxed while typing" when you review faster and accurate typing?

A. Practice B. Top row C. Home row D. Posture

4. Faster and Accurate Typing — Your class is solving a practical problem. One useful thing helps develop accuracy before speed. What is its name?

A. Practice B. Home row C. Bottom row D. Posture

5. Faster and Accurate Typing — During a school ICT lesson, Esi wants to show something that is the resting row for touch typing. Which idea should be labelled?

A. Home row B. Top row C. Posture D. Practice

6. Faster and Accurate Typing — For a short demonstration, the teacher needs an example that contains letters Z through M. Which choice would you select?

A. Posture B. Bottom row C. Home row D. Practice

7. Faster and Accurate Typing — At the community learning centre, someone describes a tool or idea that keeps shoulders relaxed while typing. Which one is it?

A. Posture B. Practice C. Home row D. Top row

8. Faster and Accurate Typing — At home, Esi remembers a class rule or concept that helps develop accuracy before speed. What was it called?

A. Practice B. Bottom row C. Home row D. Posture

9. Faster and Accurate Typing — Imagine helping a younger pupil understand something that contains letters Z through M. Which term would you teach?

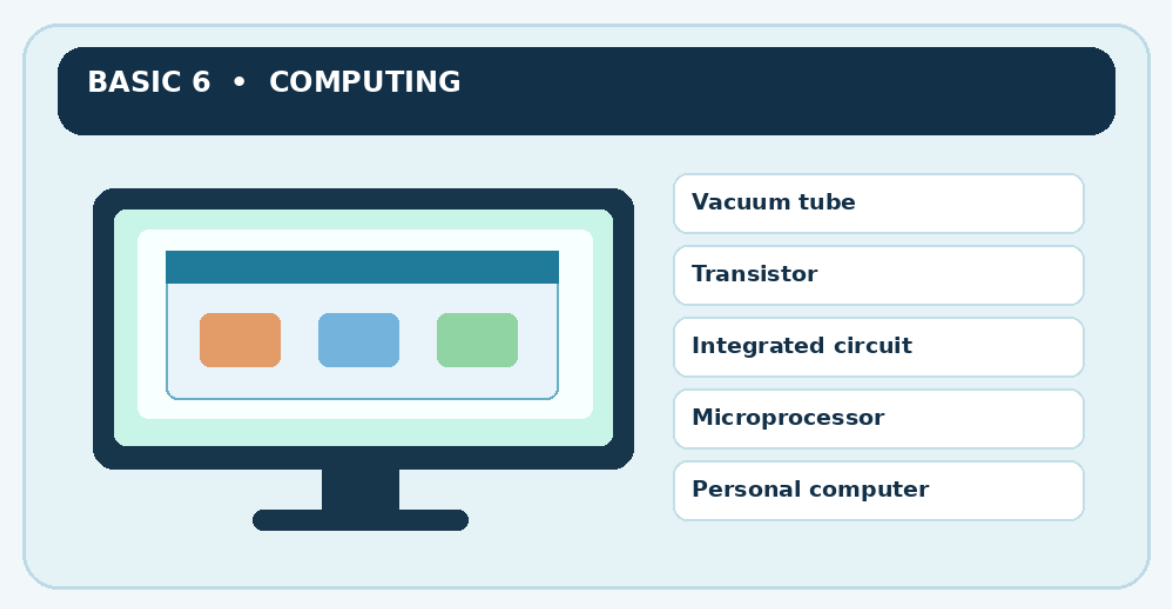

A. Posture B. Bottom row C. Practice D. Home row

10. Faster and Accurate Typing — A classmate confuses several ideas about faster and accurate typing. Which one actually contains letters Q through P?

A. Bottom row B. Posture C. Home row D. Top row

Lesson 5: Early Computer Generations

We will learn to: Identify, explain and apply the important ideas behind early computer generations.

Five important ideas

Vacuum tube: was used in many first-generation computers.

Transistor: replaced vacuum tubes in many later machines.

Integrated circuit: combined electronic parts on a chip.

Microprocessor: puts processing circuitry onto a chip.

Personal computer: is designed for use by an individual.

Our Ghanaian story

While looking at old and new computer photographs, Kofi had a question about early computer generations. The group discovered that vacuum tube was used in many first-generation computers, while transistor replaced vacuum tubes in many later machines. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of vacuum tube, transistor and integrated circuit. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches early computer generations. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.1.1.5

Lesson 5: Play & Challenge

PLAY — Choose one best answer for each question.

1. Early Computer Generations — Choose the correct name for something that was used in many first-generation computers.

A. Integrated circuit B. Transistor C. Microprocessor D. Vacuum tube

2. Early Computer Generations — Your friend says, "This replaced vacuum tubes in many later machines." What is the friend describing?

A. Transistor B. Microprocessor C. Vacuum tube D. Integrated circuit

3. Early Computer Generations — Which idea from early computer generations matches the clue "combined electronic parts on a chip"?

A. Microprocessor B. Transistor C. Integrated circuit D. Vacuum tube

4. Early Computer Generations — The teacher asks for an example that puts processing circuitry onto a chip. Which answer fits?

A. Integrated circuit B. Vacuum tube C. Transistor D. Microprocessor

5. Early Computer Generations — Can you identify the term described here: is designed for use by an individual?

A. Personal computer B. Transistor C. Vacuum tube D. Microprocessor

CHALLENGE — Think and apply.

1. Early Computer Generations — Which concept matches the explanation "is designed for use by an individual" when you review early computer generations?

A. Microprocessor B. Personal computer C. Vacuum tube D. Transistor

2. Early Computer Generations — A group makes a display on early computer generations. Their first clue is "replaced vacuum tubes in many later machines". Which label is correct?

A. Integrated circuit B. Transistor C. Microprocessor D. Vacuum tube

3. Early Computer Generations — Which answer would fit on a poster beside the words "was used in many first-generation computers"?

A. Vacuum tube B. Integrated circuit C. Microprocessor D. Transistor

4. Early Computer Generations — Your class is solving a practical problem. One useful thing puts processing circuitry onto a chip. What is its name?

A. Transistor B. Microprocessor C. Vacuum tube D. Integrated circuit

5. Early Computer Generations — At the community learning centre, someone describes a tool or idea that is designed for use by an individual. Which one is it?

A. Microprocessor B. Transistor C. Vacuum tube D. Personal computer

6. Early Computer Generations — Imagine helping a younger pupil understand something that combined electronic parts on a chip. Which term would you teach?

A. Vacuum tube B. Microprocessor C. Integrated circuit D. Transistor

7. Early Computer Generations — During a school ICT lesson, Ama wants to show something that was used in many first-generation computers. Which idea should be labelled?

A. Vacuum tube B. Microprocessor C. Integrated circuit D. Transistor

8. Early Computer Generations — For a short demonstration, the teacher needs an example that combined electronic parts on a chip. Which choice would you select?

A. Transistor B. Vacuum tube C. Microprocessor D. Integrated circuit

9. Early Computer Generations — At home, Ama remembers a class rule or concept that puts processing circuitry onto a chip. What was it called?

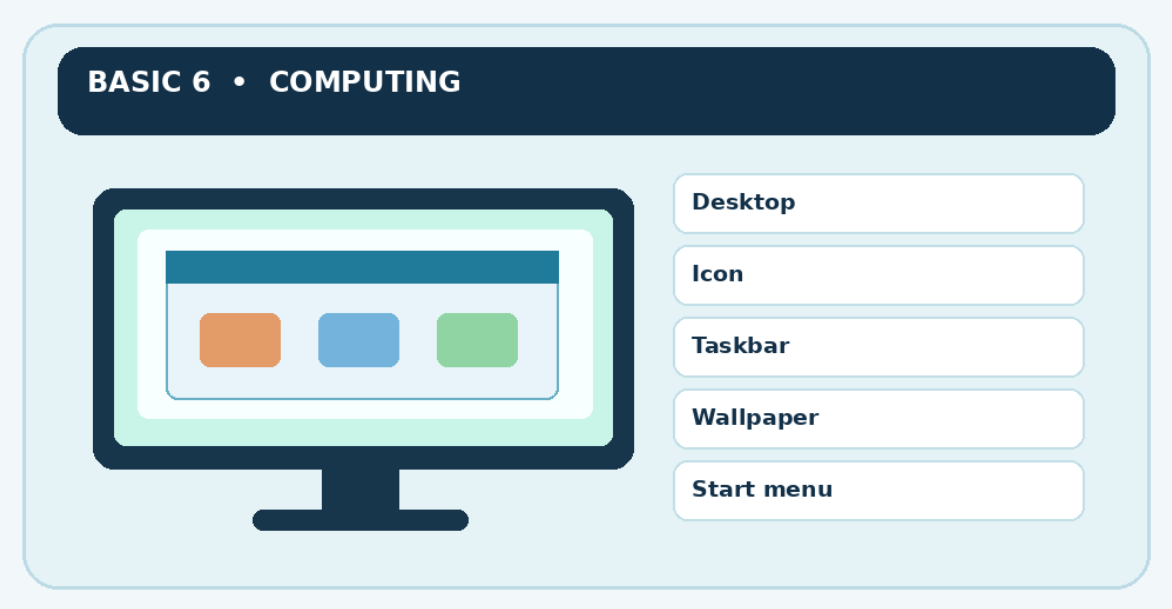

A. Transistor B. Microprocessor C. Integrated circuit D. Vacuum tube

10. Early Computer Generations — A classmate confuses several ideas about early computer generations. Which one actually replaced vacuum tubes in many later machines?

A. Integrated circuit B. Transistor C. Microprocessor D. Vacuum tube

Lesson 6: Windows Themes and Accounts

We will learn to: Identify, explain and apply the important ideas behind windows themes and accounts.

Five important ideas

Desktop: is a main computer work area.

Icon: is a small picture representing an item.

Taskbar: helps find open apps and tools.

Wallpaper: is the desktop background picture.

Start menu: offers a way to open programs.

Our Ghanaian story

When the computer starts, Ama had a question about windows themes and accounts. The group discovered that desktop is a main computer work area, while icon is a small picture representing an item. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise desktop and icon using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches windows themes and accounts. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.2.1.1

Lesson 6: Play & Challenge

PLAY — Choose one best answer for each question.

1. Windows Themes and Accounts — Choose the correct name for something that is a main computer work area.

A. Desktop B. Icon C. Wallpaper D. Start menu

2. Windows Themes and Accounts — Your friend says, "This is a small picture representing an item." What is the friend describing?

A. Wallpaper B. Desktop C. Start menu D. Icon

3. Windows Themes and Accounts — Which idea from windows themes and accounts matches the clue "helps find open apps and tools"?

A. Start menu B. Taskbar C. Wallpaper D. Desktop

4. Windows Themes and Accounts — The teacher asks for an example that is the desktop background picture. Which answer fits?

A. Desktop B. Icon C. Start menu D. Wallpaper

5. Windows Themes and Accounts — Can you identify the term described here: offers a way to open programs?

A. Start menu B. Icon C. Desktop D. Wallpaper

CHALLENGE — Think and apply.

1. Windows Themes and Accounts — Imagine helping a younger pupil understand something that helps find open apps and tools. Which term would you teach?

A. Desktop B. Start menu C. Taskbar D. Wallpaper

2. Windows Themes and Accounts — Your class is solving a practical problem. One useful thing is the desktop background picture. What is its name?

A. Wallpaper B. Icon C. Start menu D. Desktop

3. Windows Themes and Accounts — At the community learning centre, someone describes a tool or idea that offers a way to open programs. Which one is it?

A. Start menu B. Icon C. Wallpaper D. Desktop

4. Windows Themes and Accounts — For a short demonstration, the teacher needs an example that helps find open apps and tools. Which choice would you select?

A. Wallpaper B. Start menu C. Taskbar D. Desktop

5. Windows Themes and Accounts — A group makes a display on windows themes and accounts. Their first clue is "is a small picture representing an item". Which label is correct?

A. Desktop B. Start menu C. Wallpaper D. Icon

6. Windows Themes and Accounts — A classmate confuses several ideas about windows themes and accounts. Which one actually is a small picture representing an item?

A. Icon B. Wallpaper C. Start menu D. Desktop

7. Windows Themes and Accounts — At home, Yaw remembers a class rule or concept that is the desktop background picture. What was it called?

A. Desktop B. Icon C. Wallpaper D. Start menu

8. Windows Themes and Accounts — During a school ICT lesson, Yaw wants to show something that is a main computer work area. Which idea should be labelled?

A. Desktop B. Wallpaper C. Start menu D. Icon

9. Windows Themes and Accounts — Which answer would fit on a poster beside the words "is a main computer work area"?

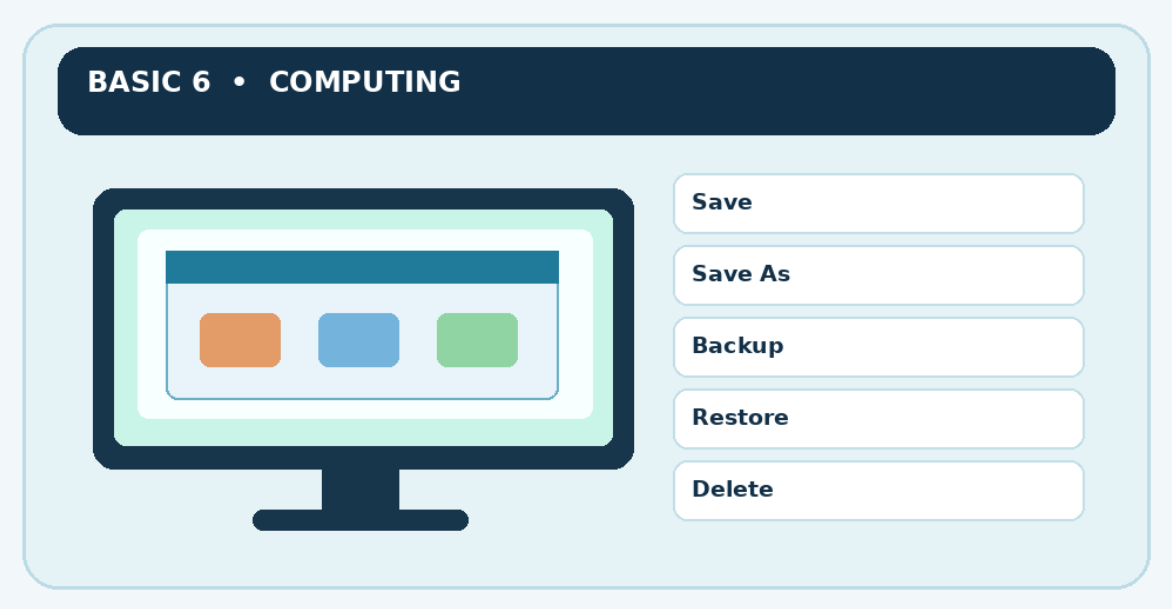

A. Desktop B. Wallpaper C. Icon D. Start menu

10. Windows Themes and Accounts — Which concept matches the explanation "offers a way to open programs" when you review windows themes and accounts?

A. Icon B. Wallpaper C. Start menu D. Desktop

Lesson 7: Using the Recycle Bin

We will learn to: Identify, explain and apply the important ideas behind using the recycle bin.

Five important ideas

Save: stores changes to a document.

Save As: can create a copy with a new name.

Backup: is an extra copy kept for safety.

Restore: brings back a recoverable item.

Delete: removes a selected item.

Our Ghanaian story

After writing a story, Kojo had a question about using the recycle bin. The group discovered that save stores changes to a document, while save as can create a copy with a new name. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise save and save as using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches using the recycle bin. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.2.1.2

Lesson 7: Play & Challenge

PLAY — Choose one best answer for each question.

1. Using the Recycle Bin — Choose the correct name for something that stores changes to a document.

A. Restore B. Save C. Save As D. Backup

2. Using the Recycle Bin — Your friend says, "This can create a copy with a new name." What is the friend describing?

A. Delete B. Save As C. Backup D. Restore

3. Using the Recycle Bin — Which idea from using the recycle bin matches the clue "is an extra copy kept for safety"?

A. Delete B. Save C. Backup D. Restore

4. Using the Recycle Bin — The teacher asks for an example that brings back a recoverable item. Which answer fits?

A. Restore B. Delete C. Save D. Backup

5. Using the Recycle Bin — Can you identify the term described here: removes a selected item?

A. Save B. Restore C. Backup D. Delete

CHALLENGE — Think and apply.

1. Using the Recycle Bin — A group makes a display on using the recycle bin. Their first clue is "can create a copy with a new name". Which label is correct?

A. Backup B. Restore C. Delete D. Save As

2. Using the Recycle Bin — Imagine helping a younger pupil understand something that is an extra copy kept for safety. Which term would you teach?

A. Save B. Restore C. Delete D. Backup

3. Using the Recycle Bin — At the community learning centre, someone describes a tool or idea that removes a selected item. Which one is it?

A. Restore B. Backup C. Save D. Delete

4. Using the Recycle Bin — Your class is solving a practical problem. One useful thing brings back a recoverable item. What is its name?

A. Backup B. Restore C. Save D. Delete

5. Using the Recycle Bin — During a school ICT lesson, Kofi wants to show something that stores changes to a document. Which idea should be labelled?

A. Restore B. Save As C. Save D. Backup

6. Using the Recycle Bin — Which answer would fit on a poster beside the words "stores changes to a document"?

A. Restore B. Save As C. Save D. Backup

7. Using the Recycle Bin — Which concept matches the explanation "removes a selected item" when you review using the recycle bin?

A. Restore B. Save C. Backup D. Delete

8. Using the Recycle Bin — For a short demonstration, the teacher needs an example that is an extra copy kept for safety. Which choice would you select?

A. Restore B. Backup C. Save D. Delete

9. Using the Recycle Bin — At home, Kofi remembers a class rule or concept that brings back a recoverable item. What was it called?

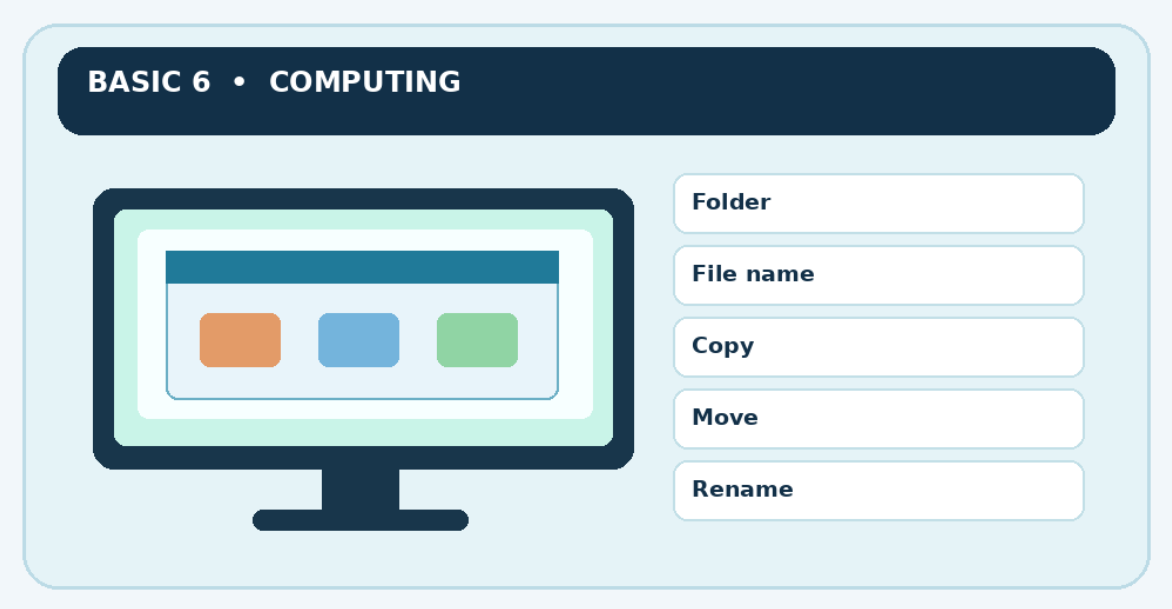

A. Backup B. Delete C. Save D. Restore

10. Using the Recycle Bin — A classmate confuses several ideas about using the recycle bin. Which one actually can create a copy with a new name?

A. Restore B. Delete C. Backup D. Save As

Lesson 8: Copy Paste and Delete Folders

We will learn to: Identify, explain and apply the important ideas behind copy paste and delete folders.

Five important ideas

Folder: organises related digital files.

File name: helps identify a saved item.

Copy: makes a second version of an item.

Move: changes where an item is stored.

Rename: changes the label without changing the file content.

Our Ghanaian story

While organising class projects, Esi had a question about copy paste and delete folders. The group discovered that folder organises related digital files, while file name helps identify a saved item. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise folder and file name using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches copy paste and delete folders. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.2.1.4

Lesson 8: Play & Challenge

PLAY — Choose one best answer for each question.

1. Copy Paste and Delete Folders — Choose the correct name for something that organises related digital files.

A. Move B. Rename C. File name D. Folder

2. Copy Paste and Delete Folders — Your friend says, "This helps identify a saved item." What is the friend describing?

A. Copy B. Rename C. Move D. File name

3. Copy Paste and Delete Folders — Which idea from copy paste and delete folders matches the clue "makes a second version of an item"?

A. File name B. Rename C. Folder D. Copy

4. Copy Paste and Delete Folders — The teacher asks for an example that changes where an item is stored. Which answer fits?

A. Rename B. Move C. Copy D. Folder

5. Copy Paste and Delete Folders — Can you identify the term described here: changes the label without changing the file content?

A. Copy B. File name C. Rename D. Move

CHALLENGE — Think and apply.

1. Copy Paste and Delete Folders — For a short demonstration, the teacher needs an example that makes a second version of an item. Which choice would you select?

A. Folder B. File name C. Copy D. Rename

2. Copy Paste and Delete Folders — Your class is solving a practical problem. One useful thing changes where an item is stored. What is its name?

A. Move B. Rename C. Copy D. Folder

3. Copy Paste and Delete Folders — At home, Akosua remembers a class rule or concept that changes where an item is stored. What was it called?

A. Rename B. Folder C. Copy D. Move

4. Copy Paste and Delete Folders — A classmate confuses several ideas about copy paste and delete folders. Which one actually helps identify a saved item?

A. File name B. Move C. Copy D. Rename

5. Copy Paste and Delete Folders — Imagine helping a younger pupil understand something that makes a second version of an item. Which term would you teach?

