Basic 6

Illustrated lessons · Practical activities · Play and Challenge questions

Independently authored learning companion aligned to selected NaCCA 2019 topics. This is not an official NaCCA publication.

LESSON 01: Develop a cooperative movement game that uses locomotor skills,

Goal: Develop a cooperative movement game that uses locomotor skills, object manipulation, and an offensive strategy and teach the game to

Learn it

Fair play means respecting rules, teammates and opponents. A good team encourages everybody to participate.

Useful material: a small-group game and agreed rules

Do it in three steps

1. Set up a safe activity space using a small-group game and agreed rules.

2. Practise the skill slowly: Develop a cooperative movement game that uses locomotor skills, object manipulation, and an offensive strategy and teach the game to.

3. Practise a short game; show how to encourage someone and resolve a disagreement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Adjust the game so all learners can take part.

Try this: Practise a short game; show how to encourage someone and resolve a disagreement.

Show your learning: respectful participation. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 01: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Develop a cooperative movement game that uses locomotor skills,: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Rush into a demanding activity without warming up

C. Develop a cooperative movement game that uses locomotor skills, object manipulation, and an offensive strategy and teach the game to

D. Practise unsafe tricks without learning the basic skill

2. [Play] Develop a cooperative movement game that uses locomotor skills,: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a small-group game and agreed rules

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Develop a cooperative movement game that uses locomotor skills,: Which action should come first?

A. Finish before looking at the instructions.

B. Set up a safe activity space using a small-group game and agreed rules.

C. Skip all practice and guess the result.

D. Ignore the main task and do something unrelated.

4. [Play] Develop a cooperative movement game that uses locomotor skills,: Which setting does this grade use?

A. an unrelated imagined city

B. only a future space colony

C. independent fitness, teamwork and safe sports participation

D. a topic unrelated to the current class

5. [Play] Develop a cooperative movement game that uses locomotor skills,: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unrelated picture with no explanation

C. an unsupported claim with no classroom practice

D. a response that does not show the lesson skill

6. [Challenge] Develop a cooperative movement game that uses locomotor skills,: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Only watch others without trying

C. Practise the skill slowly: Develop a cooperative movement game that uses locomotor skills, object manipulation, and an offensive strategy and teach the game to.

D. Skip to marking before learning

7. [Challenge] Develop a cooperative movement game that uses locomotor skills,: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Practise a short game; show how to encourage someone and resolve a disagreement.

D. Leave the task unfinished without explaining

8. [Challenge] Develop a cooperative movement game that uses locomotor skills,: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. a random answer with no supporting detail

C. an unrelated example that does not test the skill

D. respectful participation

9. [Challenge] Develop a cooperative movement game that uses locomotor skills,: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Adjust the game so all learners can take part.

B. Take unnecessary risks to finish first.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Develop a cooperative movement game that uses locomotor skills,: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Avoid the stated task and its materials

C. Copy another learner’s response without trying

D. Practise a short game; show how to encourage someone and resolve a disagreement.

11. [Challenge] Develop a cooperative movement game that uses locomotor skills,: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Fair play means respecting rules, teammates and opponents. A good team encourages everybody to participate.

D. Learning means only guessing and never checking

12. [Challenge] Develop a cooperative movement game that uses locomotor skills,: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether your work demonstrates respectful participation.

13. [Challenge] Develop a cooperative movement game that uses locomotor skills,: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Stop immediately without reflection

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Repeat the same error without checking feedback

14. [Challenge] Develop a cooperative movement game that uses locomotor skills,: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Ignore all comments and leave the task incomplete

C. Change answers randomly without a reason

D. Revisit the steps and strengthen respectful participation.

15. [Challenge] Develop a cooperative movement game that uses locomotor skills,: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

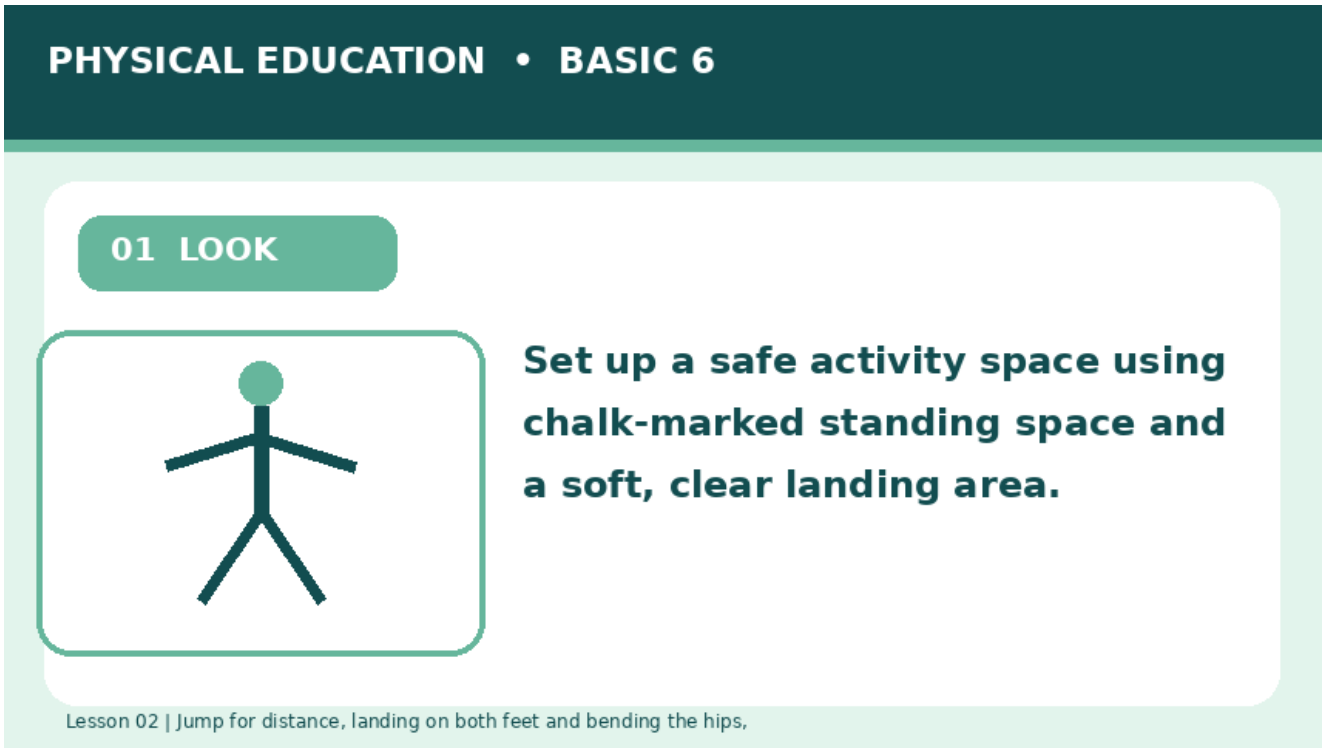

B. Apply the lesson about develop a cooperative movement game that uses locomotor skills, object manipulation, and an offensive strategy and teach the game to to a suitable real-life situation.

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 02: Jump for distance, landing on both feet and bending the hips,

Goal: Jump for distance, landing on both feet and bending the hips, knees, and ankles to reduce the impact force.

Learn it

A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

Useful material: chalk-marked standing space and a soft, clear landing area

Do it in three steps

1. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

2. Practise the skill slowly: Jump for distance, landing on both feet and bending the hips, knees, and ankles to reduce the impact force.

3. Practise take-off, landing, then describe which landing felt more balanced.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

Try this: Practise take-off, landing, then describe which landing felt more balanced.

Show your learning: controlled take-off and safe landing. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 02: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Jump for distance, landing on both feet and bending the hips,: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Jump for distance, landing on both feet and bending the hips, knees, and ankles to reduce the impact force.

2. [Play] Jump for distance, landing on both feet and bending the hips,: What useful learning material or support is listed?

A. chalk-marked standing space and a soft, clear landing area

B. a sharp object placed on the sports ground

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] Jump for distance, landing on both feet and bending the hips,: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

D. Skip all practice and guess the result.

4. [Play] Jump for distance, landing on both feet and bending the hips,: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. an unrelated imagined city

D. independent fitness, teamwork and safe sports participation

5. [Play] Jump for distance, landing on both feet and bending the hips,: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] Jump for distance, landing on both feet and bending the hips,: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Skip to marking before learning

C. Practise the skill slowly: Jump for distance, landing on both feet and bending the hips, knees, and ankles to reduce the impact force.

D. Only watch others without trying

7. [Challenge] Jump for distance, landing on both feet and bending the hips,: Which practice completes the three lesson stages?

A. Practise take-off, landing, then describe which landing felt more balanced.

B. Give a guess without trying the activity

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] Jump for distance, landing on both feet and bending the hips,: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. controlled take-off and safe landing

C. an unrelated example that does not test the skill

D. an opinion without observation or practice

9. [Challenge] Jump for distance, landing on both feet and bending the hips,: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

C. Take unnecessary risks to finish first.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Jump for distance, landing on both feet and bending the hips,: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Practise take-off, landing, then describe which landing felt more balanced.

C. Copy another learner’s response without trying

D. Complete a different lesson instead

11. [Challenge] Jump for distance, landing on both feet and bending the hips,: Which explanation best supports this lesson?

A. A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. Learning means only guessing and never checking

12. [Challenge] Jump for distance, landing on both feet and bending the hips,: What should a partner help you check?

A. Whether your work demonstrates controlled take-off and safe landing.

B. Whether you can finish without showing your work

C. Whether you can avoid answering questions

D. Whether you can ignore the agreed task

13. [Challenge] Jump for distance, landing on both feet and bending the hips,: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Jump for distance, landing on both feet and bending the hips,: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Ignore all comments and leave the task incomplete

C. Skip a difficult part without asking for help

D. Revisit the steps and strengthen controlled take-off and safe landing.

15. [Challenge] Jump for distance, landing on both feet and bending the hips,: Which choice would show responsible use of today’s skill?

A. Apply the lesson about jump for distance, landing on both feet and bending the hips, knees, and ankles to reduce the impact force to a suitable real-life situation.

B. Claim expertise without trying the skill

C. Avoid explaining how the skill could be used

D. Use the topic to mislead others

LESSON 03: Roll ball using a stick in a game situation (hockey). After a

Goal: Roll ball using a stick in a game situation (hockey). After a warm-up

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Roll ball using a stick in a game situation (hockey). After a warm-up.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 03: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Roll ball using a stick in a game situation (hockey). After a: What is this lesson mainly about?

A. Roll ball using a stick in a game situation (hockey). After a warm-up

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] Roll ball using a stick in a game situation (hockey). After a: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a slippery or obstructed practice area

C. a soft, lightweight ball and enough clear space

D. a sharp object placed on the sports ground

3. [Play] Roll ball using a stick in a game situation (hockey). After a: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Skip all practice and guess the result.

D. Set up a safe activity space using a soft, lightweight ball and enough clear space.

4. [Play] Roll ball using a stick in a game situation (hockey). After a: Which setting does this grade use?

A. a topic unrelated to the current class

B. independent fitness, teamwork and safe sports participation

C. only a future space colony

D. an unrelated imagined city

5. [Play] Roll ball using a stick in a game situation (hockey). After a: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. an unrelated picture with no explanation

D. a response that does not show the lesson skill

6. [Challenge] Roll ball using a stick in a game situation (hockey). After a: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Practise the skill slowly: Roll ball using a stick in a game situation (hockey). After a warm-up.

C. Skip to marking before learning

D. Only watch others without trying

7. [Challenge] Roll ball using a stick in a game situation (hockey). After a: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Practise at a short distance; check your direction and try again with feedback.

D. Leave the task unfinished without explaining

8. [Challenge] Roll ball using a stick in a game situation (hockey). After a: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an unrelated example that does not test the skill

C. accurate controlled ball movement

D. an opinion without observation or practice

9. [Challenge] Roll ball using a stick in a game situation (hockey). After a: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

B. Do the activity without considering other people.

C. Ignore the teacher’s safety instructions.

D. Take unnecessary risks to finish first.

10. [Challenge] Roll ball using a stick in a game situation (hockey). After a: Which classroom activity helps apply the lesson?

