Basic 1

Illustrated lessons · Practical activities · Play and Challenge questions

Independently authored learning companion aligned to selected NaCCA 2019 topics. This is not an official NaCCA publication.

LESSON 01: Roll a ball from stationary position using hands

Goal: Roll a ball from stationary position using hands.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Roll a ball from stationary position using hands.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 01: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Roll a ball from stationary position using hands: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Rush into a demanding activity without warming up

C. Roll a ball from stationary position using hands.

D. Ignore the movement task and do only an unrelated game

2. [Play] Roll a ball from stationary position using hands: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a soft, lightweight ball and enough clear space

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Roll a ball from stationary position using hands: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Skip all practice and guess the result.

D. Set up a safe activity space using a soft, lightweight ball and enough clear space.

4. [Play] Roll a ball from stationary position using hands: Which setting does this grade use?

A. a topic unrelated to the current class

B. safe simple movement and play

C. only a future space colony

D. an unrelated imagined city

5. [Play] Roll a ball from stationary position using hands: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. a response that does not show the lesson skill

6. [Challenge] Roll a ball from stationary position using hands: Which action comes after the opening step?

A. Practise the skill slowly: Roll a ball from stationary position using hands.

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Only watch others without trying

7. [Challenge] Roll a ball from stationary position using hands: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Leave the task unfinished without explaining

D. Practise at a short distance; check your direction and try again with feedback.

8. [Challenge] Roll a ball from stationary position using hands: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. an unrelated example that does not test the skill

C. accurate controlled ball movement

D. a random answer with no supporting detail

9. [Challenge] Roll a ball from stationary position using hands: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] Roll a ball from stationary position using hands: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Avoid the stated task and its materials

C. Practise at a short distance; check your direction and try again with feedback.

D. Copy another learner’s response without trying

11. [Challenge] Roll a ball from stationary position using hands: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

D. Learning means only guessing and never checking

12. [Challenge] Roll a ball from stationary position using hands: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can avoid answering questions

C. Whether you can ignore the agreed task

D. Whether you can finish without showing your work

13. [Challenge] Roll a ball from stationary position using hands: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Make up results instead of practising

C. Stop immediately without reflection

D. Repeat the same error without checking feedback

14. [Challenge] Roll a ball from stationary position using hands: How should a learner improve after feedback?

A. Revisit the steps and strengthen accurate controlled ball movement.

B. Ignore all comments and leave the task incomplete

C. Skip a difficult part without asking for help

D. Change answers randomly without a reason

15. [Challenge] Roll a ball from stationary position using hands: Which choice would show responsible use of today’s skill?

A. Apply the lesson about roll a ball from stationary position using hands to a suitable real-life situation.

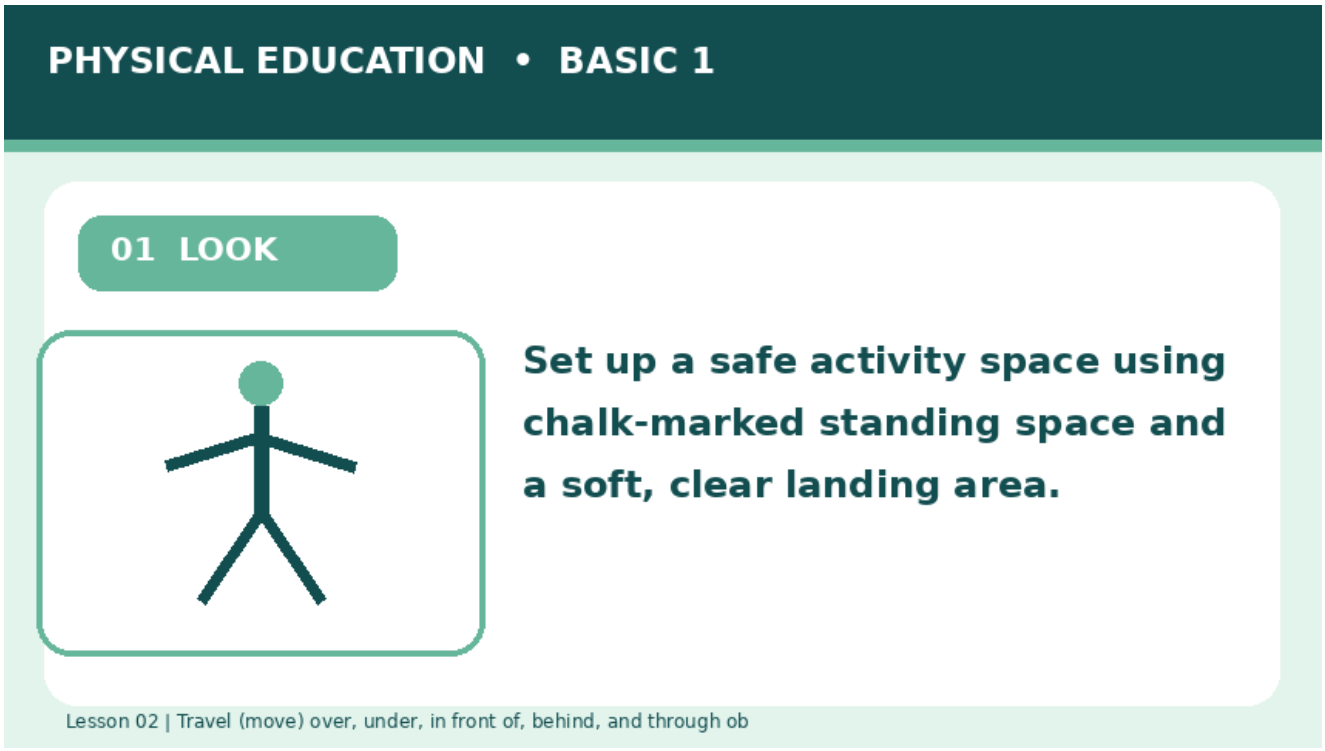

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Claim expertise without trying the skill

LESSON 02: Travel (move) over, under, in front of, behind, and through objects

Goal: Travel (move) over, under, in front of, behind, and through objects using locomotor skills (walk, jump, craw etc.).

Learn it

A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

Useful material: chalk-marked standing space and a soft, clear landing area

Do it in three steps

1. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

2. Practise the skill slowly: Travel (move) over, under, in front of, behind, and through objects using locomotor skills (walk, jump, craw etc.).

3. Practise take-off, landing, then describe which landing felt more balanced.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

Try this: Practise take-off, landing, then describe which landing felt more balanced.

Show your learning: controlled take-off and safe landing. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 02: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Travel (move) over, under, in front of, behind, and through objects: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Ignore the movement task and do only an unrelated game

C. Rush into a demanding activity without warming up

D. Travel (move) over, under, in front of, behind, and through objects using locomotor skills (walk, jump, craw etc.).

2. [Play] Travel (move) over, under, in front of, behind, and through objects: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. chalk-marked standing space and a soft, clear landing area

C. heavy unsafe equipment in a crowded space

D. a sharp object placed on the sports ground

3. [Play] Travel (move) over, under, in front of, behind, and through objects: Which action should come first?

A. Finish before looking at the instructions.

B. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

C. Skip all practice and guess the result.

D. Ignore the main task and do something unrelated.

4. [Play] Travel (move) over, under, in front of, behind, and through objects: Which setting does this grade use?

A. only a future space colony

B. safe simple movement and play

C. a topic unrelated to the current class

D. an unrelated imagined city

5. [Play] Travel (move) over, under, in front of, behind, and through objects: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a demonstrated movement or fitness task with self-assessment

C. an unsupported claim with no classroom practice

D. a response that does not show the lesson skill

6. [Challenge] Travel (move) over, under, in front of, behind, and through objects: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Travel (move) over, under, in front of, behind, and through objects using locomotor skills (walk, jump, craw etc.).