A. Copy B. Folder C. Rename D. File name

6. Copy Paste and Delete Folders — During a school ICT lesson, Akosua wants to show something that organises related digital files. Which idea should be labelled?

A. File name B. Folder C. Move D. Rename

7. Copy Paste and Delete Folders — Which answer would fit on a poster beside the words "organises related digital files"?

A. Move B. File name C. Rename D. Folder

8. Copy Paste and Delete Folders — Which concept matches the explanation "changes the label without changing the file content" when you review copy paste and delete folders?

A. Copy B. Move C. Rename D. File name

9. Copy Paste and Delete Folders — A group makes a display on copy paste and delete folders. Their first clue is "helps identify a saved item". Which label is correct?

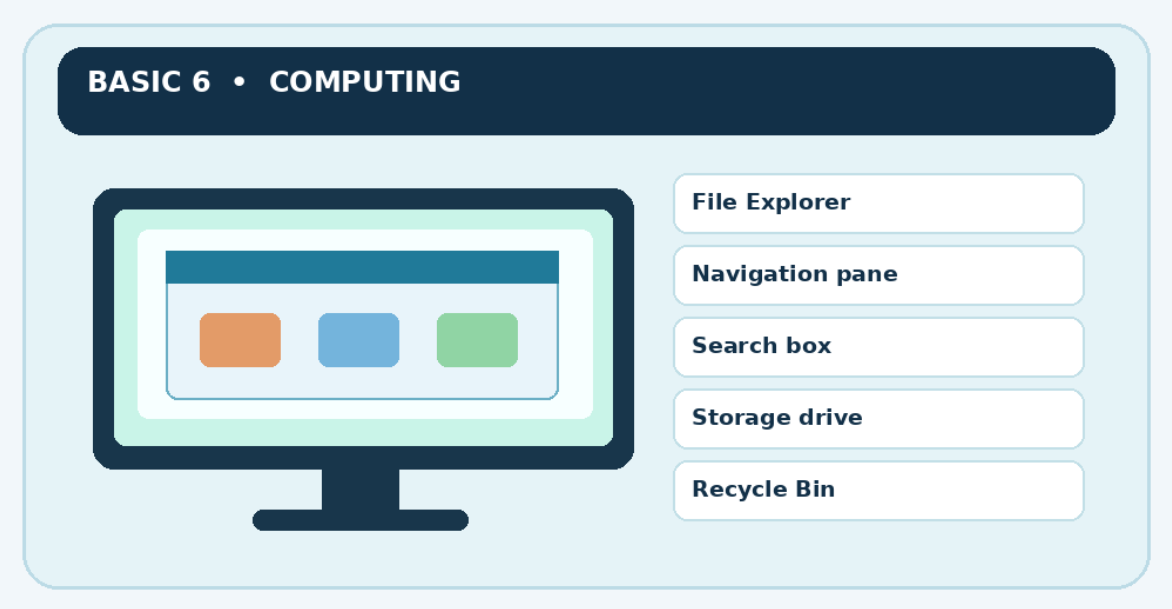

A. Rename B. Move C. Copy D. File name

10. Copy Paste and Delete Folders — At the community learning centre, someone describes a tool or idea that changes the label without changing the file content. Which one is it?

A. Rename B. Move C. Copy D. File name

Lesson 9: Working in File Explorer

We will learn to: Identify, explain and apply the important ideas behind working in file explorer.

Five important ideas

File Explorer: helps browse computer files and folders.

Navigation pane: lists useful locations.

Search box: helps find a named item.

Storage drive: holds saved digital information.

Recycle Bin: temporarily holds many deleted files.

Our Ghanaian story

While searching for classwork, Yaw had a question about working in file explorer. The group discovered that file explorer helps browse computer files and folders, while navigation pane lists useful locations. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise file explorer and navigation pane using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches working in file explorer. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.2.1.5

Lesson 9: Play & Challenge

PLAY — Choose one best answer for each question.

1. Working in File Explorer — Choose the correct name for something that helps browse computer files and folders.

A. Search box B. Storage drive C. File Explorer D. Recycle Bin

2. Working in File Explorer — Your friend says, "This lists useful locations." What is the friend describing?

A. Navigation pane B. File Explorer C. Storage drive D. Recycle Bin

3. Working in File Explorer — Which idea from working in file explorer matches the clue "helps find a named item"?

A. Recycle Bin B. File Explorer C. Search box D. Storage drive

4. Working in File Explorer — The teacher asks for an example that holds saved digital information. Which answer fits?

A. Navigation pane B. Search box C. Storage drive D. Recycle Bin

5. Working in File Explorer — Can you identify the term described here: temporarily holds many deleted files?

A. Search box B. File Explorer C. Recycle Bin D. Storage drive

CHALLENGE — Think and apply.

1. Working in File Explorer — Which concept matches the explanation "temporarily holds many deleted files" when you review working in file explorer?

A. Recycle Bin B. Storage drive C. File Explorer D. Search box

2. Working in File Explorer — Your class is solving a practical problem. One useful thing holds saved digital information. What is its name?

A. Search box B. Navigation pane C. Storage drive D. Recycle Bin

3. Working in File Explorer — During a school ICT lesson, Esi wants to show something that helps browse computer files and folders. Which idea should be labelled?

A. Recycle Bin B. Storage drive C. Search box D. File Explorer

4. Working in File Explorer — A classmate confuses several ideas about working in file explorer. Which one actually lists useful locations?

A. File Explorer B. Storage drive C. Recycle Bin D. Navigation pane

5. Working in File Explorer — For a short demonstration, the teacher needs an example that helps find a named item. Which choice would you select?

A. File Explorer B. Storage drive C. Recycle Bin D. Search box

6. Working in File Explorer — At home, Esi remembers a class rule or concept that holds saved digital information. What was it called?

A. Storage drive B. Search box C. Recycle Bin D. Navigation pane

7. Working in File Explorer — At the community learning centre, someone describes a tool or idea that temporarily holds many deleted files. Which one is it?

A. Search box B. File Explorer C. Recycle Bin D. Storage drive

8. Working in File Explorer — A group makes a display on working in file explorer. Their first clue is "lists useful locations". Which label is correct?

A. Navigation pane B. Recycle Bin C. Storage drive D. File Explorer

9. Working in File Explorer — Imagine helping a younger pupil understand something that helps find a named item. Which term would you teach?

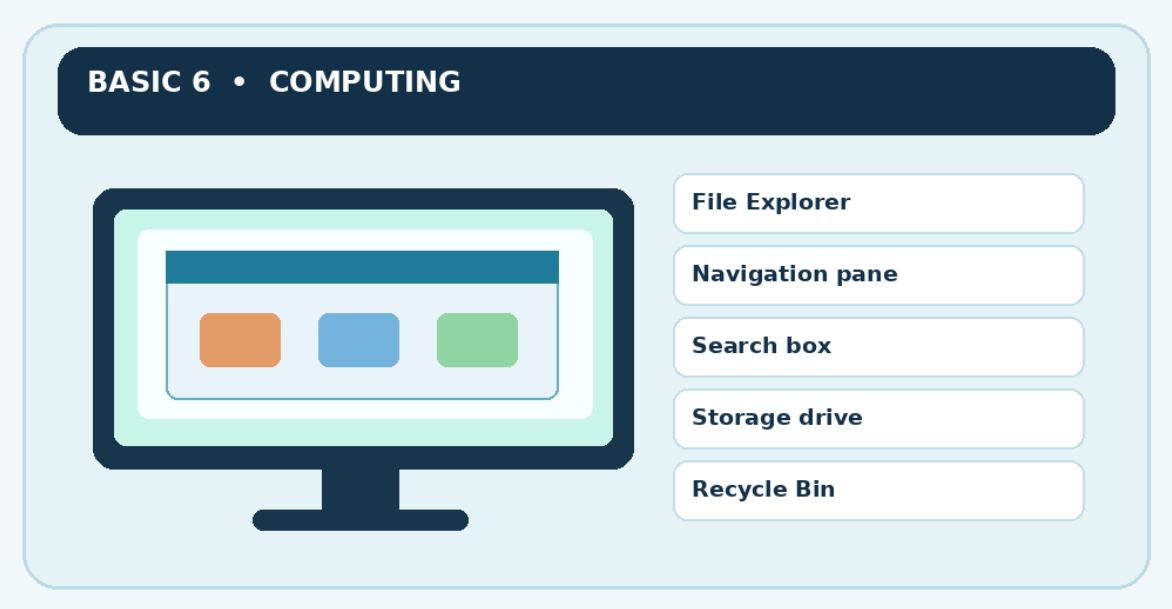

A. File Explorer B. Recycle Bin C. Storage drive D. Search box

10. Working in File Explorer — Which answer would fit on a poster beside the words "helps browse computer files and folders"?

A. File Explorer B. Search box C. Recycle Bin D. Storage drive

Lesson 10: Finding Storage Drives

We will learn to: Identify, explain and apply the important ideas behind finding storage drives.

Five important ideas

File Explorer: helps browse computer files and folders.

Navigation pane: lists useful locations.

Search box: helps find a named item.

Storage drive: holds saved digital information.

Recycle Bin: temporarily holds many deleted files.

Our Ghanaian story

While searching for classwork, Abena had a question about finding storage drives. The group discovered that file explorer helps browse computer files and folders, while navigation pane lists useful locations. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise file explorer and navigation pane using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches finding storage drives. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.2.1.6

Lesson 10: Play & Challenge

PLAY — Choose one best answer for each question.

1. Finding Storage Drives — Choose the correct name for something that helps browse computer files and folders.

A. Recycle Bin B. File Explorer C. Navigation pane D. Search box

2. Finding Storage Drives — Your friend says, "This lists useful locations." What is the friend describing?

A. Navigation pane B. Storage drive C. Search box D. File Explorer

3. Finding Storage Drives — Which idea from finding storage drives matches the clue "helps find a named item"?

A. Search box B. Navigation pane C. Recycle Bin D. Storage drive

4. Finding Storage Drives — The teacher asks for an example that holds saved digital information. Which answer fits?

A. File Explorer B. Search box C. Recycle Bin D. Storage drive

5. Finding Storage Drives — Can you identify the term described here: temporarily holds many deleted files?

A. File Explorer B. Storage drive C. Recycle Bin D. Navigation pane

CHALLENGE — Think and apply.

1. Finding Storage Drives — Which answer would fit on a poster beside the words "helps browse computer files and folders"?

A. File Explorer B. Recycle Bin C. Search box D. Navigation pane

2. Finding Storage Drives — A group makes a display on finding storage drives. Their first clue is "lists useful locations". Which label is correct?

A. File Explorer B. Navigation pane C. Search box D. Storage drive

3. Finding Storage Drives — Imagine helping a younger pupil understand something that helps find a named item. Which term would you teach?

A. Search box B. Navigation pane C. Storage drive D. Recycle Bin

4. Finding Storage Drives — During a school ICT lesson, Ama wants to show something that helps browse computer files and folders. Which idea should be labelled?

A. File Explorer B. Search box C. Recycle Bin D. Navigation pane

5. Finding Storage Drives — Your class is solving a practical problem. One useful thing holds saved digital information. What is its name?

A. File Explorer B. Recycle Bin C. Storage drive D. Search box

6. Finding Storage Drives — For a short demonstration, the teacher needs an example that helps find a named item. Which choice would you select?

A. Storage drive B. Recycle Bin C. Search box D. Navigation pane

7. Finding Storage Drives — A classmate confuses several ideas about finding storage drives. Which one actually lists useful locations?

A. Storage drive B. File Explorer C. Search box D. Navigation pane

8. Finding Storage Drives — At home, Ama remembers a class rule or concept that holds saved digital information. What was it called?

A. File Explorer B. Storage drive C. Search box D. Recycle Bin

9. Finding Storage Drives — Which concept matches the explanation "temporarily holds many deleted files" when you review finding storage drives?

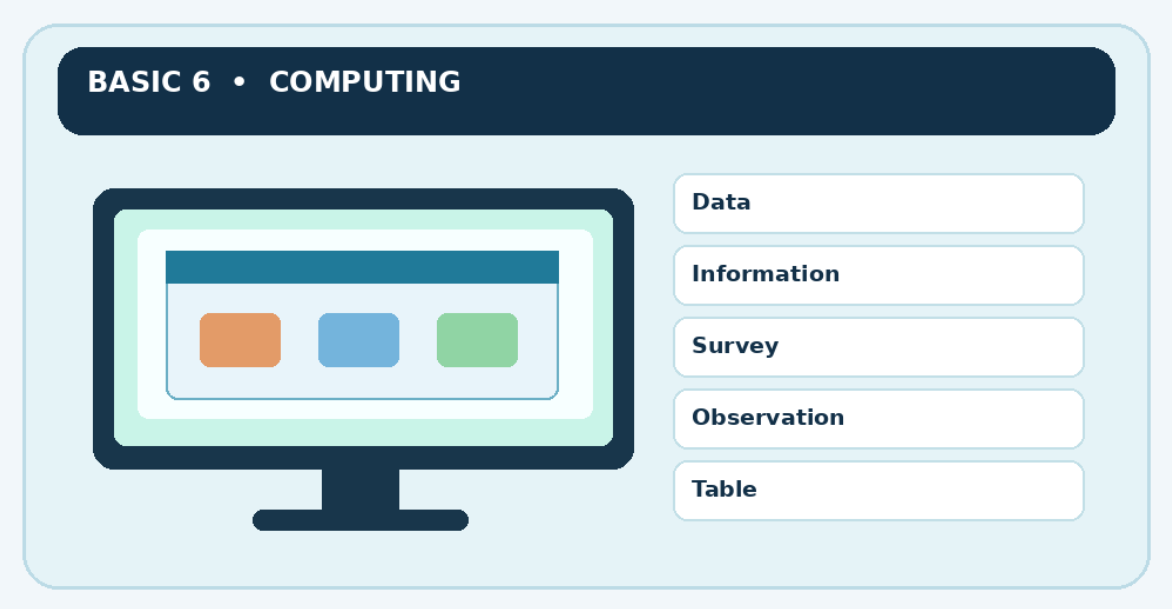

A. Recycle Bin B. File Explorer C. Navigation pane D. Storage drive

10. Finding Storage Drives — At the community learning centre, someone describes a tool or idea that temporarily holds many deleted files. Which one is it?

A. Recycle Bin B. File Explorer C. Navigation pane D. Storage drive

Lesson 11: Different Types of Data

We will learn to: Identify, explain and apply the important ideas behind different types of data.

Five important ideas

Data: raw facts gathered for a purpose.

Information: data organised to make sense.

Survey: asks people selected questions.

Observation: records what someone notices.

Table: arranges facts into rows and columns.

Our Ghanaian story

During a survey of the school, Kofi had a question about different types of data. The group discovered that data raw facts gathered for a purpose, while information data organised to make sense. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Data, Information and Survey; explain what each means.

Create and share

Make a colourful, labelled poster that teaches different types of data. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.3.1.1

Lesson 11: Play & Challenge

PLAY — Choose one best answer for each question.

1. Different Types of Data — Choose the correct name for something that raw facts gathered for a purpose.

A. Table B. Information C. Survey D. Data

2. Different Types of Data — Your friend says, "This data organised to make sense." What is the friend describing?

A. Data B. Table C. Information D. Observation

3. Different Types of Data — Which idea from different types of data matches the clue "asks people selected questions"?

A. Data B. Survey C. Table D. Information

4. Different Types of Data — The teacher asks for an example that records what someone notices. Which answer fits?

A. Information B. Observation C. Table D. Survey

5. Different Types of Data — Can you identify the term described here: arranges facts into rows and columns?

A. Observation B. Table C. Data D. Survey

CHALLENGE — Think and apply.

1. Different Types of Data — At the community learning centre, someone describes a tool or idea that arranges facts into rows and columns. Which one is it?

A. Data B. Table C. Survey D. Observation

2. Different Types of Data — At home, Yaw remembers a class rule or concept that records what someone notices. What was it called?

A. Table B. Observation C. Survey D. Information

3. Different Types of Data — During a school ICT lesson, Yaw wants to show something that raw facts gathered for a purpose. Which idea should be labelled?

A. Survey B. Table C. Information D. Data

4. Different Types of Data — A classmate confuses several ideas about different types of data. Which one actually data organised to make sense?

A. Observation B. Information C. Data D. Table

5. Different Types of Data — Imagine helping a younger pupil understand something that asks people selected questions. Which term would you teach?

A. Survey B. Table C. Information D. Data

6. Different Types of Data — Which concept matches the explanation "arranges facts into rows and columns" when you review different types of data?

A. Table B. Observation C. Data D. Survey

7. Different Types of Data — Which answer would fit on a poster beside the words "raw facts gathered for a purpose"?

A. Table B. Survey C. Information D. Data

8. Different Types of Data — A group makes a display on different types of data. Their first clue is "data organised to make sense". Which label is correct?

A. Observation B. Table C. Information D. Data

9. Different Types of Data — For a short demonstration, the teacher needs an example that asks people selected questions. Which choice would you select?

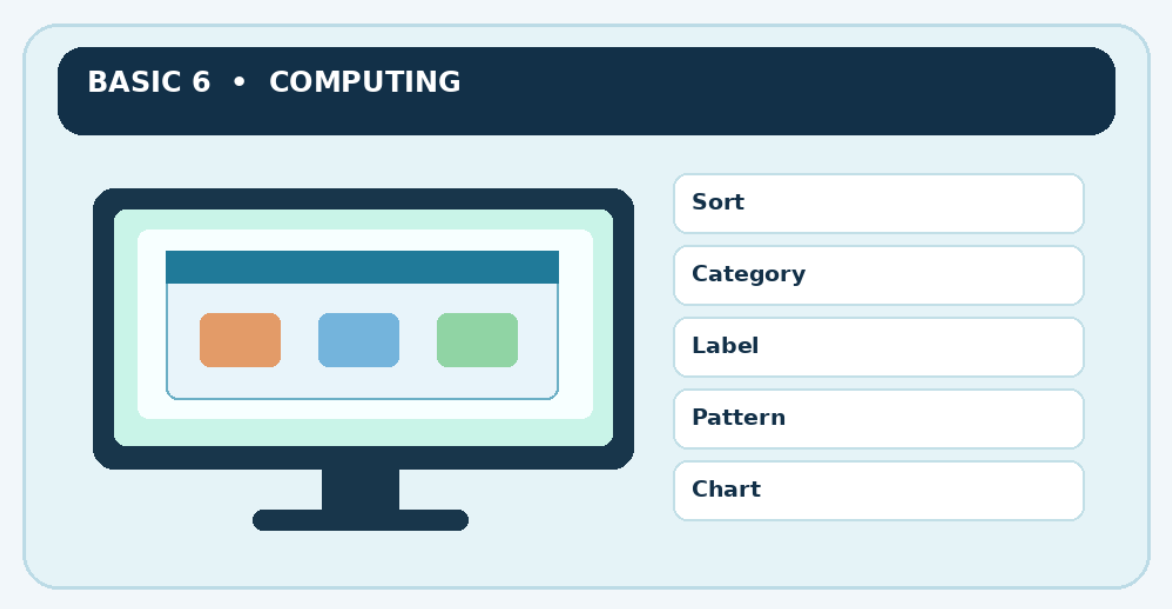

A. Table B. Information C. Survey D. Data

10. Different Types of Data — Your class is solving a practical problem. One useful thing records what someone notices. What is its name?

A. Observation B. Information C. Survey D. Table

Lesson 12: Sorting and Calculating With Data

We will learn to: Identify, explain and apply the important ideas behind sorting and calculating with data.

Five important ideas

Sort: arranges data into an order.

Category: groups items sharing a feature.

Label: gives a clear name to a group.

Pattern: is a regular feature seen in data.

Chart: shows data visually.

Our Ghanaian story

When sorting market-day information, Ama had a question about sorting and calculating with data. The group discovered that sort arranges data into an order, while category groups items sharing a feature. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Sort, Category and Label; explain what each means.

Create and share

Make a colourful, labelled poster that teaches sorting and calculating with data. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.3.1.4

Lesson 12: Play & Challenge

PLAY — Choose one best answer for each question.

1. Sorting and Calculating With Data — Choose the correct name for something that arranges data into an order.

A. Chart B. Label C. Category D. Sort

2. Sorting and Calculating With Data — Your friend says, "This groups items sharing a feature." What is the friend describing?

A. Sort B. Pattern C. Category D. Chart

3. Sorting and Calculating With Data — Which idea from sorting and calculating with data matches the clue "gives a clear name to a group"?

A. Category B. Chart C. Sort D. Label

4. Sorting and Calculating With Data — The teacher asks for an example that is a regular feature seen in data. Which answer fits?

A. Category B. Label C. Chart D. Pattern

5. Sorting and Calculating With Data — Can you identify the term described here: shows data visually?

A. Category B. Chart C. Pattern D. Label

CHALLENGE — Think and apply.

1. Sorting and Calculating With Data — Imagine helping a younger pupil understand something that gives a clear name to a group. Which term would you teach?

A. Label B. Chart C. Category D. Sort

2. Sorting and Calculating With Data — At home, Kofi remembers a class rule or concept that is a regular feature seen in data. What was it called?

A. Pattern B. Chart C. Label D. Category

3. Sorting and Calculating With Data — During a school ICT lesson, Kofi wants to show something that arranges data into an order. Which idea should be labelled?

A. Sort B. Chart C. Category D. Label

4. Sorting and Calculating With Data — Which answer would fit on a poster beside the words "arranges data into an order"?

A. Label B. Category C. Chart D. Sort

5. Sorting and Calculating With Data — For a short demonstration, the teacher needs an example that gives a clear name to a group. Which choice would you select?

A. Label B. Chart C. Category D. Sort

6. Sorting and Calculating With Data — At the community learning centre, someone describes a tool or idea that shows data visually. Which one is it?

A. Label B. Category C. Pattern D. Chart

7. Sorting and Calculating With Data — Your class is solving a practical problem. One useful thing is a regular feature seen in data. What is its name?

A. Pattern B. Category C. Chart D. Label

8. Sorting and Calculating With Data — Which concept matches the explanation "shows data visually" when you review sorting and calculating with data?

A. Label B. Chart C. Category D. Pattern

9. Sorting and Calculating With Data — A classmate confuses several ideas about sorting and calculating with data. Which one actually groups items sharing a feature?