A. Practise at a short distance; check your direction and try again with feedback.

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Avoid the stated task and its materials

11. [Challenge] Roll ball using a stick in a game situation (hockey). After a: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] Roll ball using a stick in a game situation (hockey). After a: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Roll ball using a stick in a game situation (hockey). After a: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] Roll ball using a stick in a game situation (hockey). After a: How should a learner improve after feedback?

A. Revisit the steps and strengthen accurate controlled ball movement.

B. Ignore all comments and leave the task incomplete

C. Skip a difficult part without asking for help

D. Change answers randomly without a reason

15. [Challenge] Roll ball using a stick in a game situation (hockey). After a: Which choice would show responsible use of today’s skill?

A. Apply the lesson about roll ball using a stick in a game situation (hockey). after a warm-up to a suitable real-life situation.

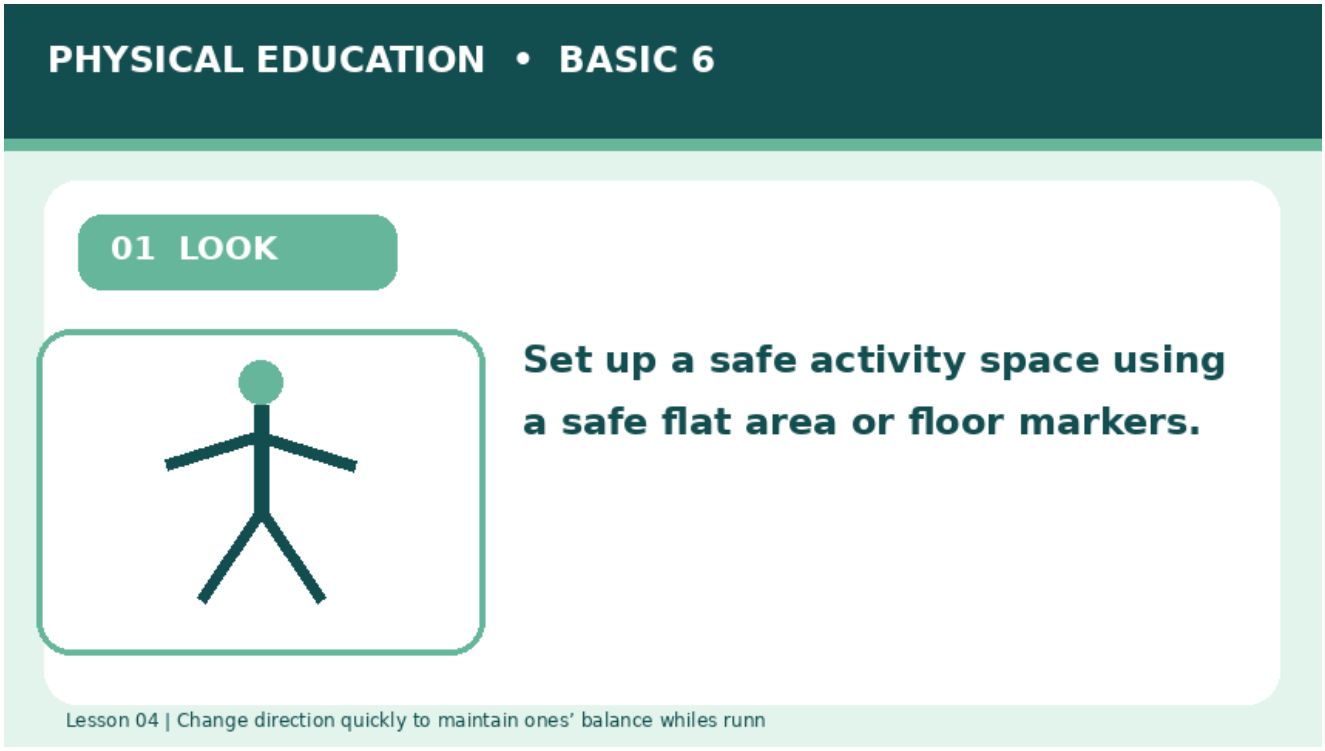

B. Use the topic to mislead others

C. Avoid explaining how the skill could be used

D. Claim expertise without trying the skill

LESSON 04: Change direction quickly to maintain ones’ balance whiles running

Goal: Change direction quickly to maintain ones’ balance whiles running with an object through obstacles.

Learn it

Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

Useful material: a safe flat area or floor markers

Do it in three steps

1. Set up a safe activity space using a safe flat area or floor markers.

2. Practise the skill slowly: Change direction quickly to maintain ones’ balance whiles running with an object through obstacles.

3. Hold a comfortable balance briefly and explain what made it steady.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

Try this: Hold a comfortable balance briefly and explain what made it steady.

Show your learning: stable body position. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 04: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Change direction quickly to maintain ones’ balance whiles running: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Change direction quickly to maintain ones’ balance whiles running with an object through obstacles.

D. Practise unsafe tricks without learning the basic skill

2. [Play] Change direction quickly to maintain ones’ balance whiles running: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a slippery or obstructed practice area

D. a safe flat area or floor markers

3. [Play] Change direction quickly to maintain ones’ balance whiles running: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Set up a safe activity space using a safe flat area or floor markers.

D. Finish before looking at the instructions.

4. [Play] Change direction quickly to maintain ones’ balance whiles running: Which setting does this grade use?

A. a topic unrelated to the current class

B. an unrelated imagined city

C. independent fitness, teamwork and safe sports participation

D. only a future space colony

5. [Play] Change direction quickly to maintain ones’ balance whiles running: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a response that does not show the lesson skill

C. a demonstrated movement or fitness task with self-assessment

D. an unsupported claim with no classroom practice

6. [Challenge] Change direction quickly to maintain ones’ balance whiles running: Which action comes after the opening step?

A. Practise the skill slowly: Change direction quickly to maintain ones’ balance whiles running with an object through obstacles.

B. Skip to marking before learning

C. Only watch others without trying

D. Change to an unrelated lesson immediately

7. [Challenge] Change direction quickly to maintain ones’ balance whiles running: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Leave the task unfinished without explaining

D. Hold a comfortable balance briefly and explain what made it steady.

8. [Challenge] Change direction quickly to maintain ones’ balance whiles running: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. a random answer with no supporting detail

C. an unrelated example that does not test the skill

D. stable body position

9. [Challenge] Change direction quickly to maintain ones’ balance whiles running: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Do the activity without considering other people.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

D. Take unnecessary risks to finish first.

10. [Challenge] Change direction quickly to maintain ones’ balance whiles running: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Complete a different lesson instead

C. Hold a comfortable balance briefly and explain what made it steady.

D. Avoid the stated task and its materials

11. [Challenge] Change direction quickly to maintain ones’ balance whiles running: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

12. [Challenge] Change direction quickly to maintain ones’ balance whiles running: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether your work demonstrates stable body position.

C. Whether you can ignore the agreed task

D. Whether you can avoid answering questions

13. [Challenge] Change direction quickly to maintain ones’ balance whiles running: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Stop immediately without reflection

C. Make up results instead of practising

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Change direction quickly to maintain ones’ balance whiles running: How should a learner improve after feedback?

A. Revisit the steps and strengthen stable body position.

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Change answers randomly without a reason

15. [Challenge] Change direction quickly to maintain ones’ balance whiles running: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

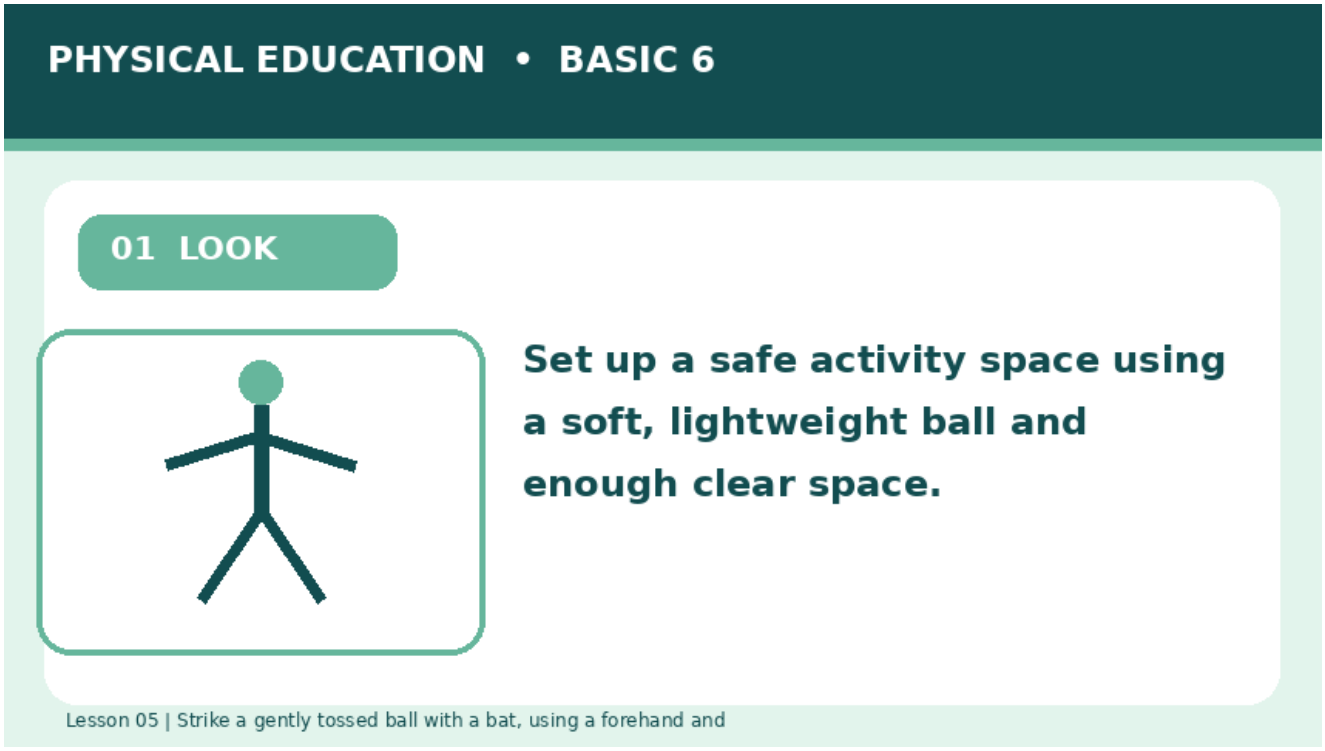

B. Use the topic to mislead others

C. Apply the lesson about change direction quickly to maintain ones’ balance whiles running with an object through obstacles to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 05: Strike a gently tossed ball with a bat, using a forehand and

Goal: Strike a gently tossed ball with a bat, using a forehand and backhand movement pattern. Organize

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Strike a gently tossed ball with a bat, using a forehand and backhand movement pattern. Organize.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 05: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Strike a gently tossed ball with a bat, using a forehand and: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Ignore the movement task and do only an unrelated game

C. Strike a gently tossed ball with a bat, using a forehand and backhand movement pattern. Organize

D. Rush into a demanding activity without warming up

2. [Play] Strike a gently tossed ball with a bat, using a forehand and: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a slippery or obstructed practice area

C. heavy unsafe equipment in a crowded space

D. a soft, lightweight ball and enough clear space

3. [Play] Strike a gently tossed ball with a bat, using a forehand and: Which action should come first?

A. Finish before looking at the instructions.

B. Set up a safe activity space using a soft, lightweight ball and enough clear space.

C. Skip all practice and guess the result.

D. Ignore the main task and do something unrelated.

4. [Play] Strike a gently tossed ball with a bat, using a forehand and: Which setting does this grade use?

