COMPUTING

Basic 1 — Illustrated Learning Workbook

Learn • Explore • Practise • Play • Challenge

15 lessons | 75 Play questions | 150 Challenge questions

Basic 1–3: supplementary digital literacy progression, not an official NaCCA Computing syllabus.

Course guide and lesson list

Start with the picture and five important ideas. Read the Ghanaian example, complete the practice activity and answer the quizzes. An adult should supervise device use and online activities.

01. Computer Parts Around Us — Computing Systems

02. How to Start a Computer Safely — Computing Systems

03. Technology at Home and School — Technology in Society

04. Devices That Send Information — Computing Systems

05. Devices That Show Information — Computing Systems

06. Using a Mouse Carefully — Computing Systems

07. Finding Keyboard Keys — Computing Systems

08. What Is a Computer Desktop? — Computer Applications

09. Files and Folders — Computer Applications

10. Pictures and Sounds — Digital Creation

11. Being Kind with Technology — Digital Citizenship

12. Sitting Safely at a Computer — Health and Safety

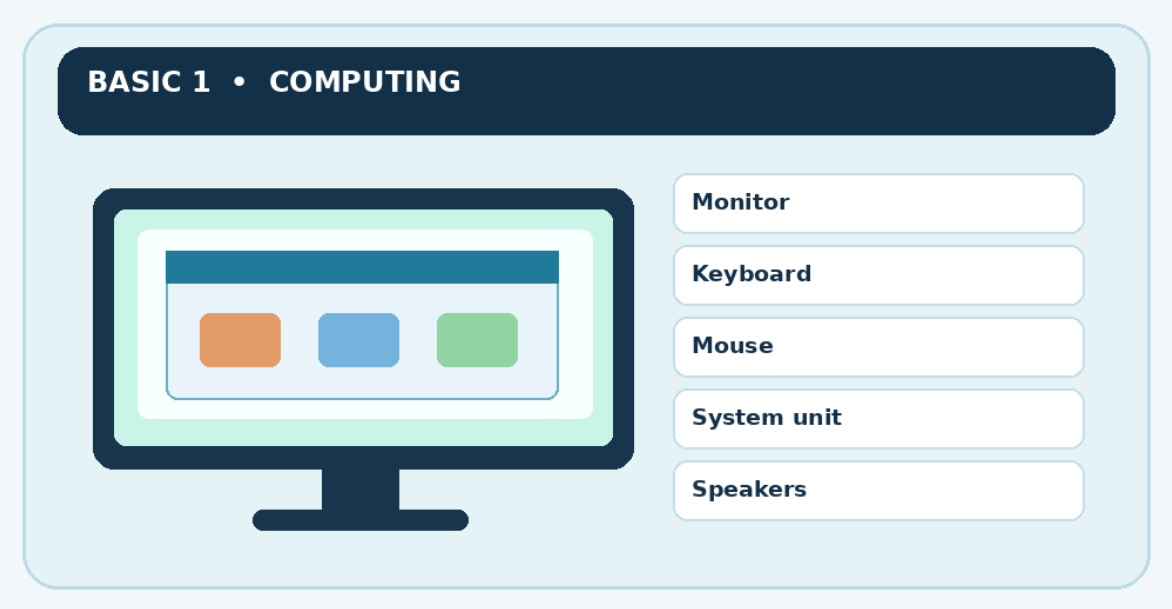

13. Numbers as Data — Data and Information

14. Technology for Communication — Internet and Communication

15. My First Digital Poster — Digital Creation

Lesson 1: Computer Parts Around Us

We will learn to: Identify, explain and apply the important ideas behind computer parts around us.

Five important ideas

Monitor: shows words and pictures.

Keyboard: enters letters and numbers.

Mouse: moves and selects a pointer.

System unit: contains important computing components.

Speakers: play sound from a computer.

Our Ghanaian story

At the school ICT laboratory, Kojo had a question about computer parts around us. The group discovered that monitor shows words and pictures, while keyboard enters letters and numbers. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of monitor, keyboard and mouse. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches computer parts around us. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-01

Lesson 1: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that shows words and pictures.

A. Monitor B. Speakers C. Mouse D. System unit

2. Your friend says, "This enters letters and numbers." What is the friend describing?

A. Mouse B. Monitor C. Keyboard D. System unit

3. Which idea from computer parts around us matches the clue "moves and selects a pointer"?

A. System unit B. Speakers C. Monitor D. Mouse

4. The teacher asks for an example that contains important computing components. Which answer fits?

A. Mouse B. Keyboard C. System unit D. Speakers

5. Can you identify the term described here: play sound from a computer?

A. Keyboard B. Speakers C. Monitor D. Mouse

CHALLENGE — Think and apply.

1. During a school ICT lesson, Yaw wants to show something that shows words and pictures. Which idea should be labelled?

A. Monitor B. Speakers C. Mouse D. System unit

2. A classmate confuses several ideas about computer parts around us. Which one actually enters letters and numbers?

A. Mouse B. Monitor C. Keyboard D. System unit

3. At home, Yaw remembers a class rule or concept that contains important computing components. What was it called?

A. Keyboard B. Mouse C. Speakers D. System unit

4. Your class is solving a practical problem. One useful thing contains important computing components. What is its name?

A. System unit B. Speakers C. Keyboard D. Mouse

5. Imagine helping a younger pupil understand something that moves and selects a pointer. Which term would you teach?

A. Monitor B. Speakers C. Mouse D. System unit

6. At the community learning centre, someone describes a tool or idea that play sound from a computer. Which one is it?

A. Keyboard B. Monitor C. Speakers D. Mouse

7. Which answer would fit on a poster beside the words "shows words and pictures"?

A. Mouse B. Monitor C. Speakers D. System unit

8. Which concept matches the explanation "play sound from a computer" when you review computer parts around us?

A. Speakers B. Keyboard C. Monitor D. Mouse

9. For a short demonstration, the teacher needs an example that moves and selects a pointer. Which choice would you select?

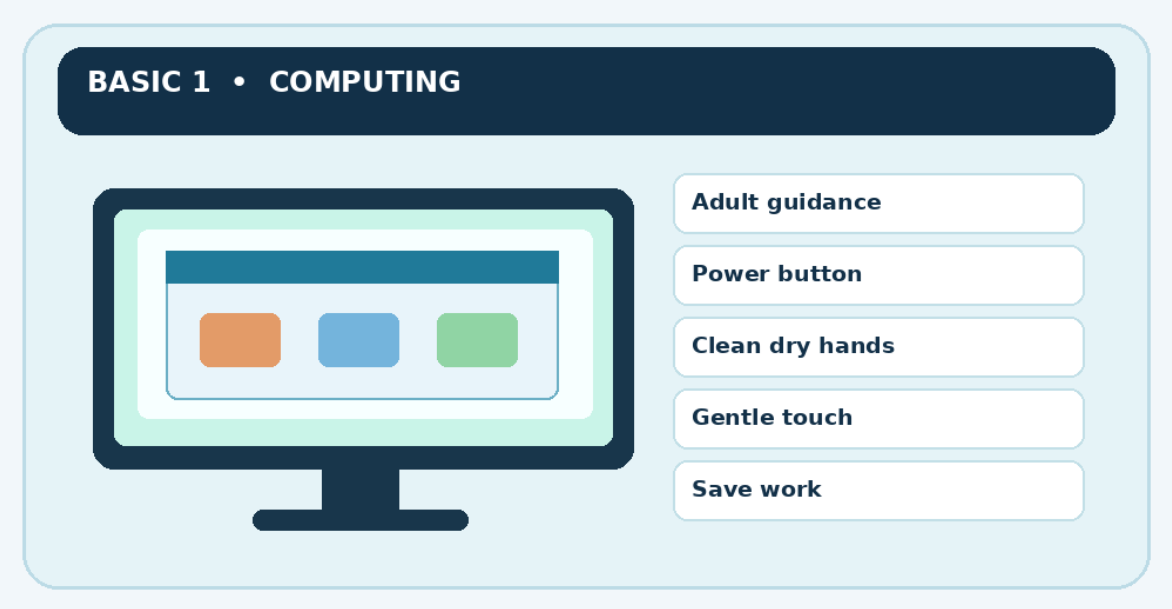

A. System unit B. Mouse C. Speakers D. Monitor

10. A group makes a display on computer parts around us. Their first clue is "enters letters and numbers". Which label is correct?

A. Keyboard B. Mouse C. Monitor D. System unit

Lesson 2: How to Start a Computer Safely

We will learn to: Identify, explain and apply the important ideas behind how to start a computer safely.

Five important ideas

Adult guidance: helps children learn safe routines.

Power button: starts or shuts down a computer.

Clean dry hands: help protect electronic devices.

Gentle touch: protects screens and keys.

Save work: keeps a digital file for later.

Our Ghanaian story

Before a computer lesson, Esi had a question about how to start a computer safely. The group discovered that adult guidance helps children learn safe routines, while power button starts or shuts down a computer. They drew an example and explained it to their classmates.

Try it!

Create a class safety demonstration. Show a good example of adult guidance and power button and explain why the good practice matters.

Create and share

Make a colourful, labelled poster that teaches how to start a computer safely. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-02

Lesson 2: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that helps children learn safe routines.

A. Adult guidance B. Power button C. Gentle touch D. Clean dry hands

2. Your friend says, "This starts or shuts down a computer." What is the friend describing?

A. Gentle touch B. Save work C. Power button D. Clean dry hands

3. Which idea from how to start a computer safely matches the clue "help protect electronic devices"?

A. Gentle touch B. Clean dry hands C. Power button D. Save work

4. The teacher asks for an example that protects screens and keys. Which answer fits?

A. Power button B. Adult guidance C. Gentle touch D. Clean dry hands

5. Can you identify the term described here: keeps a digital file for later?

A. Save work B. Gentle touch C. Adult guidance D. Power button

CHALLENGE — Think and apply.

1. During a school ICT lesson, Kofi wants to show something that helps children learn safe routines. Which idea should be labelled?