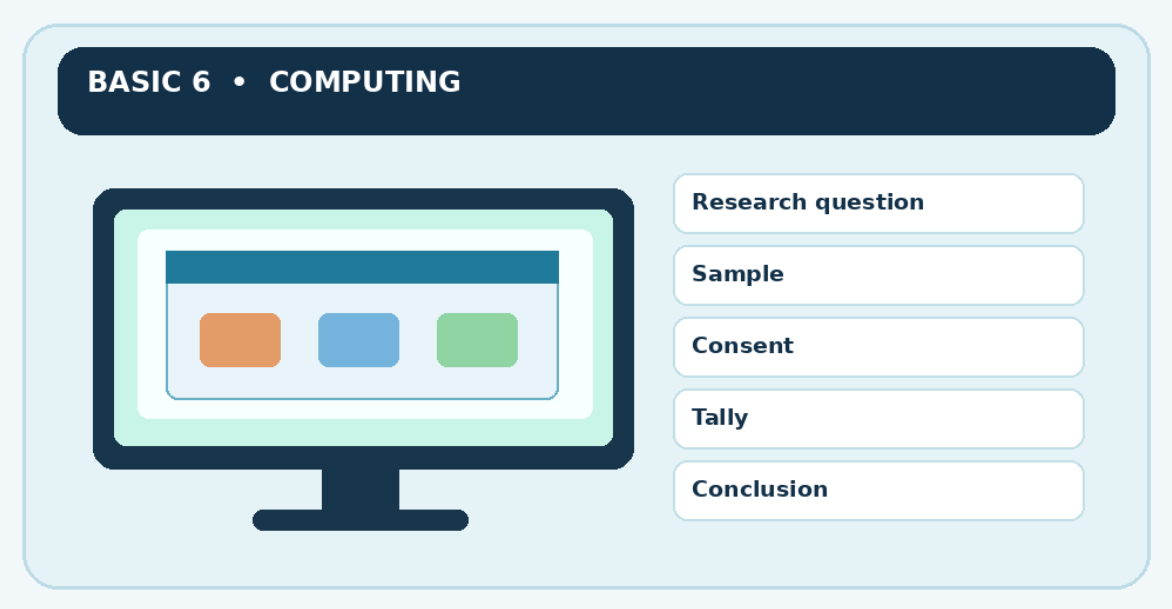

A. Pattern B. Chart C. Category D. Sort

10. Sorting and Calculating With Data — A group makes a display on sorting and calculating with data. Their first clue is "groups items sharing a feature". Which label is correct?

A. Pattern B. Category C. Sort D. Chart

Lesson 13: Plan a Survey

We will learn to: Identify, explain and apply the important ideas behind plan a survey.

Five important ideas

Research question: states what we want to discover.

Sample: is a smaller selected group.

Consent: means someone agrees to participate.

Tally: records counts using marks.

Conclusion: explains what the collected results suggest.

Our Ghanaian story

When interviewing classmates about favourite fruits, Kojo had a question about plan a survey. The group discovered that research question states what we want to discover, while sample is a smaller selected group. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Research question, Sample and Consent; explain what each means.

Create and share

Make a colourful, labelled poster that teaches plan a survey. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.3.1.6

Lesson 13: Play & Challenge

PLAY — Choose one best answer for each question.

1. Plan a Survey — Choose the correct name for something that states what we want to discover.

A. Consent B. Sample C. Research question D. Conclusion

2. Plan a Survey — Your friend says, "This is a smaller selected group." What is the friend describing?

A. Sample B. Conclusion C. Tally D. Research question

3. Plan a Survey — Which idea from plan a survey matches the clue "means someone agrees to participate"?

A. Consent B. Tally C. Conclusion D. Sample

4. Plan a Survey — The teacher asks for an example that records counts using marks. Which answer fits?

A. Conclusion B. Tally C. Research question D. Sample

5. Plan a Survey — Can you identify the term described here: explains what the collected results suggest?

A. Consent B. Tally C. Research question D. Conclusion

CHALLENGE — Think and apply.

1. Plan a Survey — Imagine helping a younger pupil understand something that means someone agrees to participate. Which term would you teach?

A. Conclusion B. Tally C. Consent D. Sample

2. Plan a Survey — During a school ICT lesson, Akosua wants to show something that states what we want to discover. Which idea should be labelled?

A. Consent B. Sample C. Research question D. Conclusion

3. Plan a Survey — Your class is solving a practical problem. One useful thing records counts using marks. What is its name?

A. Research question B. Sample C. Tally D. Conclusion

4. Plan a Survey — Which answer would fit on a poster beside the words "states what we want to discover"?

A. Conclusion B. Research question C. Sample D. Consent

5. Plan a Survey — A classmate confuses several ideas about plan a survey. Which one actually is a smaller selected group?

A. Conclusion B. Research question C. Tally D. Sample

6. Plan a Survey — Which concept matches the explanation "explains what the collected results suggest" when you review plan a survey?

A. Consent B. Tally C. Research question D. Conclusion

7. Plan a Survey — A group makes a display on plan a survey. Their first clue is "is a smaller selected group". Which label is correct?

A. Conclusion B. Research question C. Sample D. Tally

8. Plan a Survey — For a short demonstration, the teacher needs an example that means someone agrees to participate. Which choice would you select?

A. Consent B. Conclusion C. Tally D. Sample

9. Plan a Survey — At home, Akosua remembers a class rule or concept that records counts using marks. What was it called?

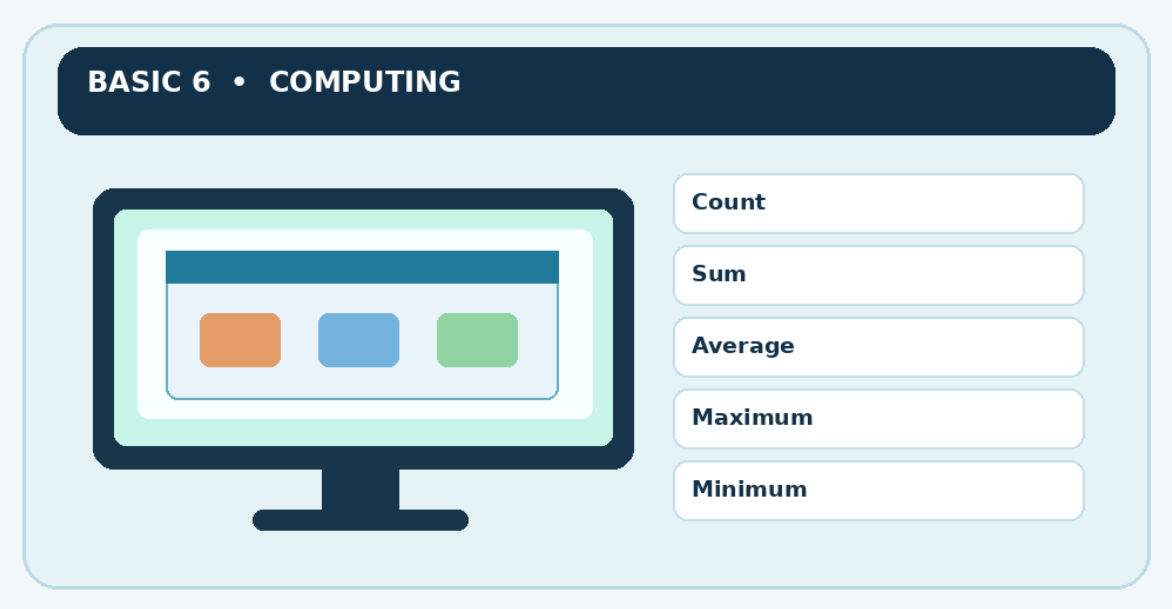

A. Tally B. Conclusion C. Sample D. Research question

10. Plan a Survey — At the community learning centre, someone describes a tool or idea that explains what the collected results suggest. Which one is it?

A. Research question B. Consent C. Tally D. Conclusion

Lesson 14: Interpreting Data

We will learn to: Identify, explain and apply the important ideas behind interpreting data.

Five important ideas

Count: tells how many items are present.

Sum: adds numbers together.

Average: shares a total evenly across the number of values.

Maximum: is the largest value.

Minimum: is the smallest value.

Our Ghanaian story

While calculating scores for sports day, Esi had a question about interpreting data. The group discovered that count tells how many items are present, while sum adds numbers together. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Count, Sum and Average; explain what each means.

Create and share

Make a colourful, labelled poster that teaches interpreting data. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.3.1.8

Lesson 14: Play & Challenge

PLAY — Choose one best answer for each question.

1. Interpreting Data — Choose the correct name for something that tells how many items are present.

A. Sum B. Average C. Count D. Maximum

2. Interpreting Data — Your friend says, "This adds numbers together." What is the friend describing?

A. Average B. Count C. Sum D. Minimum

3. Interpreting Data — Which idea from interpreting data matches the clue "shares a total evenly across the number of values"?

A. Minimum B. Average C. Sum D. Count

4. Interpreting Data — The teacher asks for an example that is the largest value. Which answer fits?

A. Maximum B. Sum C. Count D. Average

5. Interpreting Data — Can you identify the term described here: is the smallest value?

A. Maximum B. Sum C. Minimum D. Count

CHALLENGE — Think and apply.

1. Interpreting Data — At home, Esi remembers a class rule or concept that is the largest value. What was it called?

A. Maximum B. Count C. Sum D. Average

2. Interpreting Data — At the community learning centre, someone describes a tool or idea that is the smallest value. Which one is it?

A. Maximum B. Sum C. Minimum D. Count

3. Interpreting Data — For a short demonstration, the teacher needs an example that shares a total evenly across the number of values. Which choice would you select?

A. Count B. Average C. Sum D. Minimum

4. Interpreting Data — Your class is solving a practical problem. One useful thing is the largest value. What is its name?

A. Maximum B. Sum C. Count D. Average

5. Interpreting Data — Imagine helping a younger pupil understand something that shares a total evenly across the number of values. Which term would you teach?

A. Minimum B. Average C. Sum D. Count

6. Interpreting Data — A classmate confuses several ideas about interpreting data. Which one actually adds numbers together?

A. Count B. Average C. Sum D. Minimum

7. Interpreting Data — Which answer would fit on a poster beside the words "tells how many items are present"?

A. Count B. Maximum C. Sum D. Average

8. Interpreting Data — A group makes a display on interpreting data. Their first clue is "adds numbers together". Which label is correct?

A. Count B. Average C. Minimum D. Sum

9. Interpreting Data — Which concept matches the explanation "is the smallest value" when you review interpreting data?

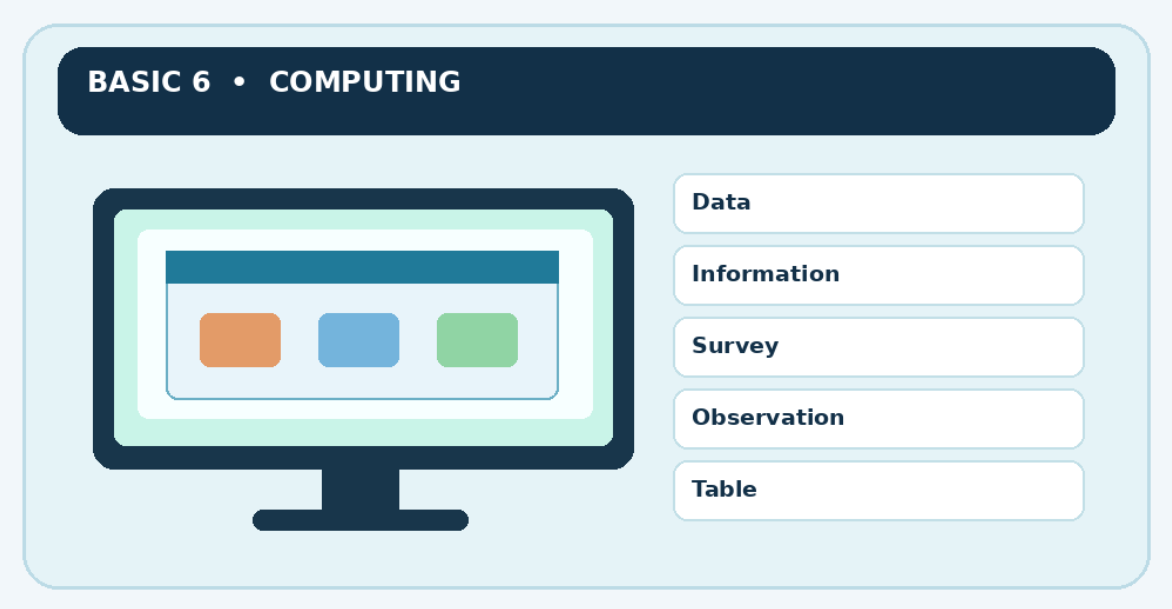

A. Minimum B. Maximum C. Sum D. Count

10. Interpreting Data — During a school ICT lesson, Esi wants to show something that tells how many items are present. Which idea should be labelled?

A. Sum B. Count C. Maximum D. Average

Lesson 15: Presenting Data in Tables and Charts

We will learn to: Identify, explain and apply the important ideas behind presenting data in tables and charts.

Five important ideas

Data: raw facts gathered for a purpose.

Information: data organised to make sense.

Survey: asks people selected questions.

Observation: records what someone notices.

Table: arranges facts into rows and columns.

Our Ghanaian story

During a survey of the school, Yaw had a question about presenting data in tables and charts. The group discovered that data raw facts gathered for a purpose, while information data organised to make sense. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Data, Information and Survey; explain what each means.

Create and share

Make a colourful, labelled poster that teaches presenting data in tables and charts. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.3.1.9

Lesson 15: Play & Challenge

PLAY — Choose one best answer for each question.

1. Presenting Data in Tables and Charts — Choose the correct name for something that raw facts gathered for a purpose.

A. Survey B. Data C. Table D. Observation

2. Presenting Data in Tables and Charts — Your friend says, "This data organised to make sense." What is the friend describing?

A. Survey B. Information C. Observation D. Table

3. Presenting Data in Tables and Charts — Which idea from presenting data in tables and charts matches the clue "asks people selected questions"?

A. Observation B. Information C. Data D. Survey

4. Presenting Data in Tables and Charts — The teacher asks for an example that records what someone notices. Which answer fits?

A. Information B. Observation C. Data D. Table

5. Presenting Data in Tables and Charts — Can you identify the term described here: arranges facts into rows and columns?

A. Survey B. Information C. Observation D. Table

CHALLENGE — Think and apply.

1. Presenting Data in Tables and Charts — A group makes a display on presenting data in tables and charts. Their first clue is "data organised to make sense". Which label is correct?

A. Table B. Survey C. Observation D. Information

2. Presenting Data in Tables and Charts — At the community learning centre, someone describes a tool or idea that arranges facts into rows and columns. Which one is it?

A. Observation B. Table C. Survey D. Information

3. Presenting Data in Tables and Charts — For a short demonstration, the teacher needs an example that asks people selected questions. Which choice would you select?

A. Survey B. Information C. Observation D. Data

4. Presenting Data in Tables and Charts — Your class is solving a practical problem. One useful thing records what someone notices. What is its name?

A. Observation B. Data C. Information D. Table

5. Presenting Data in Tables and Charts — At home, Ama remembers a class rule or concept that records what someone notices. What was it called?

A. Information B. Table C. Data D. Observation

6. Presenting Data in Tables and Charts — Which concept matches the explanation "arranges facts into rows and columns" when you review presenting data in tables and charts?

A. Observation B. Survey C. Table D. Information

7. Presenting Data in Tables and Charts — A classmate confuses several ideas about presenting data in tables and charts. Which one actually data organised to make sense?

A. Table B. Information C. Observation D. Survey

8. Presenting Data in Tables and Charts — During a school ICT lesson, Ama wants to show something that raw facts gathered for a purpose. Which idea should be labelled?

A. Survey B. Table C. Data D. Observation

9. Presenting Data in Tables and Charts — Imagine helping a younger pupil understand something that asks people selected questions. Which term would you teach?

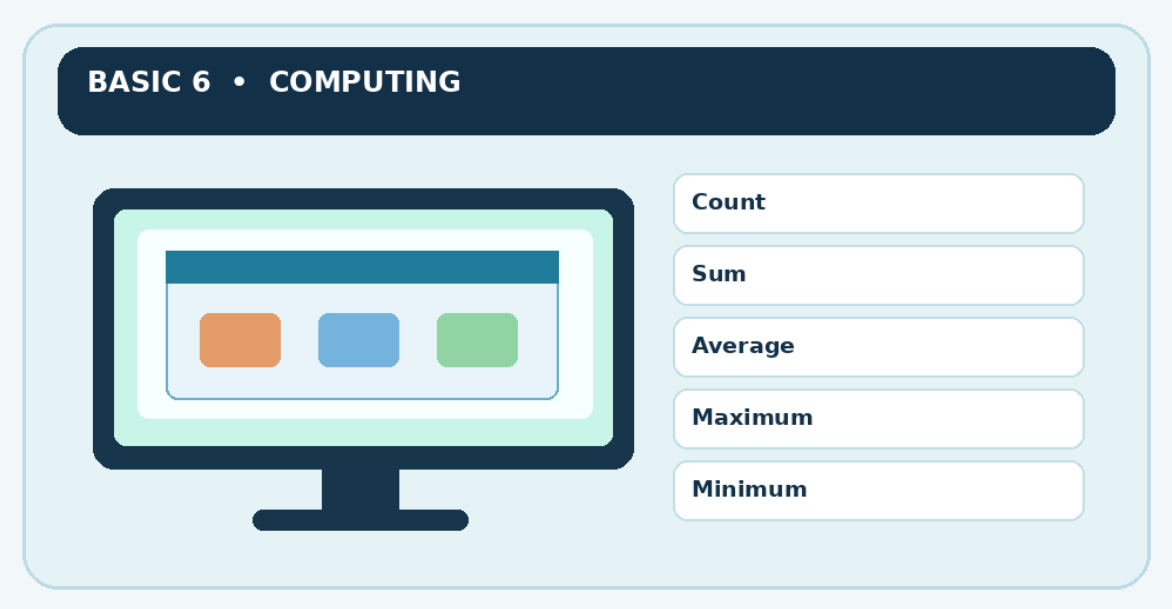

A. Survey B. Observation C. Data D. Information

10. Presenting Data in Tables and Charts — Which answer would fit on a poster beside the words "raw facts gathered for a purpose"?

A. Table B. Observation C. Survey D. Data

Lesson 16: Sum Mean Minimum and Maximum

We will learn to: Identify, explain and apply the important ideas behind sum mean minimum and maximum.

Five important ideas

Count: tells how many items are present.

Sum: adds numbers together.

Average: shares a total evenly across the number of values.

Maximum: is the largest value.

Minimum: is the smallest value.

Our Ghanaian story

While calculating scores for sports day, Abena had a question about sum mean minimum and maximum. The group discovered that count tells how many items are present, while sum adds numbers together. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Count, Sum and Average; explain what each means.

Create and share

Make a colourful, labelled poster that teaches sum mean minimum and maximum. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.3.1.11

Lesson 16: Play & Challenge

PLAY — Choose one best answer for each question.

1. Sum Mean Minimum and Maximum — Choose the correct name for something that tells how many items are present.

A. Maximum B. Count C. Minimum D. Average

2. Sum Mean Minimum and Maximum — Your friend says, "This adds numbers together." What is the friend describing?

A. Sum B. Maximum C. Minimum D. Count

3. Sum Mean Minimum and Maximum — Which idea from sum mean minimum and maximum matches the clue "shares a total evenly across the number of values"?

A. Average B. Sum C. Count D. Minimum

4. Sum Mean Minimum and Maximum — The teacher asks for an example that is the largest value. Which answer fits?

A. Sum B. Average C. Minimum D. Maximum

5. Sum Mean Minimum and Maximum — Can you identify the term described here: is the smallest value?

A. Average B. Count C. Sum D. Minimum

CHALLENGE — Think and apply.

1. Sum Mean Minimum and Maximum — Which concept matches the explanation "is the smallest value" when you review sum mean minimum and maximum?

A. Sum B. Count C. Average D. Minimum

2. Sum Mean Minimum and Maximum — Which answer would fit on a poster beside the words "tells how many items are present"?

A. Count B. Maximum C. Average D. Minimum

3. Sum Mean Minimum and Maximum — For a short demonstration, the teacher needs an example that shares a total evenly across the number of values. Which choice would you select?

A. Minimum B. Average C. Count D. Sum

4. Sum Mean Minimum and Maximum — At the community learning centre, someone describes a tool or idea that is the smallest value. Which one is it?

A. Count B. Minimum C. Sum D. Average

5. Sum Mean Minimum and Maximum — A group makes a display on sum mean minimum and maximum. Their first clue is "adds numbers together". Which label is correct?

A. Maximum B. Count C. Minimum D. Sum

6. Sum Mean Minimum and Maximum — A classmate confuses several ideas about sum mean minimum and maximum. Which one actually adds numbers together?

A. Maximum B. Count C. Minimum D. Sum

7. Sum Mean Minimum and Maximum — Imagine helping a younger pupil understand something that shares a total evenly across the number of values. Which term would you teach?

A. Minimum B. Average C. Count D. Sum

8. Sum Mean Minimum and Maximum — Your class is solving a practical problem. One useful thing is the largest value. What is its name?

A. Minimum B. Maximum C. Sum D. Average

9. Sum Mean Minimum and Maximum — At home, Yaw remembers a class rule or concept that is the largest value. What was it called?

A. Minimum B. Average C. Maximum D. Sum

10. Sum Mean Minimum and Maximum — During a school ICT lesson, Yaw wants to show something that tells how many items are present. Which idea should be labelled?

A. Average B. Count C. Maximum D. Minimum

Lesson 17: Communication in Our Community

We will learn to: Identify, explain and apply the important ideas behind communication in our community.

Five important ideas

Mobile phone: allows calls and messages.

Radio: broadcasts sound to listeners.

Television: shares moving pictures and sound.

Email: sends digital written messages.

Video call: lets distant people see and hear one another.

Our Ghanaian story

When contacting relatives in another region, Kofi had a question about communication in our community. The group discovered that mobile phone allows calls and messages, while radio broadcasts sound to listeners. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of mobile phone, radio and television. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches communication in our community. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.4.1.1

Lesson 17: Play & Challenge

PLAY — Choose one best answer for each question.

1. Communication in Our Community — Choose the correct name for something that allows calls and messages.

A. Mobile phone B. Radio C. Email D. Television

2. Communication in Our Community — Your friend says, "This broadcasts sound to listeners." What is the friend describing?

A. Television B. Radio C. Video call D. Email

3. Communication in Our Community — Which idea from communication in our community matches the clue "shares moving pictures and sound"?