A. a topic unrelated to the current class

B. an unrelated imagined city

C. independent fitness, teamwork and safe sports participation

D. only a future space colony

5. [Play] Strike a gently tossed ball with a bat, using a forehand and: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unrelated picture with no explanation

C. an unsupported claim with no classroom practice

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] Strike a gently tossed ball with a bat, using a forehand and: Which action comes after the opening step?

A. Only watch others without trying

B. Skip to marking before learning

C. Change to an unrelated lesson immediately

D. Practise the skill slowly: Strike a gently tossed ball with a bat, using a forehand and backhand movement pattern. Organize.

7. [Challenge] Strike a gently tossed ball with a bat, using a forehand and: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Practise at a short distance; check your direction and try again with feedback.

D. Give a guess without trying the activity

8. [Challenge] Strike a gently tossed ball with a bat, using a forehand and: What counts as good evidence of learning here?

A. accurate controlled ball movement

B. a random answer with no supporting detail

C. an opinion without observation or practice

D. an unrelated example that does not test the skill

9. [Challenge] Strike a gently tossed ball with a bat, using a forehand and: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Strike a gently tossed ball with a bat, using a forehand and: Which classroom activity helps apply the lesson?

A. Practise at a short distance; check your direction and try again with feedback.

B. Complete a different lesson instead

C. Avoid the stated task and its materials

D. Copy another learner’s response without trying

11. [Challenge] Strike a gently tossed ball with a bat, using a forehand and: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

D. The lesson has no connection to life or skills

12. [Challenge] Strike a gently tossed ball with a bat, using a forehand and: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Strike a gently tossed ball with a bat, using a forehand and: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Stop immediately without reflection

D. Repeat the same error without checking feedback

14. [Challenge] Strike a gently tossed ball with a bat, using a forehand and: How should a learner improve after feedback?

A. Revisit the steps and strengthen accurate controlled ball movement.

B. Ignore all comments and leave the task incomplete

C. Skip a difficult part without asking for help

D. Change answers randomly without a reason

15. [Challenge] Strike a gently tossed ball with a bat, using a forehand and: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

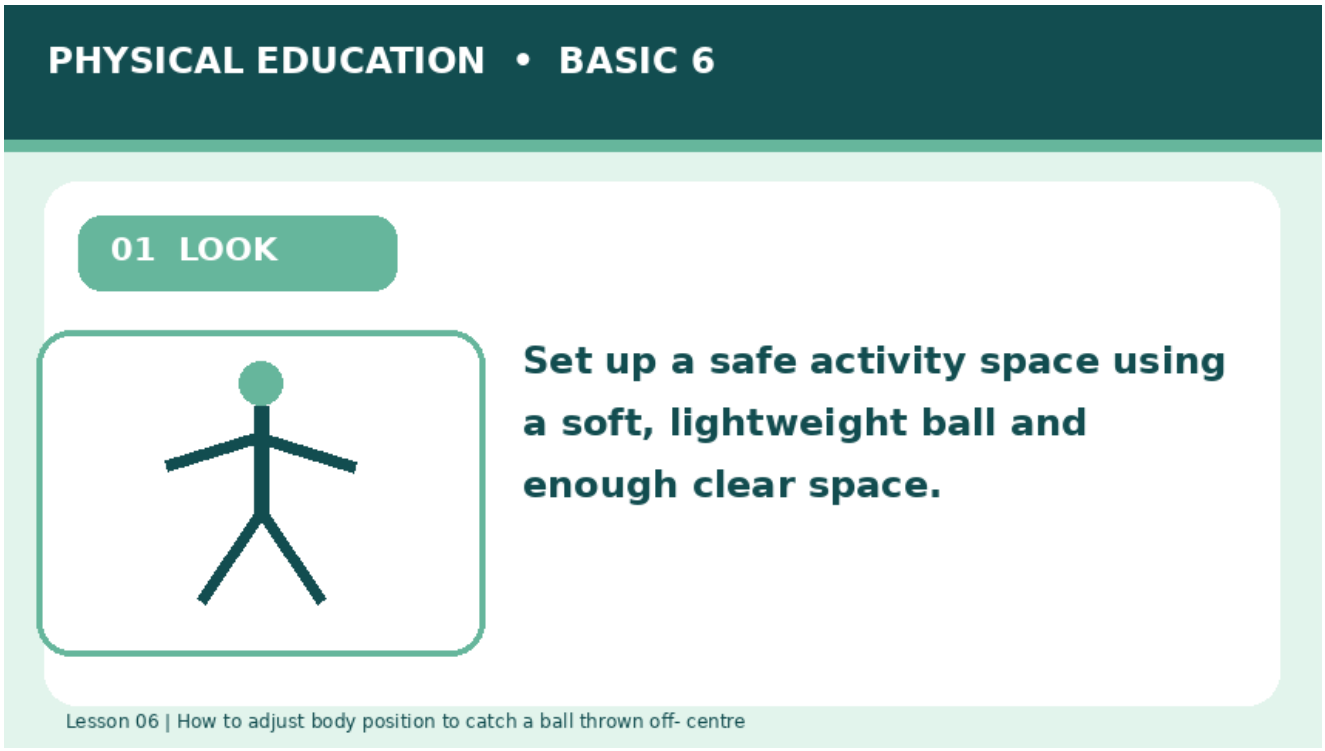

B. Use the topic to mislead others

C. Avoid explaining how the skill could be used

D. Apply the lesson about strike a gently tossed ball with a bat, using a forehand and backhand movement pattern. organize to a suitable real-life situation.

LESSON 06: How to adjust body position to catch a ball thrown off- centre.

Goal: Show how to adjust body position to catch a ball thrown off- centre. Demonstrate the correct hand, arm, body, feet position in the catching.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Show how to adjust body position to catch a ball thrown off- centre. Demonstrate the correct hand, arm, body, feet position in the catching.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 06: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] How to adjust body position to catch a ball thrown off- centre.: What is this lesson mainly about?

A. Show how to adjust body position to catch a ball thrown off- centre. Demonstrate the correct hand, arm, body, feet position in the catching.

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Rush into a demanding activity without warming up

2. [Play] How to adjust body position to catch a ball thrown off- centre.: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a soft, lightweight ball and enough clear space

C. a slippery or obstructed practice area

D. heavy unsafe equipment in a crowded space

3. [Play] How to adjust body position to catch a ball thrown off- centre.: Which action should come first?

A. Finish before looking at the instructions.

B. Skip all practice and guess the result.

C. Set up a safe activity space using a soft, lightweight ball and enough clear space.

D. Ignore the main task and do something unrelated.

4. [Play] How to adjust body position to catch a ball thrown off- centre.: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. an unrelated imagined city

D. independent fitness, teamwork and safe sports participation

5. [Play] How to adjust body position to catch a ball thrown off- centre.: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a demonstrated movement or fitness task with self-assessment

C. an unsupported claim with no classroom practice

D. a response that does not show the lesson skill

6. [Challenge] How to adjust body position to catch a ball thrown off- centre.: Which action comes after the opening step?

A. Practise the skill slowly: Show how to adjust body position to catch a ball thrown off- centre. Demonstrate the correct hand, arm, body, feet position in the catching.

B. Skip to marking before learning

C. Change to an unrelated lesson immediately

D. Only watch others without trying

7. [Challenge] How to adjust body position to catch a ball thrown off- centre.: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Practise at a short distance; check your direction and try again with feedback.

C. Stop after reading the title

D. Give a guess without trying the activity

8. [Challenge] How to adjust body position to catch a ball thrown off- centre.: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. accurate controlled ball movement

D. an opinion without observation or practice

9. [Challenge] How to adjust body position to catch a ball thrown off- centre.: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Do the activity without considering other people.

C. Ignore the teacher’s safety instructions.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

10. [Challenge] How to adjust body position to catch a ball thrown off- centre.: Which classroom activity helps apply the lesson?

A. Practise at a short distance; check your direction and try again with feedback.

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Avoid the stated task and its materials

11. [Challenge] How to adjust body position to catch a ball thrown off- centre.: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. The topic can be completed without observing or practising

C. Learning means only guessing and never checking

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] How to adjust body position to catch a ball thrown off- centre.: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can finish without showing your work

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can avoid answering questions

13. [Challenge] How to adjust body position to catch a ball thrown off- centre.: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] How to adjust body position to catch a ball thrown off- centre.: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Ignore all comments and leave the task incomplete

D. Skip a difficult part without asking for help

15. [Challenge] How to adjust body position to catch a ball thrown off- centre.: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

B. Apply the lesson about show how to adjust body position to catch a ball thrown off- centre. demonstrate the correct hand, arm, body, feet position in the catching to a suitable real-life situation.

C. Use the topic to mislead others

D. Claim expertise without trying the skill

LESSON 07: Kick a ball, dropped from the hands, at a target (goalies’ punting

Goal: Kick a ball, dropped from the hands, at a target (goalies’ punting in football). Arrange about five cones with partners standing at the opposite sides

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Kick a ball, dropped from the hands, at a target (goalies’ punting in football). Arrange about five cones with partners standing at the opposite sides.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 07: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Kick a ball, dropped from the hands, at a target (goalies’ punting: What is this lesson mainly about?

A. Kick a ball, dropped from the hands, at a target (goalies’ punting in football). Arrange about five cones with partners standing at the opposite sides

B. Rush into a demanding activity without warming up

C. Practise unsafe tricks without learning the basic skill

D. Ignore the movement task and do only an unrelated game

2. [Play] Kick a ball, dropped from the hands, at a target (goalies’ punting: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. heavy unsafe equipment in a crowded space

C. a sharp object placed on the sports ground

D. a soft, lightweight ball and enough clear space

3. [Play] Kick a ball, dropped from the hands, at a target (goalies’ punting: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Finish before looking at the instructions.

D. Set up a safe activity space using a soft, lightweight ball and enough clear space.

4. [Play] Kick a ball, dropped from the hands, at a target (goalies’ punting: Which setting does this grade use?

A. an unrelated imagined city

B. only a future space colony

C. independent fitness, teamwork and safe sports participation

D. a topic unrelated to the current class

5. [Play] Kick a ball, dropped from the hands, at a target (goalies’ punting: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] Kick a ball, dropped from the hands, at a target (goalies’ punting: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Only watch others without trying

D. Practise the skill slowly: Kick a ball, dropped from the hands, at a target (goalies’ punting in football). Arrange about five cones with partners standing at the opposite sides.

7. [Challenge] Kick a ball, dropped from the hands, at a target (goalies’ punting: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Give a guess without trying the activity

D. Practise at a short distance; check your direction and try again with feedback.

8. [Challenge] Kick a ball, dropped from the hands, at a target (goalies’ punting: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an opinion without observation or practice

C. an unrelated example that does not test the skill

D. accurate controlled ball movement

9. [Challenge] Kick a ball, dropped from the hands, at a target (goalies' punting: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person's face.

C. Take unnecessary risks to finish first.

D. Ignore the teacher's safety instructions.

10. [Challenge] Kick a ball, dropped from the hands, at a target (goalies' punting: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy another learner's response without trying

C. Avoid the stated task and its materials

D. Practise at a short distance; check your direction and try again with feedback.

11. [Challenge] Kick a ball, dropped from the hands, at a target (goalies' punting: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Learning means only guessing and never checking

C. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

D. The topic can be completed without observing or practising

12. [Challenge] Kick a ball, dropped from the hands, at a target (goalies' punting: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can finish without showing your work

C. Whether you can avoid answering questions

D. Whether your work demonstrates accurate controlled ball movement.

13. [Challenge] Kick a ball, dropped from the hands, at a target (goalies' punting: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Make up results instead of practising

14. [Challenge] Kick a ball, dropped from the hands, at a target (goalies' punting: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Change answers randomly without a reason

D. Skip a difficult part without asking for help

15. [Challenge] Kick a ball, dropped from the hands, at a target (goalies' punting: Which choice would show responsible use of today's skill?