A. Clean dry hands B. Gentle touch C. Adult guidance D. Power button

2. Which concept matches the explanation "keeps a digital file for later" when you review how to start a computer safely?

A. Gentle touch B. Power button C. Adult guidance D. Save work

3. At home, Kofi remembers a class rule or concept that protects screens and keys. What was it called?

A. Adult guidance B. Gentle touch C. Clean dry hands D. Power button

4. At the community learning centre, someone describes a tool or idea that keeps a digital file for later. Which one is it?

A. Power button B. Save work C. Gentle touch D. Adult guidance

5. Imagine helping a younger pupil understand something that help protect electronic devices. Which term would you teach?

A. Save work B. Power button C. Gentle touch D. Clean dry hands

6. Which answer would fit on a poster beside the words "helps children learn safe routines"?

A. Clean dry hands B. Adult guidance C. Power button D. Gentle touch

7. For a short demonstration, the teacher needs an example that help protect electronic devices. Which choice would you select?

A. Power button B. Gentle touch C. Save work D. Clean dry hands

8. Your class is solving a practical problem. One useful thing protects screens and keys. What is its name?

A. Gentle touch B. Power button C. Clean dry hands D. Adult guidance

9. A group makes a display on how to start a computer safely. Their first clue is "starts or shuts down a computer". Which label is correct?

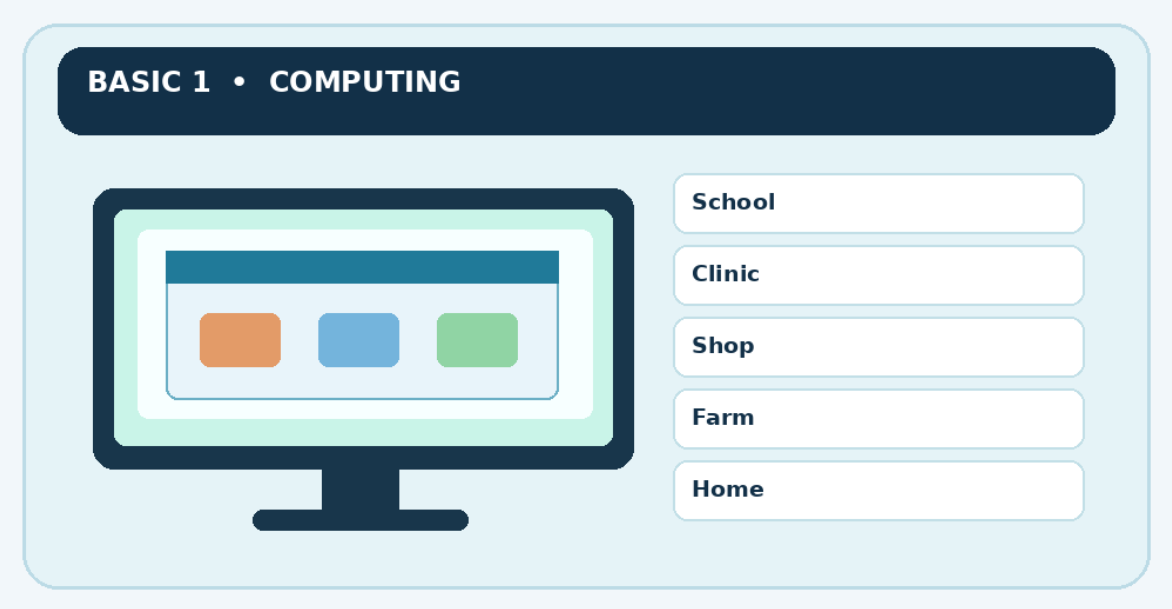

A. Save work B. Gentle touch C. Power button D. Clean dry hands

10. A classmate confuses several ideas about how to start a computer safely. Which one actually starts or shuts down a computer?

A. Gentle touch B. Power button C. Clean dry hands D. Save work

Lesson 3: Technology at Home and School

We will learn to: Identify, explain and apply the important ideas behind technology at home and school.

Five important ideas

School: uses computers for lessons and reading.

Clinic: uses computers for patient information.

Shop: uses computers for sales records.

Farm: uses technology for weather information.

Home: uses devices for learning and communication.

Our Ghanaian story

During a walk through the community, Yaw had a question about technology at home and school. The group discovered that school uses computers for lessons and reading, while clinic uses computers for patient information. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of school, clinic and shop. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches technology at home and school. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-03

Lesson 3: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that uses computers for lessons and reading.

A. Shop B. Clinic C. School D. Farm

2. Your friend says, "This uses computers for patient information." What is the friend describing?

A. Shop B. School C. Clinic D. Home

3. Which idea from technology at home and school matches the clue "uses computers for sales records"?

A. Farm B. Shop C. School D. Clinic

4. The teacher asks for an example that uses technology for weather information. Which answer fits?

A. Home B. School C. Clinic D. Farm

5. Can you identify the term described here: uses devices for learning and communication?

A. Shop B. Home C. Clinic D. School

CHALLENGE — Think and apply.

1. Imagine helping a younger pupil understand something that uses computers for sales records. Which term would you teach?

A. School B. Clinic C. Farm D. Shop

2. At home, Akosua remembers a class rule or concept that uses technology for weather information. What was it called?

A. Home B. School C. Clinic D. Farm

3. Which answer would fit on a poster beside the words "uses computers for lessons and reading"?

A. Shop B. Clinic C. School D. Farm

4. A classmate confuses several ideas about technology at home and school. Which one actually uses computers for patient information?

A. Home B. Shop C. School D. Clinic

5. A group makes a display on technology at home and school. Their first clue is "uses computers for patient information". Which label is correct?

A. Clinic B. Home C. School D. Shop

6. Your class is solving a practical problem. One useful thing uses technology for weather information. What is its name?

A. Home B. Farm C. School D. Clinic

7. During a school ICT lesson, Akosua wants to show something that uses computers for lessons and reading. Which idea should be labelled?

A. Clinic B. Farm C. Shop D. School

8. At the community learning centre, someone describes a tool or idea that uses devices for learning and communication. Which one is it?

A. Shop B. School C. Clinic D. Home

9. For a short demonstration, the teacher needs an example that uses computers for sales records. Which choice would you select?

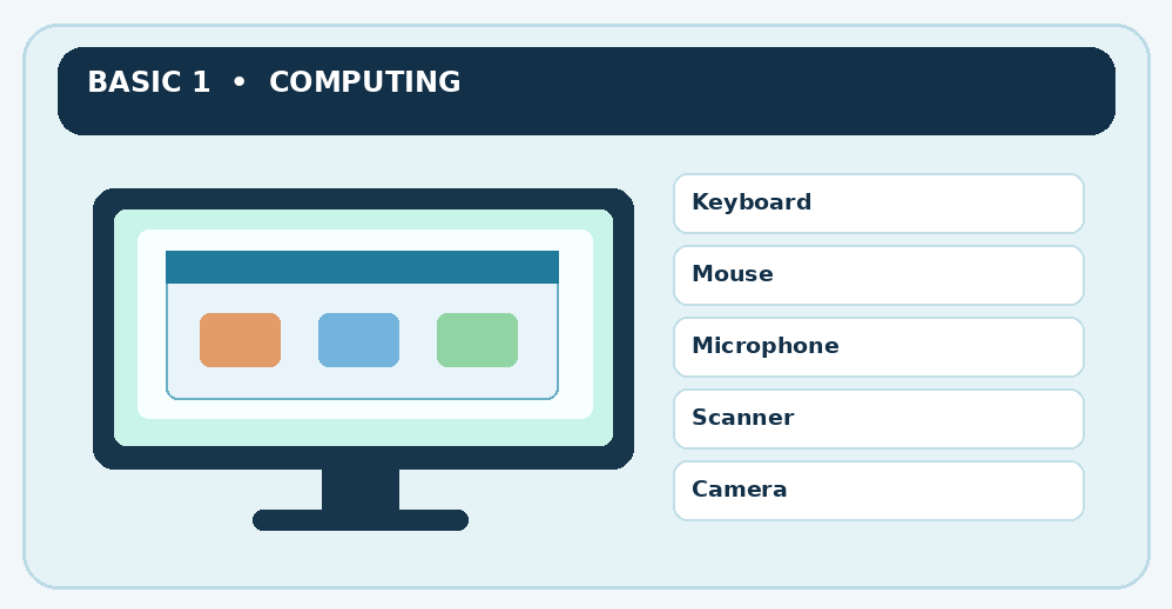

A. Shop B. Farm C. School D. Clinic

10. Which concept matches the explanation "uses devices for learning and communication" when you review technology at home and school?

A. School B. Clinic C. Home D. Shop

Lesson 4: Devices That Send Information

We will learn to: Identify, explain and apply the important ideas behind devices that send information.

Five important ideas

Keyboard: inputs typed letters and digits.

Mouse: inputs clicks and movements.

Microphone: inputs recorded sound.

Scanner: inputs pictures from paper.

Camera: inputs digital photographs.

Our Ghanaian story

When the class records a school event, Abena had a question about devices that send information. The group discovered that keyboard inputs typed letters and digits, while mouse inputs clicks and movements. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of keyboard, mouse and microphone. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches devices that send information. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-04

Lesson 4: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that inputs typed letters and digits.

A. Scanner B. Microphone C. Keyboard D. Mouse

2. Your friend says, "This inputs clicks and movements." What is the friend describing?

A. Camera B. Microphone C. Scanner D. Mouse

3. Which idea from devices that send information matches the clue "inputs recorded sound"?

A. Microphone B. Camera C. Keyboard D. Scanner

4. The teacher asks for an example that inputs pictures from paper. Which answer fits?

A. Microphone B. Mouse C. Camera D. Scanner

5. Can you identify the term described here: inputs digital photographs?

A. Mouse B. Microphone C. Keyboard D. Camera

CHALLENGE — Think and apply.