A. Video call B. Mobile phone C. Television D. Radio

4. Communication in Our Community — The teacher asks for an example that sends digital written messages. Which answer fits?

A. Mobile phone B. Television C. Video call D. Email

5. Communication in Our Community — Can you identify the term described here: lets distant people see and hear one another?

A. Mobile phone B. Television C. Video call D. Radio

CHALLENGE — Think and apply.

1. Communication in Our Community — At home, Kofi remembers a class rule or concept that sends digital written messages. What was it called?

A. Email B. Television C. Mobile phone D. Video call

2. Communication in Our Community — At the community learning centre, someone describes a tool or idea that lets distant people see and hear one another. Which one is it?

A. Radio B. Mobile phone C. Video call D. Television

3. Communication in Our Community — During a school ICT lesson, Kofi wants to show something that allows calls and messages. Which idea should be labelled?

A. Mobile phone B. Television C. Radio D. Email

4. Communication in Our Community — A group makes a display on communication in our community. Their first clue is "broadcasts sound to listeners". Which label is correct?

A. Radio B. Television C. Video call D. Email

5. Communication in Our Community — A classmate confuses several ideas about communication in our community. Which one actually broadcasts sound to listeners?

A. Video call B. Email C. Radio D. Television

6. Communication in Our Community — Your class is solving a practical problem. One useful thing sends digital written messages. What is its name?

A. Video call B. Mobile phone C. Television D. Email

7. Communication in Our Community — Which concept matches the explanation "lets distant people see and hear one another" when you review communication in our community?

A. Video call B. Mobile phone C. Radio D. Television

8. Communication in Our Community — Imagine helping a younger pupil understand something that shares moving pictures and sound. Which term would you teach?

A. Television B. Video call C. Mobile phone D. Radio

9. Communication in Our Community — For a short demonstration, the teacher needs an example that shares moving pictures and sound. Which choice would you select?

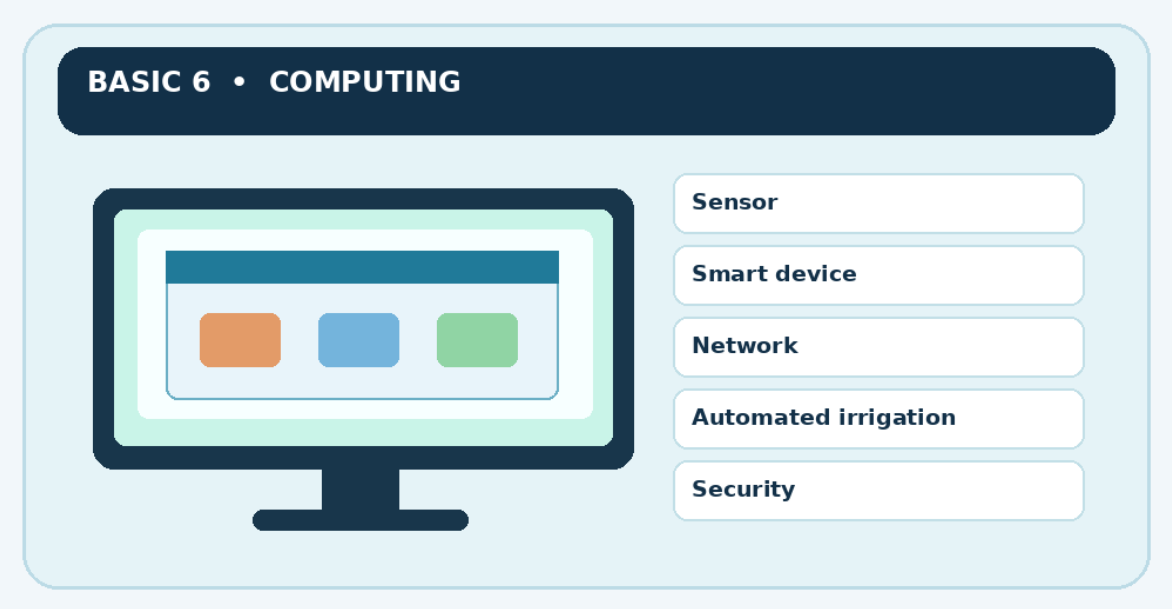

A. Television B. Mobile phone C. Radio D. Video call

10. Communication in Our Community — Which answer would fit on a poster beside the words "allows calls and messages"?

A. Radio B. Email C. Mobile phone D. Television

Lesson 18: More Communication Technologies

We will learn to: Identify, explain and apply the important ideas behind more communication technologies.

Five important ideas

Sensor: detects a change such as temperature or movement.

Smart device: can use connected data to act.

Network: allows devices to exchange information.

Automated irrigation: can water crops based on programmed rules.

Security: protects connected devices and their information.

Our Ghanaian story

At a demonstration of a smart farming system, Ama had a question about more communication technologies. The group discovered that sensor detects a change such as temperature or movement, while smart device can use connected data to act. They drew an example and explained it to their classmates.

Try it!

Design a simple paper model explaining sensor, smart device and network. Trade models with a classmate and explain how your design works.

Create and share

Make a colourful, labelled poster that teaches more communication technologies. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.1.4.1.2

Lesson 18: Play & Challenge

PLAY — Choose one best answer for each question.

1. More Communication Technologies — Choose the correct name for something that detects a change such as temperature or movement.

A. Smart device B. Automated irrigation C. Security D. Sensor

2. More Communication Technologies — Your friend says, "This can use connected data to act." What is the friend describing?

A. Automated irrigation B. Smart device C. Security D. Network

3. More Communication Technologies — Which idea from more communication technologies matches the clue "allows devices to exchange information"?

A. Network B. Automated irrigation C. Security D. Sensor

4. More Communication Technologies — The teacher asks for an example that can water crops based on programmed rules. Which answer fits?

A. Network B. Security C. Sensor D. Automated irrigation

5. More Communication Technologies — Can you identify the term described here: protects connected devices and their information?

A. Smart device B. Network C. Automated irrigation D. Security

CHALLENGE — Think and apply.

1. More Communication Technologies — Which answer would fit on a poster beside the words "detects a change such as temperature or movement"?

A. Sensor B. Smart device C. Automated irrigation D. Security

2. More Communication Technologies — At the community learning centre, someone describes a tool or idea that protects connected devices and their information. Which one is it?

A. Network B. Smart device C. Automated irrigation D. Security

3. More Communication Technologies — A group makes a display on more communication technologies. Their first clue is "can use connected data to act". Which label is correct?

A. Smart device B. Automated irrigation C. Security D. Network

4. More Communication Technologies — A classmate confuses several ideas about more communication technologies. Which one actually can use connected data to act?

A. Smart device B. Network C. Security D. Automated irrigation

5. More Communication Technologies — Which concept matches the explanation "protects connected devices and their information" when you review more communication technologies?

A. Network B. Security C. Automated irrigation D. Smart device

6. More Communication Technologies — At home, Akosua remembers a class rule or concept that can water crops based on programmed rules. What was it called?

A. Sensor B. Automated irrigation C. Security D. Network

7. More Communication Technologies — Imagine helping a younger pupil understand something that allows devices to exchange information. Which term would you teach?

A. Security B. Automated irrigation C. Network D. Sensor

8. More Communication Technologies — Your class is solving a practical problem. One useful thing can water crops based on programmed rules. What is its name?

A. Automated irrigation B. Sensor C. Security D. Network

9. More Communication Technologies — For a short demonstration, the teacher needs an example that allows devices to exchange information. Which choice would you select?

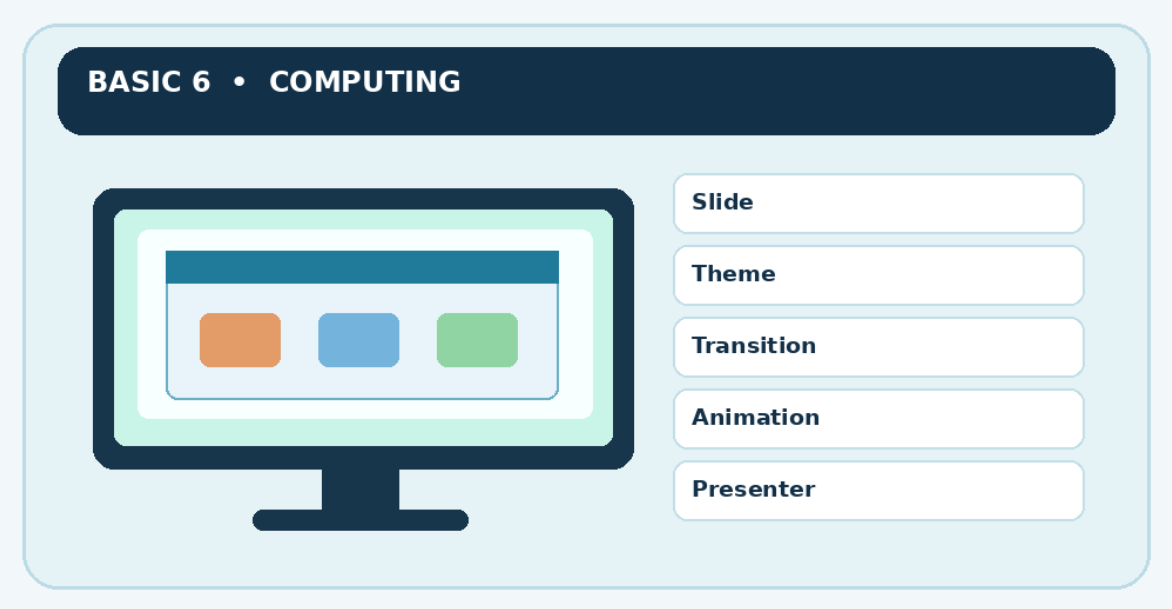

A. Network B. Automated irrigation C. Security D. Sensor

10. More Communication Technologies — During a school ICT lesson, Akosua wants to show something that detects a change such as temperature or movement. Which idea should be labelled?

A. Security B. Sensor C. Automated irrigation D. Smart device

Lesson 19: Presentation File and Design Tools

We will learn to: Identify, explain and apply the important ideas behind presentation file and design tools.

Five important ideas

Slide: is one screen of a presentation.

Theme: gives slides a coordinated design.

Transition: controls how one slide changes to another.

Animation: makes an object appear or move.

Presenter: speaks clearly while showing the slides.

Our Ghanaian story

While preparing a school assembly talk, Kojo had a question about presentation file and design tools. The group discovered that slide is one screen of a presentation, while theme gives slides a coordinated design. They drew an example and explained it to their classmates.

Try it!

Make a one-page paper example about your school or a Ghanaian festival. Include slide, theme and transition; present it clearly to a partner.

Create and share

Make a colourful, labelled poster that teaches presentation file and design tools. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.2.1.1.1

Lesson 19: Play & Challenge

PLAY — Choose one best answer for each question.

1. Presentation File and Design Tools — Choose the correct name for something that is one screen of a presentation.

A. Slide B. Animation C. Presenter D. Transition

2. Presentation File and Design Tools — Your friend says, "This gives slides a coordinated design." What is the friend describing?

A. Transition B. Animation C. Theme D. Presenter

3. Presentation File and Design Tools — Which idea from presentation file and design tools matches the clue "controls how one slide changes to another"?

A. Slide B. Transition C. Animation D. Presenter

4. Presentation File and Design Tools — The teacher asks for an example that makes an object appear or move. Which answer fits?

A. Slide B. Animation C. Theme D. Transition

5. Presentation File and Design Tools — Can you identify the term described here: speaks clearly while showing the slides?

A. Transition B. Presenter C. Theme D. Slide

CHALLENGE — Think and apply.

1. Presentation File and Design Tools — Which concept matches the explanation "speaks clearly while showing the slides" when you review presentation file and design tools?

A. Theme B. Presenter C. Slide D. Transition

2. Presentation File and Design Tools — At home, Esi remembers a class rule or concept that makes an object appear or move. What was it called?

A. Transition B. Theme C. Animation D. Slide

3. Presentation File and Design Tools — For a short demonstration, the teacher needs an example that controls how one slide changes to another. Which choice would you select?

A. Presenter B. Transition C. Slide D. Animation

4. Presentation File and Design Tools — Imagine helping a younger pupil understand something that controls how one slide changes to another. Which term would you teach?

A. Animation B. Transition C. Slide D. Presenter

5. Presentation File and Design Tools — During a school ICT lesson, Esi wants to show something that is one screen of a presentation. Which idea should be labelled?

A. Presenter B. Animation C. Slide D. Transition

6. Presentation File and Design Tools — A group makes a display on presentation file and design tools. Their first clue is "gives slides a coordinated design". Which label is correct?

A. Animation B. Transition C. Presenter D. Theme

7. Presentation File and Design Tools — Your class is solving a practical problem. One useful thing makes an object appear or move. What is its name?

A. Animation B. Slide C. Theme D. Transition

8. Presentation File and Design Tools — A classmate confuses several ideas about presentation file and design tools. Which one actually gives slides a coordinated design?

A. Presenter B. Theme C. Transition D. Animation

9. Presentation File and Design Tools — Which answer would fit on a poster beside the words "is one screen of a presentation"?

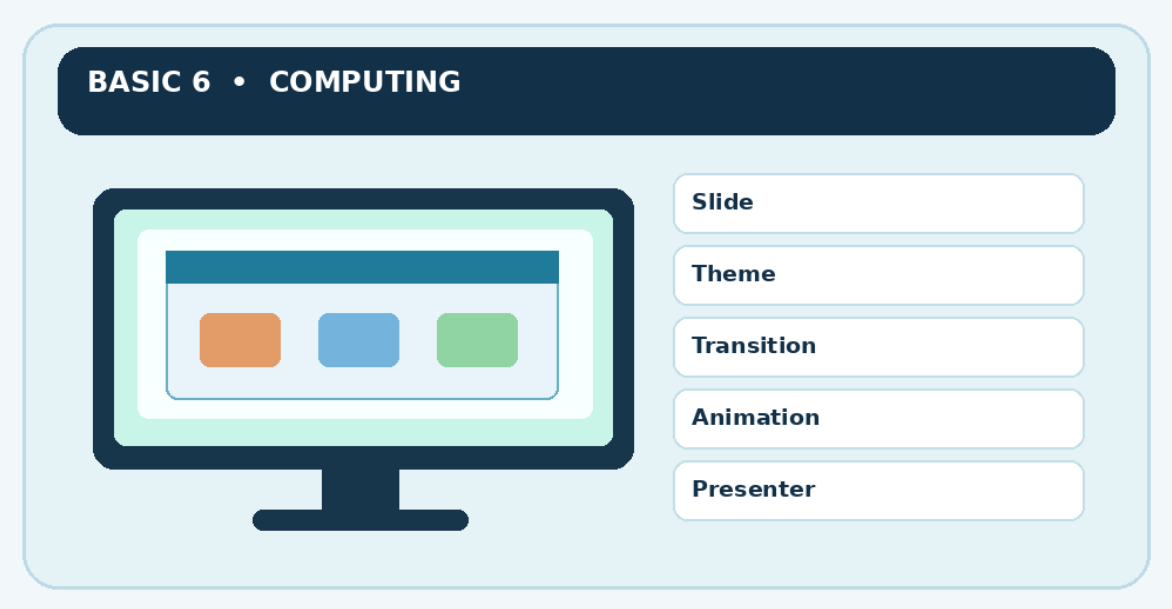

A. Presenter B. Transition C. Slide D. Animation

10. Presentation File and Design Tools — At the community learning centre, someone describes a tool or idea that speaks clearly while showing the slides. Which one is it?

A. Slide B. Presenter C. Theme D. Transition

Lesson 20: PowerPoint Text and Insert Tools

We will learn to: Identify, explain and apply the important ideas behind powerpoint text and insert tools.

Five important ideas

Slide: is one screen of a presentation.

Theme: gives slides a coordinated design.

Transition: controls how one slide changes to another.

Animation: makes an object appear or move.

Presenter: speaks clearly while showing the slides.

Our Ghanaian story

While preparing a school assembly talk, Esi had a question about powerpoint text and insert tools. The group discovered that slide is one screen of a presentation, while theme gives slides a coordinated design. They drew an example and explained it to their classmates.

Try it!

Make a one-page paper example about your school or a Ghanaian festival. Include slide, theme and transition; present it clearly to a partner.

Create and share

Make a colourful, labelled poster that teaches powerpoint text and insert tools. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.2.1.1.2

Lesson 20: Play & Challenge

PLAY — Choose one best answer for each question.

1. PowerPoint Text and Insert Tools — Choose the correct name for something that is one screen of a presentation.

A. Presenter B. Animation C. Slide D. Transition

2. PowerPoint Text and Insert Tools — Your friend says, "This gives slides a coordinated design." What is the friend describing?

A. Presenter B. Theme C. Animation D. Transition

3. PowerPoint Text and Insert Tools — Which idea from powerpoint text and insert tools matches the clue "controls how one slide changes to another"?

A. Presenter B. Transition C. Theme D. Slide

4. PowerPoint Text and Insert Tools — The teacher asks for an example that makes an object appear or move. Which answer fits?

A. Slide B. Presenter C. Animation D. Theme

5. PowerPoint Text and Insert Tools — Can you identify the term described here: speaks clearly while showing the slides?

A. Presenter B. Transition C. Theme D. Slide

CHALLENGE — Think and apply.

1. PowerPoint Text and Insert Tools — A classmate confuses several ideas about powerpoint text and insert tools. Which one actually gives slides a coordinated design?

A. Animation B. Theme C. Transition D. Presenter

2. PowerPoint Text and Insert Tools — A group makes a display on powerpoint text and insert tools. Their first clue is "gives slides a coordinated design". Which label is correct?

A. Theme B. Presenter C. Animation D. Transition

3. PowerPoint Text and Insert Tools — At home, Ama remembers a class rule or concept that makes an object appear or move. What was it called?

A. Theme B. Presenter C. Animation D. Slide

4. PowerPoint Text and Insert Tools — Which answer would fit on a poster beside the words "is one screen of a presentation"?

A. Slide B. Presenter C. Transition D. Animation

5. PowerPoint Text and Insert Tools — For a short demonstration, the teacher needs an example that controls how one slide changes to another. Which choice would you select?

A. Transition B. Theme C. Slide D. Presenter

6. PowerPoint Text and Insert Tools — During a school ICT lesson, Ama wants to show something that is one screen of a presentation. Which idea should be labelled?

A. Presenter B. Transition C. Animation D. Slide

7. PowerPoint Text and Insert Tools — Your class is solving a practical problem. One useful thing makes an object appear or move. What is its name?

A. Theme B. Presenter C. Animation D. Slide

8. PowerPoint Text and Insert Tools — At the community learning centre, someone describes a tool or idea that speaks clearly while showing the slides. Which one is it?

A. Slide B. Transition C. Presenter D. Theme

9. PowerPoint Text and Insert Tools — Imagine helping a younger pupil understand something that controls how one slide changes to another. Which term would you teach?

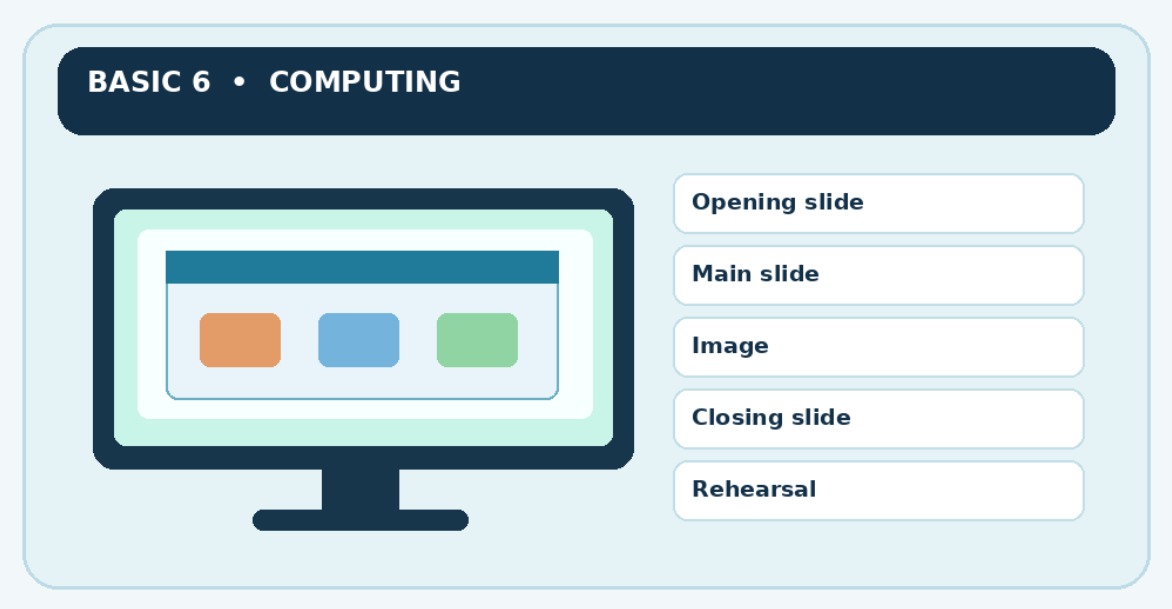

A. Theme B. Presenter C. Slide D. Transition

10. PowerPoint Text and Insert Tools — Which concept matches the explanation "speaks clearly while showing the slides" when you review powerpoint text and insert tools?

A. Transition B. Slide C. Theme D. Presenter

Lesson 21: Five-Slide Class Presentation

We will learn to: Identify, explain and apply the important ideas behind five-slide class presentation.

Five important ideas

Opening slide: introduces the topic.

Main slide: shows one key idea.

Image: helps communicate meaning.

Closing slide: sums up the message.

Rehearsal: helps a presenter speak with confidence.

Our Ghanaian story

Before presenting an environmental club project, Yaw had a question about five-slide class presentation. The group discovered that opening slide introduces the topic, while main slide shows one key idea. They drew an example and explained it to their classmates.

Try it!

Make a one-page paper example about your school or a Ghanaian festival. Include opening slide, main slide and image; present it clearly to a partner.

Create and share

Make a colourful, labelled poster that teaches five-slide class presentation. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.2.1.1.3

Lesson 21: Play & Challenge

PLAY — Choose one best answer for each question.

1. Five-Slide Class Presentation — Choose the correct name for something that introduces the topic.

A. Opening slide B. Main slide C. Image D. Rehearsal

2. Five-Slide Class Presentation — Your friend says, "This shows one key idea." What is the friend describing?

A. Image B. Main slide C. Opening slide D. Rehearsal

3. Five-Slide Class Presentation — Which idea from five-slide class presentation matches the clue "helps communicate meaning"?