A. Use the topic to mislead others

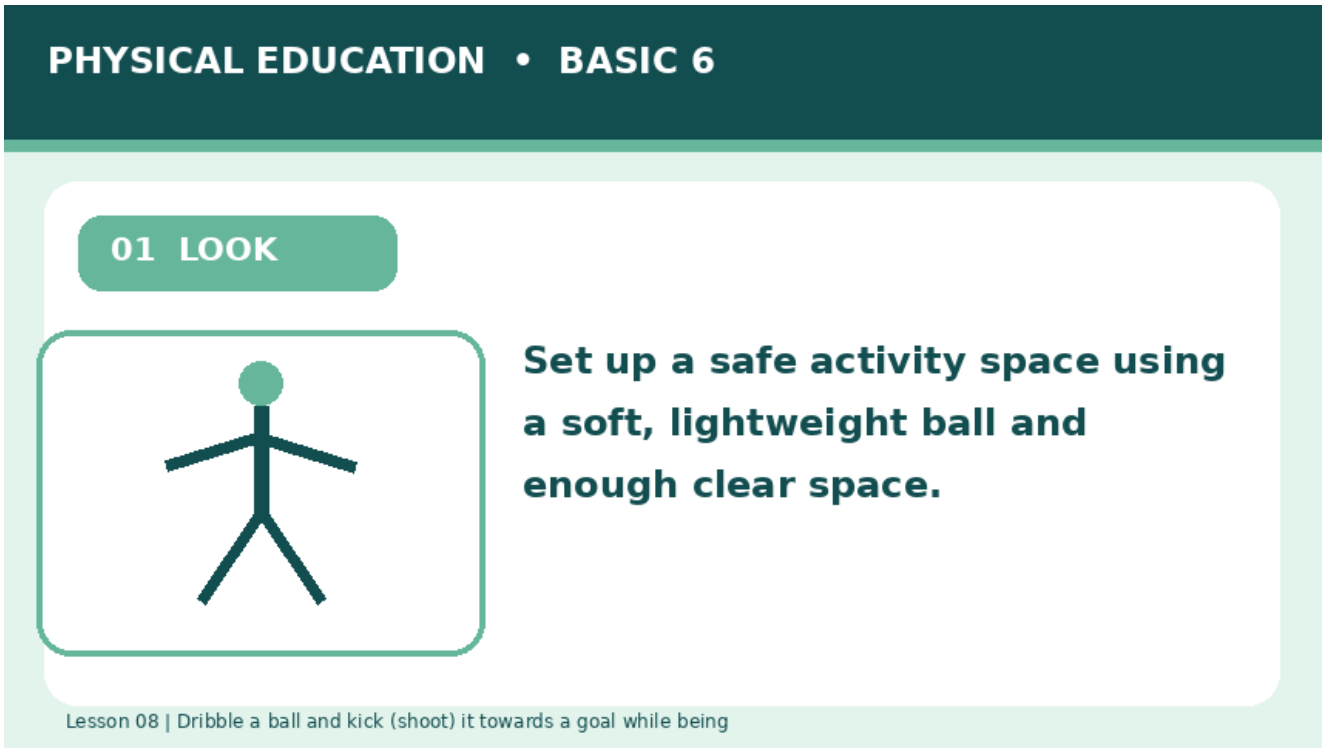

B. Avoid explaining how the skill could be used

C. Claim expertise without trying the skill

D. Apply the lesson about kick a ball, dropped from the hands, at a target (goalies' punting in football). arrange about five cones with partners standing at the opposite sides to a suitable real-life situation.

LESSON 08: Dribble a ball and kick (shoot) it towards a goal while being

Goal: Dribble a ball and kick (shoot) it towards a goal while being guarded. Arrange 5 cones in front of a goal post. The last cone should be about 5-10m away

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Dribble a ball and kick (shoot) it towards a goal while being guarded. Arrange 5 cones in front of a goal post. The last cone should be about 5-10m away.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 08: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Dribble a ball and kick (shoot) it towards a goal while being: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Dribble a ball and kick (shoot) it towards a goal while being guarded. Arrange 5 cones in front of a goal post. The last cone should be about 5-10m away

C. Rush into a demanding activity without warming up

D. Practise unsafe tricks without learning the basic skill

2. [Play] Dribble a ball and kick (shoot) it towards a goal while being: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a slippery or obstructed practice area

D. a soft, lightweight ball and enough clear space

3. [Play] Dribble a ball and kick (shoot) it towards a goal while being: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Set up a safe activity space using a soft, lightweight ball and enough clear space.

C. Skip all practice and guess the result.

D. Finish before looking at the instructions.

4. [Play] Dribble a ball and kick (shoot) it towards a goal while being: Which setting does this grade use?

A. an unrelated imagined city

B. independent fitness, teamwork and safe sports participation

C. only a future space colony

D. a topic unrelated to the current class

5. [Play] Dribble a ball and kick (shoot) it towards a goal while being: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a response that does not show the lesson skill

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] Dribble a ball and kick (shoot) it towards a goal while being: Which action comes after the opening step?

A. Practise the skill slowly: Dribble a ball and kick (shoot) it towards a goal while being guarded. Arrange 5 cones in front of a goal post. The last cone should be about 5-10m away.

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Only watch others without trying

7. [Challenge] Dribble a ball and kick (shoot) it towards a goal while being: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Give a guess without trying the activity

D. Practise at a short distance; check your direction and try again with feedback.

8. [Challenge] Dribble a ball and kick (shoot) it towards a goal while being: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an unrelated example that does not test the skill

C. an opinion without observation or practice

D. accurate controlled ball movement

9. [Challenge] Dribble a ball and kick (shoot) it towards a goal while being: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

10. [Challenge] Dribble a ball and kick (shoot) it towards a goal while being: Which classroom activity helps apply the lesson?

A. Practise at a short distance; check your direction and try again with feedback.

B. Complete a different lesson instead

C. Avoid the stated task and its materials

D. Copy another learner’s response without trying

11. [Challenge] Dribble a ball and kick (shoot) it towards a goal while being: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] Dribble a ball and kick (shoot) it towards a goal while being: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Dribble a ball and kick (shoot) it towards a goal while being: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Repeat the same error without checking feedback

C. Stop immediately without reflection

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Dribble a ball and kick (shoot) it towards a goal while being: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Revisit the steps and strengthen accurate controlled ball movement.

15. [Challenge] Dribble a ball and kick (shoot) it towards a goal while being: Which choice would show responsible use of today’s skill?

A. Apply the lesson about dribble a ball and kick (shoot) it towards a goal while being guarded. arrange 5 cones in front of a goal post. the last cone should be about 5-10m away to a suitable real-life situation.

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Avoid explaining how the skill could be used

LESSON 09: Roll (body) smoothly forward and backward (combination of forward

Goal: Roll (body) smoothly forward and backward (combination of forward and backward roll) After a warm-up

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Roll (body) smoothly forward and backward (combination of forward and backward roll) After a warm-up.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 09: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Roll (body) smoothly forward and backward (combination of forward: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Rush into a demanding activity without warming up

C. Roll (body) smoothly forward and backward (combination of forward and backward roll) After a warm-up

D. Practise unsafe tricks without learning the basic skill

2. [Play] Roll (body) smoothly forward and backward (combination of forward: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a soft, lightweight ball and enough clear space

C. heavy unsafe equipment in a crowded space

D. a sharp object placed on the sports ground

3. [Play] Roll (body) smoothly forward and backward (combination of forward: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Set up a safe activity space using a soft, lightweight ball and enough clear space.

D. Skip all practice and guess the result.

4. [Play] Roll (body) smoothly forward and backward (combination of forward: Which setting does this grade use?

A. a topic unrelated to the current class

B. an unrelated imagined city

C. independent fitness, teamwork and safe sports participation

D. only a future space colony

5. [Play] Roll (body) smoothly forward and backward (combination of forward: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. a response that does not show the lesson skill

C. an unrelated picture with no explanation

D. an unsupported claim with no classroom practice

6. [Challenge] Roll (body) smoothly forward and backward (combination of forward: Which action comes after the opening step?

A. Practise the skill slowly: Roll (body) smoothly forward and backward (combination of forward and backward roll) After a warm-up.

B. Skip to marking before learning

C. Change to an unrelated lesson immediately

D. Only watch others without trying

7. [Challenge] Roll (body) smoothly forward and backward (combination of forward: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Practise at a short distance; check your direction and try again with feedback.

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] Roll (body) smoothly forward and backward (combination of forward: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. a random answer with no supporting detail

D. accurate controlled ball movement

9. [Challenge] Roll (body) smoothly forward and backward (combination of forward: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Ignore the teacher’s safety instructions.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Take unnecessary risks to finish first.

10. [Challenge] Roll (body) smoothly forward and backward (combination of forward: Which classroom activity helps apply the lesson?

A. Practise at a short distance; check your direction and try again with feedback.

B. Complete a different lesson instead

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] Roll (body) smoothly forward and backward (combination of forward: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

C. The topic can be completed without observing or practising

D. Learning means only guessing and never checking

12. [Challenge] Roll (body) smoothly forward and backward (combination of forward: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can avoid answering questions

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can ignore the agreed task

13. [Challenge] Roll (body) smoothly forward and backward (combination of forward: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Make up results instead of practising

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Roll (body) smoothly forward and backward (combination of forward: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Change answers randomly without a reason

D. Revisit the steps and strengthen accurate controlled ball movement.

15. [Challenge] Roll (body) smoothly forward and backward (combination of forward: Which choice would show responsible use of today’s skill?

A. Apply the lesson about roll (body) smoothly forward and backward (combination of forward and backward roll) after a warm-up to a suitable real-life situation.

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Avoid explaining how the skill could be used

LESSON 10: The time necessary to prepare for and begin a forehand stroke and a

Goal: Identify the time necessary to prepare for and begin a forehand stroke and a backhand stroke. To get started, one needs to learn four basic strokes: the

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify the time necessary to prepare for and begin a forehand stroke and a backhand stroke. To get started, one needs to learn four basic strokes: the.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 10: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The time necessary to prepare for and begin a forehand stroke and a: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Identify the time necessary to prepare for and begin a forehand stroke and a backhand stroke. To get started, one needs to learn four basic strokes: the

D. Practise unsafe tricks without learning the basic skill

2. [Play] The time necessary to prepare for and begin a forehand stroke and a: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a sharp object placed on the sports ground

C. space markers and suitable lightweight equipment

D. heavy unsafe equipment in a crowded space

3. [Play] The time necessary to prepare for and begin a forehand stroke and a: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Set up a safe activity space using space markers and suitable lightweight equipment.

D. Skip all practice and guess the result.

4. [Play] The time necessary to prepare for and begin a forehand stroke and a: Which setting does this grade use?

A. independent fitness, teamwork and safe sports participation

B. a topic unrelated to the current class

C. only a future space colony

D. an unrelated imagined city

5. [Play] The time necessary to prepare for and begin a forehand stroke and a: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] The time necessary to prepare for and begin a forehand stroke and a: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Practise the skill slowly: Identify the time necessary to prepare for and begin a forehand stroke and a backhand stroke. To get started, one needs to learn four basic strokes: the.

C. Skip to marking before learning

D. Only watch others without trying

7. [Challenge] The time necessary to prepare for and begin a forehand stroke and a: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Give a guess without trying the activity

8. [Challenge] The time necessary to prepare for and begin a forehand stroke and a: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an opinion without observation or practice

C. an unrelated example that does not test the skill

D. careful, safe movement

9. [Challenge] The time necessary to prepare for and begin a forehand stroke and a: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Do the activity without considering other people.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Take unnecessary risks to finish first.

10. [Challenge] The time necessary to prepare for and begin a forehand stroke and a: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Copy another learner’s response without trying

D. Complete a different lesson instead

11. [Challenge] The time necessary to prepare for and begin a forehand stroke and a: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. Learning means only guessing and never checking

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] The time necessary to prepare for and begin a forehand stroke and a: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether your work demonstrates careful, safe movement.