1. At home, Esi remembers a class rule or concept that inputs pictures from paper. What was it called?

A. Microphone B. Mouse C. Camera D. Scanner

2. A group makes a display on devices that send information. Their first clue is "inputs clicks and movements". Which label is correct?

A. Mouse B. Microphone C. Scanner D. Camera

3. During a school ICT lesson, Esi wants to show something that inputs typed letters and digits. Which idea should be labelled?

A. Microphone B. Mouse C. Scanner D. Keyboard

4. A classmate confuses several ideas about devices that send information. Which one actually inputs clicks and movements?

A. Mouse B. Camera C. Scanner D. Microphone

5. At the community learning centre, someone describes a tool or idea that inputs digital photographs. Which one is it?

A. Keyboard B. Camera C. Microphone D. Mouse

6. Which concept matches the explanation "inputs digital photographs" when you review devices that send information?

A. Camera B. Mouse C. Microphone D. Keyboard

7. Imagine helping a younger pupil understand something that inputs recorded sound. Which term would you teach?

A. Microphone B. Keyboard C. Scanner D. Camera

8. Which answer would fit on a poster beside the words "inputs typed letters and digits"?

A. Microphone B. Scanner C. Keyboard D. Mouse

9. For a short demonstration, the teacher needs an example that inputs recorded sound. Which choice would you select?

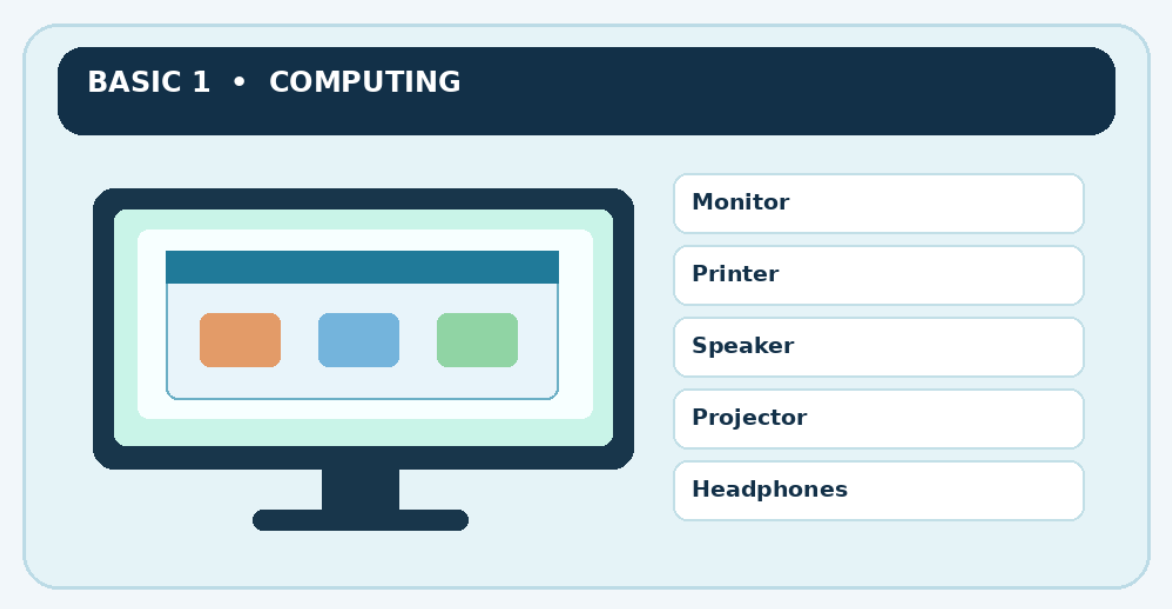

A. Keyboard B. Microphone C. Camera D. Scanner

10. Your class is solving a practical problem. One useful thing inputs pictures from paper. What is its name?

A. Camera B. Scanner C. Microphone D. Mouse

Lesson 5: Devices That Show Information

We will learn to: Identify, explain and apply the important ideas behind devices that show information.

Five important ideas

Monitor: displays visual output.

Printer: makes output on paper.

Speaker: produces audio output.

Projector: shows images to a group.

Headphones: provide sound for one listener.

Our Ghanaian story

During a class presentation, Kofi had a question about devices that show information. The group discovered that monitor displays visual output, while printer makes output on paper. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of monitor, printer and speaker. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches devices that show information. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-05

Lesson 5: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that displays visual output.

A. Speaker B. Monitor C. Projector D. Printer

2. Your friend says, "This makes output on paper." What is the friend describing?

A. Monitor B. Projector C. Printer D. Speaker

3. Which idea from devices that show information matches the clue "produces audio output"?

A. Speaker B. Headphones C. Projector D. Monitor

4. The teacher asks for an example that shows images to a group. Which answer fits?

A. Monitor B. Printer C. Projector D. Headphones

5. Can you identify the term described here: provide sound for one listener?

A. Headphones B. Projector C. Monitor D. Speaker

CHALLENGE — Think and apply.

1. During a school ICT lesson, Ama wants to show something that displays visual output. Which idea should be labelled?

A. Speaker B. Printer C. Projector D. Monitor

2. A group makes a display on devices that show information. Their first clue is "makes output on paper". Which label is correct?

A. Projector B. Monitor C. Speaker D. Printer

3. Your class is solving a practical problem. One useful thing shows images to a group. What is its name?

A. Printer B. Headphones C. Projector D. Monitor

4. For a short demonstration, the teacher needs an example that produces audio output. Which choice would you select?

A. Speaker B. Headphones C. Projector D. Monitor

5. Which answer would fit on a poster beside the words "displays visual output"?

A. Speaker B. Projector C. Monitor D. Printer

6. Which concept matches the explanation "provide sound for one listener" when you review devices that show information?

A. Speaker B. Monitor C. Headphones D. Projector

7. Imagine helping a younger pupil understand something that produces audio output. Which term would you teach?

A. Headphones B. Speaker C. Projector D. Monitor

8. A classmate confuses several ideas about devices that show information. Which one actually makes output on paper?

A. Projector B. Speaker C. Monitor D. Printer

9. At the community learning centre, someone describes a tool or idea that provide sound for one listener. Which one is it?

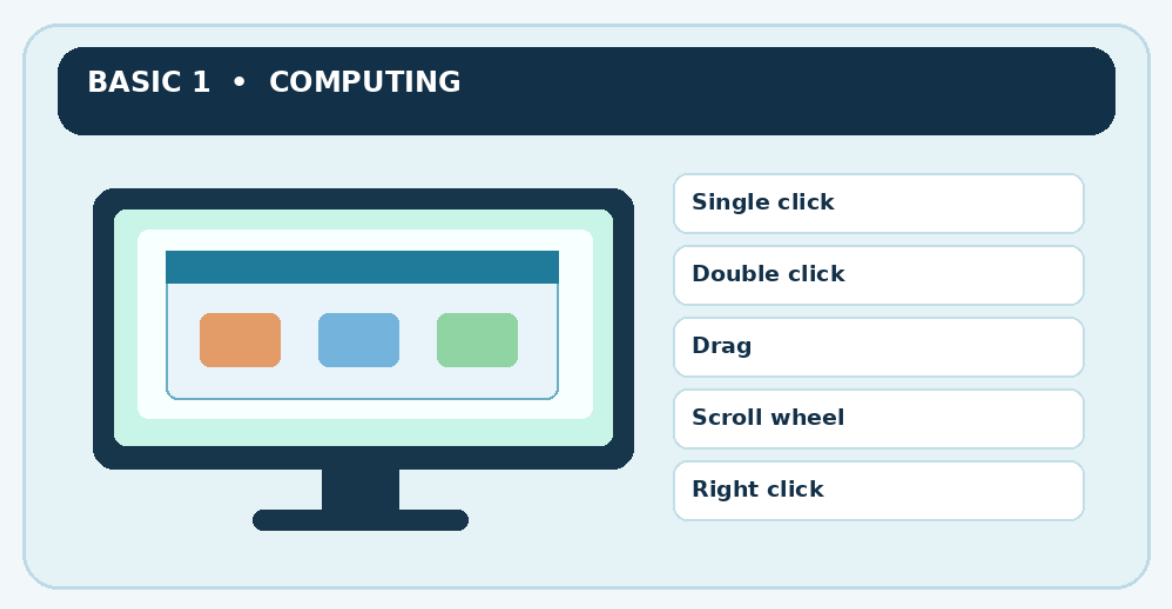

A. Speaker B. Headphones C. Monitor D. Projector

10. At home, Ama remembers a class rule or concept that shows images to a group. What was it called?

A. Headphones B. Projector C. Printer D. Monitor

Lesson 6: Using a Mouse Carefully

We will learn to: Identify, explain and apply the important ideas behind using a mouse carefully.

Five important ideas

Single click: selects an item.

Double click: opens many files or apps.

Drag: holds the button while moving an item.

Scroll wheel: moves through a page.

Right click: opens a context menu in many systems.

Our Ghanaian story

At a shared classroom computer, Ama had a question about using a mouse carefully. The group discovered that single click selects an item, while double click opens many files or apps. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise single click and double click using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches using a mouse carefully. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-06

Lesson 6: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that selects an item.

A. Single click B. Double click C. Drag D. Scroll wheel

2. Your friend says, "This opens many files or apps." What is the friend describing?

A. Drag B. Single click C. Double click D. Right click

3. Which idea from using a mouse carefully matches the clue "holds the button while moving an item"?

A. Single click B. Double click C. Drag D. Scroll wheel

4. The teacher asks for an example that moves through a page. Which answer fits?

A. Drag B. Single click C. Right click D. Scroll wheel

5. Can you identify the term described here: opens a context menu in many systems?

A. Right click B. Drag C. Double click D. Scroll wheel

CHALLENGE — Think and apply.

1. During a school ICT lesson, Yaw wants to show something that selects an item. Which idea should be labelled?

A. Drag B. Single click C. Scroll wheel D. Double click

2. At home, Yaw remembers a class rule or concept that moves through a page. What was it called?

A. Drag B. Scroll wheel C. Single click D. Right click

3. For a short demonstration, the teacher needs an example that holds the button while moving an item. Which choice would you select?