A. Rehearsal B. Image C. Closing slide D. Main slide

4. Five-Slide Class Presentation — The teacher asks for an example that sums up the message. Which answer fits?

A. Opening slide B. Main slide C. Image D. Closing slide

5. Five-Slide Class Presentation — Can you identify the term described here: helps a presenter speak with confidence?

A. Opening slide B. Image C. Closing slide D. Rehearsal

CHALLENGE — Think and apply.

1. Five-Slide Class Presentation — Which concept matches the explanation "helps a presenter speak with confidence" when you review five-slide class presentation?

A. Opening slide B. Rehearsal C. Closing slide D. Image

2. Five-Slide Class Presentation — For a short demonstration, the teacher needs an example that helps communicate meaning. Which choice would you select?

A. Main slide B. Rehearsal C. Image D. Closing slide

3. Five-Slide Class Presentation — Your class is solving a practical problem. One useful thing sums up the message. What is its name?

A. Image B. Opening slide C. Main slide D. Closing slide

4. Five-Slide Class Presentation — A group makes a display on five-slide class presentation. Their first clue is "shows one key idea". Which label is correct?

A. Rehearsal B. Opening slide C. Main slide D. Image

5. Five-Slide Class Presentation — At home, Yaw remembers a class rule or concept that sums up the message. What was it called?

A. Image B. Closing slide C. Main slide D. Opening slide

6. Five-Slide Class Presentation — Which answer would fit on a poster beside the words "introduces the topic"?

A. Image B. Rehearsal C. Main slide D. Opening slide

7. Five-Slide Class Presentation — A classmate confuses several ideas about five-slide class presentation. Which one actually shows one key idea?

A. Rehearsal B. Image C. Main slide D. Opening slide

8. Five-Slide Class Presentation — At the community learning centre, someone describes a tool or idea that helps a presenter speak with confidence. Which one is it?

A. Closing slide B. Opening slide C. Image D. Rehearsal

9. Five-Slide Class Presentation — Imagine helping a younger pupil understand something that helps communicate meaning. Which term would you teach?

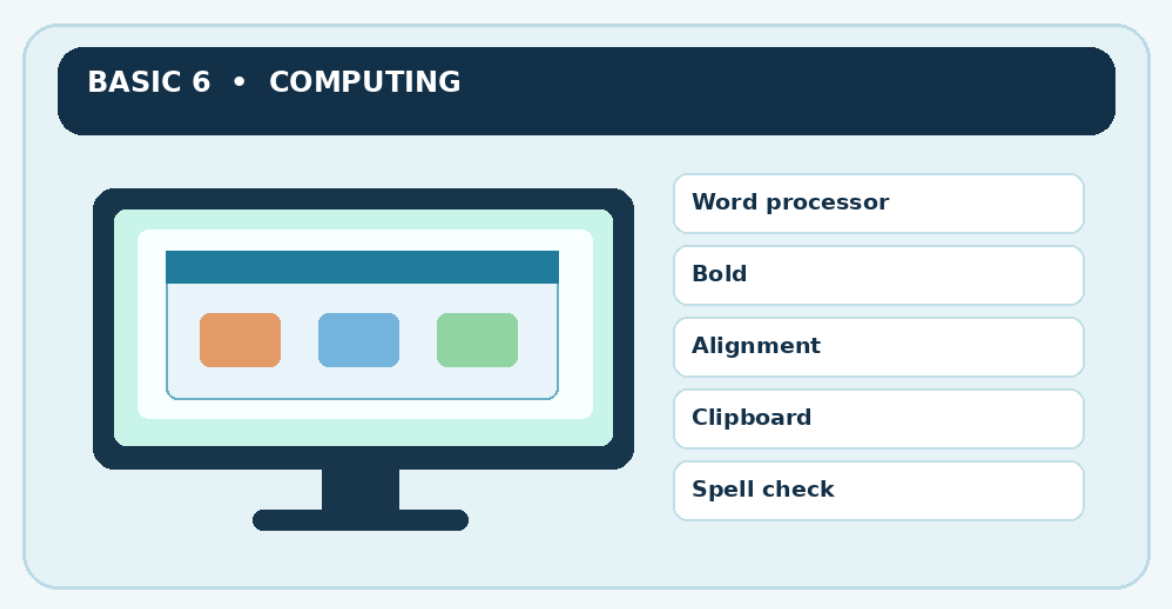

A. Rehearsal B. Image C. Main slide D. Closing slide

10. Five-Slide Class Presentation — During a school ICT lesson, Yaw wants to show something that introduces the topic. Which idea should be labelled?

A. Opening slide B. Main slide C. Image D. Rehearsal

Lesson 22: Word Processing File and Layout

We will learn to: Identify, explain and apply the important ideas behind word processing file and layout.

Five important ideas

Word processor: creates and edits text documents.

Bold: makes important words stand out.

Alignment: positions text on the page.

Clipboard: temporarily holds copied material.

Spell check: helps find possible spelling mistakes.

Our Ghanaian story

While typing a school announcement, Abena had a question about word processing file and layout. The group discovered that word processor creates and edits text documents, while bold makes important words stand out. They drew an example and explained it to their classmates.

Try it!

Make a one-page paper example about your school or a Ghanaian festival. Include word processor, bold and alignment; present it clearly to a partner.

Create and share

Make a colourful, labelled poster that teaches word processing file and layout. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.3.1.1.1

Lesson 22: Play & Challenge

PLAY — Choose one best answer for each question.

1. Word Processing File and Layout — Choose the correct name for something that creates and edits text documents.

A. Clipboard B. Spell check C. Bold D. Word processor

2. Word Processing File and Layout — Your friend says, "This makes important words stand out." What is the friend describing?

A. Word processor B. Alignment C. Clipboard D. Bold

3. Word Processing File and Layout — Which idea from word processing file and layout matches the clue "positions text on the page"?

A. Spell check B. Clipboard C. Bold D. Alignment

4. Word Processing File and Layout — The teacher asks for an example that temporarily holds copied material. Which answer fits?

A. Bold B. Word processor C. Clipboard D. Spell check

5. Word Processing File and Layout — Can you identify the term described here: helps find possible spelling mistakes?

A. Word processor B. Spell check C. Bold D. Clipboard

CHALLENGE — Think and apply.

1. Word Processing File and Layout — A classmate confuses several ideas about word processing file and layout. Which one actually makes important words stand out?

A. Word processor B. Clipboard C. Bold D. Alignment

2. Word Processing File and Layout — During a school ICT lesson, Kofi wants to show something that creates and edits text documents. Which idea should be labelled?

A. Bold B. Clipboard C. Word processor D. Spell check

3. Word Processing File and Layout — At home, Kofi remembers a class rule or concept that temporarily holds copied material. What was it called?

A. Clipboard B. Word processor C. Spell check D. Bold

4. Word Processing File and Layout — Your class is solving a practical problem. One useful thing temporarily holds copied material. What is its name?

A. Bold B. Spell check C. Word processor D. Clipboard

5. Word Processing File and Layout — Which answer would fit on a poster beside the words "creates and edits text documents"?

A. Bold B. Word processor C. Spell check D. Clipboard

6. Word Processing File and Layout — A group makes a display on word processing file and layout. Their first clue is "makes important words stand out". Which label is correct?

A. Alignment B. Bold C. Clipboard D. Word processor

7. Word Processing File and Layout — At the community learning centre, someone describes a tool or idea that helps find possible spelling mistakes. Which one is it?

A. Spell check B. Word processor C. Clipboard D. Bold

8. Word Processing File and Layout — Which concept matches the explanation "helps find possible spelling mistakes" when you review word processing file and layout?

A. Word processor B. Clipboard C. Bold D. Spell check

9. Word Processing File and Layout — For a short demonstration, the teacher needs an example that positions text on the page. Which choice would you select?

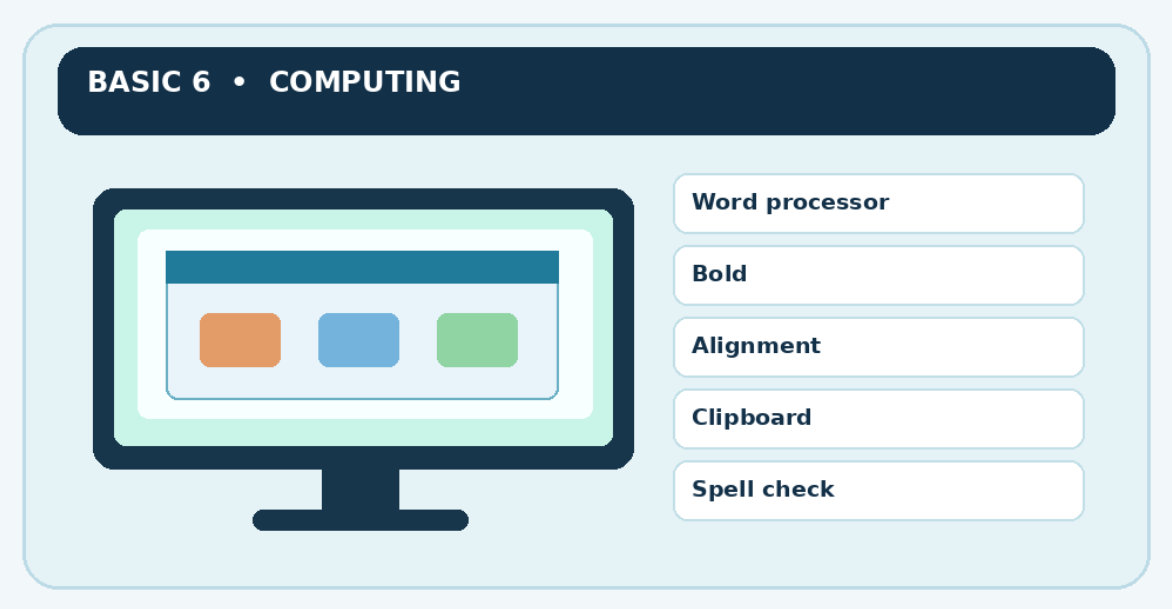

A. Spell check B. Clipboard C. Alignment D. Bold

10. Word Processing File and Layout — Imagine helping a younger pupil understand something that positions text on the page. Which term would you teach?

A. Bold B. Spell check C. Alignment D. Clipboard

Lesson 23: Insert Text Features

We will learn to: Identify, explain and apply the important ideas behind insert text features.

Five important ideas

Word processor: creates and edits text documents.

Bold: makes important words stand out.

Alignment: positions text on the page.

Clipboard: temporarily holds copied material.

Spell check: helps find possible spelling mistakes.

Our Ghanaian story

While typing a school announcement, Kofi had a question about insert text features. The group discovered that word processor creates and edits text documents, while bold makes important words stand out. They drew an example and explained it to their classmates.

Try it!

Make a one-page paper example about your school or a Ghanaian festival. Include word processor, bold and alignment; present it clearly to a partner.

Create and share

Make a colourful, labelled poster that teaches insert text features. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.3.1.1.2

Lesson 23: Play & Challenge

PLAY — Choose one best answer for each question.

1. Insert Text Features — Choose the correct name for something that creates and edits text documents.

A. Spell check B. Clipboard C. Alignment D. Word processor

2. Insert Text Features — Your friend says, "This makes important words stand out." What is the friend describing?

A. Bold B. Spell check C. Word processor D. Alignment

3. Insert Text Features — Which idea from insert text features matches the clue "positions text on the page"?

A. Bold B. Alignment C. Spell check D. Word processor

4. Insert Text Features — The teacher asks for an example that temporarily holds copied material. Which answer fits?

A. Alignment B. Bold C. Spell check D. Clipboard

5. Insert Text Features — Can you identify the term described here: helps find possible spelling mistakes?

A. Alignment B. Bold C. Spell check D. Clipboard

CHALLENGE — Think and apply.

1. Insert Text Features — Your class is solving a practical problem. One useful thing temporarily holds copied material. What is its name?

A. Alignment B. Clipboard C. Spell check D. Bold

2. Insert Text Features — At the community learning centre, someone describes a tool or idea that helps find possible spelling mistakes. Which one is it?

A. Alignment B. Clipboard C. Spell check D. Bold

3. Insert Text Features — During a school ICT lesson, Akosua wants to show something that creates and edits text documents. Which idea should be labelled?

A. Clipboard B. Alignment C. Word processor D. Spell check

4. Insert Text Features — At home, Akosua remembers a class rule or concept that temporarily holds copied material. What was it called?

A. Bold B. Clipboard C. Alignment D. Spell check

5. Insert Text Features — A group makes a display on insert text features. Their first clue is "makes important words stand out". Which label is correct?

A. Spell check B. Alignment C. Word processor D. Bold

6. Insert Text Features — For a short demonstration, the teacher needs an example that positions text on the page. Which choice would you select?

A. Spell check B. Alignment C. Word processor D. Bold

7. Insert Text Features — Which concept matches the explanation "helps find possible spelling mistakes" when you review insert text features?

A. Spell check B. Bold C. Alignment D. Clipboard

8. Insert Text Features — A classmate confuses several ideas about insert text features. Which one actually makes important words stand out?

A. Bold B. Spell check C. Word processor D. Alignment

9. Insert Text Features — Which answer would fit on a poster beside the words "creates and edits text documents"?

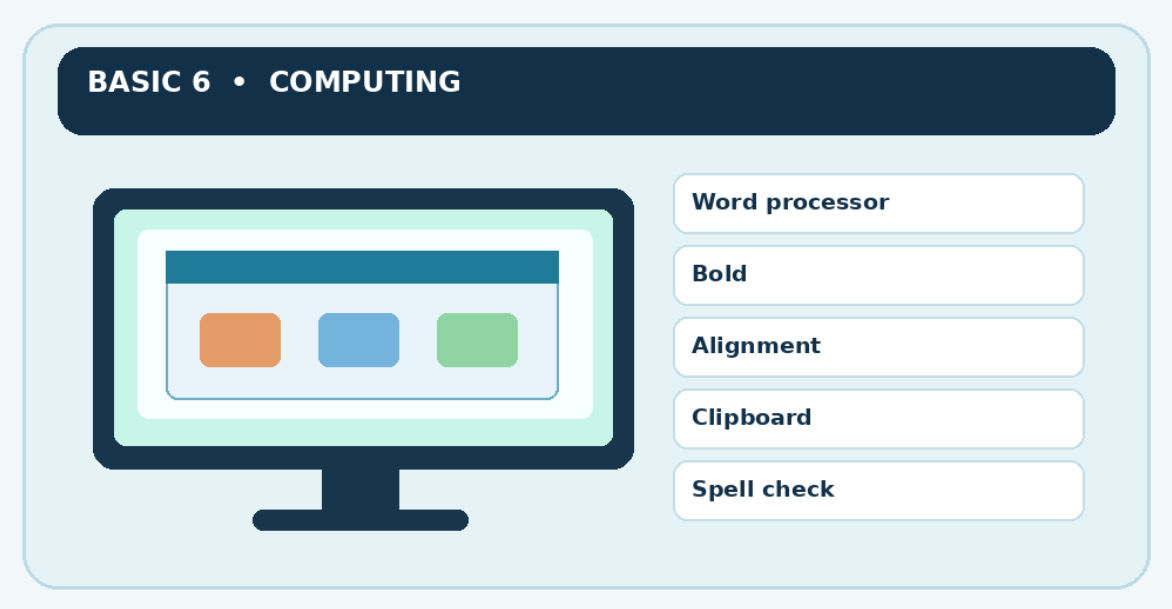

A. Word processor B. Clipboard C. Spell check D. Alignment

10. Insert Text Features — Imagine helping a younger pupil understand something that positions text on the page. Which term would you teach?

A. Bold B. Alignment C. Word processor D. Spell check

Lesson 24: Produce a Polished Paragraph

We will learn to: Identify, explain and apply the important ideas behind produce a polished paragraph.

Five important ideas

Word processor: creates and edits text documents.

Bold: makes important words stand out.

Alignment: positions text on the page.

Clipboard: temporarily holds copied material.

Spell check: helps find possible spelling mistakes.

Our Ghanaian story

While typing a school announcement, Ama had a question about produce a polished paragraph. The group discovered that word processor creates and edits text documents, while bold makes important words stand out. They drew an example and explained it to their classmates.

Try it!

Make a one-page paper example about your school or a Ghanaian festival. Include word processor, bold and alignment; present it clearly to a partner.

Create and share

Make a colourful, labelled poster that teaches produce a polished paragraph. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.3.1.1.3

Lesson 24: Play & Challenge

PLAY — Choose one best answer for each question.

1. Produce a Polished Paragraph — Choose the correct name for something that creates and edits text documents.

A. Word processor B. Bold C. Spell check D. Alignment

2. Produce a Polished Paragraph — Your friend says, "This makes important words stand out." What is the friend describing?

A. Word processor B. Bold C. Clipboard D. Spell check

3. Produce a Polished Paragraph — Which idea from produce a polished paragraph matches the clue "positions text on the page"?

A. Spell check B. Bold C. Clipboard D. Alignment

4. Produce a Polished Paragraph — The teacher asks for an example that temporarily holds copied material. Which answer fits?

A. Clipboard B. Alignment C. Spell check D. Word processor

5. Produce a Polished Paragraph — Can you identify the term described here: helps find possible spelling mistakes?

A. Clipboard B. Bold C. Alignment D. Spell check

CHALLENGE — Think and apply.

1. Produce a Polished Paragraph — Which concept matches the explanation "helps find possible spelling mistakes" when you review produce a polished paragraph?

A. Alignment B. Spell check C. Clipboard D. Bold

2. Produce a Polished Paragraph — For a short demonstration, the teacher needs an example that positions text on the page. Which choice would you select?

A. Bold B. Clipboard C. Alignment D. Spell check

3. Produce a Polished Paragraph — Which answer would fit on a poster beside the words "creates and edits text documents"?

A. Alignment B. Word processor C. Bold D. Spell check

4. Produce a Polished Paragraph — At the community learning centre, someone describes a tool or idea that helps find possible spelling mistakes. Which one is it?

A. Alignment B. Clipboard C. Spell check D. Bold

5. Produce a Polished Paragraph — At home, Esi remembers a class rule or concept that temporarily holds copied material. What was it called?

A. Clipboard B. Word processor C. Spell check D. Alignment

6. Produce a Polished Paragraph — Imagine helping a younger pupil understand something that positions text on the page. Which term would you teach?

A. Alignment B. Spell check C. Clipboard D. Bold

7. Produce a Polished Paragraph — During a school ICT lesson, Esi wants to show something that creates and edits text documents. Which idea should be labelled?

A. Alignment B. Spell check C. Bold D. Word processor

8. Produce a Polished Paragraph — A classmate confuses several ideas about produce a polished paragraph. Which one actually makes important words stand out?

A. Bold B. Word processor C. Spell check D. Clipboard

9. Produce a Polished Paragraph — A group makes a display on produce a polished paragraph. Their first clue is "makes important words stand out". Which label is correct?

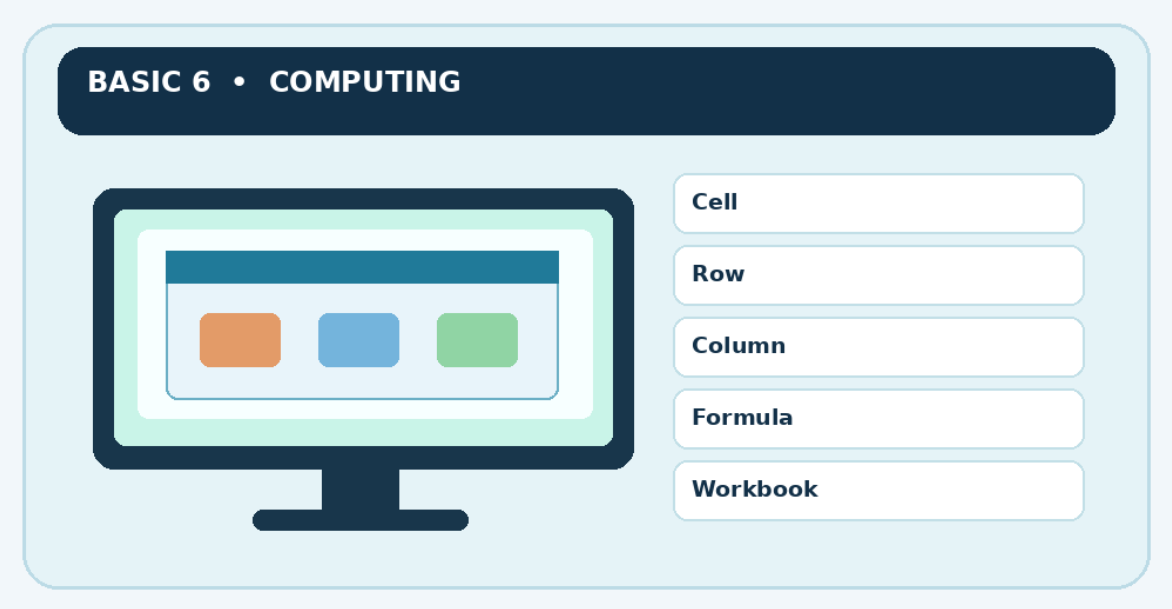

A. Clipboard B. Bold C. Spell check D. Word processor

10. Produce a Polished Paragraph — Your class is solving a practical problem. One useful thing temporarily holds copied material. What is its name?

A. Word processor B. Spell check C. Clipboard D. Alignment

Lesson 25: Build a Spreadsheet

We will learn to: Identify, explain and apply the important ideas behind build a spreadsheet.

Five important ideas

Cell: is one box in a worksheet.

Row: runs horizontally across a sheet.

Column: runs vertically down a sheet.

Formula: calculates a result using values.

Workbook: is a saved file containing one or more worksheets.

Our Ghanaian story

While organising marks in a class worksheet, Kojo had a question about build a spreadsheet. The group discovered that cell is one box in a worksheet, while row runs horizontally across a sheet. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Cell, Row and Column; explain what each means.

Create and share

Make a colourful, labelled poster that teaches build a spreadsheet. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.5.3.1.2

Lesson 25: Play & Challenge

PLAY — Choose one best answer for each question.