C. Whether you can avoid answering questions

D. Whether you can ignore the agreed task

13. [Challenge] The time necessary to prepare for and begin a forehand stroke and a: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Repeat the same error without checking feedback

C. Make up results instead of practising

D. Stop immediately without reflection

14. [Challenge] The time necessary to prepare for and begin a forehand stroke and a: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Change answers randomly without a reason

C. Revisit the steps and strengthen careful, safe movement.

D. Ignore all comments and leave the task incomplete

15. [Challenge] The time necessary to prepare for and begin a forehand stroke and a: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

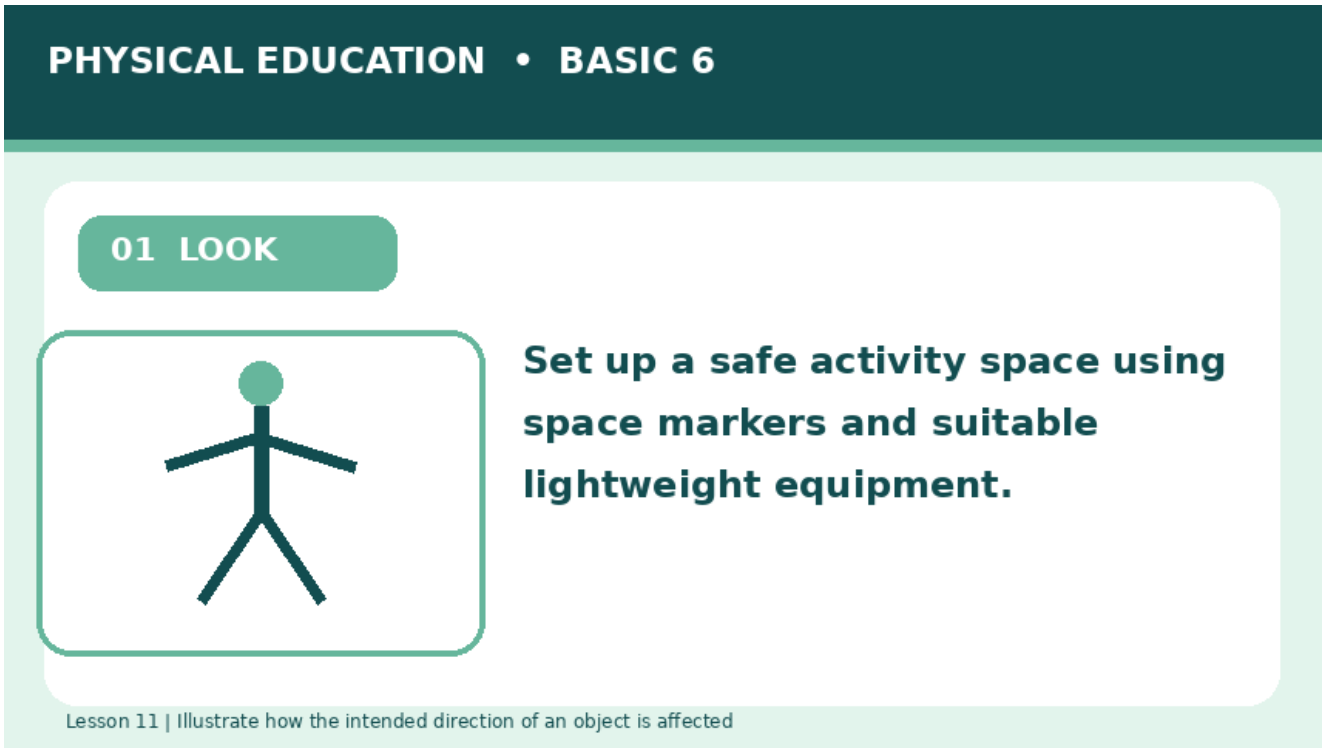

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Apply the lesson about identify the time necessary to prepare for and begin a forehand stroke and a backhand stroke. to get started, one needs to learn four basic strokes: the to a suitable real-life situation.

LESSON 11: Illustrate how the intended direction of an object is affected by

Goal: Illustrate how the intended direction of an object is affected by the angle of the implement or body part at the time of contact.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Illustrate how the intended direction of an object is affected by the angle of the implement or body part at the time of contact.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 11: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Illustrate how the intended direction of an object is affected by: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Illustrate how the intended direction of an object is affected by the angle of the implement or body part at the time of contact.

C. Rush into a demanding activity without warming up

D. Ignore the movement task and do only an unrelated game

2. [Play] Illustrate how the intended direction of an object is affected by: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. space markers and suitable lightweight equipment

C. heavy unsafe equipment in a crowded space

D. a sharp object placed on the sports ground

3. [Play] Illustrate how the intended direction of an object is affected by: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Finish before looking at the instructions.

D. Set up a safe activity space using space markers and suitable lightweight equipment.

4. [Play] Illustrate how the intended direction of an object is affected by: Which setting does this grade use?

A. an unrelated imagined city

B. a topic unrelated to the current class

C. independent fitness, teamwork and safe sports participation

D. only a future space colony

5. [Play] Illustrate how the intended direction of an object is affected by: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. an unrelated picture with no explanation

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] Illustrate how the intended direction of an object is affected by: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Only watch others without trying

C. Practise the skill slowly: Illustrate how the intended direction of an object is affected by the angle of the implement or body part at the time of contact.

D. Skip to marking before learning

7. [Challenge] Illustrate how the intended direction of an object is affected by: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Leave the task unfinished without explaining

C. Stop after reading the title

D. Observe a demonstration, practise slowly, then reflect on one improvement.

8. [Challenge] Illustrate how the intended direction of an object is affected by: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an opinion without observation or practice

C. careful, safe movement

D. an unrelated example that does not test the skill

9. [Challenge] Illustrate how the intended direction of an object is affected by: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

10. [Challenge] Illustrate how the intended direction of an object is affected by: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Avoid the stated task and its materials

D. Complete a different lesson instead

11. [Challenge] Illustrate how the intended direction of an object is affected by: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. The lesson has no connection to life or skills

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] Illustrate how the intended direction of an object is affected by: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates careful, safe movement.

C. Whether you can finish without showing your work

D. Whether you can avoid answering questions

13. [Challenge] Illustrate how the intended direction of an object is affected by: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Make up results instead of practising

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Repeat the same error without checking feedback

14. [Challenge] Illustrate how the intended direction of an object is affected by: How should a learner improve after feedback?

A. Revisit the steps and strengthen careful, safe movement.

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Change answers randomly without a reason

15. [Challenge] Illustrate how the intended direction of an object is affected by: Which choice would show responsible use of today’s skill?

A. Apply the lesson about illustrate how the intended direction of an object is affected by the angle of the implement or body part at the time of contact to a suitable real-life situation.

B. Use the topic to mislead others

C. Avoid explaining how the skill could be used

D. Claim expertise without trying the skill

LESSON 12: Opportunities to pass or dribble while being guarded (offense and

Goal: Identify opportunities to pass or dribble while being guarded (offense and defense). After general and specific warm-ups, guide

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Identify opportunities to pass or dribble while being guarded (offense and defense). After general and specific warm-ups, guide.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 12: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Opportunities to pass or dribble while being guarded (offense and: What is this lesson mainly about?

A. Identify opportunities to pass or dribble while being guarded (offense and defense). After general and specific warm-ups, guide

B. Rush into a demanding activity without warming up

C. Practise unsafe tricks without learning the basic skill

D. Ignore the movement task and do only an unrelated game

2. [Play] Opportunities to pass or dribble while being guarded (offense and: What useful learning material or support is listed?

A. a soft, lightweight ball and enough clear space

B. a sharp object placed on the sports ground

C. a slippery or obstructed practice area

D. heavy unsafe equipment in a crowded space

3. [Play] Opportunities to pass or dribble while being guarded (offense and: Which action should come first?

A. Finish before looking at the instructions.

B. Skip all practice and guess the result.

C. Set up a safe activity space using a soft, lightweight ball and enough clear space.

D. Ignore the main task and do something unrelated.

4. [Play] Opportunities to pass or dribble while being guarded (offense and: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. an unrelated imagined city

D. independent fitness, teamwork and safe sports participation

5. [Play] Opportunities to pass or dribble while being guarded (offense and: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. a response that does not show the lesson skill

C. an unrelated picture with no explanation

D. an unsupported claim with no classroom practice

6. [Challenge] Opportunities to pass or dribble while being guarded (offense and: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Only watch others without trying

C. Practise the skill slowly: Identify opportunities to pass or dribble while being guarded (offense and defense). After general and specific warm-ups, guide.

D. Skip to marking before learning

7. [Challenge] Opportunities to pass or dribble while being guarded (offense and: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Practise at a short distance; check your direction and try again with feedback.

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] Opportunities to pass or dribble while being guarded (offense and: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. a random answer with no supporting detail

C. accurate controlled ball movement

D. an unrelated example that does not test the skill

9. [Challenge] Opportunities to pass or dribble while being guarded (offense and: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Do the activity without considering other people.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Take unnecessary risks to finish first.

10. [Challenge] Opportunities to pass or dribble while being guarded (offense and: Which classroom activity helps apply the lesson?

A. Practise at a short distance; check your direction and try again with feedback.

B. Avoid the stated task and its materials

C. Complete a different lesson instead

D. Copy another learner’s response without trying

11. [Challenge] Opportunities to pass or dribble while being guarded (offense and: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] Opportunities to pass or dribble while being guarded (offense and: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can avoid answering questions

13. [Challenge] Opportunities to pass or dribble while being guarded (offense and: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Make up results instead of practising

14. [Challenge] Opportunities to pass or dribble while being guarded (offense and: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Change answers randomly without a reason

C. Revisit the steps and strengthen accurate controlled ball movement.

D. Skip a difficult part without asking for help

15. [Challenge] Opportunities to pass or dribble while being guarded (offense and: Which choice would show responsible use of today’s skill?

A. Apply the lesson about identify opportunities to pass or dribble while being guarded (offense and defense). after general and specific warm-ups, guide to a suitable real-life situation.

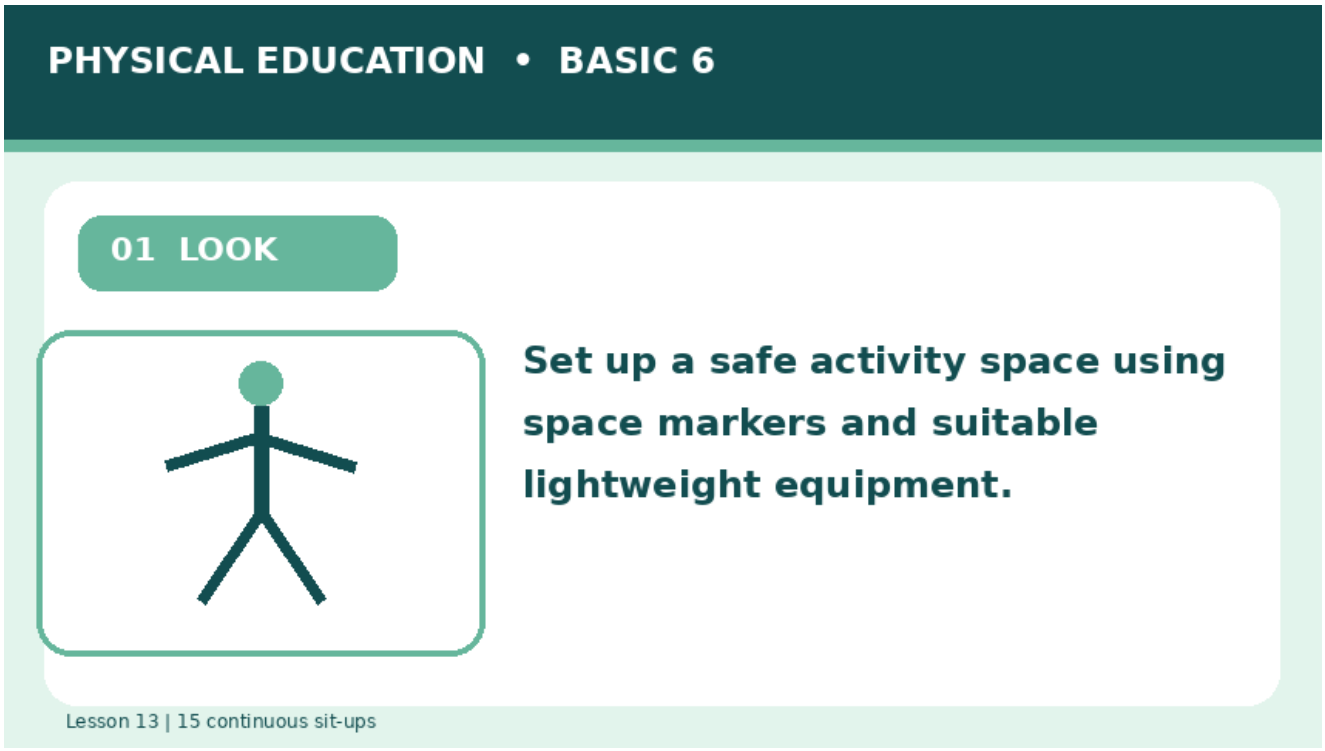

B. Claim expertise without trying the skill

C. Avoid explaining how the skill could be used

D. Use the topic to mislead others

LESSON 13: 15 continuous sit-ups

Goal: Perform 15 continuous sit-ups

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Perform 15 continuous sit-ups.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 13: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] 15 continuous sit-ups: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Perform 15 continuous sit-ups