D. Only watch others without trying

7. [Challenge] Travel (move) over, under, in front of, behind, and through objects: Which practice completes the three lesson stages?

A. Practise take-off, landing, then describe which landing felt more balanced.

B. Stop after reading the title

C. Leave the task unfinished without explaining

D. Give a guess without trying the activity

8. [Challenge] Travel (move) over, under, in front of, behind, and through objects: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. an unrelated example that does not test the skill

C. a random answer with no supporting detail

D. controlled take-off and safe landing

9. [Challenge] Travel (move) over, under, in front of, behind, and through objects: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Do the activity without considering other people.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

D. Take unnecessary risks to finish first.

10. [Challenge] Travel (move) over, under, in front of, behind, and through objects: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Practise take-off, landing, then describe which landing felt more balanced.

C. Avoid the stated task and its materials

D. Copy another learner’s response without trying

11. [Challenge] Travel (move) over, under, in front of, behind, and through objects: Which explanation best supports this lesson?

A. A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

B. Learning means only guessing and never checking

C. The lesson has no connection to life or skills

D. The topic can be completed without observing or practising

12. [Challenge] Travel (move) over, under, in front of, behind, and through objects: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether your work demonstrates controlled take-off and safe landing.

13. [Challenge] Travel (move) over, under, in front of, behind, and through objects: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Make up results instead of practising

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Travel (move) over, under, in front of, behind, and through objects: How should a learner improve after feedback?

A. Revisit the steps and strengthen controlled take-off and safe landing.

B. Ignore all comments and leave the task incomplete

C. Skip a difficult part without asking for help

D. Change answers randomly without a reason

15. [Challenge] Travel (move) over, under, in front of, behind, and through objects: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

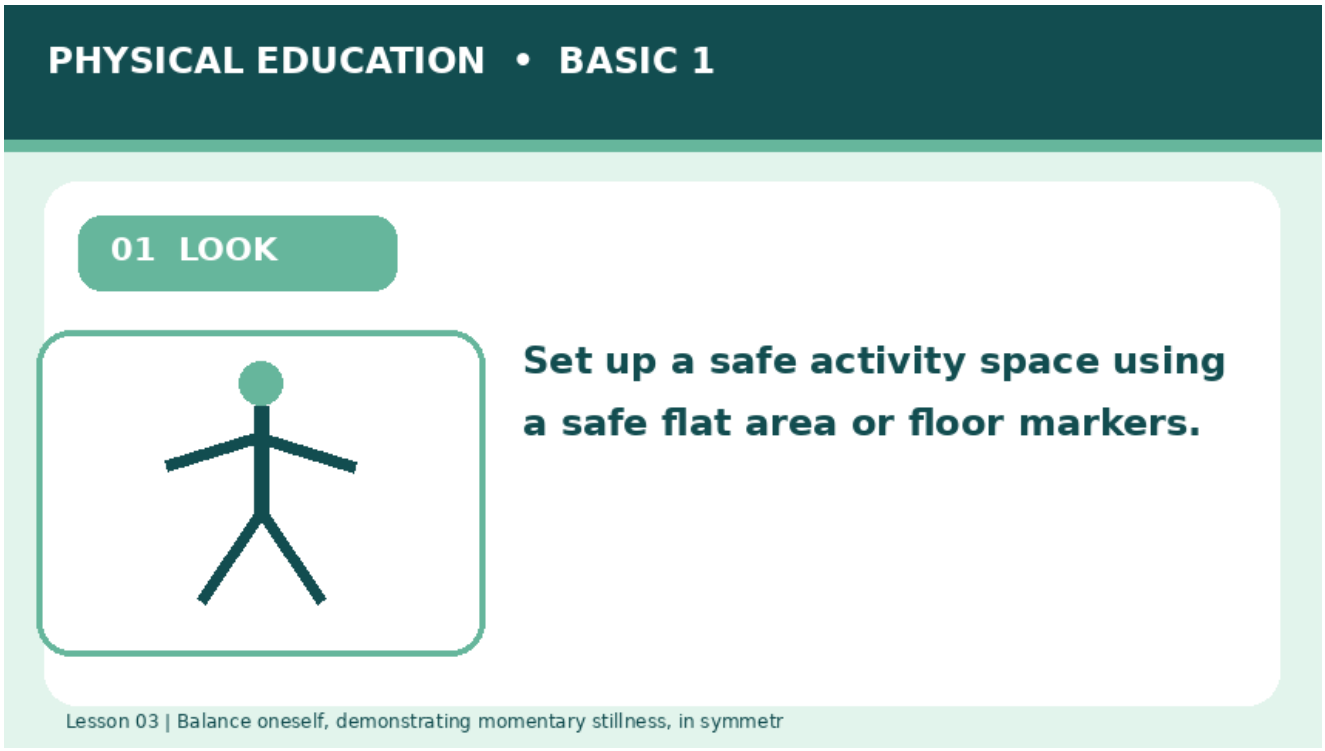

B. Apply the lesson about travel (move) over, under, in front of, behind, and through objects using locomotor skills (walk, jump, craw etc.) to a suitable real-life situation.

C. Avoid explaining how the skill could be used

D. Use the topic to mislead others

LESSON 03: Balance oneself, demonstrating momentary stillness, in symmetrical

Goal: Balance oneself, demonstrating momentary stillness, in symmetrical and asymmetrical shapes using body parts other than both feet as a base of support.

Learn it

Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

Useful material: a safe flat area or floor markers

Do it in three steps

1. Set up a safe activity space using a safe flat area or floor markers.

2. Practise the skill slowly: Balance oneself, demonstrating momentary stillness, in symmetrical and asymmetrical shapes using body parts other than both feet as a base of support.

3. Hold a comfortable balance briefly and explain what made it steady.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

Try this: Hold a comfortable balance briefly and explain what made it steady.

Show your learning: stable body position. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 03: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Balance oneself, demonstrating momentary stillness, in symmetrical: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Balance oneself, demonstrating momentary stillness, in symmetrical and asymmetrical shapes using body parts other than both feet as a base of support.

C. Rush into a demanding activity without warming up

D. Practise unsafe tricks without learning the basic skill

2. [Play] Balance oneself, demonstrating momentary stillness, in symmetrical: What useful learning material or support is listed?

A. a safe flat area or floor markers

B. a slippery or obstructed practice area

C. heavy unsafe equipment in a crowded space

D. a sharp object placed on the sports ground

3. [Play] Balance oneself, demonstrating momentary stillness, in symmetrical: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Set up a safe activity space using a safe flat area or floor markers.

D. Finish before looking at the instructions.

4. [Play] Balance oneself, demonstrating momentary stillness, in symmetrical: Which setting does this grade use?

A. safe simple movement and play

B. an unrelated imagined city

C. only a future space colony

D. a topic unrelated to the current class

5. [Play] Balance oneself, demonstrating momentary stillness, in symmetrical: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. a response that does not show the lesson skill

C. an unsupported claim with no classroom practice

D. an unrelated picture with no explanation

6. [Challenge] Balance oneself, demonstrating momentary stillness, in symmetrical: Which action comes after the opening step?

A. Practise the skill slowly: Balance oneself, demonstrating momentary stillness, in symmetrical and asymmetrical shapes using body parts other than both feet as a base of support.

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Only watch others without trying

7. [Challenge] Balance oneself, demonstrating momentary stillness, in symmetrical: Which practice completes the three lesson stages?