1. Build a Spreadsheet — Choose the correct name for something that is one box in a worksheet.

A. Formula B. Cell C. Column D. Workbook

2. Build a Spreadsheet — Your friend says, "This runs horizontally across a sheet." What is the friend describing?

A. Cell B. Column C. Row D. Formula

3. Build a Spreadsheet — Which idea from build a spreadsheet matches the clue "runs vertically down a sheet"?

A. Column B. Workbook C. Row D. Cell

4. Build a Spreadsheet — The teacher asks for an example that calculates a result using values. Which answer fits?

A. Cell B. Formula C. Row D. Column

5. Build a Spreadsheet — Can you identify the term described here: is a saved file containing one or more worksheets?

A. Row B. Workbook C. Formula D. Cell

CHALLENGE — Think and apply.

1. Build a Spreadsheet — For a short demonstration, the teacher needs an example that runs vertically down a sheet. Which choice would you select?

A. Column B. Workbook C. Row D. Cell

2. Build a Spreadsheet — During a school ICT lesson, Ama wants to show something that is one box in a worksheet. Which idea should be labelled?

A. Formula B. Workbook C. Cell D. Column

3. Build a Spreadsheet — At the community learning centre, someone describes a tool or idea that is a saved file containing one or more worksheets. Which one is it?

A. Formula B. Row C. Workbook D. Cell

4. Build a Spreadsheet — Which concept matches the explanation "is a saved file containing one or more worksheets" when you review build a spreadsheet?

A. Cell B. Row C. Formula D. Workbook

5. Build a Spreadsheet — Your class is solving a practical problem. One useful thing calculates a result using values. What is its name?

A. Column B. Row C. Formula D. Cell

6. Build a Spreadsheet — A classmate confuses several ideas about build a spreadsheet. Which one actually runs horizontally across a sheet?

A. Column B. Row C. Formula D. Cell

7. Build a Spreadsheet — Which answer would fit on a poster beside the words "is one box in a worksheet"?

A. Workbook B. Formula C. Column D. Cell

8. Build a Spreadsheet — A group makes a display on build a spreadsheet. Their first clue is "runs horizontally across a sheet". Which label is correct?

A. Column B. Row C. Formula D. Cell

9. Build a Spreadsheet — At home, Ama remembers a class rule or concept that calculates a result using values. What was it called?

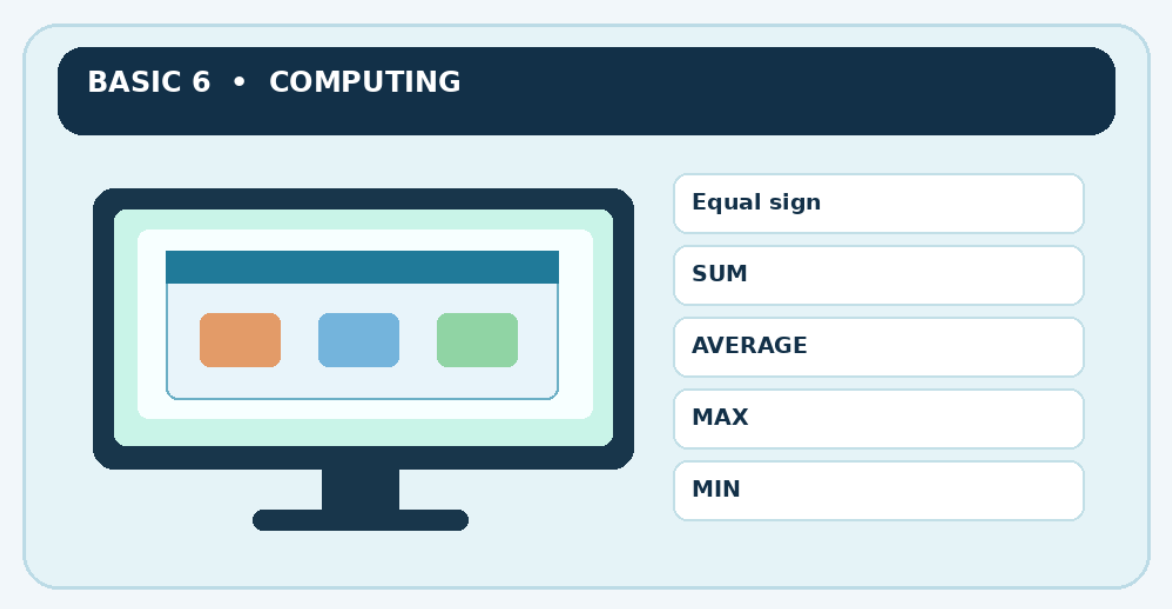

A. Column B. Cell C. Formula D. Row

10. Build a Spreadsheet — Imagine helping a younger pupil understand something that runs vertically down a sheet. Which term would you teach?

A. Workbook B. Cell C. Row D. Column

Lesson 26: Worksheet Calculations

We will learn to: Identify, explain and apply the important ideas behind worksheet calculations.

Five important ideas

Equal sign: begins a spreadsheet formula.

SUM: adds numbers in a selected range.

AVERAGE: calculates the arithmetic mean.

MAX: finds the largest number.

MIN: finds the smallest number.

Our Ghanaian story

While adding classroom survey numbers, Esi had a question about worksheet calculations. The group discovered that equal sign begins a spreadsheet formula, while sum adds numbers in a selected range. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Equal sign, SUM and AVERAGE; explain what each means.

Create and share

Make a colourful, labelled poster that teaches worksheet calculations. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.5.3.1.3

Lesson 26: Play & Challenge

PLAY — Choose one best answer for each question.

1. Worksheet Calculations — Choose the correct name for something that begins a spreadsheet formula.

A. AVERAGE B. MAX C. SUM D. Equal sign

2. Worksheet Calculations — Your friend says, "This adds numbers in a selected range." What is the friend describing?

A. AVERAGE B. SUM C. MIN D. MAX

3. Worksheet Calculations — Which idea from worksheet calculations matches the clue "calculates the arithmetic mean"?

A. MIN B. Equal sign C. SUM D. AVERAGE

4. Worksheet Calculations — The teacher asks for an example that finds the largest number. Which answer fits?

A. Equal sign B. MAX C. SUM D. MIN

5. Worksheet Calculations — Can you identify the term described here: finds the smallest number?

A. MIN B. AVERAGE C. Equal sign D. SUM

CHALLENGE — Think and apply.

1. Worksheet Calculations — For a short demonstration, the teacher needs an example that calculates the arithmetic mean. Which choice would you select?

A. SUM B. Equal sign C. MIN D. AVERAGE

2. Worksheet Calculations — A group makes a display on worksheet calculations. Their first clue is "adds numbers in a selected range". Which label is correct?

A. MIN B. MAX C. SUM D. AVERAGE

3. Worksheet Calculations — Imagine helping a younger pupil understand something that calculates the arithmetic mean. Which term would you teach?

A. AVERAGE B. MIN C. Equal sign D. SUM

4. Worksheet Calculations — At the community learning centre, someone describes a tool or idea that finds the smallest number. Which one is it?

A. SUM B. Equal sign C. MIN D. AVERAGE

5. Worksheet Calculations — Your class is solving a practical problem. One useful thing finds the largest number. What is its name?

A. MAX B. MIN C. Equal sign D. SUM

6. Worksheet Calculations — At home, Yaw remembers a class rule or concept that finds the largest number. What was it called?

A. MIN B. Equal sign C. MAX D. SUM

7. Worksheet Calculations — Which concept matches the explanation "finds the smallest number" when you review worksheet calculations?

A. MIN B. Equal sign C. AVERAGE D. SUM

8. Worksheet Calculations — Which answer would fit on a poster beside the words "begins a spreadsheet formula"?

A. SUM B. MAX C. AVERAGE D. Equal sign

9. Worksheet Calculations — During a school ICT lesson, Yaw wants to show something that begins a spreadsheet formula. Which idea should be labelled?

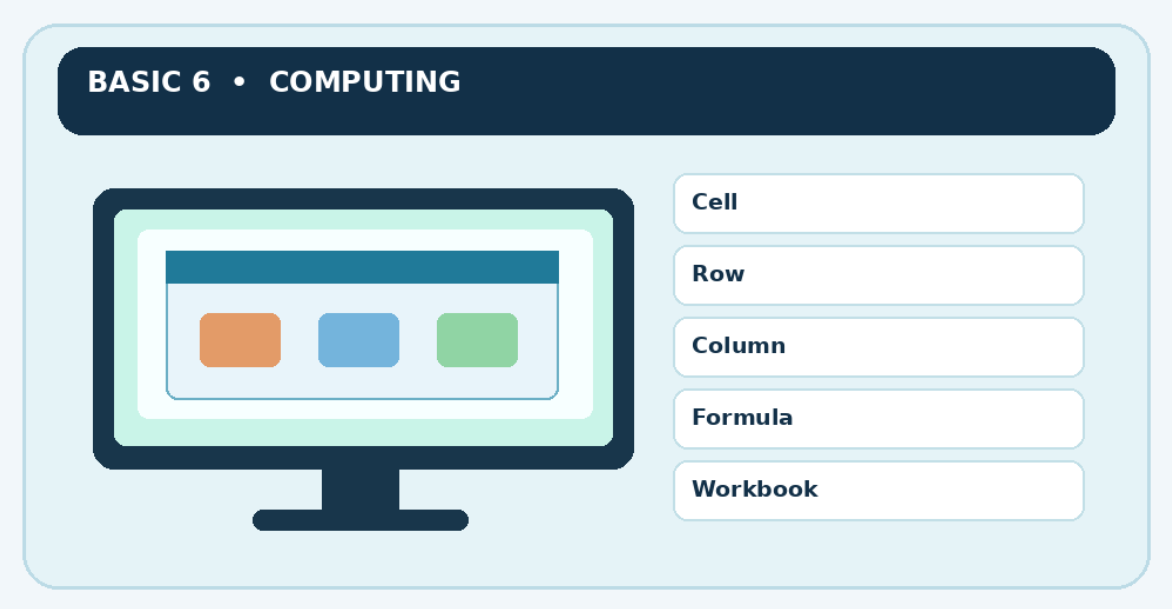

A. AVERAGE B. Equal sign C. MAX D. SUM

10. Worksheet Calculations — A classmate confuses several ideas about worksheet calculations. Which one actually adds numbers in a selected range?

A. MAX B. AVERAGE C. MIN D. SUM

Lesson 27: Edit a Worksheet

We will learn to: Identify, explain and apply the important ideas behind edit a worksheet.

Five important ideas

Cell: is one box in a worksheet.

Row: runs horizontally across a sheet.

Column: runs vertically down a sheet.

Formula: calculates a result using values.

Workbook: is a saved file containing one or more worksheets.

Our Ghanaian story

While organising marks in a class worksheet, Yaw had a question about edit a worksheet. The group discovered that cell is one box in a worksheet, while row runs horizontally across a sheet. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Cell, Row and Column; explain what each means.

Create and share

Make a colourful, labelled poster that teaches edit a worksheet. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.5.3.1.4

Lesson 27: Play & Challenge

PLAY — Choose one best answer for each question.

1. Edit a Worksheet — Choose the correct name for something that is one box in a worksheet.

A. Row B. Column C. Workbook D. Cell

2. Edit a Worksheet — Your friend says, "This runs horizontally across a sheet." What is the friend describing?

A. Formula B. Row C. Column D. Workbook

3. Edit a Worksheet — Which idea from edit a worksheet matches the clue "runs vertically down a sheet"?

A. Row B. Formula C. Column D. Cell

4. Edit a Worksheet — The teacher asks for an example that calculates a result using values. Which answer fits?

A. Cell B. Workbook C. Row D. Formula

5. Edit a Worksheet — Can you identify the term described here: is a saved file containing one or more worksheets?

A. Cell B. Workbook C. Row D. Formula

CHALLENGE — Think and apply.

1. Edit a Worksheet — During a school ICT lesson, Kofi wants to show something that is one box in a worksheet. Which idea should be labelled?

A. Row B. Column C. Cell D. Workbook

2. Edit a Worksheet — At home, Kofi remembers a class rule or concept that calculates a result using values. What was it called?

A. Workbook B. Row C. Cell D. Formula

3. Edit a Worksheet — For a short demonstration, the teacher needs an example that runs vertically down a sheet. Which choice would you select?

A. Formula B. Column C. Row D. Cell

4. Edit a Worksheet — Your class is solving a practical problem. One useful thing calculates a result using values. What is its name?

A. Formula B. Workbook C. Row D. Cell

5. Edit a Worksheet — Which answer would fit on a poster beside the words "is one box in a worksheet"?

A. Workbook B. Row C. Column D. Cell

6. Edit a Worksheet — Imagine helping a younger pupil understand something that runs vertically down a sheet. Which term would you teach?

A. Column B. Cell C. Row D. Formula

7. Edit a Worksheet — A group makes a display on edit a worksheet. Their first clue is "runs horizontally across a sheet". Which label is correct?

A. Formula B. Column C. Row D. Workbook

8. Edit a Worksheet — A classmate confuses several ideas about edit a worksheet. Which one actually runs horizontally across a sheet?

A. Row B. Column C. Workbook D. Formula

9. Edit a Worksheet — Which concept matches the explanation "is a saved file containing one or more worksheets" when you review edit a worksheet?

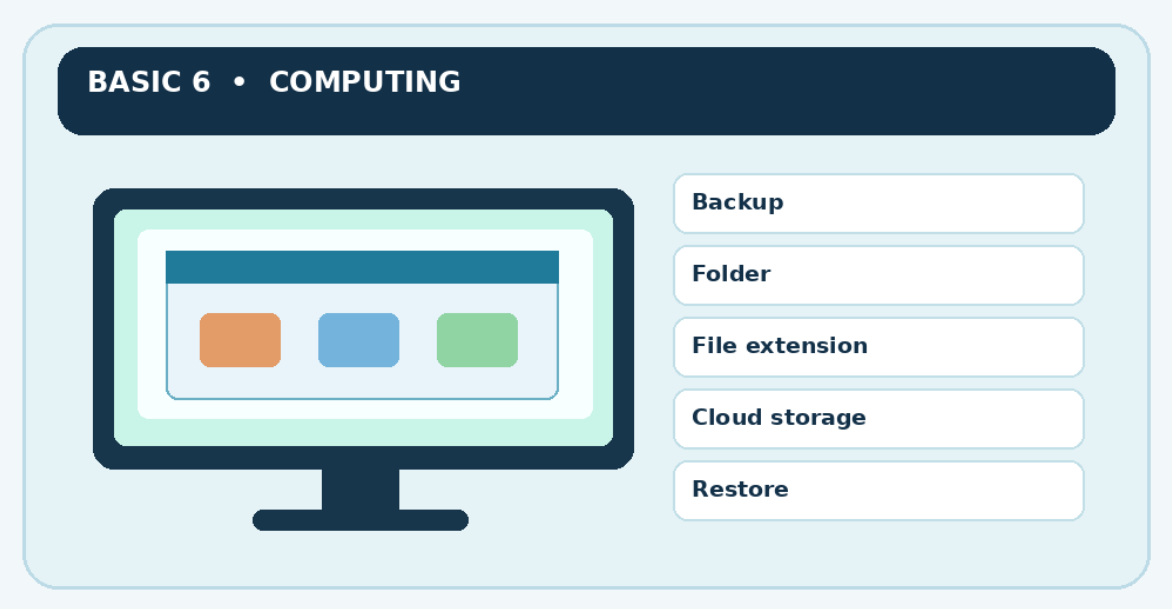

A. Row B. Cell C. Formula D. Workbook

10. Edit a Worksheet — At the community learning centre, someone describes a tool or idea that is a saved file containing one or more worksheets. Which one is it?

A. Formula B. Cell C. Workbook D. Row

Lesson 28: Manage Workbooks

We will learn to: Identify, explain and apply the important ideas behind manage workbooks.

Five important ideas

Backup: is an extra saved copy of important work.

Folder: groups related files.

File extension: can show a file type.

Cloud storage: can save files on a remote service.

Restore: returns an earlier saved copy when possible.

Our Ghanaian story

After saving a group project, Abena had a question about manage workbooks. The group discovered that backup is an extra saved copy of important work, while folder groups related files. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of backup, folder and file extension. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches manage workbooks. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.5.3.1.6

Lesson 28: Play & Challenge

PLAY — Choose one best answer for each question.

1. Manage Workbooks — Choose the correct name for something that is an extra saved copy of important work.

A. Backup B. Restore C. File extension D. Cloud storage

2. Manage Workbooks — Your friend says, "This groups related files." What is the friend describing?

A. Cloud storage B. Backup C. Folder D. Restore

3. Manage Workbooks — Which idea from manage workbooks matches the clue "can show a file type"?

A. File extension B. Restore C. Cloud storage D. Folder

4. Manage Workbooks — The teacher asks for an example that can save files on a remote service. Which answer fits?

A. Cloud storage B. Restore C. File extension D. Folder

5. Manage Workbooks — Can you identify the term described here: returns an earlier saved copy when possible?

A. File extension B. Cloud storage C. Restore D. Backup

CHALLENGE — Think and apply.

1. Manage Workbooks — Which answer would fit on a poster beside the words "is an extra saved copy of important work"?

A. Cloud storage B. Restore C. File extension D. Backup

2. Manage Workbooks — A group makes a display on manage workbooks. Their first clue is "groups related files". Which label is correct?

A. Backup B. Cloud storage C. Restore D. Folder

3. Manage Workbooks — At the community learning centre, someone describes a tool or idea that returns an earlier saved copy when possible. Which one is it?

A. Cloud storage B. Backup C. Restore D. File extension

4. Manage Workbooks — Your class is solving a practical problem. One useful thing can save files on a remote service. What is its name?

A. Cloud storage B. Restore C. File extension D. Folder

5. Manage Workbooks — At home, Akosua remembers a class rule or concept that can save files on a remote service. What was it called?

A. Cloud storage B. Restore C. Folder D. File extension

6. Manage Workbooks — A classmate confuses several ideas about manage workbooks. Which one actually groups related files?

A. Folder B. Cloud storage C. Backup D. Restore

7. Manage Workbooks — For a short demonstration, the teacher needs an example that can show a file type. Which choice would you select?

A. Cloud storage B. Folder C. Restore D. File extension

8. Manage Workbooks — Imagine helping a younger pupil understand something that can show a file type. Which term would you teach?

A. Cloud storage B. File extension C. Restore D. Folder

9. Manage Workbooks — Which concept matches the explanation "returns an earlier saved copy when possible" when you review manage workbooks?

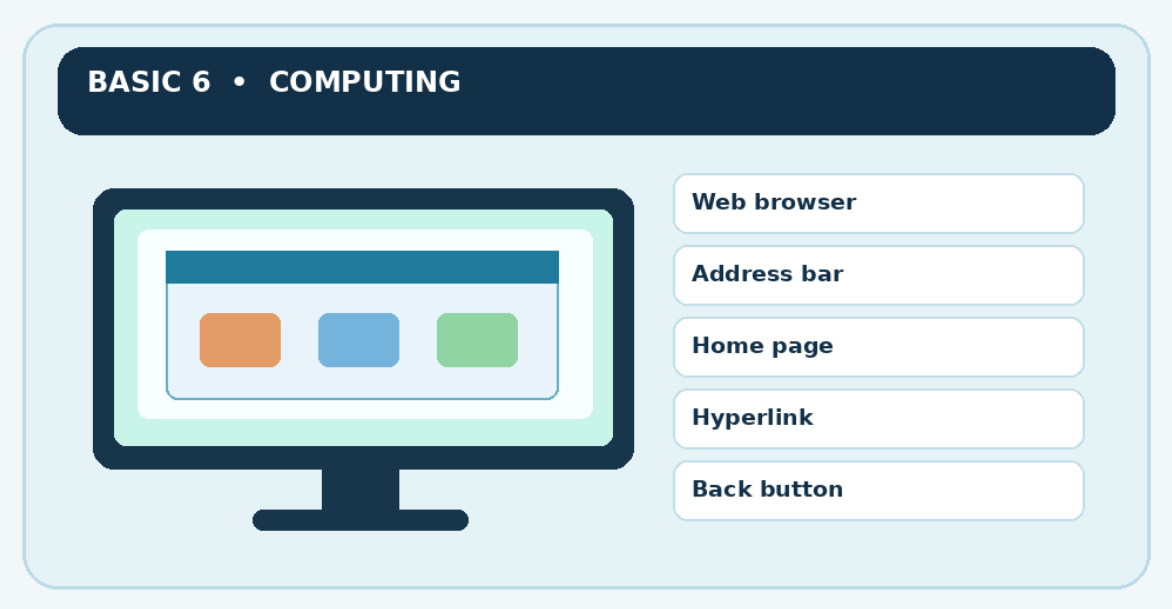

A. Backup B. Restore C. File extension D. Cloud storage

10. Manage Workbooks — During a school ICT lesson, Akosua wants to show something that is an extra saved copy of important work. Which idea should be labelled?

A. Cloud storage B. Backup C. File extension D. Restore

Lesson 29: Understanding URLs

We will learn to: Identify, explain and apply the important ideas behind understanding urls.

Five important ideas

Web browser: opens websites and web pages.

Address bar: shows or accepts a website address.

Home page: is the main starting page of a website.

Hyperlink: opens another page or resource when selected.

Back button: returns to a previously visited page.

Our Ghanaian story

While exploring a teacher-approved website, Kofi had a question about understanding urls. The group discovered that web browser opens websites and web pages, while address bar shows or accepts a website address. They drew an example and explained it to their classmates.

Try it!

Use an imaginary example or a teacher-approved offline screenshot. Discuss when to use web browser and address bar. Never enter a real password or share private details in this activity.

Create and share

Make a colourful, labelled poster that teaches understanding urls. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.6.2.1.5

Lesson 29: Play & Challenge

PLAY — Choose one best answer for each question.

1. Understanding URLs — Choose the correct name for something that opens websites and web pages.

A. Back button B. Web browser C. Hyperlink D. Address bar

2. Understanding URLs — Your friend says, "This shows or accepts a website address." What is the friend describing?

A. Web browser B. Address bar C. Home page D. Back button

3. Understanding URLs — Which idea from understanding urls matches the clue "is the main starting page of a website"?

A. Home page B. Back button C. Address bar D. Hyperlink

4. Understanding URLs — The teacher asks for an example that opens another page or resource when selected. Which answer fits?

A. Hyperlink B. Home page C. Web browser D. Back button

5. Understanding URLs — Can you identify the term described here: returns to a previously visited page?

A. Hyperlink B. Address bar C. Back button D. Web browser

CHALLENGE — Think and apply.

1. Understanding URLs — Imagine helping a younger pupil understand something that is the main starting page of a website. Which term would you teach?

A. Home page B. Address bar C. Back button D. Hyperlink

2. Understanding URLs — For a short demonstration, the teacher needs an example that is the main starting page of a website. Which choice would you select?