2. [Play] 15 continuous sit-ups: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. a sharp object placed on the sports ground

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] 15 continuous sit-ups: Which action should come first?

A. Finish before looking at the instructions.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Skip all practice and guess the result.

D. Ignore the main task and do something unrelated.

4. [Play] 15 continuous sit-ups: Which setting does this grade use?

A. independent fitness, teamwork and safe sports participation

B. only a future space colony

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] 15 continuous sit-ups: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. a response that does not show the lesson skill

C. an unsupported claim with no classroom practice

D. an unrelated picture with no explanation

6. [Challenge] 15 continuous sit-ups: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Perform 15 continuous sit-ups.

D. Only watch others without trying

7. [Challenge] 15 continuous sit-ups: Which practice completes the three lesson stages?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Give a guess without trying the activity

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] 15 continuous sit-ups: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. careful, safe movement

D. a random answer with no supporting detail

9. [Challenge] 15 continuous sit-ups: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Ignore the teacher’s safety instructions.

C. Do the activity without considering other people.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

10. [Challenge] 15 continuous sit-ups: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Avoid the stated task and its materials

C. Copy another learner’s response without trying

D. Complete a different lesson instead

11. [Challenge] 15 continuous sit-ups: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] 15 continuous sit-ups: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can finish without showing your work

C. Whether your work demonstrates careful, safe movement.

D. Whether you can avoid answering questions

13. [Challenge] 15 continuous sit-ups: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Make up results instead of practising

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] 15 continuous sit-ups: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen careful, safe movement.

D. Change answers randomly without a reason

15. [Challenge] 15 continuous sit-ups: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

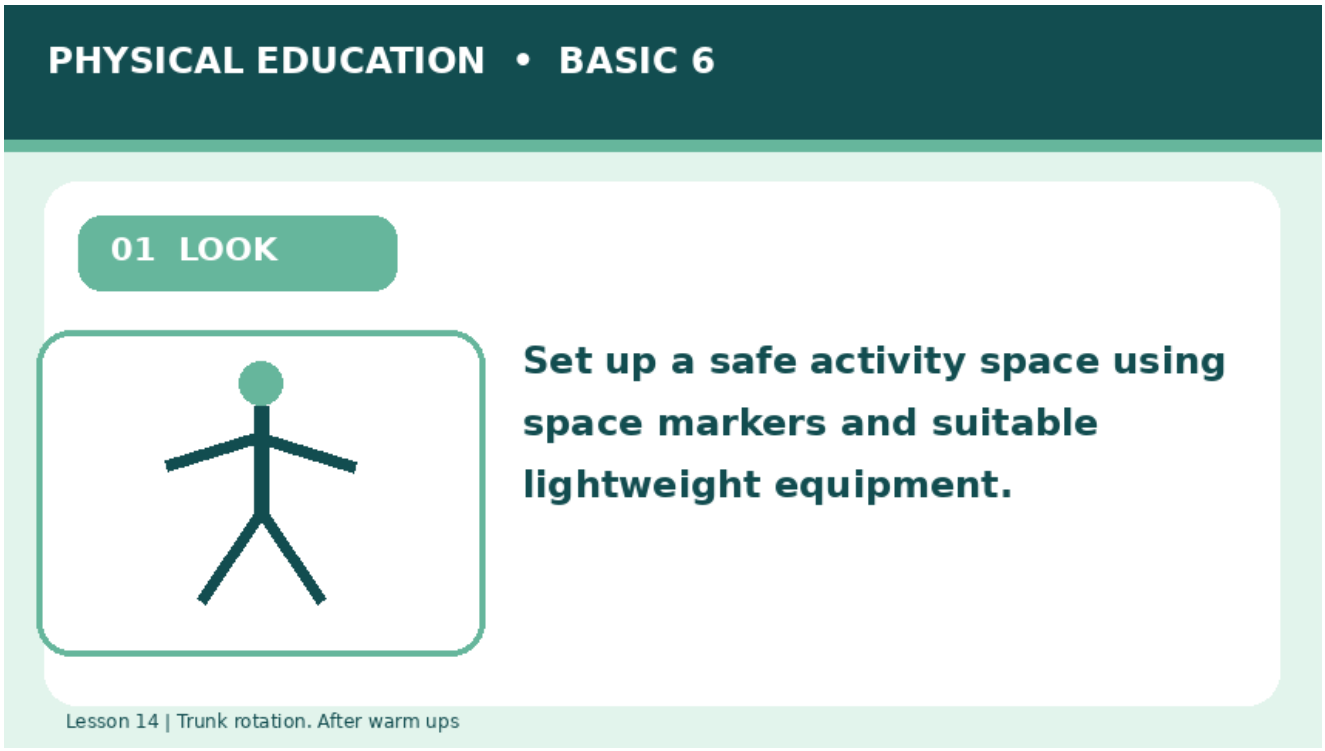

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Apply the lesson about perform 15 continuous sit-ups to a suitable real-life situation.

LESSON 14: Trunk rotation. After warm ups

Goal: Perform trunk rotation. After warm ups

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Perform trunk rotation. After warm ups.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 14: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Trunk rotation. After warm ups: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Perform trunk rotation. After warm ups

2. [Play] Trunk rotation. After warm ups: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a slippery or obstructed practice area

C. space markers and suitable lightweight equipment

D. heavy unsafe equipment in a crowded space

3. [Play] Trunk rotation. After warm ups: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Set up a safe activity space using space markers and suitable lightweight equipment.

D. Skip all practice and guess the result.

4. [Play] Trunk rotation. After warm ups: Which setting does this grade use?

A. only a future space colony

B. an unrelated imagined city

C. independent fitness, teamwork and safe sports participation

D. a topic unrelated to the current class

5. [Play] Trunk rotation. After warm ups: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a demonstrated movement or fitness task with self-assessment

C. an unsupported claim with no classroom practice

D. a response that does not show the lesson skill

6. [Challenge] Trunk rotation. After warm ups: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Skip to marking before learning

C. Practise the skill slowly: Perform trunk rotation. After warm ups.

D. Only watch others without trying

7. [Challenge] Trunk rotation. After warm ups: Which practice completes the three lesson stages?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Leave the task unfinished without explaining

C. Stop after reading the title

D. Give a guess without trying the activity

8. [Challenge] Trunk rotation. After warm ups: What counts as good evidence of learning here?

A. careful, safe movement

B. an unrelated example that does not test the skill

C. a random answer with no supporting detail

D. an opinion without observation or practice

9. [Challenge] Trunk rotation. After warm ups: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] Trunk rotation. After warm ups: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Complete a different lesson instead

C. Avoid the stated task and its materials

D. Copy another learner’s response without trying

11. [Challenge] Trunk rotation. After warm ups: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Learning means only guessing and never checking

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. The topic can be completed without observing or practising

12. [Challenge] Trunk rotation. After warm ups: What should a partner help you check?

A. Whether your work demonstrates careful, safe movement.

B. Whether you can avoid answering questions

C. Whether you can finish without showing your work

D. Whether you can ignore the agreed task

13. [Challenge] Trunk rotation. After warm ups: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Repeat the same error without checking feedback

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] Trunk rotation. After warm ups: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Change answers randomly without a reason

C. Ignore all comments and leave the task incomplete

D. Revisit the steps and strengthen careful, safe movement.

15. [Challenge] Trunk rotation. After warm ups: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

B. Apply the lesson about perform trunk rotation. after warm ups to a suitable real-life situation.

C. Avoid explaining how the skill could be used

D. Claim expertise without trying the skill

LESSON 15: Develop a one-day personal physical fitness plan specifying the

Goal: Develop a one-day personal physical fitness plan specifying the intensity, time, and types of physical activities for each component

Learn it

Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

Useful material: a clock or timer and drinking water

Do it in three steps

1. Set up a safe activity space using a clock or timer and drinking water.

2. Practise the skill slowly: Develop a one-day personal physical fitness plan specifying the intensity, time, and types of physical activities for each component.

3. Try a gentle activity, check how you feel, and talk about an appropriate rest.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

Try this: Try a gentle activity, check how you feel, and talk about an appropriate rest.

Show your learning: a safe personal activity plan. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 15: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Develop a one-day personal physical fitness plan specifying the: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Develop a one-day personal physical fitness plan specifying the intensity, time, and types of physical activities for each component

C. Rush into a demanding activity without warming up

D. Ignore the movement task and do only an unrelated game

2. [Play] Develop a one-day personal physical fitness plan specifying the: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. a clock or timer and drinking water

3. [Play] Develop a one-day personal physical fitness plan specifying the: Which action should come first?

A. Set up a safe activity space using a clock or timer and drinking water.

B. Ignore the main task and do something unrelated.

C. Skip all practice and guess the result.

D. Finish before looking at the instructions.

4. [Play] Develop a one-day personal physical fitness plan specifying the: Which setting does this grade use?

A. independent fitness, teamwork and safe sports participation

B. only a future space colony

C. a topic unrelated to the current class

D. an unrelated imagined city

5. [Play] Develop a one-day personal physical fitness plan specifying the: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. a response that does not show the lesson skill

6. [Challenge] Develop a one-day personal physical fitness plan specifying the: Which action comes after the opening step?

A. Skip to marking before learning

B. Practise the skill slowly: Develop a one-day personal physical fitness plan specifying the intensity, time, and types of physical activities for each component.

C. Only watch others without trying

D. Change to an unrelated lesson immediately

7. [Challenge] Develop a one-day personal physical fitness plan specifying the: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Leave the task unfinished without explaining

D. Try a gentle activity, check how you feel, and talk about an appropriate rest.

8. [Challenge] Develop a one-day personal physical fitness plan specifying the: What counts as good evidence of learning here?

A. a safe personal activity plan

B. an opinion without observation or practice

C. a random answer with no supporting detail

D. an unrelated example that does not test the skill

9. [Challenge] Develop a one-day personal physical fitness plan specifying the: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

B. Do the activity without considering other people.

C. Ignore the teacher’s safety instructions.

D. Take unnecessary risks to finish first.

10. [Challenge] Develop a one-day personal physical fitness plan specifying the: Which classroom activity helps apply the lesson?