A. Drag B. Scroll wheel C. Double click D. Single click

4. Which answer would fit on a poster beside the words "selects an item"?

A. Scroll wheel B. Drag C. Double click D. Single click

5. Imagine helping a younger pupil understand something that holds the button while moving an item. Which term would you teach?

A. Drag B. Scroll wheel C. Single click D. Double click

6. Your class is solving a practical problem. One useful thing moves through a page. What is its name?

A. Right click B. Single click C. Drag D. Scroll wheel

7. Which concept matches the explanation "opens a context menu in many systems" when you review using a mouse carefully?

A. Double click B. Drag C. Scroll wheel D. Right click

8. A group makes a display on using a mouse carefully. Their first clue is "opens many files or apps". Which label is correct?

A. Double click B. Drag C. Single click D. Right click

9. At the community learning centre, someone describes a tool or idea that opens a context menu in many systems. Which one is it?

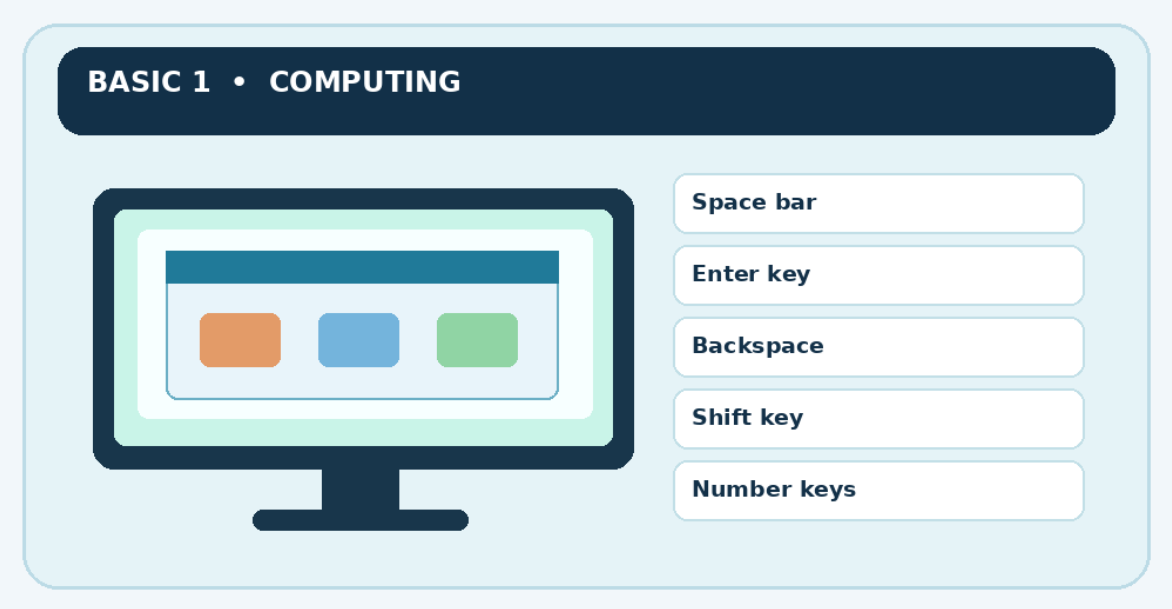

A. Double click B. Scroll wheel C. Drag D. Right click

10. A classmate confuses several ideas about using a mouse carefully. Which one actually opens many files or apps?

A. Drag B. Right click C. Double click D. Single click

Lesson 7: Finding Keyboard Keys

We will learn to: Identify, explain and apply the important ideas behind finding keyboard keys.

Five important ideas

Space bar: leaves a gap between words.

Enter key: moves to the next line or confirms a choice.

Backspace: deletes the character before the cursor.

Shift key: makes capital letters when held.

Number keys: type the digits zero to nine.

Our Ghanaian story

While preparing a school notice, Kojo had a question about finding keyboard keys. The group discovered that space bar leaves a gap between words, while enter key moves to the next line or confirms a choice. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise space bar and enter key using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches finding keyboard keys. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-07

Lesson 7: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that leaves a gap between words.

A. Number keys B. Shift key C. Space bar D. Enter key

2. Your friend says, "This moves to the next line or confirms a choice." What is the friend describing?

A. Space bar B. Enter key C. Number keys D. Backspace

3. Which idea from finding keyboard keys matches the clue "deletes the character before the cursor"?

A. Shift key B. Space bar C. Enter key D. Backspace

4. The teacher asks for an example that makes capital letters when held. Which answer fits?

A. Enter key B. Number keys C. Space bar D. Shift key

5. Can you identify the term described here: type the digits zero to nine?

A. Backspace B. Number keys C. Space bar D. Enter key

CHALLENGE — Think and apply.

1. At home, Kofi remembers a class rule or concept that makes capital letters when held. What was it called?

A. Number keys B. Enter key C. Shift key D. Space bar

2. Which answer would fit on a poster beside the words "leaves a gap between words"?

A. Shift key B. Number keys C. Enter key D. Space bar

3. A classmate confuses several ideas about finding keyboard keys. Which one actually moves to the next line or confirms a choice?

A. Backspace B. Number keys C. Enter key D. Space bar

4. During a school ICT lesson, Kofi wants to show something that leaves a gap between words. Which idea should be labelled?

A. Space bar B. Enter key C. Number keys D. Shift key

5. Imagine helping a younger pupil understand something that deletes the character before the cursor. Which term would you teach?

A. Shift key B. Enter key C. Backspace D. Space bar

6. Which concept matches the explanation "type the digits zero to nine" when you review finding keyboard keys?

A. Space bar B. Number keys C. Enter key D. Backspace

7. For a short demonstration, the teacher needs an example that deletes the character before the cursor. Which choice would you select?

A. Backspace B. Shift key C. Enter key D. Space bar

8. A group makes a display on finding keyboard keys. Their first clue is "moves to the next line or confirms a choice". Which label is correct?

A. Enter key B. Backspace C. Number keys D. Space bar

9. Your class is solving a practical problem. One useful thing makes capital letters when held. What is its name?

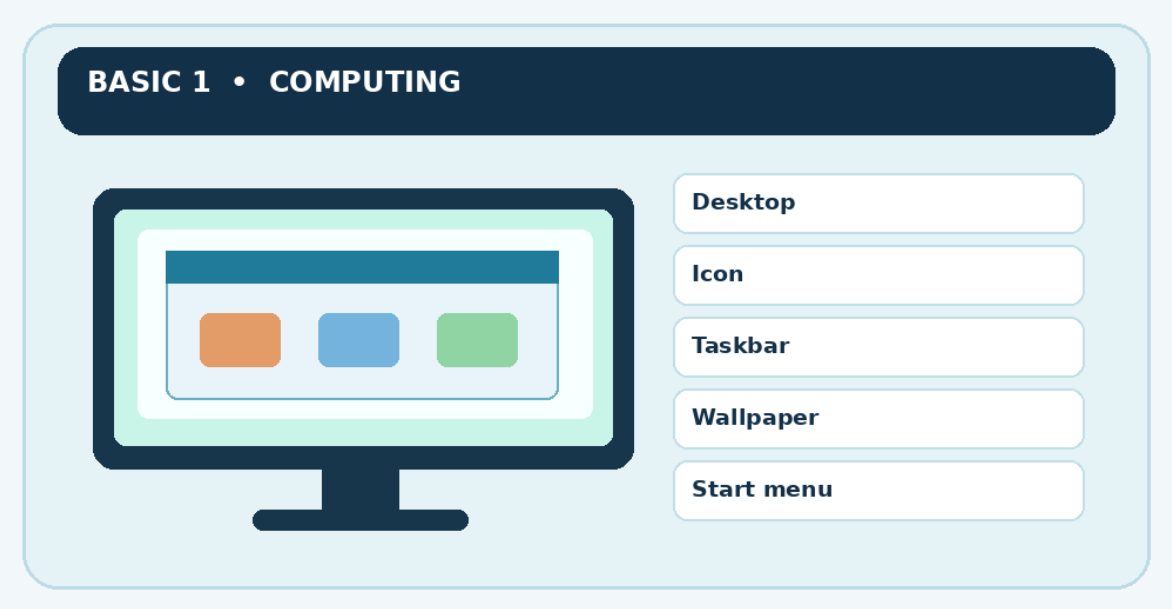

A. Shift key B. Space bar C. Enter key D. Number keys

10. At the community learning centre, someone describes a tool or idea that type the digits zero to nine. Which one is it?

A. Number keys B. Space bar C. Enter key D. Backspace

Lesson 8: What Is a Computer Desktop?

We will learn to: Identify, explain and apply the important ideas behind what is a computer desktop?.

Five important ideas

Desktop: is a main computer work area.

Icon: is a small picture representing an item.

Taskbar: helps find open apps and tools.

Wallpaper: is the desktop background picture.

Start menu: offers a way to open programs.

Our Ghanaian story

When the computer starts, Esi had a question about what is a computer desktop?. The group discovered that desktop is a main computer work area, while icon is a small picture representing an item. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise desktop and icon using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches what is a computer desktop?. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-08

Lesson 8: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that is a main computer work area.

A. Desktop B. Taskbar C. Wallpaper D. Start menu

2. Your friend says, "This is a small picture representing an item." What is the friend describing?

A. Icon B. Wallpaper C. Desktop D. Taskbar

3. Which idea from what is a computer desktop? matches the clue "helps find open apps and tools"?

A. Taskbar B. Start menu C. Wallpaper D. Icon

4. The teacher asks for an example that is the desktop background picture. Which answer fits?

A. Wallpaper B. Taskbar C. Start menu D. Icon

5. Can you identify the term described here: offers a way to open programs?

A. Wallpaper B. Taskbar C. Icon D. Start menu

CHALLENGE — Think and apply.