A. Hold a comfortable balance briefly and explain what made it steady.

B. Stop after reading the title

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] Balance oneself, demonstrating momentary stillness, in symmetrical: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. stable body position

D. a random answer with no supporting detail

9. [Challenge] Balance oneself, demonstrating momentary stillness, in symmetrical: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

C. Do the activity without considering other people.

D. Take unnecessary risks to finish first.

10. [Challenge] Balance oneself, demonstrating momentary stillness, in symmetrical: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Copy another learner’s response without trying

C. Hold a comfortable balance briefly and explain what made it steady.

D. Complete a different lesson instead

11. [Challenge] Balance oneself, demonstrating momentary stillness, in symmetrical: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Learning means only guessing and never checking

C. Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

D. The topic can be completed without observing or practising

12. [Challenge] Balance oneself, demonstrating momentary stillness, in symmetrical: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates stable body position.

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Balance oneself, demonstrating momentary stillness, in symmetrical: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] Balance oneself, demonstrating momentary stillness, in symmetrical: How should a learner improve after feedback?

A. Revisit the steps and strengthen stable body position.

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Change answers randomly without a reason

15. [Challenge] Balance oneself, demonstrating momentary stillness, in symmetrical: Which choice would show responsible use of today’s skill?

A. Apply the lesson about balance oneself, demonstrating momentary stillness, in symmetrical and asymmetrical shapes using body parts other than both feet as a base of support to a suitable real-life situation.

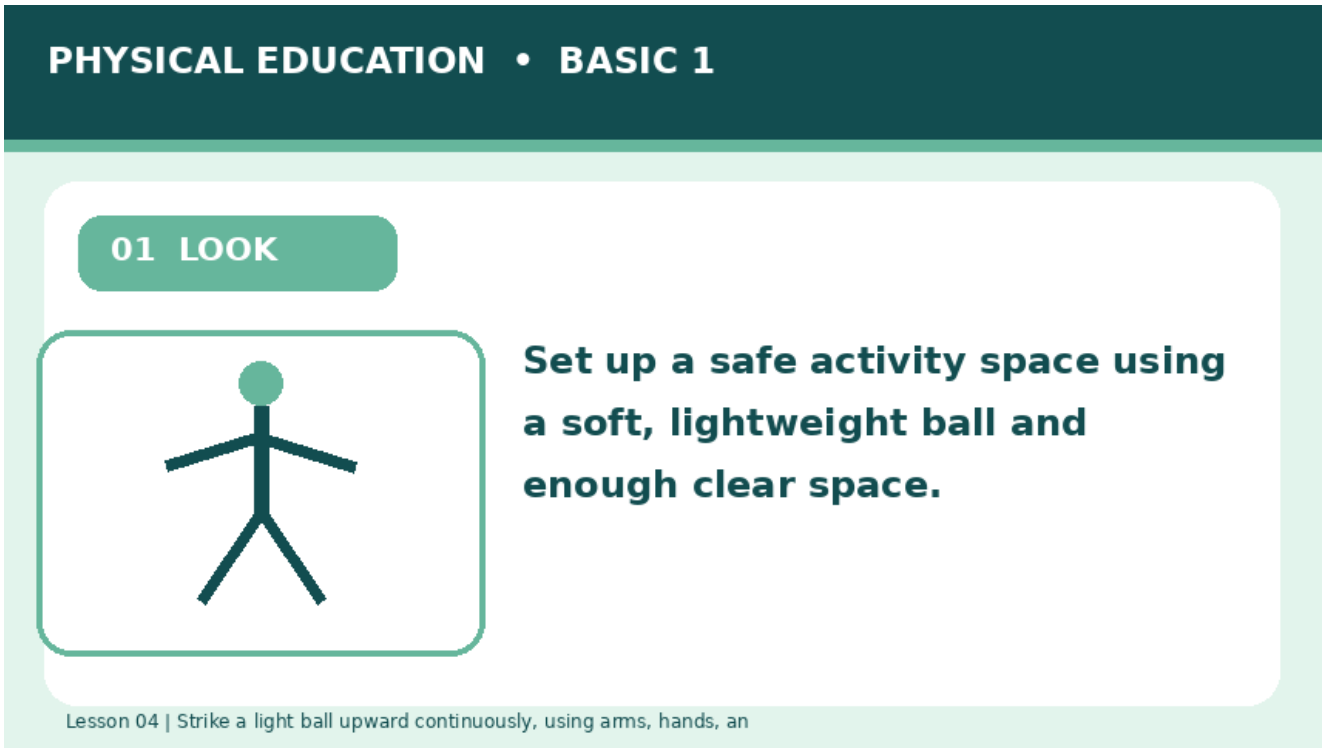

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Claim expertise without trying the skill

LESSON 04: Strike a light ball upward continuously, using arms, hands, and

Goal: Strike a light ball upward continuously, using arms, hands, and feet. After general and specific warm-ups, demonstrate to

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Strike a light ball upward continuously, using arms, hands, and feet. After general and specific warm-ups, demonstrate to.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 04: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Strike a light ball upward continuously, using arms, hands, and: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Strike a light ball upward continuously, using arms, hands, and feet. After general and specific warm-ups, demonstrate to

C. Practise unsafe tricks without learning the basic skill

D. Ignore the movement task and do only an unrelated game

2. [Play] Strike a light ball upward continuously, using arms, hands, and: What useful learning material or support is listed?

A. a soft, lightweight ball and enough clear space

B. heavy unsafe equipment in a crowded space

C. a slippery or obstructed practice area

D. a sharp object placed on the sports ground

3. [Play] Strike a light ball upward continuously, using arms, hands, and: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Set up a safe activity space using a soft, lightweight ball and enough clear space.

D. Skip all practice and guess the result.

4. [Play] Strike a light ball upward continuously, using arms, hands, and: Which setting does this grade use?

A. safe simple movement and play

B. only a future space colony

C. a topic unrelated to the current class

D. an unrelated imagined city

5. [Play] Strike a light ball upward continuously, using arms, hands, and: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. a response that does not show the lesson skill

6. [Challenge] Strike a light ball upward continuously, using arms, hands, and: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Strike a light ball upward continuously, using arms, hands, and feet. After general and specific warm-ups, demonstrate to.

D. Only watch others without trying

7. [Challenge] Strike a light ball upward continuously, using arms, hands, and: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Stop after reading the title

C. Give a guess without trying the activity

D. Practise at a short distance; check your direction and try again with feedback.

8. [Challenge] Strike a light ball upward continuously, using arms, hands, and: What counts as good evidence of learning here?

A. accurate controlled ball movement

B. an unrelated example that does not test the skill

C. an opinion without observation or practice

D. a random answer with no supporting detail

9. [Challenge] Strike a light ball upward continuously, using arms, hands, and: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

C. Do the activity without considering other people.

D. Take unnecessary risks to finish first.

10. [Challenge] Strike a light ball upward continuously, using arms, hands, and: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Practise at a short distance; check your direction and try again with feedback.

C. Avoid the stated task and its materials

D. Complete a different lesson instead

11. [Challenge] Strike a light ball upward continuously, using arms, hands, and: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

D. Learning means only guessing and never checking

12. [Challenge] Strike a light ball upward continuously, using arms, hands, and: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates accurate controlled ball movement.