A. Try a gentle activity, check how you feel, and talk about an appropriate rest.

B. Avoid the stated task and its materials

C. Complete a different lesson instead

D. Copy another learner’s response without trying

11. [Challenge] Develop a one-day personal physical fitness plan specifying the: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. The topic can be completed without observing or practising

C. Learning means only guessing and never checking

D. Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

12. [Challenge] Develop a one-day personal physical fitness plan specifying the: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether your work demonstrates a safe personal activity plan.

D. Whether you can avoid answering questions

13. [Challenge] Develop a one-day personal physical fitness plan specifying the: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] Develop a one-day personal physical fitness plan specifying the: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen a safe personal activity plan.

D. Change answers randomly without a reason

15. [Challenge] Develop a one-day personal physical fitness plan specifying the: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

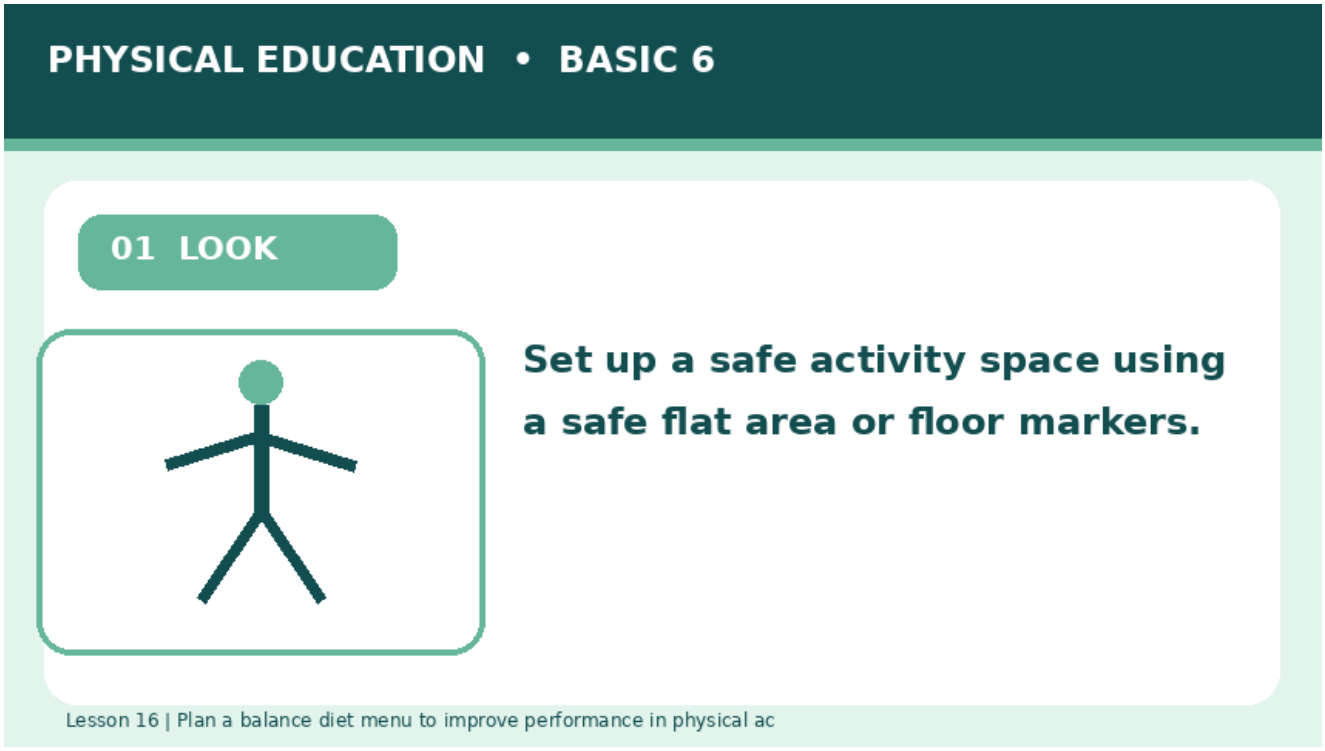

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Apply the lesson about develop a one-day personal physical fitness plan specifying the intensity, time, and types of physical activities for each component to a suitable real-life situation.

LESSON 16: Plan a balance diet menu to improve performance in physical activity

Goal: Plan a balance diet menu to improve performance in physical activity.

Learn it

Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

Useful material: a safe flat area or floor markers

Do it in three steps

1. Set up a safe activity space using a safe flat area or floor markers.

2. Practise the skill slowly: Plan a balance diet menu to improve performance in physical activity.

3. Hold a comfortable balance briefly and explain what made it steady.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

Try this: Hold a comfortable balance briefly and explain what made it steady.

Show your learning: stable body position. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 16: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Plan a balance diet menu to improve performance in physical activity: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Rush into a demanding activity without warming up

C. Ignore the movement task and do only an unrelated game

D. Plan a balance diet menu to improve performance in physical activity.

2. [Play] Plan a balance diet menu to improve performance in physical activity: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a slippery or obstructed practice area

C. a safe flat area or floor markers

D. heavy unsafe equipment in a crowded space

3. [Play] Plan a balance diet menu to improve performance in physical activity: Which action should come first?

A. Finish before looking at the instructions.

B. Ignore the main task and do something unrelated.

C. Set up a safe activity space using a safe flat area or floor markers.

D. Skip all practice and guess the result.

4. [Play] Plan a balance diet menu to improve performance in physical activity: Which setting does this grade use?

A. an unrelated imagined city

B. independent fitness, teamwork and safe sports participation

C. only a future space colony

D. a topic unrelated to the current class

5. [Play] Plan a balance diet menu to improve performance in physical activity: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unrelated picture with no explanation

C. a response that does not show the lesson skill

D. an unsupported claim with no classroom practice

6. [Challenge] Plan a balance diet menu to improve performance in physical activity: Which action comes after the opening step?

A. Practise the skill slowly: Plan a balance diet menu to improve performance in physical activity.

B. Skip to marking before learning

C. Only watch others without trying

D. Change to an unrelated lesson immediately

7. [Challenge] Plan a balance diet menu to improve performance in physical activity: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Leave the task unfinished without explaining

D. Hold a comfortable balance briefly and explain what made it steady.

8. [Challenge] Plan a balance diet menu to improve performance in physical activity: What counts as good evidence of learning here?

A. stable body position

B. an opinion without observation or practice

C. a random answer with no supporting detail

D. an unrelated example that does not test the skill

9. [Challenge] Plan a balance diet menu to improve performance in physical activity: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

C. Do the activity without considering other people.

D. Take unnecessary risks to finish first.

10. [Challenge] Plan a balance diet menu to improve performance in physical activity: Which classroom activity helps apply the lesson?

A. Hold a comfortable balance briefly and explain what made it steady.

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Avoid the stated task and its materials

11. [Challenge] Plan a balance diet menu to improve performance in physical activity: Which explanation best supports this lesson?

A. Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

B. Learning means only guessing and never checking

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] Plan a balance diet menu to improve performance in physical activity: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates stable body position.

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Plan a balance diet menu to improve performance in physical activity: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] Plan a balance diet menu to improve performance in physical activity: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Revisit the steps and strengthen stable body position.

C. Ignore all comments and leave the task incomplete

D. Change answers randomly without a reason

15. [Challenge] Plan a balance diet menu to improve performance in physical activity: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

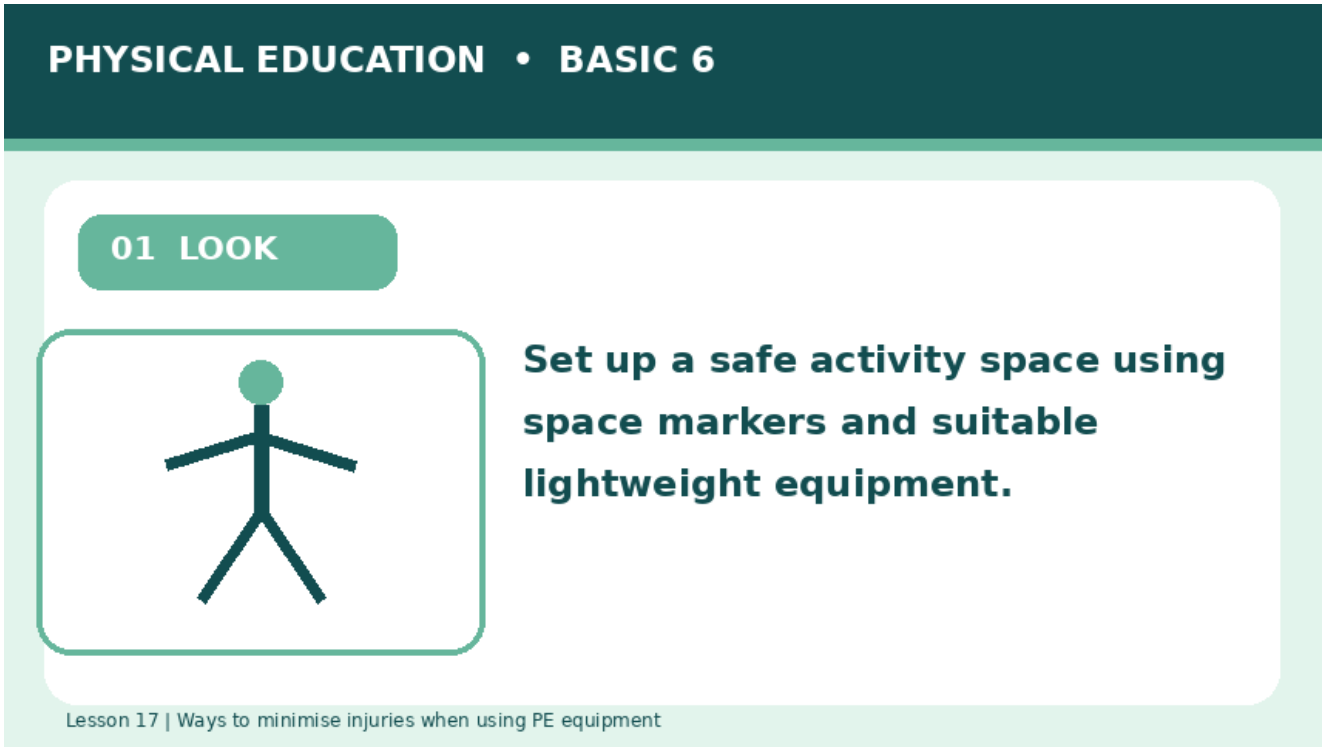

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Apply the lesson about plan a balance diet menu to improve performance in physical activity to a suitable real-life situation.

LESSON 17: Ways to minimise injuries when using PE equipment

Goal: Identify ways to minimise injuries when using PE equipment.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify ways to minimise injuries when using PE equipment.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 17: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Ways to minimise injuries when using PE equipment: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Identify ways to minimise injuries when using PE equipment.

2. [Play] Ways to minimise injuries when using PE equipment: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a slippery or obstructed practice area

C. space markers and suitable lightweight equipment

D. heavy unsafe equipment in a crowded space

3. [Play] Ways to minimise injuries when using PE equipment: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Finish before looking at the instructions.

D. Set up a safe activity space using space markers and suitable lightweight equipment.

4. [Play] Ways to minimise injuries when using PE equipment: Which setting does this grade use?

A. a topic unrelated to the current class

B. independent fitness, teamwork and safe sports participation

C. only a future space colony

D. an unrelated imagined city

5. [Play] Ways to minimise injuries when using PE equipment: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unrelated picture with no explanation

C. an unsupported claim with no classroom practice

D. a response that does not show the lesson skill

6. [Challenge] Ways to minimise injuries when using PE equipment: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Only watch others without trying

C. Skip to marking before learning

D. Practise the skill slowly: Identify ways to minimise injuries when using PE equipment.

7. [Challenge] Ways to minimise injuries when using PE equipment: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Give a guess without trying the activity

D. Observe a demonstration, practise slowly, then reflect on one improvement.

8. [Challenge] Ways to minimise injuries when using PE equipment: What counts as good evidence of learning here?