1. A classmate confuses several ideas about what is a computer desktop?. Which one actually is a small picture representing an item?

A. Wallpaper B. Icon C. Desktop D. Taskbar

2. During a school ICT lesson, Akosua wants to show something that is a main computer work area. Which idea should be labelled?

A. Desktop B. Start menu C. Wallpaper D. Taskbar

3. Imagine helping a younger pupil understand something that helps find open apps and tools. Which term would you teach?

A. Start menu B. Taskbar C. Icon D. Wallpaper

4. At the community learning centre, someone describes a tool or idea that offers a way to open programs. Which one is it?

A. Start menu B. Taskbar C. Wallpaper D. Icon

5. Your class is solving a practical problem. One useful thing is the desktop background picture. What is its name?

A. Icon B. Taskbar C. Start menu D. Wallpaper

6. At home, Akosua remembers a class rule or concept that is the desktop background picture. What was it called?

A. Icon B. Wallpaper C. Start menu D. Taskbar

7. A group makes a display on what is a computer desktop?. Their first clue is "is a small picture representing an item". Which label is correct?

A. Wallpaper B. Icon C. Taskbar D. Desktop

8. Which concept matches the explanation "offers a way to open programs" when you review what is a computer desktop??

A. Icon B. Taskbar C. Start menu D. Wallpaper

9. For a short demonstration, the teacher needs an example that helps find open apps and tools. Which choice would you select?

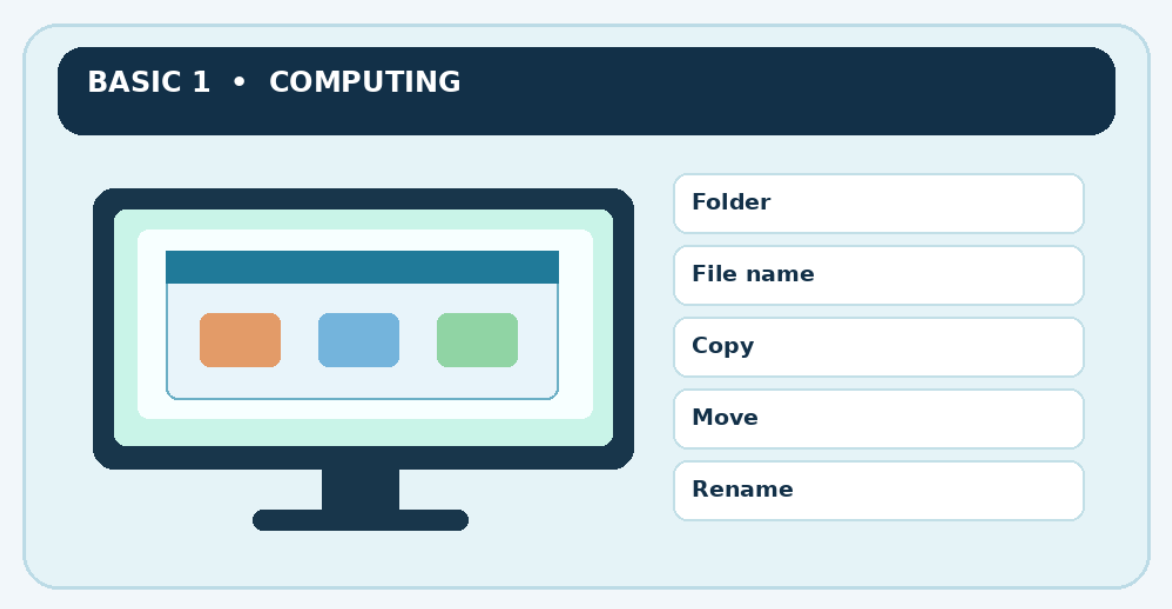

A. Taskbar B. Icon C. Start menu D. Wallpaper

10. Which answer would fit on a poster beside the words "is a main computer work area"?

A. Desktop B. Wallpaper C. Taskbar D. Start menu

Lesson 9: Files and Folders

We will learn to: Identify, explain and apply the important ideas behind files and folders.

Five important ideas

Folder: organises related digital files.

File name: helps identify a saved item.

Copy: makes a second version of an item.

Move: changes where an item is stored.

Rename: changes the label without changing the file content.

Our Ghanaian story

While organising class projects, Yaw had a question about files and folders. The group discovered that folder organises related digital files, while file name helps identify a saved item. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise folder and file name using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches files and folders. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-09

Lesson 9: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that organises related digital files.

A. File name B. Move C. Folder D. Rename

2. Your friend says, "This helps identify a saved item." What is the friend describing?

A. Copy B. Folder C. File name D. Rename

3. Which idea from files and folders matches the clue "makes a second version of an item"?

A. Copy B. Move C. Folder D. File name

4. The teacher asks for an example that changes where an item is stored. Which answer fits?

A. Copy B. Move C. Rename D. File name

5. Can you identify the term described here: changes the label without changing the file content?

A. Copy B. Rename C. Move D. File name

CHALLENGE — Think and apply.

1. At the community learning centre, someone describes a tool or idea that changes the label without changing the file content. Which one is it?

A. Move B. Copy C. File name D. Rename

2. During a school ICT lesson, Esi wants to show something that organises related digital files. Which idea should be labelled?

A. Folder B. File name C. Rename D. Move

3. Which concept matches the explanation "changes the label without changing the file content" when you review files and folders?

A. Copy B. Move C. File name D. Rename

4. Your class is solving a practical problem. One useful thing changes where an item is stored. What is its name?

A. Rename B. File name C. Move D. Copy

5. Which answer would fit on a poster beside the words "organises related digital files"?

A. File name B. Folder C. Rename D. Move

6. Imagine helping a younger pupil understand something that makes a second version of an item. Which term would you teach?

A. Folder B. Copy C. Move D. File name

7. A classmate confuses several ideas about files and folders. Which one actually helps identify a saved item?

A. Rename B. Folder C. File name D. Copy

8. For a short demonstration, the teacher needs an example that makes a second version of an item. Which choice would you select?

A. Copy B. File name C. Move D. Folder

9. At home, Esi remembers a class rule or concept that changes where an item is stored. What was it called?

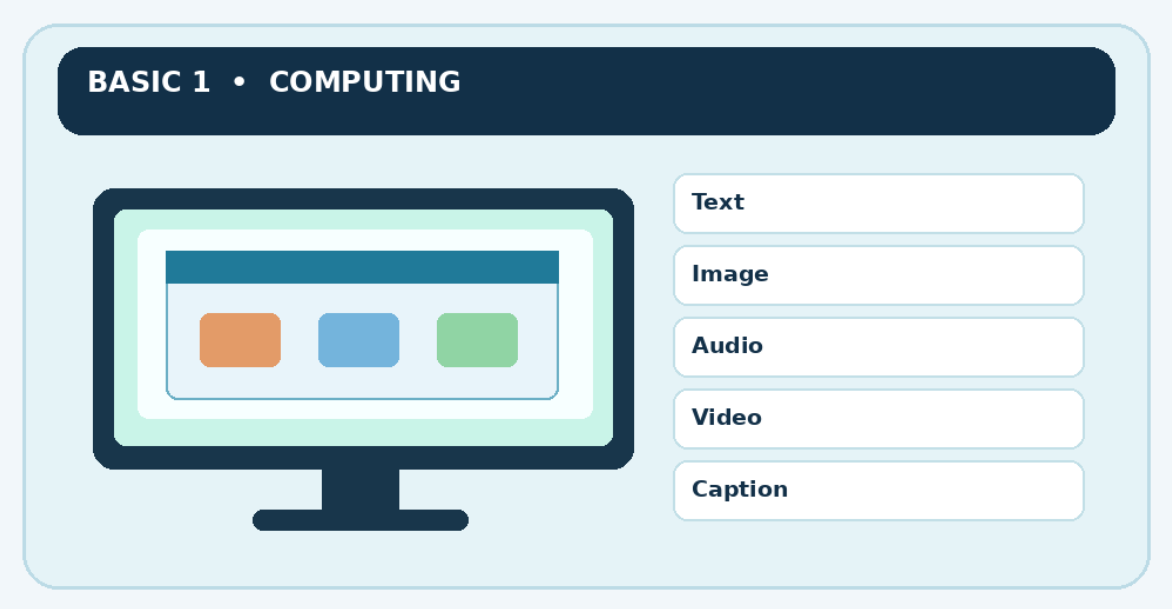

A. Move B. File name C. Rename D. Copy

10. A group makes a display on files and folders. Their first clue is "helps identify a saved item". Which label is correct?

A. Folder B. Copy C. File name D. Rename

Lesson 10: Pictures and Sounds

We will learn to: Identify, explain and apply the important ideas behind pictures and sounds.

Five important ideas

Text: communicates information with words.

Image: communicates using pictures.

Audio: communicates using sound.

Video: shows moving images, usually with sound.

Caption: adds an explanation to media.

Our Ghanaian story

While making a photo story about local life, Abena had a question about pictures and sounds. The group discovered that text communicates information with words, while image communicates using pictures. They drew an example and explained it to their classmates.

Try it!

Make a one-page paper example about your school or a Ghanaian festival. Include text, image and audio; present it clearly to a partner.

Create and share

Make a colourful, labelled poster that teaches pictures and sounds. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-10

Lesson 10: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that communicates information with words.

A. Text B. Image C. Caption D. Audio

2. Your friend says, "This communicates using pictures." What is the friend describing?

A. Audio B. Image C. Text D. Video

3. Which idea from pictures and sounds matches the clue "communicates using sound"?

A. Image B. Text C. Audio D. Video

4. The teacher asks for an example that shows moving images, usually with sound. Which answer fits?

A. Text B. Image C. Video D. Audio

5. Can you identify the term described here: adds an explanation to media?

A. Video B. Caption C. Image D. Audio

CHALLENGE — Think and apply.