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Strike a light ball upward continuously, using arms, hands, and: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Make up results instead of practising

C. Stop immediately without reflection

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Strike a light ball upward continuously, using arms, hands, and: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Skip a difficult part without asking for help

D. Change answers randomly without a reason

15. [Challenge] Strike a light ball upward continuously, using arms, hands, and: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

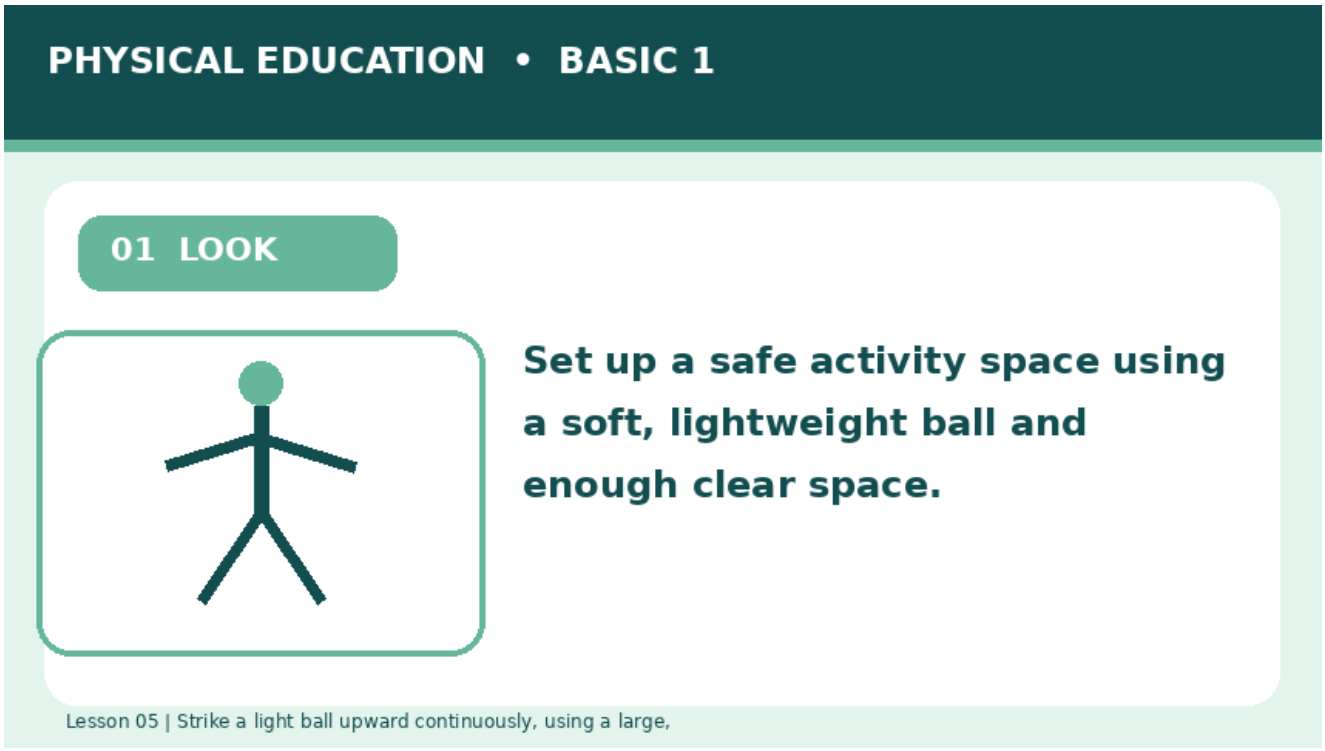

B. Claim expertise without trying the skill

C. Apply the lesson about strike a light ball upward continuously, using arms, hands, and feet. after general and specific warm-ups, demonstrate to to a suitable real-life situation.

D. Use the topic to mislead others

LESSON 05: Strike a light ball upward continuously, using a large,

Goal: Strike a light ball upward continuously, using a large, short-handled paddle. After general and specific warm-ups, demonstrate to

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Strike a light ball upward continuously, using a large, short-handled paddle. After general and specific warm-ups, demonstrate to.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 05: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Strike a light ball upward continuously, using a large,: What is this lesson mainly about?

A. Strike a light ball upward continuously, using a large, short-handled paddle. After general and specific warm-ups, demonstrate to

B. Ignore the movement task and do only an unrelated game

C. Rush into a demanding activity without warming up

D. Practise unsafe tricks without learning the basic skill

2. [Play] Strike a light ball upward continuously, using a large,: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a slippery or obstructed practice area

C. a soft, lightweight ball and enough clear space

D. a sharp object placed on the sports ground

3. [Play] Strike a light ball upward continuously, using a large,: Which action should come first?

A. Skip all practice and guess the result.

B. Ignore the main task and do something unrelated.

C. Finish before looking at the instructions.

D. Set up a safe activity space using a soft, lightweight ball and enough clear space.

4. [Play] Strike a light ball upward continuously, using a large,: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. safe simple movement and play

D. an unrelated imagined city

5. [Play] Strike a light ball upward continuously, using a large,: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. an unsupported claim with no classroom practice

6. [Challenge] Strike a light ball upward continuously, using a large,: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Only watch others without trying

D. Practise the skill slowly: Strike a light ball upward continuously, using a large, short-handled paddle. After general and specific warm-ups, demonstrate to.

7. [Challenge] Strike a light ball upward continuously, using a large,: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Practise at a short distance; check your direction and try again with feedback.

D. Give a guess without trying the activity

8. [Challenge] Strike a light ball upward continuously, using a large,: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. a random answer with no supporting detail

C. accurate controlled ball movement

D. an unrelated example that does not test the skill

9. [Challenge] Strike a light ball upward continuously, using a large,: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

B. Ignore the teacher’s safety instructions.

C. Take unnecessary risks to finish first.

D. Do the activity without considering other people.

10. [Challenge] Strike a light ball upward continuously, using a large,: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Complete a different lesson instead

C. Practise at a short distance; check your direction and try again with feedback.

D. Avoid the stated task and its materials

11. [Challenge] Strike a light ball upward continuously, using a large,: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

C. The topic can be completed without observing or practising

D. Learning means only guessing and never checking

12. [Challenge] Strike a light ball upward continuously, using a large,: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can avoid answering questions

13. [Challenge] Strike a light ball upward continuously, using a large,: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Stop immediately without reflection

C. Make up results instead of practising

D. Repeat the same error without checking feedback

14. [Challenge] Strike a light ball upward continuously, using a large,: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen accurate controlled ball movement.

D. Change answers randomly without a reason

15. [Challenge] Strike a light ball upward continuously, using a large,: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