A. Address bar B. Hyperlink C. Home page D. Back button

3. Understanding URLs — At home, Esi remembers a class rule or concept that opens another page or resource when selected. What was it called?

A. Home page B. Back button C. Hyperlink D. Web browser

4. Understanding URLs — At the community learning centre, someone describes a tool or idea that returns to a previously visited page. Which one is it?

A. Web browser B. Hyperlink C. Back button D. Address bar

5. Understanding URLs — A classmate confuses several ideas about understanding urls. Which one actually shows or accepts a website address?

A. Web browser B. Home page C. Back button D. Address bar

6. Understanding URLs — Which concept matches the explanation "returns to a previously visited page" when you review understanding urls?

A. Hyperlink B. Address bar C. Web browser D. Back button

7. Understanding URLs — Your class is solving a practical problem. One useful thing opens another page or resource when selected. What is its name?

A. Back button B. Hyperlink C. Home page D. Web browser

8. Understanding URLs — A group makes a display on understanding urls. Their first clue is "shows or accepts a website address". Which label is correct?

A. Web browser B. Address bar C. Back button D. Home page

9. Understanding URLs — Which answer would fit on a poster beside the words "opens websites and web pages"?

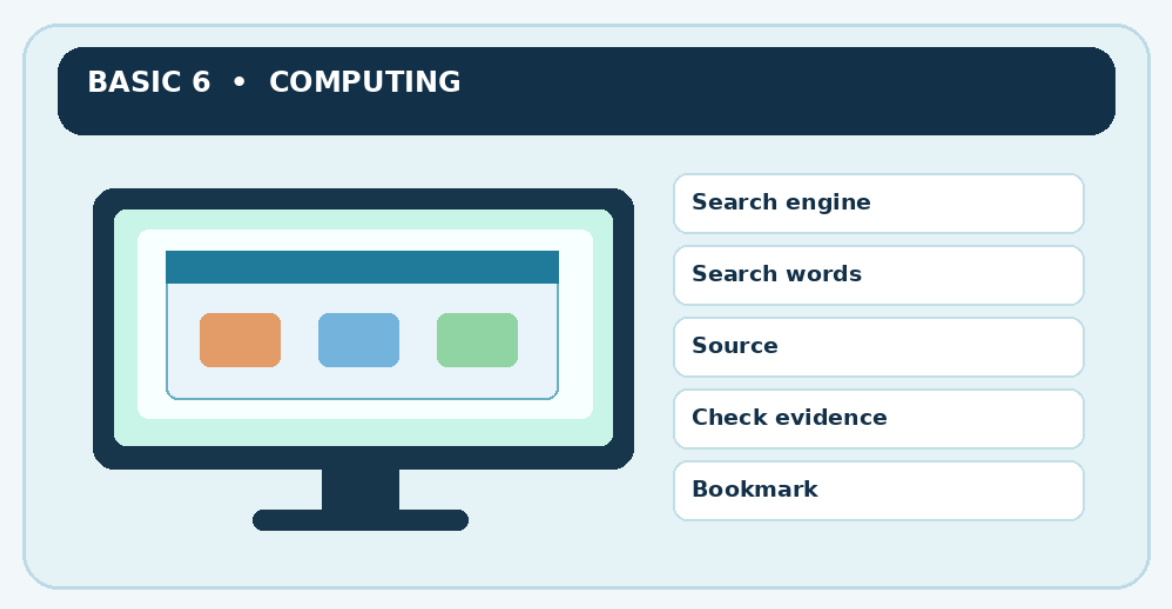

A. Back button B. Hyperlink C. Web browser D. Address bar

10. Understanding URLs — During a school ICT lesson, Esi wants to show something that opens websites and web pages. Which idea should be labelled?

A. Hyperlink B. Address bar C. Web browser D. Back button

Lesson 30: Find Information on a Page

We will learn to: Identify, explain and apply the important ideas behind find information on a page.

Five important ideas

Search engine: helps find pages about a topic.

Search words: describe what information is needed.

Source: is where information comes from.

Check evidence: helps judge whether information is reliable.

Bookmark: saves a link for later.

Our Ghanaian story

When researching Ghanaian wildlife, Ama had a question about find information on a page. The group discovered that search engine helps find pages about a topic, while search words describe what information is needed. They drew an example and explained it to their classmates.

Try it!

Use an imaginary example or a teacher-approved offline screenshot. Discuss when to use search engine and search words. Never enter a real password or share private details in this activity.

Create and share

Make a colourful, labelled poster that teaches find information on a page. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.6.3.1.4

Lesson 30: Play & Challenge

PLAY — Choose one best answer for each question.

1. Find Information on a Page — Choose the correct name for something that helps find pages about a topic.

A. Search engine B. Bookmark C. Check evidence D. Source

2. Find Information on a Page — Your friend says, "This describe what information is needed." What is the friend describing?

A. Search words B. Source C. Check evidence D. Search engine

3. Find Information on a Page — Which idea from find information on a page matches the clue "is where information comes from"?

A. Search words B. Source C. Bookmark D. Search engine

4. Find Information on a Page — The teacher asks for an example that helps judge whether information is reliable. Which answer fits?

A. Source B. Bookmark C. Check evidence D. Search engine

5. Find Information on a Page — Can you identify the term described here: saves a link for later?

A. Bookmark B. Search words C. Search engine D. Check evidence

CHALLENGE — Think and apply.

1. Find Information on a Page — Imagine helping a younger pupil understand something that is where information comes from. Which term would you teach?

A. Source B. Bookmark C. Search words D. Search engine

2. Find Information on a Page — For a short demonstration, the teacher needs an example that is where information comes from. Which choice would you select?

A. Search engine B. Search words C. Bookmark D. Source

3. Find Information on a Page — Which answer would fit on a poster beside the words "helps find pages about a topic"?

A. Bookmark B. Search engine C. Check evidence D. Source

4. Find Information on a Page — At home, Ama remembers a class rule or concept that helps judge whether information is reliable. What was it called?

A. Search engine B. Check evidence C. Bookmark D. Source

5. Find Information on a Page — Your class is solving a practical problem. One useful thing helps judge whether information is reliable. What is its name?

A. Search engine B. Source C. Bookmark D. Check evidence

6. Find Information on a Page — During a school ICT lesson, Ama wants to show something that helps find pages about a topic. Which idea should be labelled?

A. Bookmark B. Search engine C. Check evidence D. Source

7. Find Information on a Page — Which concept matches the explanation "saves a link for later" when you review find information on a page?

A. Check evidence B. Search words C. Search engine D. Bookmark

8. Find Information on a Page — At the community learning centre, someone describes a tool or idea that saves a link for later. Which one is it?

A. Search words B. Bookmark C. Check evidence D. Search engine

9. Find Information on a Page — A group makes a display on find information on a page. Their first clue is "describe what information is needed". Which label is correct?

A. Check evidence B. Search words C. Search engine D. Source

10. Find Information on a Page — A classmate confuses several ideas about find information on a page. Which one actually describe what information is needed?

A. Check evidence B. Search engine C. Search words D. Source

Lesson 31: Setting Bookmarks

We will learn to: Identify, explain and apply the important ideas behind setting bookmarks.

Five important ideas

Theme: changes the appearance of a browser.

Bookmark: saves a useful page link.

Default search engine: is the service a browser uses for searches.

Cookies: are small pieces of information stored by sites.

Settings: control how the browser behaves.

Our Ghanaian story

While setting up a safe browser at school, Kojo had a question about setting bookmarks. The group discovered that theme changes the appearance of a browser, while bookmark saves a useful page link. They drew an example and explained it to their classmates.

Try it!

Use an imaginary example or a teacher-approved offline screenshot. Discuss when to use theme and bookmark. Never enter a real password or share private details in this activity.

Create and share

Make a colourful, labelled poster that teaches setting bookmarks. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.6.6.1.4

Lesson 31: Play & Challenge

PLAY — Choose one best answer for each question.

1. Setting Bookmarks — Choose the correct name for something that changes the appearance of a browser.

A. Settings B. Theme C. Cookies D. Bookmark

2. Setting Bookmarks — Your friend says, "This saves a useful page link." What is the friend describing?

A. Settings B. Cookies C. Default search engine D. Bookmark

3. Setting Bookmarks — Which idea from setting bookmarks matches the clue "is the service a browser uses for searches"?

A. Bookmark B. Default search engine C. Settings D. Theme

4. Setting Bookmarks — The teacher asks for an example that are small pieces of information stored by sites. Which answer fits?

A. Bookmark B. Settings C. Cookies D. Default search engine

5. Setting Bookmarks — Can you identify the term described here: control how the browser behaves?

A. Cookies B. Settings C. Default search engine D. Theme

CHALLENGE — Think and apply.

1. Setting Bookmarks — At the community learning centre, someone describes a tool or idea that control how the browser behaves. Which one is it?

A. Cookies B. Settings C. Default search engine D. Theme

2. Setting Bookmarks — At home, Yaw remembers a class rule or concept that are small pieces of information stored by sites. What was it called?

A. Default search engine B. Bookmark C. Settings D. Cookies

3. Setting Bookmarks — Your class is solving a practical problem. One useful thing are small pieces of information stored by sites. What is its name?

A. Bookmark B. Default search engine C. Settings D. Cookies

4. Setting Bookmarks — Which concept matches the explanation "control how the browser behaves" when you review setting bookmarks?

A. Settings B. Cookies C. Theme D. Default search engine

5. Setting Bookmarks — Imagine helping a younger pupil understand something that is the service a browser uses for searches. Which term would you teach?

A. Settings B. Bookmark C. Default search engine D. Theme

6. Setting Bookmarks — During a school ICT lesson, Yaw wants to show something that changes the appearance of a browser. Which idea should be labelled?

A. Bookmark B. Cookies C. Settings D. Theme

7. Setting Bookmarks — A group makes a display on setting bookmarks. Their first clue is "saves a useful page link". Which label is correct?

A. Settings B. Bookmark C. Default search engine D. Cookies

8. Setting Bookmarks — A classmate confuses several ideas about setting bookmarks. Which one actually saves a useful page link?

A. Settings B. Default search engine C. Bookmark D. Cookies

9. Setting Bookmarks — Which answer would fit on a poster beside the words "changes the appearance of a browser"?

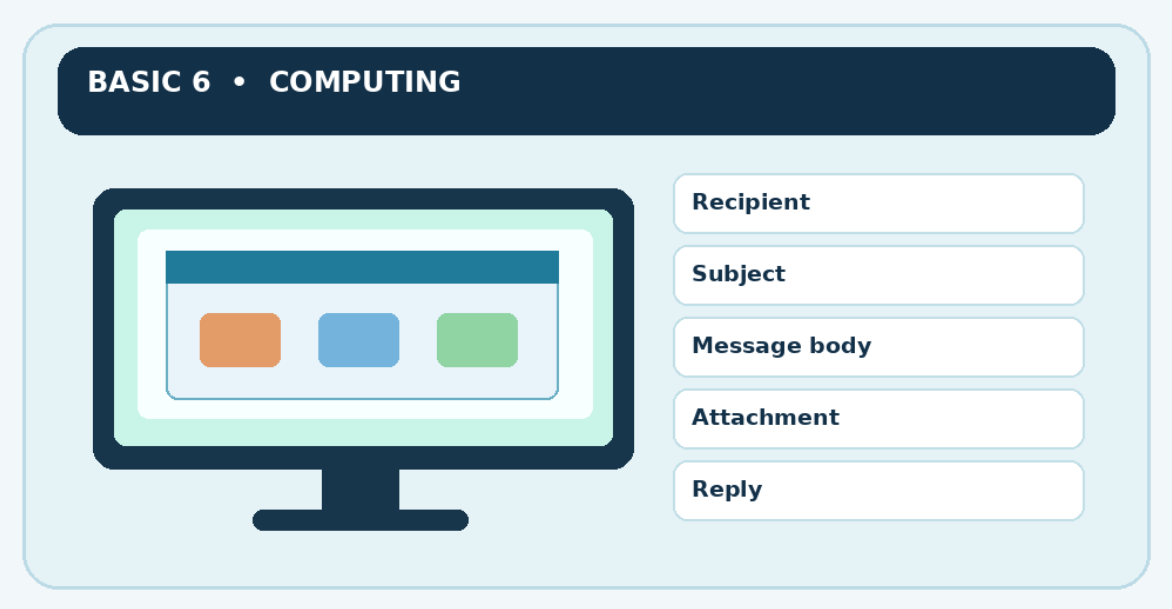

A. Bookmark B. Settings C. Theme D. Cookies

10. Setting Bookmarks — For a short demonstration, the teacher needs an example that is the service a browser uses for searches. Which choice would you select?

A. Default search engine B. Bookmark C. Theme D. Settings

Lesson 32: Reply and Forward Emails

We will learn to: Identify, explain and apply the important ideas behind reply and forward emails.

Five important ideas

Recipient: is the person meant to receive an email.

Subject: says briefly what the message is about.

Message body: contains the main written information.

Attachment: is a file sent with a message.

Reply: sends a response to a received message.

Our Ghanaian story

When writing a supervised class message, Esi had a question about reply and forward emails. The group discovered that recipient is the person meant to receive an email, while subject says briefly what the message is about. They drew an example and explained it to their classmates.

Try it!

Use an imaginary example or a teacher-approved offline screenshot. Discuss when to use recipient and subject. Never enter a real password or share private details in this activity.

Create and share

Make a colourful, labelled poster that teaches reply and forward emails. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.6.7.1.2

Lesson 32: Play & Challenge

PLAY — Choose one best answer for each question.

1. Reply and Forward Emails — Choose the correct name for something that is the person meant to receive an email.

A. Subject B. Recipient C. Message body D. Reply

2. Reply and Forward Emails — Your friend says, "This says briefly what the message is about." What is the friend describing?

A. Message body B. Reply C. Subject D. Recipient

3. Reply and Forward Emails — Which idea from reply and forward emails matches the clue "contains the main written information"?

A. Reply B. Attachment C. Recipient D. Message body

4. Reply and Forward Emails — The teacher asks for an example that is a file sent with a message. Which answer fits?

A. Attachment B. Reply C. Subject D. Recipient

5. Reply and Forward Emails — Can you identify the term described here: sends a response to a received message?

A. Message body B. Attachment C. Recipient D. Reply

CHALLENGE — Think and apply.

1. Reply and Forward Emails — For a short demonstration, the teacher needs an example that contains the main written information. Which choice would you select?

A. Reply B. Attachment C. Message body D. Recipient

2. Reply and Forward Emails — At the community learning centre, someone describes a tool or idea that sends a response to a received message. Which one is it?

A. Attachment B. Message body C. Reply D. Recipient

3. Reply and Forward Emails — Imagine helping a younger pupil understand something that contains the main written information. Which term would you teach?

A. Attachment B. Message body C. Recipient D. Reply

4. Reply and Forward Emails — Your class is solving a practical problem. One useful thing is a file sent with a message. What is its name?

A. Attachment B. Subject C. Reply D. Recipient

5. Reply and Forward Emails — Which concept matches the explanation "sends a response to a received message" when you review reply and forward emails?

A. Attachment B. Recipient C. Reply D. Message body

6. Reply and Forward Emails — At home, Kofi remembers a class rule or concept that is a file sent with a message. What was it called?

A. Reply B. Attachment C. Subject D. Recipient

7. Reply and Forward Emails — A classmate confuses several ideas about reply and forward emails. Which one actually says briefly what the message is about?

A. Recipient B. Subject C. Reply D. Message body

8. Reply and Forward Emails — A group makes a display on reply and forward emails. Their first clue is "says briefly what the message is about". Which label is correct?

A. Reply B. Message body C. Recipient D. Subject

9. Reply and Forward Emails — Which answer would fit on a poster beside the words "is the person meant to receive an email"?

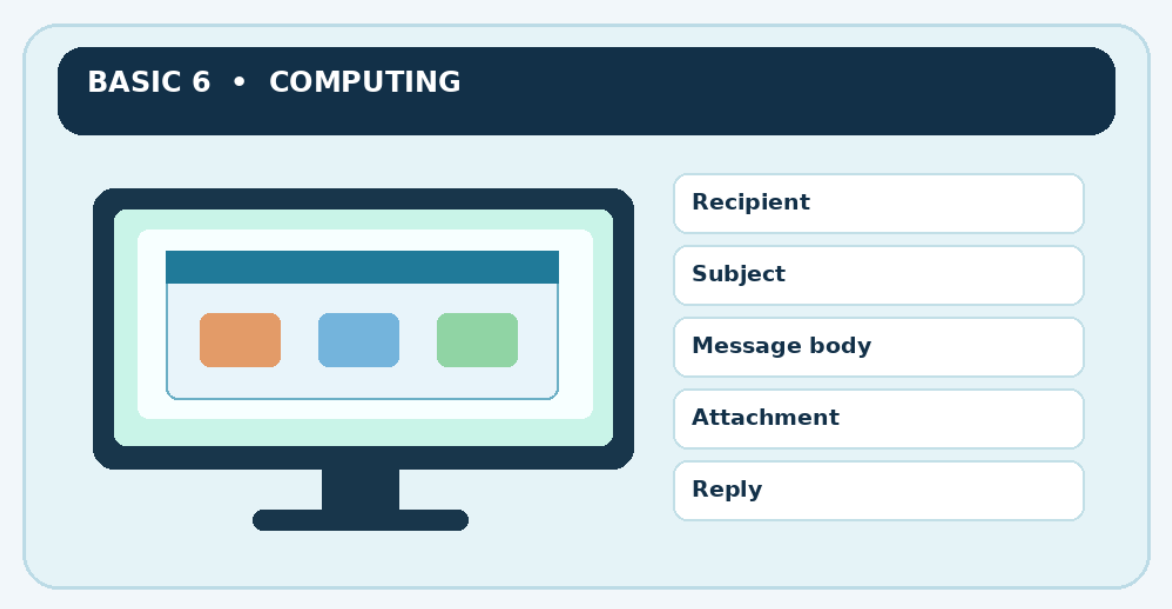

A. Message body B. Subject C. Reply D. Recipient

10. Reply and Forward Emails — During a school ICT lesson, Kofi wants to show something that is the person meant to receive an email. Which idea should be labelled?

A. Reply B. Recipient C. Message body D. Subject

Lesson 33: Email Attachments

We will learn to: Identify, explain and apply the important ideas behind email attachments.

Five important ideas

Recipient: is the person meant to receive an email.

Subject: says briefly what the message is about.

Message body: contains the main written information.

Attachment: is a file sent with a message.

Reply: sends a response to a received message.

Our Ghanaian story

When writing a supervised class message, Yaw had a question about email attachments. The group discovered that recipient is the person meant to receive an email, while subject says briefly what the message is about. They drew an example and explained it to their classmates.

Try it!

Use an imaginary example or a teacher-approved offline screenshot. Discuss when to use recipient and subject. Never enter a real password or share private details in this activity.

Create and share

Make a colourful, labelled poster that teaches email attachments. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.6.7.1.6

Lesson 33: Play & Challenge

PLAY — Choose one best answer for each question.

1. Email Attachments — Choose the correct name for something that is the person meant to receive an email.

A. Recipient B. Message body C. Subject D. Reply

2. Email Attachments — Your friend says, "This says briefly what the message is about." What is the friend describing?

A. Message body B. Recipient C. Reply D. Subject

3. Email Attachments — Which idea from email attachments matches the clue "contains the main written information"?

A. Attachment B. Recipient C. Message body D. Reply

4. Email Attachments — The teacher asks for an example that is a file sent with a message. Which answer fits?

A. Attachment B. Reply C. Message body D. Subject

5. Email Attachments — Can you identify the term described here: sends a response to a received message?

A. Reply B. Recipient C. Subject D. Attachment

CHALLENGE — Think and apply.

1. Email Attachments — A group makes a display on email attachments. Their first clue is "says briefly what the message is about". Which label is correct?

A. Message body B. Reply C. Recipient D. Subject

2. Email Attachments — Imagine helping a younger pupil understand something that contains the main written information. Which term would you teach?

A. Message body B. Recipient C. Attachment D. Reply

3. Email Attachments — A classmate confuses several ideas about email attachments. Which one actually says briefly what the message is about?

A. Reply B. Subject C. Recipient D. Message body

4. Email Attachments — Which answer would fit on a poster beside the words "is the person meant to receive an email"?

A. Message body B. Subject C. Recipient D. Reply

5. Email Attachments — At the community learning centre, someone describes a tool or idea that sends a response to a received message. Which one is it?

A. Subject B. Recipient C. Attachment D. Reply

6. Email Attachments — For a short demonstration, the teacher needs an example that contains the main written information. Which choice would you select?

A. Reply B. Message body C. Recipient D. Attachment

7. Email Attachments — Your class is solving a practical problem. One useful thing is a file sent with a message. What is its name?

A. Attachment B. Subject C. Reply D. Message body

8. Email Attachments — At home, Akosua remembers a class rule or concept that is a file sent with a message. What was it called?

A. Subject B. Message body C. Reply D. Attachment

9. Email Attachments — During a school ICT lesson, Akosua wants to show something that is the person meant to receive an email. Which idea should be labelled?

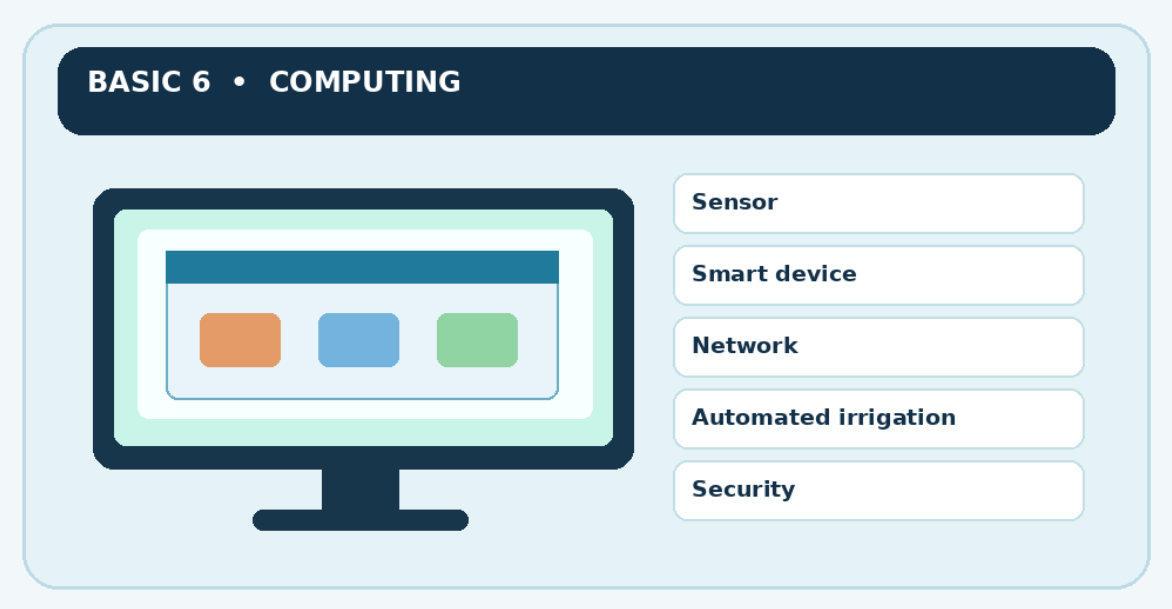

A. Subject B. Recipient C. Reply D. Message body

10. Email Attachments — Which concept matches the explanation "sends a response to a received message" when you review email attachments?