1. Which concept matches the explanation "adds an explanation to media" when you review pictures and sounds?

A. Caption B. Image C. Video D. Audio

2. At home, Ama remembers a class rule or concept that shows moving images, usually with sound. What was it called?

A. Image B. Video C. Text D. Audio

3. Which answer would fit on a poster beside the words "communicates information with words"?

A. Caption B. Text C. Audio D. Image

4. For a short demonstration, the teacher needs an example that communicates using sound. Which choice would you select?

A. Video B. Audio C. Image D. Text

5. Imagine helping a younger pupil understand something that communicates using sound. Which term would you teach?

A. Image B. Text C. Video D. Audio

6. During a school ICT lesson, Ama wants to show something that communicates information with words. Which idea should be labelled?

A. Image B. Caption C. Text D. Audio

7. At the community learning centre, someone describes a tool or idea that adds an explanation to media. Which one is it?

A. Audio B. Caption C. Video D. Image

8. A group makes a display on pictures and sounds. Their first clue is "communicates using pictures". Which label is correct?

A. Text B. Video C. Image D. Audio

9. A classmate confuses several ideas about pictures and sounds. Which one actually communicates using pictures?

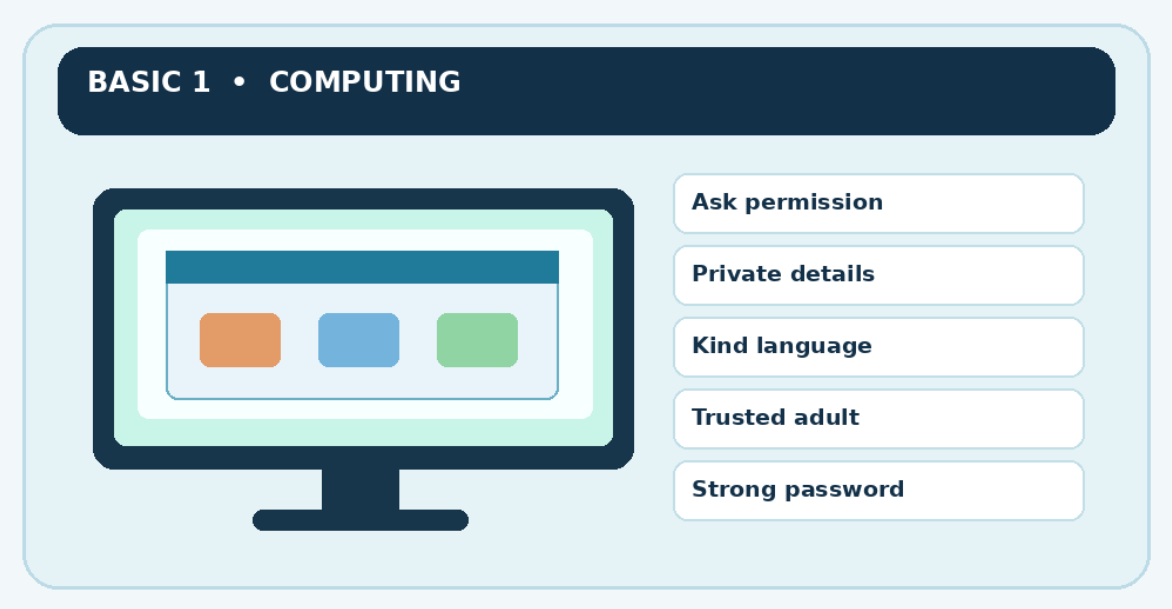

A. Audio B. Image C. Video D. Text

10. Your class is solving a practical problem. One useful thing shows moving images, usually with sound. What is its name?

A. Video B. Text C. Image D. Audio

Lesson 11: Being Kind with Technology

We will learn to: Identify, explain and apply the important ideas behind being kind with technology.

Five important ideas

Ask permission: is important before using another person's device.

Private details: should not be shared with strangers.

Kind language: makes digital communication respectful.

Trusted adult: can help with worrying online contact.

Strong password: protects an account from unwanted entry.

Our Ghanaian story

During a conversation about safe technology, Kofi had a question about being kind with technology. The group discovered that ask permission is important before using another person's device, while private details should not be shared with strangers. They drew an example and explained it to their classmates.

Try it!

Use an imaginary example or a teacher-approved offline screenshot. Discuss when to use ask permission and private details. Never enter a real password or share private details in this activity.

Create and share

Make a colourful, labelled poster that teaches being kind with technology. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-11

Lesson 11: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that is important before using another person's device.

A. Strong password B. Ask permission C. Private details D. Trusted adult

2. Your friend says, "This should not be shared with strangers." What is the friend describing?

A. Ask permission B. Trusted adult C. Strong password D. Private details

3. Which idea from being kind with technology matches the clue "makes digital communication respectful"?

A. Trusted adult B. Strong password C. Kind language D. Private details

4. The teacher asks for an example that can help with worrying online contact. Which answer fits?

A. Trusted adult B. Ask permission C. Strong password D. Private details

5. Can you identify the term described here: protects an account from unwanted entry?

A. Strong password B. Kind language C. Trusted adult D. Ask permission

CHALLENGE — Think and apply.

1. Imagine helping a younger pupil understand something that makes digital communication respectful. Which term would you teach?

A. Private details B. Strong password C. Kind language D. Trusted adult

2. For a short demonstration, the teacher needs an example that makes digital communication respectful. Which choice would you select?

A. Private details B. Trusted adult C. Strong password D. Kind language

3. A classmate confuses several ideas about being kind with technology. Which one actually should not be shared with strangers?

A. Trusted adult B. Strong password C. Private details D. Ask permission

4. During a school ICT lesson, Yaw wants to show something that is important before using another person's device. Which idea should be labelled?

A. Trusted adult B. Ask permission C. Private details D. Strong password

5. At home, Yaw remembers a class rule or concept that can help with worrying online contact. What was it called?

A. Trusted adult B. Private details C. Ask permission D. Strong password

6. At the community learning centre, someone describes a tool or idea that protects an account from unwanted entry. Which one is it?

A. Kind language B. Ask permission C. Trusted adult D. Strong password

7. Which answer would fit on a poster beside the words "is important before using another person's device"?

A. Private details B. Ask permission C. Trusted adult D. Strong password

8. Which concept matches the explanation "protects an account from unwanted entry" when you review being kind with technology?

A. Trusted adult B. Strong password C. Ask permission D. Kind language

9. Your class is solving a practical problem. One useful thing can help with worrying online contact. What is its name?

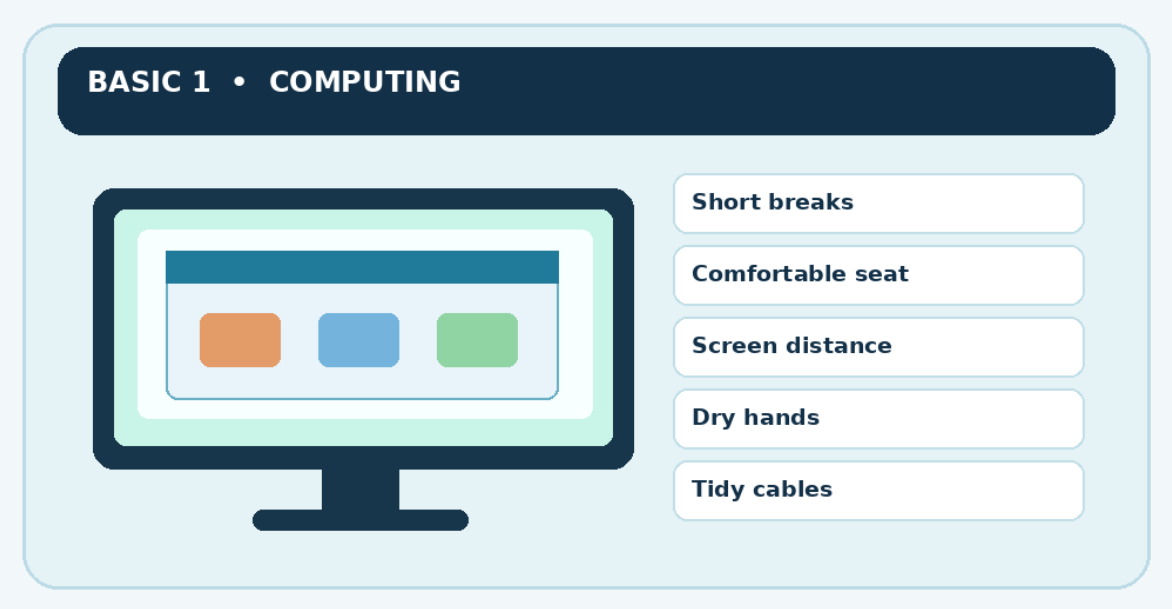

A. Ask permission B. Private details C. Strong password D. Trusted adult

10. A group makes a display on being kind with technology. Their first clue is "should not be shared with strangers". Which label is correct?

A. Trusted adult B. Ask permission C. Private details D. Strong password

Lesson 12: Sitting Safely at a Computer

We will learn to: Identify, explain and apply the important ideas behind sitting safely at a computer.

Five important ideas

Short breaks: allow eyes and muscles to rest.

Comfortable seat: supports a healthy sitting position.

Screen distance: helps prevent eye strain.

Dry hands: reduce electrical risk near devices.

Tidy cables: help prevent trips and falls.

Our Ghanaian story

After a long class computer session, Ama had a question about sitting safely at a computer. The group discovered that short breaks allow eyes and muscles to rest, while comfortable seat supports a healthy sitting position. They drew an example and explained it to their classmates.

Try it!

Create a class safety demonstration. Show a good example of short breaks and comfortable seat and explain why the good practice matters.

Create and share

Make a colourful, labelled poster that teaches sitting safely at a computer. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-12

Lesson 12: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that allow eyes and muscles to rest.