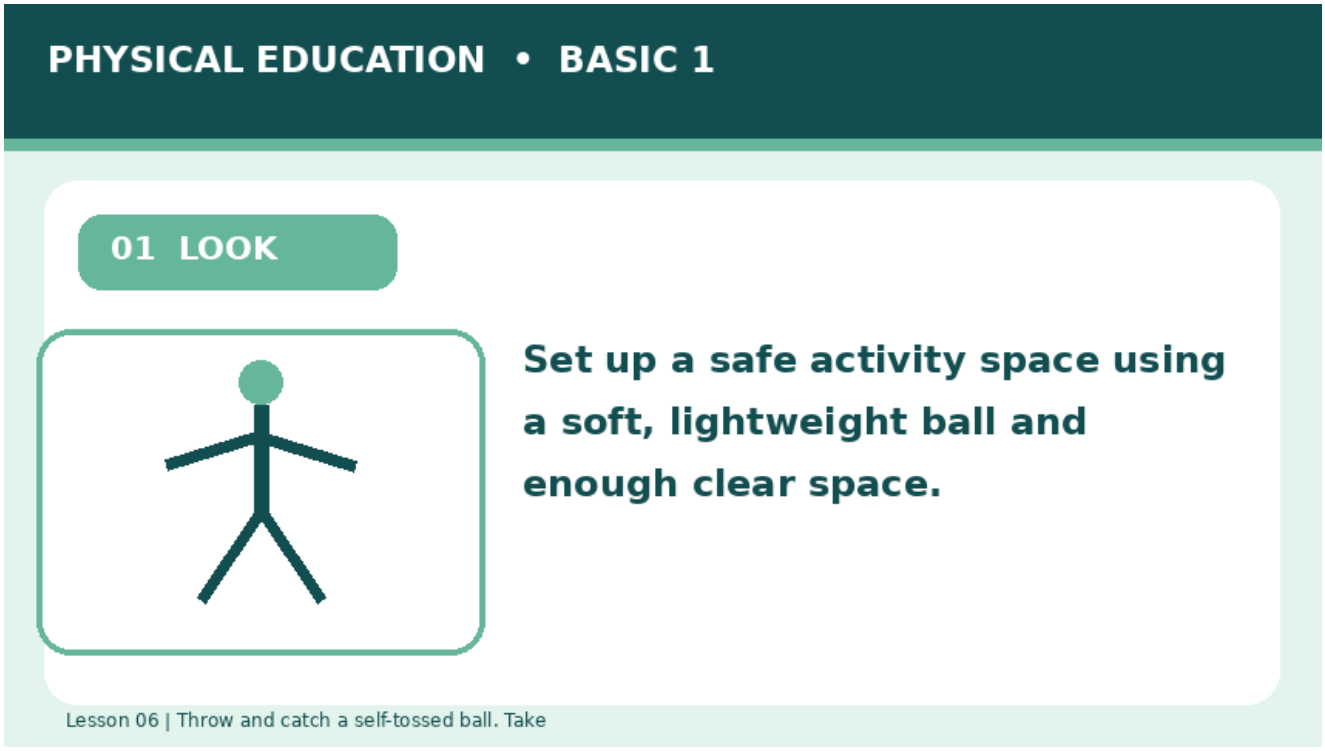

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Apply the lesson about strike a light ball upward continuously, using a large, short-handled paddle. after general and specific warm-ups, demonstrate to to a suitable real-life situation.

LESSON 06: Throw and catch a self-tossed ball. Take

Goal: Throw and catch a self-tossed ball. Take

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Throw and catch a self-tossed ball. Take.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 06: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Throw and catch a self-tossed ball. Take: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Throw and catch a self-tossed ball. Take

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] Throw and catch a self-tossed ball. Take: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. heavy unsafe equipment in a crowded space

C. a sharp object placed on the sports ground

D. a soft, lightweight ball and enough clear space

3. [Play] Throw and catch a self-tossed ball. Take: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Set up a safe activity space using a soft, lightweight ball and enough clear space.

C. Skip all practice and guess the result.

D. Finish before looking at the instructions.

4. [Play] Throw and catch a self-tossed ball. Take: Which setting does this grade use?

A. an unrelated imagined city

B. safe simple movement and play

C. only a future space colony

D. a topic unrelated to the current class

5. [Play] Throw and catch a self-tossed ball. Take: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. an unsupported claim with no classroom practice

6. [Challenge] Throw and catch a self-tossed ball. Take: Which action comes after the opening step?

A. Skip to marking before learning

B. Only watch others without trying

C. Practise the skill slowly: Throw and catch a self-tossed ball. Take.

D. Change to an unrelated lesson immediately

7. [Challenge] Throw and catch a self-tossed ball. Take: Which practice completes the three lesson stages?

A. Practise at a short distance; check your direction and try again with feedback.

B. Leave the task unfinished without explaining

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] Throw and catch a self-tossed ball. Take: What counts as good evidence of learning here?

A. accurate controlled ball movement

B. an unrelated example that does not test the skill

C. a random answer with no supporting detail

D. an opinion without observation or practice

9. [Challenge] Throw and catch a self-tossed ball. Take: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Do the activity without considering other people.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Take unnecessary risks to finish first.

10. [Challenge] Throw and catch a self-tossed ball. Take: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Practise at a short distance; check your direction and try again with feedback.

C. Avoid the stated task and its materials

D. Copy another learner’s response without trying

11. [Challenge] Throw and catch a self-tossed ball. Take: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. The topic can be completed without observing or practising

C. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

D. Learning means only guessing and never checking

12. [Challenge] Throw and catch a self-tossed ball. Take: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can finish without showing your work

13. [Challenge] Throw and catch a self-tossed ball. Take: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Stop immediately without reflection

C. Make up results instead of practising

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Throw and catch a self-tossed ball. Take: How should a learner improve after feedback?

A. Revisit the steps and strengthen accurate controlled ball movement.

B. Ignore all comments and leave the task incomplete

C. Skip a difficult part without asking for help

D. Change answers randomly without a reason

15. [Challenge] Throw and catch a self-tossed ball. Take: Which choice would show responsible use of today’s skill?

A. Apply the lesson about throw and catch a self-tossed ball. take to a suitable real-life situation.

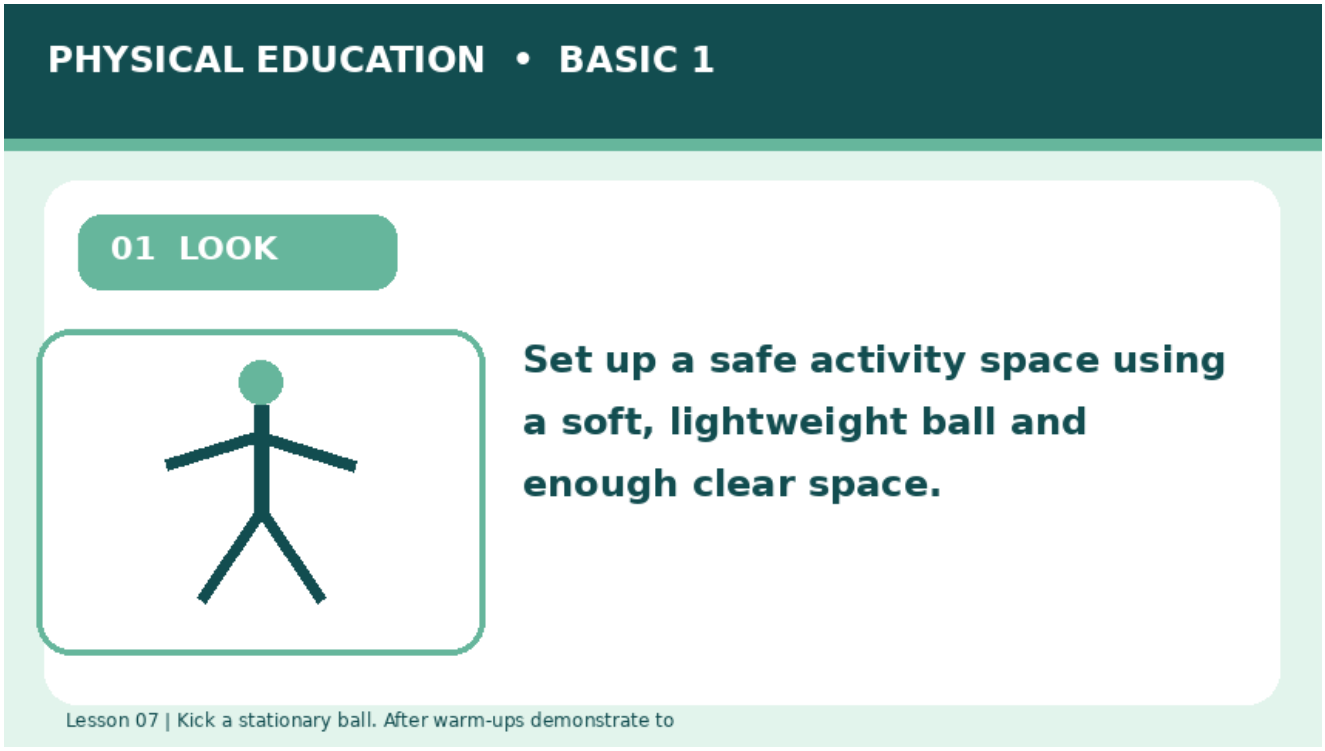

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Claim expertise without trying the skill

LESSON 07: Kick a stationary ball. After warm-ups demonstrate to

Goal: Kick a stationary ball. After warm-ups demonstrate to

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Kick a stationary ball. After warm-ups demonstrate to.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 07: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Kick a stationary ball. After warm-ups demonstrate to: What is this lesson mainly about?