A. Subject B. Reply C. Attachment D. Recipient

Lesson 34: Connected Devices and Sensors

We will learn to: Identify, explain and apply the important ideas behind connected devices and sensors.

Five important ideas

Sensor: detects a change such as temperature or movement.

Smart device: can use connected data to act.

Network: allows devices to exchange information.

Automated irrigation: can water crops based on programmed rules.

Security: protects connected devices and their information.

Our Ghanaian story

At a demonstration of a smart farming system, Abena had a question about connected devices and sensors. The group discovered that sensor detects a change such as temperature or movement, while smart device can use connected data to act. They drew an example and explained it to their classmates.

Try it!

Design a simple paper model explaining sensor, smart device and network. Trade models with a classmate and explain how your design works.

Create and share

Make a colourful, labelled poster that teaches connected devices and sensors. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.6.8.1.1

Lesson 34: Play & Challenge

PLAY — Choose one best answer for each question.

1. Connected Devices and Sensors — Choose the correct name for something that detects a change such as temperature or movement.

A. Smart device B. Security C. Network D. Sensor

2. Connected Devices and Sensors — Your friend says, "This can use connected data to act." What is the friend describing?

A. Network B. Automated irrigation C. Smart device D. Security

3. Connected Devices and Sensors — Which idea from connected devices and sensors matches the clue "allows devices to exchange information"?

A. Security B. Smart device C. Sensor D. Network

4. Connected Devices and Sensors — The teacher asks for an example that can water crops based on programmed rules. Which answer fits?

A. Smart device B. Security C. Automated irrigation D. Network

5. Connected Devices and Sensors — Can you identify the term described here: protects connected devices and their information?

A. Security B. Smart device C. Sensor D. Network

CHALLENGE — Think and apply.

1. Connected Devices and Sensors — Which answer would fit on a poster beside the words "detects a change such as temperature or movement"?

A. Smart device B. Security C. Sensor D. Network

2. Connected Devices and Sensors — A group makes a display on connected devices and sensors. Their first clue is "can use connected data to act". Which label is correct?

A. Automated irrigation B. Network C. Security D. Smart device

3. Connected Devices and Sensors — Which concept matches the explanation "protects connected devices and their information" when you review connected devices and sensors?

A. Sensor B. Network C. Security D. Smart device

4. Connected Devices and Sensors — For a short demonstration, the teacher needs an example that allows devices to exchange information. Which choice would you select?

A. Sensor B. Network C. Smart device D. Security

5. Connected Devices and Sensors — During a school ICT lesson, Esi wants to show something that detects a change such as temperature or movement. Which idea should be labelled?

A. Network B. Sensor C. Security D. Smart device

6. Connected Devices and Sensors — At home, Esi remembers a class rule or concept that can water crops based on programmed rules. What was it called?

A. Automated irrigation B. Smart device C. Network D. Security

7. Connected Devices and Sensors — Your class is solving a practical problem. One useful thing can water crops based on programmed rules. What is its name?

A. Security B. Network C. Smart device D. Automated irrigation

8. Connected Devices and Sensors — At the community learning centre, someone describes a tool or idea that protects connected devices and their information. Which one is it?

A. Smart device B. Network C. Security D. Sensor

9. Connected Devices and Sensors — Imagine helping a younger pupil understand something that allows devices to exchange information. Which term would you teach?

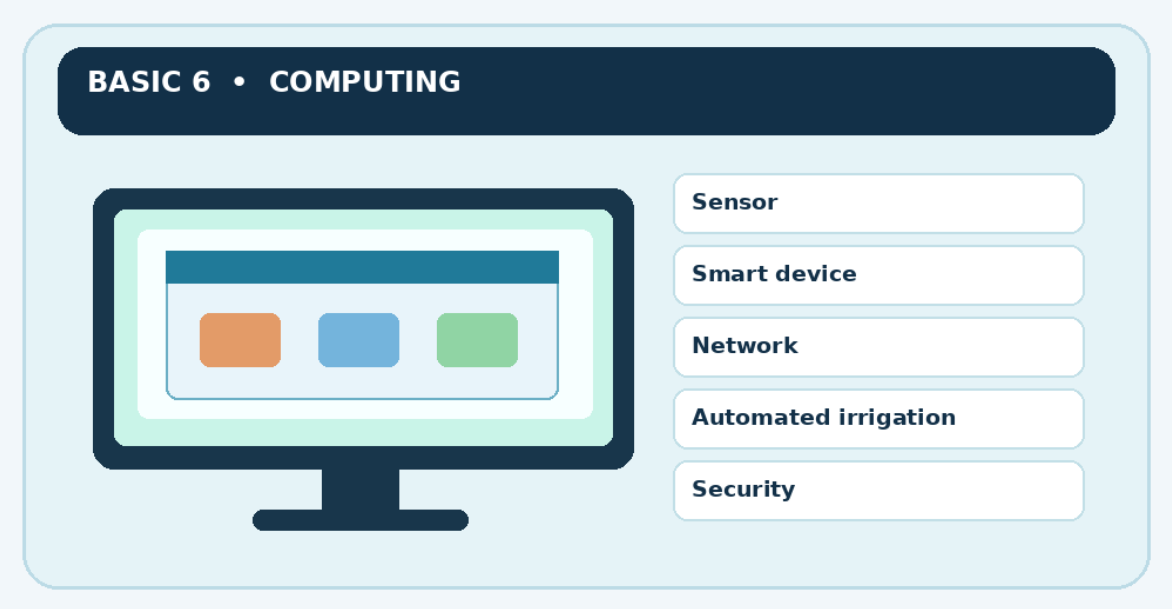

A. Security B. Sensor C. Network D. Smart device

10. Connected Devices and Sensors — A classmate confuses several ideas about connected devices and sensors. Which one actually can use connected data to act?

A. Smart device B. Automated irrigation C. Network D. Security

Lesson 35: IoT in Farms and Businesses

We will learn to: Identify, explain and apply the important ideas behind iot in farms and businesses.

Five important ideas

Sensor: detects a change such as temperature or movement.

Smart device: can use connected data to act.

Network: allows devices to exchange information.

Automated irrigation: can water crops based on programmed rules.

Security: protects connected devices and their information.

Our Ghanaian story

At a demonstration of a smart farming system, Kofi had a question about iot in farms and businesses. The group discovered that sensor detects a change such as temperature or movement, while smart device can use connected data to act. They drew an example and explained it to their classmates.

Try it!

Design a simple paper model explaining sensor, smart device and network. Trade models with a classmate and explain how your design works.

Create and share

Make a colourful, labelled poster that teaches iot in farms and businesses. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: B6.6.8.1.2

Lesson 35: Play & Challenge

PLAY — Choose one best answer for each question.

1. IoT in Farms and Businesses — Choose the correct name for something that detects a change such as temperature or movement.

A. Security B. Sensor C. Automated irrigation D. Network

2. IoT in Farms and Businesses — Your friend says, "This can use connected data to act." What is the friend describing?

A. Security B. Smart device C. Automated irrigation D. Sensor

3. IoT in Farms and Businesses — Which idea from iot in farms and businesses matches the clue "allows devices to exchange information"?

A. Security B. Network C. Automated irrigation D. Smart device

4. IoT in Farms and Businesses — The teacher asks for an example that can water crops based on programmed rules. Which answer fits?

A. Network B. Sensor C. Security D. Automated irrigation

5. IoT in Farms and Businesses — Can you identify the term described here: protects connected devices and their information?

A. Network B. Sensor C. Automated irrigation D. Security

CHALLENGE — Think and apply.

1. IoT in Farms and Businesses — Which answer would fit on a poster beside the words "detects a change such as temperature or movement"?

A. Security B. Network C. Automated irrigation D. Sensor

2. IoT in Farms and Businesses — At the community learning centre, someone describes a tool or idea that protects connected devices and their information. Which one is it?

A. Automated irrigation B. Network C. Sensor D. Security

3. IoT in Farms and Businesses — A classmate confuses several ideas about iot in farms and businesses. Which one actually can use connected data to act?

A. Sensor B. Security C. Smart device D. Automated irrigation

4. IoT in Farms and Businesses — At home, Ama remembers a class rule or concept that can water crops based on programmed rules. What was it called?

A. Security B. Network C. Sensor D. Automated irrigation

5. IoT in Farms and Businesses — Imagine helping a younger pupil understand something that allows devices to exchange information. Which term would you teach?

A. Automated irrigation B. Security C. Smart device D. Network

6. IoT in Farms and Businesses — For a short demonstration, the teacher needs an example that allows devices to exchange information. Which choice would you select?

A. Smart device B. Security C. Automated irrigation D. Network

7. IoT in Farms and Businesses — A group makes a display on iot in farms and businesses. Their first clue is "can use connected data to act". Which label is correct?

A. Sensor B. Security C. Smart device D. Automated irrigation

8. IoT in Farms and Businesses — Which concept matches the explanation "protects connected devices and their information" when you review iot in farms and businesses?

A. Sensor B. Automated irrigation C. Security D. Network

9. IoT in Farms and Businesses — During a school ICT lesson, Ama wants to show something that detects a change such as temperature or movement. Which idea should be labelled?

A. Network B. Sensor C. Automated irrigation D. Security

10. IoT in Farms and Businesses — Your class is solving a practical problem. One useful thing can water crops based on programmed rules. What is its name?

A. Network B. Sensor C. Security D. Automated irrigation

Teacher answer guide

Review the correct term and ask each learner to explain why it fits.

Lesson 1 — Computer Generations and Devices

Play: 1. Vacuum tube | 2. Transistor | 3. Integrated circuit | 4. Microprocessor | 5. Personal computer

Challenge: 1. Microprocessor | 2. Transistor | 3. Personal computer | 4. Microprocessor | 5. Transistor | 6. Vacuum tube | 7. Personal computer | 8. Integrated circuit | 9. Vacuum tube | 10. Integrated circuit

Lesson 2 — Hardware, Software and People

Play: 1. Input device | 2. Output device | 3. Storage device | 4. Processor | 5. Peripheral

Challenge: 1. Output device | 2. Processor | 3. Storage device | 4. Storage device | 5. Input device | 6. Output device | 7. Peripheral | 8. Input device | 9. Processor | 10. Peripheral

Lesson 3 — Refined Mouse Skills

Play: 1. Single click | 2. Double click | 3. Drag | 4. Scroll wheel | 5. Right click

Challenge: 1. Single click | 2. Right click | 3. Scroll wheel | 4. Right click | 5. Drag | 6. Scroll wheel | 7. Drag | 8. Single click | 9. Double click | 10. Double click

Lesson 4 — Faster and Accurate Typing

Play: 1. Home row | 2. Top row | 3. Bottom row | 4. Practice | 5. Posture

Challenge: 1. Home row | 2. Top row | 3. Posture | 4. Practice | 5. Home row | 6. Bottom row | 7. Posture | 8. Practice | 9. Bottom row | 10. Top row

Lesson 5 — Early Computer Generations

Play: 1. Vacuum tube | 2. Transistor | 3. Integrated circuit | 4. Microprocessor | 5. Personal computer

Challenge: 1. Personal computer | 2. Transistor | 3. Vacuum tube | 4. Microprocessor | 5. Personal computer | 6. Integrated circuit | 7. Vacuum tube | 8. Integrated circuit | 9. Microprocessor | 10. Transistor

Lesson 6 — Windows Themes and Accounts

Play: 1. Desktop | 2. Icon | 3. Taskbar | 4. Wallpaper | 5. Start menu

Challenge: 1. Taskbar | 2. Wallpaper | 3. Start menu | 4. Taskbar | 5. Icon | 6. Icon | 7. Wallpaper | 8. Desktop | 9. Desktop | 10. Start menu

Lesson 7 — Using the Recycle Bin

Play: 1. Save | 2. Save As | 3. Backup | 4. Restore | 5. Delete

Challenge: 1. Save As | 2. Backup | 3. Delete | 4. Restore | 5. Save | 6. Save | 7. Delete | 8. Backup | 9. Restore | 10. Save As

Lesson 8 — Copy Paste and Delete Folders

Play: 1. Folder | 2. File name | 3. Copy | 4. Move | 5. Rename

Challenge: 1. Copy | 2. Move | 3. Move | 4. File name | 5. Copy | 6. Folder | 7. Folder | 8. Rename | 9. File name | 10. Rename

Lesson 9 — Working in File Explorer

Play: 1. File Explorer | 2. Navigation pane | 3. Search box | 4. Storage drive | 5. Recycle Bin

Challenge: 1. Recycle Bin | 2. Storage drive | 3. File Explorer | 4. Navigation pane | 5. Search box | 6. Storage drive | 7. Recycle Bin | 8. Navigation pane | 9. Search box | 10. File Explorer

Lesson 10 — Finding Storage Drives

Play: 1. File Explorer | 2. Navigation pane | 3. Search box | 4. Storage drive | 5. Recycle Bin

Challenge: 1. File Explorer | 2. Navigation pane | 3. Search box | 4. File Explorer | 5. Storage drive | 6. Search box | 7. Navigation pane | 8. Storage drive | 9. Recycle Bin | 10. Recycle Bin

Lesson 11 — Different Types of Data

Play: 1. Data | 2. Information | 3. Survey | 4. Observation | 5. Table

Challenge: 1. Table | 2. Observation | 3. Data | 4. Information | 5. Survey | 6. Table | 7. Data | 8. Information | 9. Survey | 10. Observation

Lesson 12 — Sorting and Calculating With Data

Play: 1. Sort | 2. Category | 3. Label | 4. Pattern | 5. Chart

Challenge: 1. Label | 2. Pattern | 3. Sort | 4. Sort | 5. Label | 6. Chart | 7. Pattern | 8. Chart | 9. Category | 10. Category

Lesson 13 — Plan a Survey

Play: 1. Research question | 2. Sample | 3. Consent | 4. Tally | 5. Conclusion

Challenge: 1. Consent | 2. Research question | 3. Tally | 4. Research question | 5. Sample | 6. Conclusion | 7. Sample | 8. Consent | 9. Tally | 10. Conclusion

Lesson 14 — Interpreting Data

Play: 1. Count | 2. Sum | 3. Average | 4. Maximum | 5. Minimum

Challenge: 1. Maximum | 2. Minimum | 3. Average | 4. Maximum | 5. Average | 6. Sum | 7. Count | 8. Sum | 9. Minimum | 10. Count

Lesson 15 — Presenting Data in Tables and Charts

Play: 1. Data | 2. Information | 3. Survey | 4. Observation | 5. Table

Challenge: 1. Information | 2. Table | 3. Survey | 4. Observation | 5. Observation | 6. Table | 7. Information | 8. Data | 9. Survey | 10. Data

Lesson 16 — Sum Mean Minimum and Maximum

Play: 1. Count | 2. Sum | 3. Average | 4. Maximum | 5. Minimum

Challenge: 1. Minimum | 2. Count | 3. Average | 4. Minimum | 5. Sum | 6. Sum | 7. Average | 8. Maximum | 9. Maximum | 10. Count

Lesson 17 — Communication in Our Community

Play: 1. Mobile phone | 2. Radio | 3. Television | 4. Email | 5. Video call

Challenge: 1. Email | 2. Video call | 3. Mobile phone | 4. Radio | 5. Radio | 6. Email | 7. Video call | 8. Television | 9. Television | 10. Mobile phone

Lesson 18 — More Communication Technologies

Play: 1. Sensor | 2. Smart device | 3. Network | 4. Automated irrigation | 5. Security

Challenge: 1. Sensor | 2. Security | 3. Smart device | 4. Smart device | 5. Security | 6. Automated irrigation | 7. Network | 8. Automated irrigation | 9. Network | 10. Sensor

Lesson 19 — Presentation File and Design Tools

Play: 1. Slide | 2. Theme | 3. Transition | 4. Animation | 5. Presenter

Challenge: 1. Presenter | 2. Animation | 3. Transition | 4. Transition | 5. Slide | 6. Theme | 7. Animation | 8. Theme | 9. Slide | 10. Presenter

Lesson 20 — PowerPoint Text and Insert Tools

Play: 1. Slide | 2. Theme | 3. Transition | 4. Animation | 5. Presenter

Challenge: 1. Theme | 2. Theme | 3. Animation | 4. Slide | 5. Transition | 6. Slide | 7. Animation | 8. Presenter | 9. Transition | 10. Presenter

Lesson 21 — Five-Slide Class Presentation

Play: 1. Opening slide | 2. Main slide | 3. Image | 4. Closing slide | 5. Rehearsal

Challenge: 1. Rehearsal | 2. Image | 3. Closing slide | 4. Main slide | 5. Closing slide | 6. Opening slide | 7. Main slide | 8. Rehearsal | 9. Image | 10. Opening slide

Lesson 22 — Word Processing File and Layout

Play: 1. Word processor | 2. Bold | 3. Alignment | 4. Clipboard | 5. Spell check

Challenge: 1. Bold | 2. Word processor | 3. Clipboard | 4. Clipboard | 5. Word processor | 6. Bold | 7. Spell check | 8. Spell check | 9. Alignment | 10. Alignment

Lesson 23 — Insert Text Features

Play: 1. Word processor | 2. Bold | 3. Alignment | 4. Clipboard | 5. Spell check

Challenge: 1. Clipboard | 2. Spell check | 3. Word processor | 4. Clipboard | 5. Bold | 6. Alignment | 7. Spell check | 8. Bold | 9. Word processor | 10. Alignment

Lesson 24 — Produce a Polished Paragraph

Play: 1. Word processor | 2. Bold | 3. Alignment | 4. Clipboard | 5. Spell check

Challenge: 1. Spell check | 2. Alignment | 3. Word processor | 4. Spell check | 5. Clipboard | 6. Alignment | 7. Word processor | 8. Bold | 9. Bold | 10. Clipboard

Lesson 25 — Build a Spreadsheet

Play: 1. Cell | 2. Row | 3. Column | 4. Formula | 5. Workbook

Challenge: 1. Column | 2. Cell | 3. Workbook | 4. Workbook | 5. Formula | 6. Row | 7. Cell | 8. Row | 9. Formula | 10. Column

Lesson 26 — Worksheet Calculations

Play: 1. Equal sign | 2. SUM | 3. AVERAGE | 4. MAX | 5. MIN

Challenge: 1. AVERAGE | 2. SUM | 3. AVERAGE | 4. MIN | 5. MAX | 6. MAX | 7. MIN | 8. Equal sign | 9. Equal sign | 10. SUM

Lesson 27 — Edit a Worksheet

Play: 1. Cell | 2. Row | 3. Column | 4. Formula | 5. Workbook

Challenge: 1. Cell | 2. Formula | 3. Column | 4. Formula | 5. Cell | 6. Column | 7. Row | 8. Row | 9. Workbook | 10. Workbook

Lesson 28 — Manage Workbooks

Play: 1. Backup | 2. Folder | 3. File extension | 4. Cloud storage | 5. Restore

Challenge: 1. Backup | 2. Folder | 3. Restore | 4. Cloud storage | 5. Cloud storage | 6. Folder | 7. File extension | 8. File extension | 9. Restore | 10. Backup

Lesson 29 — Understanding URLs

Play: 1. Web browser | 2. Address bar | 3. Home page | 4. Hyperlink | 5. Back button

Challenge: 1. Home page | 2. Home page | 3. Hyperlink | 4. Back button | 5. Address bar | 6. Back button | 7. Hyperlink | 8. Address bar | 9. Web browser | 10. Web browser

Lesson 30 — Find Information on a Page

Play: 1. Search engine | 2. Search words | 3. Source | 4. Check evidence | 5. Bookmark

Challenge: 1. Source | 2. Source | 3. Search engine | 4. Check evidence | 5. Check evidence | 6. Search engine | 7. Bookmark | 8. Bookmark | 9. Search words | 10. Search words

Lesson 31 — Setting Bookmarks

Play: 1. Theme | 2. Bookmark | 3. Default search engine | 4. Cookies | 5. Settings

Challenge: 1. Settings | 2. Cookies | 3. Cookies | 4. Settings | 5. Default search engine | 6. Theme | 7. Bookmark | 8. Bookmark | 9. Theme | 10. Default search engine

Lesson 32 — Reply and Forward Emails

Play: 1. Recipient | 2. Subject | 3. Message body | 4. Attachment | 5. Reply

Challenge: 1. Message body | 2. Reply | 3. Message body | 4. Attachment | 5. Reply | 6. Attachment | 7. Subject | 8. Subject | 9. Recipient | 10. Recipient

Lesson 33 — Email Attachments

Play: 1. Recipient | 2. Subject | 3. Message body | 4. Attachment | 5. Reply

Challenge: 1. Subject | 2. Message body | 3. Subject | 4. Recipient | 5. Reply | 6. Message body | 7. Attachment | 8. Attachment | 9. Recipient | 10. Reply

Lesson 34 — Connected Devices and Sensors

Play: 1. Sensor | 2. Smart device | 3. Network | 4. Automated irrigation | 5. Security

Challenge: 1. Sensor | 2. Smart device | 3. Security | 4. Network | 5. Sensor | 6. Automated irrigation | 7. Automated irrigation | 8. Security | 9. Network | 10. Smart device

Lesson 35 — IoT in Farms and Businesses

Play: 1. Sensor | 2. Smart device | 3. Network | 4. Automated irrigation | 5. Security

Challenge: 1. Sensor | 2. Security | 3. Smart device | 4. Automated irrigation | 5. Network | 6. Network | 7. Smart device | 8. Security | 9. Sensor | 10. Automated irrigation