A. Dry hands B. Tidy cables C. Short breaks D. Comfortable seat

2. Your friend says, "This supports a healthy sitting position." What is the friend describing?

A. Tidy cables B. Short breaks C. Dry hands D. Comfortable seat

3. Which idea from sitting safely at a computer matches the clue "helps prevent eye strain"?

A. Comfortable seat B. Screen distance C. Dry hands D. Tidy cables

4. The teacher asks for an example that reduce electrical risk near devices. Which answer fits?

A. Screen distance B. Tidy cables C. Short breaks D. Dry hands

5. Can you identify the term described here: help prevent trips and falls?

A. Tidy cables B. Comfortable seat C. Screen distance D. Dry hands

CHALLENGE — Think and apply.

1. Which concept matches the explanation "help prevent trips and falls" when you review sitting safely at a computer?

A. Comfortable seat B. Dry hands C. Screen distance D. Tidy cables

2. A classmate confuses several ideas about sitting safely at a computer. Which one actually supports a healthy sitting position?

A. Tidy cables B. Comfortable seat C. Short breaks D. Dry hands

3. At the community learning centre, someone describes a tool or idea that help prevent trips and falls. Which one is it?

A. Dry hands B. Tidy cables C. Screen distance D. Comfortable seat

4. Which answer would fit on a poster beside the words "allow eyes and muscles to rest"?

A. Comfortable seat B. Short breaks C. Dry hands D. Tidy cables

5. Imagine helping a younger pupil understand something that helps prevent eye strain. Which term would you teach?

A. Screen distance B. Comfortable seat C. Tidy cables D. Dry hands

6. A group makes a display on sitting safely at a computer. Their first clue is "supports a healthy sitting position". Which label is correct?

A. Dry hands B. Comfortable seat C. Tidy cables D. Short breaks

7. At home, Kofi remembers a class rule or concept that reduce electrical risk near devices. What was it called?

A. Tidy cables B. Dry hands C. Short breaks D. Screen distance

8. For a short demonstration, the teacher needs an example that helps prevent eye strain. Which choice would you select?

A. Comfortable seat B. Tidy cables C. Dry hands D. Screen distance

9. Your class is solving a practical problem. One useful thing reduce electrical risk near devices. What is its name?

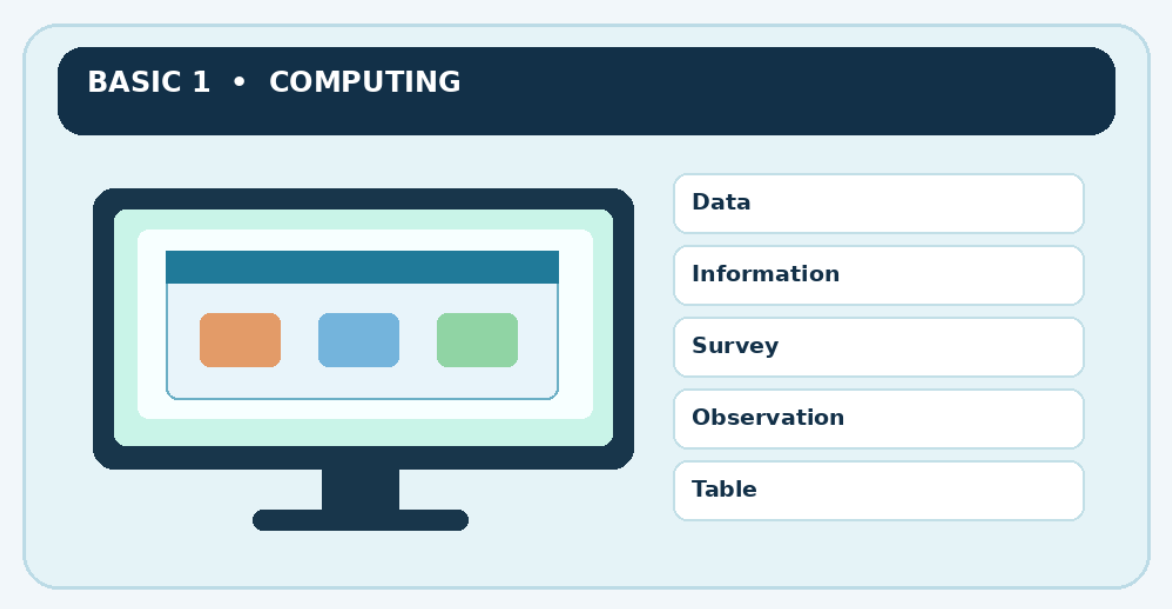

A. Screen distance B. Short breaks C. Tidy cables D. Dry hands

10. During a school ICT lesson, Kofi wants to show something that allow eyes and muscles to rest. Which idea should be labelled?

A. Comfortable seat B. Tidy cables C. Short breaks D. Dry hands

Lesson 13: Numbers as Data

We will learn to: Identify, explain and apply the important ideas behind numbers as data.

Five important ideas

Data: raw facts gathered for a purpose.

Information: data organised to make sense.

Survey: asks people selected questions.

Observation: records what someone notices.

Table: arranges facts into rows and columns.

Our Ghanaian story

During a survey of the school, Kojo had a question about numbers as data. The group discovered that data raw facts gathered for a purpose, while information data organised to make sense. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Data, Information and Survey; explain what each means.

Create and share

Make a colourful, labelled poster that teaches numbers as data. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-13

Lesson 13: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that raw facts gathered for a purpose.

A. Table B. Information C. Survey D. Data

2. Your friend says, "This data organised to make sense." What is the friend describing?

A. Information B. Survey C. Table D. Observation

3. Which idea from numbers as data matches the clue "asks people selected questions"?

A. Data B. Information C. Table D. Survey

4. The teacher asks for an example that records what someone notices. Which answer fits?

A. Survey B. Information C. Observation D. Table

5. Can you identify the term described here: arranges facts into rows and columns?

A. Table B. Survey C. Data D. Observation

CHALLENGE — Think and apply.

1. At the community learning centre, someone describes a tool or idea that arranges facts into rows and columns. Which one is it?

A. Survey B. Observation C. Table D. Data

2. For a short demonstration, the teacher needs an example that asks people selected questions. Which choice would you select?

A. Data B. Survey C. Table D. Information

3. Imagine helping a younger pupil understand something that asks people selected questions. Which term would you teach?

A. Table B. Information C. Survey D. Data

4. A group makes a display on numbers as data. Their first clue is "data organised to make sense". Which label is correct?

A. Survey B. Table C. Information D. Observation

5. During a school ICT lesson, Akosua wants to show something that raw facts gathered for a purpose. Which idea should be labelled?

A. Table B. Survey C. Information D. Data

6. Your class is solving a practical problem. One useful thing records what someone notices. What is its name?

A. Table B. Observation C. Survey D. Information

7. A classmate confuses several ideas about numbers as data. Which one actually data organised to make sense?

A. Observation B. Table C. Survey D. Information

8. Which concept matches the explanation "arranges facts into rows and columns" when you review numbers as data?

A. Survey B. Table C. Observation D. Data

9. Which answer would fit on a poster beside the words "raw facts gathered for a purpose"?

A. Survey B. Table C. Information D. Data

10. At home, Akosua remembers a class rule or concept that records what someone notices. What was it called?

A. Table B. Information C. Observation D. Survey

Lesson 14: Technology for Communication

We will learn to: Identify, explain and apply the important ideas behind technology for communication.

Five important ideas

Mobile phone: allows calls and messages.

Radio: broadcasts sound to listeners.

Television: shares moving pictures and sound.

Email: sends digital written messages.

Video call: lets distant people see and hear one another.

Our Ghanaian story

When contacting relatives in another region, Esi had a question about technology for communication. The group discovered that mobile phone allows calls and messages, while radio broadcasts sound to listeners. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of mobile phone, radio and television. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches technology for communication. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-14

Lesson 14: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that allows calls and messages.

A. Mobile phone B. Radio C. Email D. Video call

2. Your friend says, "This broadcasts sound to listeners." What is the friend describing?

A. Email B. Mobile phone C. Radio D. Video call

3. Which idea from technology for communication matches the clue "shares moving pictures and sound"?

A. Television B. Mobile phone C. Email D. Radio

4. The teacher asks for an example that sends digital written messages. Which answer fits?

A. Television B. Mobile phone C. Email D. Radio

5. Can you identify the term described here: lets distant people see and hear one another?

A. Radio B. Video call C. Television D. Mobile phone

CHALLENGE — Think and apply.

1. A classmate confuses several ideas about technology for communication. Which one actually broadcasts sound to listeners?

A. Email B. Radio C. Video call D. Mobile phone

2. At home, Esi remembers a class rule or concept that sends digital written messages. What was it called?

A. Mobile phone B. Email C. Television D. Radio

3. At the community learning centre, someone describes a tool or idea that lets distant people see and hear one another. Which one is it?

A. Television B. Radio C. Mobile phone D. Video call

4. A group makes a display on technology for communication. Their first clue is "broadcasts sound to listeners". Which label is correct?

A. Email B. Video call C. Mobile phone D. Radio

5. During a school ICT lesson, Esi wants to show something that allows calls and messages. Which idea should be labelled?

A. Email B. Radio C. Video call D. Mobile phone

6. Imagine helping a younger pupil understand something that shares moving pictures and sound. Which term would you teach?

A. Television B. Radio C. Mobile phone D. Email

7. Your class is solving a practical problem. One useful thing sends digital written messages. What is its name?

A. Email B. Radio C. Television D. Mobile phone

8. For a short demonstration, the teacher needs an example that shares moving pictures and sound. Which choice would you select?