A. Kick a stationary ball. After warm-ups demonstrate to

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] Kick a stationary ball. After warm-ups demonstrate to: What useful learning material or support is listed?

A. a soft, lightweight ball and enough clear space

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Kick a stationary ball. After warm-ups demonstrate to: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using a soft, lightweight ball and enough clear space.

C. Ignore the main task and do something unrelated.

D. Finish before looking at the instructions.

4. [Play] Kick a stationary ball. After warm-ups demonstrate to: Which setting does this grade use?

A. safe simple movement and play

B. a topic unrelated to the current class

C. an unrelated imagined city

D. only a future space colony

5. [Play] Kick a stationary ball. After warm-ups demonstrate to: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. a response that does not show the lesson skill

6. [Challenge] Kick a stationary ball. After warm-ups demonstrate to: Which action comes after the opening step?

A. Only watch others without trying

B. Practise the skill slowly: Kick a stationary ball. After warm-ups demonstrate to.

C. Skip to marking before learning

D. Change to an unrelated lesson immediately

7. [Challenge] Kick a stationary ball. After warm-ups demonstrate to: Which practice completes the three lesson stages?

A. Practise at a short distance; check your direction and try again with feedback.

B. Give a guess without trying the activity

C. Leave the task unfinished without explaining

D. Stop after reading the title

8. [Challenge] Kick a stationary ball. After warm-ups demonstrate to: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. a random answer with no supporting detail

C. an unrelated example that does not test the skill

D. accurate controlled ball movement

9. [Challenge] Kick a stationary ball. After warm-ups demonstrate to: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

B. Ignore the teacher’s safety instructions.

C. Do the activity without considering other people.

D. Take unnecessary risks to finish first.

10. [Challenge] Kick a stationary ball. After warm-ups demonstrate to: Which classroom activity helps apply the lesson?

A. Practise at a short distance; check your direction and try again with feedback.

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Avoid the stated task and its materials

11. [Challenge] Kick a stationary ball. After warm-ups demonstrate to: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] Kick a stationary ball. After warm-ups demonstrate to: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can avoid answering questions

13. [Challenge] Kick a stationary ball. After warm-ups demonstrate to: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Make up results instead of practising

D. Repeat the same error without checking feedback

14. [Challenge] Kick a stationary ball. After warm-ups demonstrate to: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen accurate controlled ball movement.

D. Ignore all comments and leave the task incomplete

15. [Challenge] Kick a stationary ball. After warm-ups demonstrate to: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

B. Use the topic to mislead others

C. Apply the lesson about kick a stationary ball. after warm-ups demonstrate to to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 08: Move the ball forward while dribbling with the hand and with the

Goal: Move the ball forward while dribbling with the hand and with the foot by varying the amount of force (push).

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Move the ball forward while dribbling with the hand and with the foot by varying the amount of force (push).

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 08: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Move the ball forward while dribbling with the hand and with the: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Move the ball forward while dribbling with the hand and with the foot by varying the amount of force (push).

C. Rush into a demanding activity without warming up

D. Practise unsafe tricks without learning the basic skill

2. [Play] Move the ball forward while dribbling with the hand and with the: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a soft, lightweight ball and enough clear space

C. a sharp object placed on the sports ground

D. a slippery or obstructed practice area

3. [Play] Move the ball forward while dribbling with the hand and with the: Which action should come first?

A. Set up a safe activity space using a soft, lightweight ball and enough clear space.

B. Finish before looking at the instructions.

C. Skip all practice and guess the result.

D. Ignore the main task and do something unrelated.

4. [Play] Move the ball forward while dribbling with the hand and with the: Which setting does this grade use?

A. only a future space colony

B. an unrelated imagined city

C. safe simple movement and play

D. a topic unrelated to the current class

5. [Play] Move the ball forward while dribbling with the hand and with the: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. a response that does not show the lesson skill

6. [Challenge] Move the ball forward while dribbling with the hand and with the: Which action comes after the opening step?

A. Skip to marking before learning

B. Only watch others without trying

C. Change to an unrelated lesson immediately

D. Practise the skill slowly: Move the ball forward while dribbling with the hand and with the foot by varying the amount of force (push).

7. [Challenge] Move the ball forward while dribbling with the hand and with the: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Give a guess without trying the activity

C. Stop after reading the title

D. Practise at a short distance; check your direction and try again with feedback.

8. [Challenge] Move the ball forward while dribbling with the hand and with the: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. accurate controlled ball movement

D. an opinion without observation or practice

9. [Challenge] Move the ball forward while dribbling with the hand and with the: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Do the activity without considering other people.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Move the ball forward while dribbling with the hand and with the: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Complete a different lesson instead

C. Practise at a short distance; check your direction and try again with feedback.

D. Avoid the stated task and its materials

11. [Challenge] Move the ball forward while dribbling with the hand and with the: Which explanation best supports this lesson?

A. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

B. The lesson has no connection to life or skills

C. The topic can be completed without observing or practising

D. Learning means only guessing and never checking

12. [Challenge] Move the ball forward while dribbling with the hand and with the: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether your work demonstrates accurate controlled ball movement.

13. [Challenge] Move the ball forward while dribbling with the hand and with the: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Move the ball forward while dribbling with the hand and with the: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Ignore all comments and leave the task incomplete

C. Revisit the steps and strengthen accurate controlled ball movement.

D. Skip a difficult part without asking for help

15. [Challenge] Move the ball forward while dribbling with the hand and with the: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

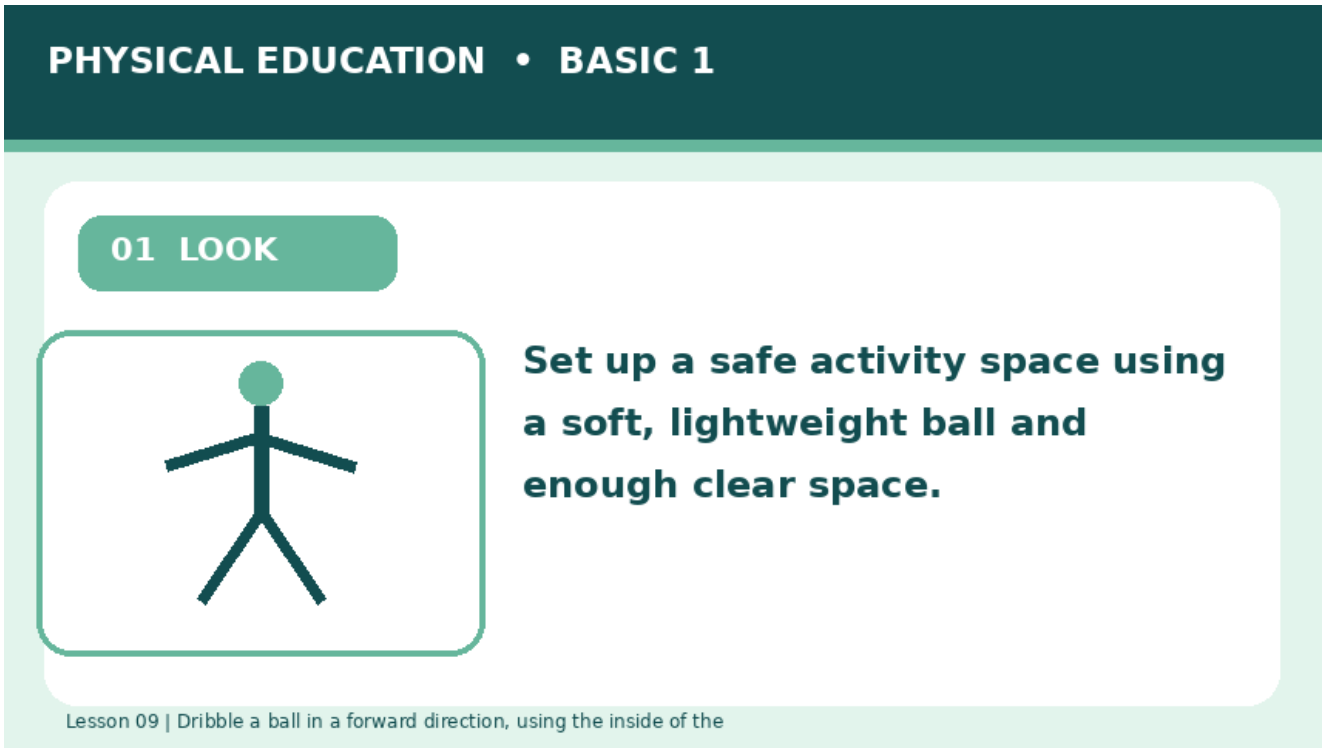

B. Apply the lesson about move the ball forward while dribbling with the hand and with the foot by varying the amount of force (push) to a suitable real-life situation.