A. careful, safe movement

B. an unrelated example that does not test the skill

C. an opinion without observation or practice

D. a random answer with no supporting detail

9. [Challenge] Ways to minimise injuries when using PE equipment: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

C. Do the activity without considering other people.

D. Take unnecessary risks to finish first.

10. [Challenge] Ways to minimise injuries when using PE equipment: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Avoid the stated task and its materials

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Complete a different lesson instead

11. [Challenge] Ways to minimise injuries when using PE equipment: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. The lesson has no connection to life or skills

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] Ways to minimise injuries when using PE equipment: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can finish without showing your work

C. Whether your work demonstrates careful, safe movement.

D. Whether you can avoid answering questions

13. [Challenge] Ways to minimise injuries when using PE equipment: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Stop immediately without reflection

D. Repeat the same error without checking feedback

14. [Challenge] Ways to minimise injuries when using PE equipment: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Ignore all comments and leave the task incomplete

C. Revisit the steps and strengthen careful, safe movement.

D. Change answers randomly without a reason

15. [Challenge] Ways to minimise injuries when using PE equipment: Which choice would show responsible use of today’s skill?

A. Apply the lesson about identify ways to minimise injuries when using pe equipment to a suitable real-life situation.

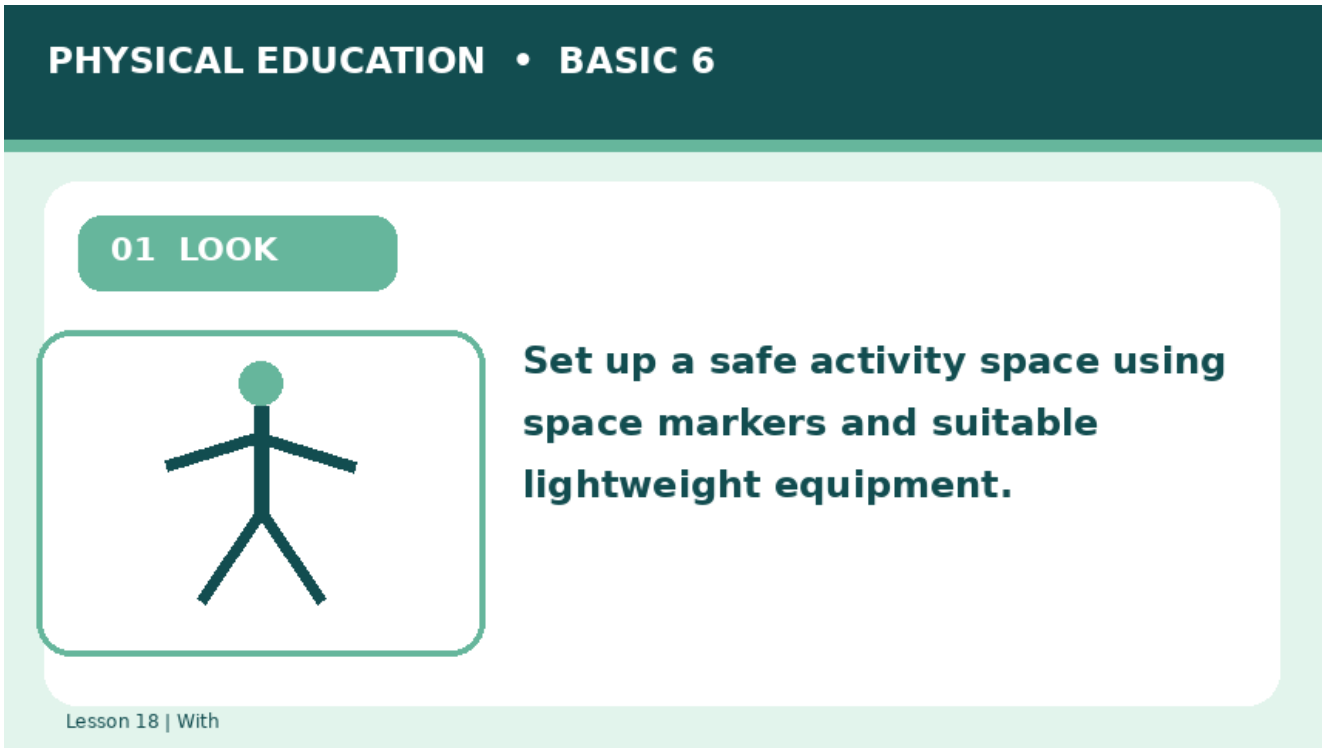

B. Use the topic to mislead others

C. Avoid explaining how the skill could be used

D. Claim expertise without trying the skill

LESSON 18: With

Goal: Discuss with

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Discuss with.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 18: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] With: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Discuss with

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] With: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. space markers and suitable lightweight equipment

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] With: Which action should come first?

A. Set up a safe activity space using space markers and suitable lightweight equipment.

B. Skip all practice and guess the result.

C. Finish before looking at the instructions.

D. Ignore the main task and do something unrelated.

4. [Play] With: Which setting does this grade use?

A. independent fitness, teamwork and safe sports participation

B. an unrelated imagined city

C. only a future space colony

D. a topic unrelated to the current class

5. [Play] With: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. a response that does not show the lesson skill

C. an unrelated picture with no explanation

D. an unsupported claim with no classroom practice

6. [Challenge] With: Which action comes after the opening step?

A. Only watch others without trying

B. Skip to marking before learning

C. Change to an unrelated lesson immediately

D. Practise the skill slowly: Discuss with.

7. [Challenge] With: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Leave the task unfinished without explaining

D. Stop after reading the title

8. [Challenge] With: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. careful, safe movement

C. a random answer with no supporting detail

D. an unrelated example that does not test the skill

9. [Challenge] With: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

B. Take unnecessary risks to finish first.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] With: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Complete a different lesson instead

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Avoid the stated task and its materials

11. [Challenge] With: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The lesson has no connection to life or skills

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. The topic can be completed without observing or practising

12. [Challenge] With: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether your work demonstrates careful, safe movement.

D. Whether you can finish without showing your work

13. [Challenge] With: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] With: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Ignore all comments and leave the task incomplete

C. Revisit the steps and strengthen careful, safe movement.

D. Change answers randomly without a reason

15. [Challenge] With: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Apply the lesson about discuss with to a suitable real-life situation.

LESSON 19: Provide positive feedback to peers during physical activities

Goal: Provide positive feedback to peers during physical activities.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Provide positive feedback to peers during physical activities.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 19: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Provide positive feedback to peers during physical activities: What is this lesson mainly about?

A. Provide positive feedback to peers during physical activities.

B. Ignore the movement task and do only an unrelated game

C. Rush into a demanding activity without warming up

D. Practise unsafe tricks without learning the basic skill

2. [Play] Provide positive feedback to peers during physical activities: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. heavy unsafe equipment in a crowded space

C. space markers and suitable lightweight equipment

D. a slippery or obstructed practice area

3. [Play] Provide positive feedback to peers during physical activities: Which action should come first?

A. Skip all practice and guess the result.

B. Finish before looking at the instructions.

C. Set up a safe activity space using space markers and suitable lightweight equipment.

D. Ignore the main task and do something unrelated.

4. [Play] Provide positive feedback to peers during physical activities: Which setting does this grade use?

A. only a future space colony

B. a topic unrelated to the current class

C. independent fitness, teamwork and safe sports participation

D. an unrelated imagined city

5. [Play] Provide positive feedback to peers during physical activities: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unrelated picture with no explanation

C. a response that does not show the lesson skill

D. an unsupported claim with no classroom practice

6. [Challenge] Provide positive feedback to peers during physical activities: Which action comes after the opening step?

A. Skip to marking before learning

B. Only watch others without trying

C. Change to an unrelated lesson immediately

D. Practise the skill slowly: Provide positive feedback to peers during physical activities.

7. [Challenge] Provide positive feedback to peers during physical activities: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Stop after reading the title

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Give a guess without trying the activity

8. [Challenge] Provide positive feedback to peers during physical activities: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an opinion without observation or practice

C. careful, safe movement

D. an unrelated example that does not test the skill

9. [Challenge] Provide positive feedback to peers during physical activities: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

C. Ignore the teacher’s safety instructions.

D. Take unnecessary risks to finish first.

10. [Challenge] Provide positive feedback to peers during physical activities: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Copy another learner’s response without trying

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Complete a different lesson instead

11. [Challenge] Provide positive feedback to peers during physical activities: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

C. Learning means only guessing and never checking

D. The lesson has no connection to life or skills

12. [Challenge] Provide positive feedback to peers during physical activities: What should a partner help you check?

A. Whether your work demonstrates careful, safe movement.

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Provide positive feedback to peers during physical activities: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Make up results instead of practising

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Provide positive feedback to peers during physical activities: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Revisit the steps and strengthen careful, safe movement.

C. Skip a difficult part without asking for help

D. Change answers randomly without a reason

15. [Challenge] Provide positive feedback to peers during physical activities: Which choice would show responsible use of today’s skill?

A. Apply the lesson about provide positive feedback to peers during physical activities to a suitable real-life situation.

B. Use the topic to mislead others

C. Avoid explaining how the skill could be used

D. Claim expertise without trying the skill

LESSON 20: Evaluate individual responsibility in group efforts. Evaluate

Goal: Evaluate individual responsibility in group efforts. Evaluate individual

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Evaluate individual responsibility in group efforts. Evaluate individual.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 20: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Evaluate individual responsibility in group efforts. Evaluate: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Evaluate individual responsibility in group efforts. Evaluate individual

C. Practise unsafe tricks without learning the basic skill

D. Rush into a demanding activity without warming up

2. [Play] Evaluate individual responsibility in group efforts. Evaluate: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a slippery or obstructed practice area

C. heavy unsafe equipment in a crowded space

D. space markers and suitable lightweight equipment

3. [Play] Evaluate individual responsibility in group efforts. Evaluate: Which action should come first?

A. Set up a safe activity space using space markers and suitable lightweight equipment.

B. Skip all practice and guess the result.

C. Ignore the main task and do something unrelated.

D. Finish before looking at the instructions.

4. [Play] Evaluate individual responsibility in group efforts. Evaluate: Which setting does this grade use?

A. independent fitness, teamwork and safe sports participation

B. an unrelated imagined city

C. a topic unrelated to the current class

D. only a future space colony

5. [Play] Evaluate individual responsibility in group efforts. Evaluate: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] Evaluate individual responsibility in group efforts. Evaluate: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Evaluate individual responsibility in group efforts. Evaluate individual.

D. Only watch others without trying

7. [Challenge] Evaluate individual responsibility in group efforts. Evaluate: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Give a guess without trying the activity

C. Stop after reading the title

D. Observe a demonstration, practise slowly, then reflect on one improvement.

8. [Challenge] Evaluate individual responsibility in group efforts. Evaluate: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. careful, safe movement

D. an opinion without observation or practice

9. [Challenge] Evaluate individual responsibility in group efforts. Evaluate: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

10. [Challenge] Evaluate individual responsibility in group efforts. Evaluate: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Complete a different lesson instead

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] Evaluate individual responsibility in group efforts. Evaluate: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Learning means only guessing and never checking

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. The topic can be completed without observing or practising

12. [Challenge] Evaluate individual responsibility in group efforts. Evaluate: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can finish without showing your work

C. Whether your work demonstrates careful, safe movement.

D. Whether you can ignore the agreed task

13. [Challenge] Evaluate individual responsibility in group efforts. Evaluate: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Stop immediately without reflection

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Make up results instead of practising

14. [Challenge] Evaluate individual responsibility in group efforts. Evaluate: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Ignore all comments and leave the task incomplete

C. Skip a difficult part without asking for help

D. Revisit the steps and strengthen careful, safe movement.

15. [Challenge] Evaluate individual responsibility in group efforts. Evaluate: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

B. Use the topic to mislead others

C. Avoid explaining how the skill could be used

D. Apply the lesson about evaluate individual responsibility in group efforts. evaluate individual to a suitable real-life situation.