A. Mobile phone B. Email C. Television D. Radio

9. Which answer would fit on a poster beside the words "allows calls and messages"?

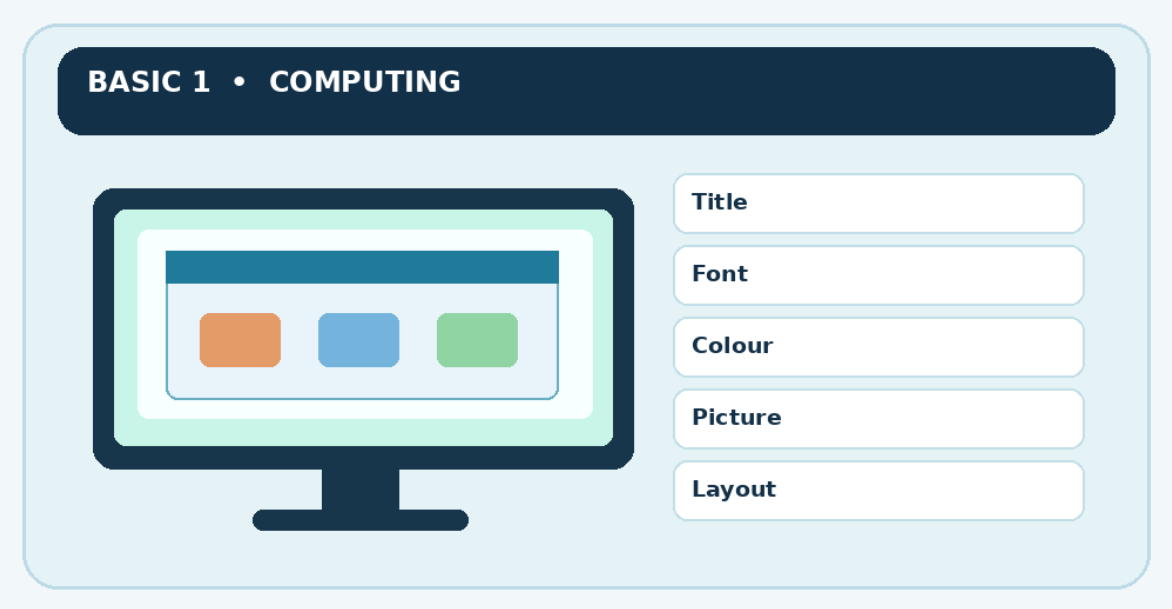

A. Email B. Radio C. Mobile phone D. Video call

10. Which concept matches the explanation "lets distant people see and hear one another" when you review technology for communication?

A. Television B. Video call C. Mobile phone D. Radio

Lesson 15: My First Digital Poster

We will learn to: Identify, explain and apply the important ideas behind my first digital poster.

Five important ideas

Title: states the topic of a page or slide.

Font: changes how writing appears.

Colour: helps emphasise important information.

Picture: can explain an idea visually.

Layout: arranges content clearly.

Our Ghanaian story

While making an Independence Day poster, Yaw had a question about my first digital poster. The group discovered that title states the topic of a page or slide, while font changes how writing appears. They drew an example and explained it to their classmates.

Try it!

Make a one-page paper example about your school or a Ghanaian festival. Include title, font and colour; present it clearly to a partner.

Create and share

Make a colourful, labelled poster that teaches my first digital poster. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B1-15

Lesson 15: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that states the topic of a page or slide.

A. Title B. Font C. Colour D. Picture

2. Your friend says, "This changes how writing appears." What is the friend describing?

A. Title B. Layout C. Font D. Colour

3. Which idea from my first digital poster matches the clue "helps emphasise important information"?

A. Title B. Colour C. Font D. Layout

4. The teacher asks for an example that can explain an idea visually. Which answer fits?

A. Colour B. Picture C. Title D. Layout

5. Can you identify the term described here: arranges content clearly?

A. Font B. Colour C. Title D. Layout

CHALLENGE — Think and apply.

1. At home, Ama remembers a class rule or concept that can explain an idea visually. What was it called?

A. Picture B. Colour C. Title D. Layout

2. Imagine helping a younger pupil understand something that helps emphasise important information. Which term would you teach?

A. Layout B. Font C. Colour D. Title

3. Which answer would fit on a poster beside the words "states the topic of a page or slide"?

A. Colour B. Picture C. Font D. Title

4. A group makes a display on my first digital poster. Their first clue is "changes how writing appears". Which label is correct?

A. Colour B. Font C. Layout D. Title

5. Which concept matches the explanation "arranges content clearly" when you review my first digital poster?

A. Layout B. Title C. Colour D. Font

6. A classmate confuses several ideas about my first digital poster. Which one actually changes how writing appears?

A. Colour B. Layout C. Title D. Font

7. For a short demonstration, the teacher needs an example that helps emphasise important information. Which choice would you select?

A. Layout B. Colour C. Font D. Title

8. At the community learning centre, someone describes a tool or idea that arranges content clearly. Which one is it?

A. Layout B. Title C. Colour D. Font

9. During a school ICT lesson, Ama wants to show something that states the topic of a page or slide. Which idea should be labelled?

A. Picture B. Title C. Font D. Colour

10. Your class is solving a practical problem. One useful thing can explain an idea visually. What is its name?

A. Layout B. Colour C. Title D. Picture

Teacher answer guide

Review the correct term and ask each learner to explain why it fits.

Lesson 1 — Computer Parts Around Us

Play: 1. Monitor | 2. Keyboard | 3. Mouse | 4. System unit | 5. Speakers

Challenge: 1. Monitor | 2. Keyboard | 3. System unit | 4. System unit | 5. Mouse | 6. Speakers | 7. Monitor | 8. Speakers | 9. Mouse | 10. Keyboard

Lesson 2 — How to Start a Computer Safely

Play: 1. Adult guidance | 2. Power button | 3. Clean dry hands | 4. Gentle touch | 5. Save work

Challenge: 1. Adult guidance | 2. Save work | 3. Gentle touch | 4. Save work | 5. Clean dry hands | 6. Adult guidance | 7. Clean dry hands | 8. Gentle touch | 9. Power button | 10. Power button

Lesson 3 — Technology at Home and School

Play: 1. School | 2. Clinic | 3. Shop | 4. Farm | 5. Home

Challenge: 1. Shop | 2. Farm | 3. School | 4. Clinic | 5. Clinic | 6. Farm | 7. School | 8. Home | 9. Shop | 10. Home

Lesson 4 — Devices That Send Information

Play: 1. Keyboard | 2. Mouse | 3. Microphone | 4. Scanner | 5. Camera

Challenge: 1. Scanner | 2. Mouse | 3. Keyboard | 4. Mouse | 5. Camera | 6. Camera | 7. Microphone | 8. Keyboard | 9. Microphone | 10. Scanner

Lesson 5 — Devices That Show Information

Play: 1. Monitor | 2. Printer | 3. Speaker | 4. Projector | 5. Headphones

Challenge: 1. Monitor | 2. Printer | 3. Projector | 4. Speaker | 5. Monitor | 6. Headphones | 7. Speaker | 8. Printer | 9. Headphones | 10. Projector

Lesson 6 — Using a Mouse Carefully

Play: 1. Single click | 2. Double click | 3. Drag | 4. Scroll wheel | 5. Right click

Challenge: 1. Single click | 2. Scroll wheel | 3. Drag | 4. Single click | 5. Drag | 6. Scroll wheel | 7. Right click | 8. Double click | 9. Right click | 10. Double click

Lesson 7 — Finding Keyboard Keys

Play: 1. Space bar | 2. Enter key | 3. Backspace | 4. Shift key | 5. Number keys

Challenge: 1. Shift key | 2. Space bar | 3. Enter key | 4. Space bar | 5. Backspace | 6. Number keys | 7. Backspace | 8. Enter key | 9. Shift key | 10. Number keys

Lesson 8 — What Is a Computer Desktop?

Play: 1. Desktop | 2. Icon | 3. Taskbar | 4. Wallpaper | 5. Start menu

Challenge: 1. Icon | 2. Desktop | 3. Taskbar | 4. Start menu | 5. Wallpaper | 6. Wallpaper | 7. Icon | 8. Start menu | 9. Taskbar | 10. Desktop

Lesson 9 — Files and Folders

Play: 1. Folder | 2. File name | 3. Copy | 4. Move | 5. Rename

Challenge: 1. Rename | 2. Folder | 3. Rename | 4. Move | 5. Folder | 6. Copy | 7. File name | 8. Copy | 9. Move | 10. File name

Lesson 10 — Pictures and Sounds

Play: 1. Text | 2. Image | 3. Audio | 4. Video | 5. Caption

Challenge: 1. Caption | 2. Video | 3. Text | 4. Audio | 5. Audio | 6. Text | 7. Caption | 8. Image | 9. Image | 10. Video

Lesson 11 — Being Kind with Technology

Play: 1. Ask permission | 2. Private details | 3. Kind language | 4. Trusted adult | 5. Strong password

Challenge: 1. Kind language | 2. Kind language | 3. Private details | 4. Ask permission | 5. Trusted adult | 6. Strong password | 7. Ask permission | 8. Strong password | 9. Trusted adult | 10. Private details

Lesson 12 — Sitting Safely at a Computer

Play: 1. Short breaks | 2. Comfortable seat | 3. Screen distance | 4. Dry hands | 5. Tidy cables

Challenge: 1. Tidy cables | 2. Comfortable seat | 3. Tidy cables | 4. Short breaks | 5. Screen distance | 6. Comfortable seat | 7. Dry hands | 8. Screen distance | 9. Dry hands | 10. Short breaks

Lesson 13 — Numbers as Data

Play: 1. Data | 2. Information | 3. Survey | 4. Observation | 5. Table

Challenge: 1. Table | 2. Survey | 3. Survey | 4. Information | 5. Data | 6. Observation | 7. Information | 8. Table | 9. Data | 10. Observation

Lesson 14 — Technology for Communication

Play: 1. Mobile phone | 2. Radio | 3. Television | 4. Email | 5. Video call

Challenge: 1. Radio | 2. Email | 3. Video call | 4. Radio | 5. Mobile phone | 6. Television | 7. Email | 8. Television | 9. Mobile phone | 10. Video call

Lesson 15 — My First Digital Poster

Play: 1. Title | 2. Font | 3. Colour | 4. Picture | 5. Layout

Challenge: 1. Picture | 2. Colour | 3. Title | 4. Font | 5. Layout | 6. Font | 7. Colour | 8. Layout | 9. Title | 10. Picture