C. Use the topic to mislead others

D. Avoid explaining how the skill could be used

LESSON 09: Dribble a ball in a forward direction, using the inside of the

Goal: Dribble a ball in a forward direction, using the inside of the foot. Arrange cones in a straight line after warm-ups. Place a ball about 50cm in front of

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Dribble a ball in a forward direction, using the inside of the foot. Arrange cones in a straight line after warm-ups. Place a ball about 50cm in front of.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 09: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Dribble a ball in a forward direction, using the inside of the: What is this lesson mainly about?

A. Dribble a ball in a forward direction, using the inside of the foot. Arrange cones in a straight line after warm-ups. Place a ball about 50cm in front of

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] Dribble a ball in a forward direction, using the inside of the: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a soft, lightweight ball and enough clear space

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] Dribble a ball in a forward direction, using the inside of the: Which action should come first?

A. Set up a safe activity space using a soft, lightweight ball and enough clear space.

B. Skip all practice and guess the result.

C. Ignore the main task and do something unrelated.

D. Finish before looking at the instructions.

4. [Play] Dribble a ball in a forward direction, using the inside of the: Which setting does this grade use?

A. a topic unrelated to the current class

B. safe simple movement and play

C. an unrelated imagined city

D. only a future space colony

5. [Play] Dribble a ball in a forward direction, using the inside of the: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a response that does not show the lesson skill

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] Dribble a ball in a forward direction, using the inside of the: Which action comes after the opening step?

A. Skip to marking before learning

B. Only watch others without trying

C. Change to an unrelated lesson immediately

D. Practise the skill slowly: Dribble a ball in a forward direction, using the inside of the foot. Arrange cones in a straight line after warm-ups. Place a ball about 50cm in front of.

7. [Challenge] Dribble a ball in a forward direction, using the inside of the: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Practise at a short distance; check your direction and try again with feedback.

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] Dribble a ball in a forward direction, using the inside of the: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. accurate controlled ball movement

C. an opinion without observation or practice

D. a random answer with no supporting detail

9. [Challenge] Dribble a ball in a forward direction, using the inside of the: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Ignore the teacher’s safety instructions.

C. Take unnecessary risks to finish first.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

10. [Challenge] Dribble a ball in a forward direction, using the inside of the: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy another learner’s response without trying

C. Practise at a short distance; check your direction and try again with feedback.

D. Avoid the stated task and its materials

11. [Challenge] Dribble a ball in a forward direction, using the inside of the: Which explanation best supports this lesson?

A. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] Dribble a ball in a forward direction, using the inside of the: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Dribble a ball in a forward direction, using the inside of the: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Make up results instead of practising

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Stop immediately without reflection

14. [Challenge] Dribble a ball in a forward direction, using the inside of the: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Ignore all comments and leave the task incomplete

D. Skip a difficult part without asking for help

15. [Challenge] Dribble a ball in a forward direction, using the inside of the: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

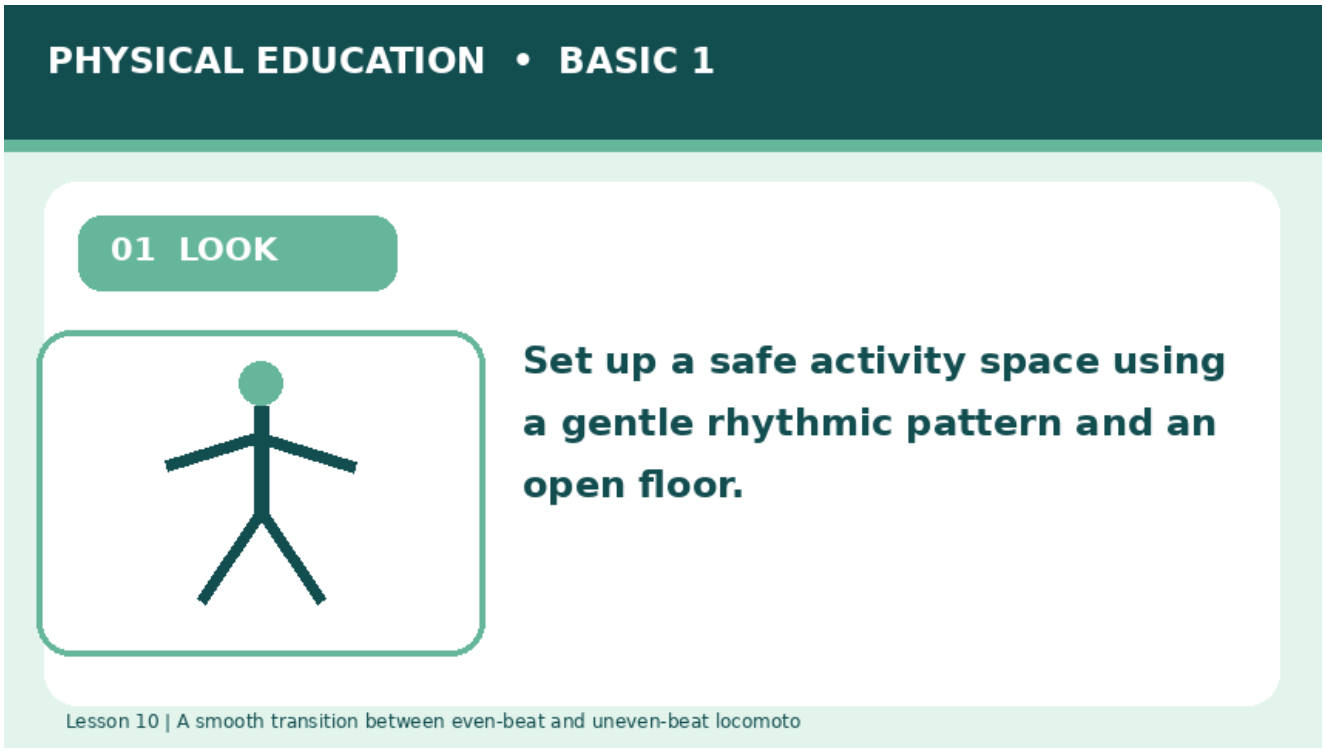

B. Apply the lesson about dribble a ball in a forward direction, using the inside of the foot. arrange cones in a straight line after warm-ups. place a ball about 50cm in front of to a suitable real-life situation.

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 10: A smooth transition between even-beat and uneven-beat locomotor

Goal: Demonstrate a smooth transition between even-beat and uneven-beat locomotor skills in response to music or an external beat.

Learn it

Rhythm helps a group coordinate movements in time. Listening and careful spacing support safe group practice.

Useful material: a gentle rhythmic pattern and an open floor

Do it in three steps

1. Set up a safe activity space using a gentle rhythmic pattern and an open floor.

2. Practise the skill slowly: Demonstrate a smooth transition between even-beat and uneven-beat locomotor skills in response to music or an external beat.

3. Copy a short movement phrase, then make a safe variation with a partner.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid collisions or uncomfortable movements.

Try this: Copy a short movement phrase, then make a safe variation with a partner.

Show your learning: coordinated steps and respectful space. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 10: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] A smooth transition between even-beat and uneven-beat locomotor: What is this lesson mainly about?

A. Demonstrate a smooth transition between even-beat and uneven-beat locomotor skills in response to music or an external beat.

B. Ignore the movement task and do only an unrelated game

C. Rush into a demanding activity without warming up

D. Practise unsafe tricks without learning the basic skill

2. [Play] A smooth transition between even-beat and uneven-beat locomotor: What useful learning material or support is listed?

A. a gentle rhythmic pattern and an open floor

B. a sharp object placed on the sports ground

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] A smooth transition between even-beat and uneven-beat locomotor: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Set up a safe activity space using a gentle rhythmic pattern and an open floor.

D. Finish before looking at the instructions.

4. [Play] A smooth transition between even-beat and uneven-beat locomotor: Which setting does this grade use?

A. only a future space colony

B. a topic unrelated to the current class

C. an unrelated imagined city

D. safe simple movement and play

5. [Play] A smooth transition between even-beat and uneven-beat locomotor: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. an unsupported claim with no classroom practice

6. [Challenge] A smooth transition between even-beat and uneven-beat locomotor: Which action comes after the opening step?

A. Skip to marking before learning

B. Practise the skill slowly: Demonstrate a smooth transition between even-beat and uneven-beat locomotor skills in response to music or an external beat.

C. Change to an unrelated lesson immediately

D. Only watch others without trying

7. [Challenge] A smooth transition between even-beat and uneven-beat locomotor: Which practice completes the three lesson stages?

A. Copy a short movement phrase, then make a safe variation with a partner.

B. Give a guess without trying the activity

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] A smooth transition between even-beat and uneven-beat locomotor: What counts as good evidence of learning here?

A. coordinated steps and respectful space

B. an opinion without observation or practice

C. a random answer with no supporting detail

D. an unrelated example that does not test the skill

9. [Challenge] A smooth transition between even-beat and uneven-beat locomotor: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid collisions or uncomfortable movements.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] A smooth transition between even-beat and uneven-beat locomotor: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy a short movement phrase, then make a safe variation with a partner.

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] A smooth transition between even-beat and uneven-beat locomotor: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. The lesson has no connection to life or skills

D. Rhythm helps a group coordinate movements in time. Listening and careful spacing support safe group practice.

12. [Challenge] A smooth transition between even-beat and uneven-beat locomotor: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether your work demonstrates coordinated steps and respectful space.

13. [Challenge] A smooth transition between even-beat and uneven-beat locomotor: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Repeat the same error without checking feedback

C. Make up results instead of practising

D. Stop immediately without reflection

14. [Challenge] A smooth transition between even-beat and uneven-beat locomotor: How should a learner improve after feedback?

A. Revisit the steps and strengthen coordinated steps and respectful space.

B. Skip a difficult part without asking for help

C. Change answers randomly without a reason

D. Ignore all comments and leave the task incomplete

15. [Challenge] A smooth transition between even-beat and uneven-beat locomotor: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

B. Avoid explaining how the skill could be used

C. Apply the lesson about demonstrate a smooth transition between even-beat and uneven-beat locomotor skills in response to music or an external beat to a suitable real-life situation.

D. Use the topic to mislead others

LESSON 11: Personal space Give

Goal: Identify personal space Give

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify personal space Give.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 11: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Personal space Give: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Identify personal space Give

2. [Play] Personal space Give: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a slippery or obstructed practice area

D. space markers and suitable lightweight equipment

3. [Play] Personal space Give: Which action should come first?

A. Finish before looking at the instructions.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Skip all practice and guess the result.

D. Ignore the main task and do something unrelated.

4. [Play] Personal space Give: Which setting does this grade use?

A. safe simple movement and play

B. only a future space colony

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] Personal space Give: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] Personal space Give: Which action comes after the opening step?

A. Skip to marking before learning

B. Only watch others without trying

C. Practise the skill slowly: Identify personal space Give.

D. Change to an unrelated lesson immediately

7. [Challenge] Personal space Give: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Give a guess without trying the activity

8. [Challenge] Personal space Give: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. a random answer with no supporting detail

C. an unrelated example that does not test the skill

D. careful, safe movement

9. [Challenge] Personal space Give: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

C. Take unnecessary risks to finish first.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Personal space Give: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] Personal space Give: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. The lesson has no connection to life or skills

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] Personal space Give: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can finish without showing your work

C. Whether you can ignore the agreed task

D. Whether your work demonstrates careful, safe movement.

13. [Challenge] Personal space Give: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Repeat the same error without checking feedback

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Stop immediately without reflection

14. [Challenge] Personal space Give: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen careful, safe movement.

D. Ignore all comments and leave the task incomplete

15. [Challenge] Personal space Give: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

B. Claim expertise without trying the skill

C. Apply the lesson about identify personal space give to a suitable real-life situation.

D. Use the topic to mislead others

LESSON 12: The key differences and similarities in jog and a run, a hop and a

Goal: Explain the key differences and similarities in jog and a run, a hop and a jump, and a gallop and a slide.

Learn it

A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

Useful material: chalk-marked standing space and a soft, clear landing area

Do it in three steps

1. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

2. Practise the skill slowly: Explain the key differences and similarities in jog and a run, a hop and a jump, and a gallop and a slide.

3. Practise take-off, landing, then describe which landing felt more balanced.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

Try this: Practise take-off, landing, then describe which landing felt more balanced.

Show your learning: controlled take-off and safe landing. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 12: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The key differences and similarities in jog and a run, a hop and a: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Practise unsafe tricks without learning the basic skill

C. Explain the key differences and similarities in jog and a run, a hop and a jump, and a gallop and a slide.

D. Rush into a demanding activity without warming up

2. [Play] The key differences and similarities in jog and a run, a hop and a: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. chalk-marked standing space and a soft, clear landing area

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] The key differences and similarities in jog and a run, a hop and a: Which action should come first?

A. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

B. Ignore the main task and do something unrelated.

C. Finish before looking at the instructions.

D. Skip all practice and guess the result.

4. [Play] The key differences and similarities in jog and a run, a hop and a: Which setting does this grade use?

A. a topic unrelated to the current class

B. safe simple movement and play

C. an unrelated imagined city

D. only a future space colony

5. [Play] The key differences and similarities in jog and a run, a hop and a: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a response that does not show the lesson skill

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] The key differences and similarities in jog and a run, a hop and a: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Only watch others without trying

C. Skip to marking before learning

D. Practise the skill slowly: Explain the key differences and similarities in jog and a run, a hop and a jump, and a gallop and a slide.

7. [Challenge] The key differences and similarities in jog and a run, a hop and a: Which practice completes the three lesson stages?

A. Practise take-off, landing, then describe which landing felt more balanced.

B. Give a guess without trying the activity

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] The key differences and similarities in jog and a run, a hop and a: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an opinion without observation or practice

C. controlled take-off and safe landing

D. an unrelated example that does not test the skill

9. [Challenge] The key differences and similarities in jog and a run, a hop and a: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

B. Ignore the teacher’s safety instructions.

C. Take unnecessary risks to finish first.

D. Do the activity without considering other people.

10. [Challenge] The key differences and similarities in jog and a run, a hop and a: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy another learner’s response without trying

C. Practise take-off, landing, then describe which landing felt more balanced.

D. Avoid the stated task and its materials

11. [Challenge] The key differences and similarities in jog and a run, a hop and a: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

D. Learning means only guessing and never checking

12. [Challenge] The key differences and similarities in jog and a run, a hop and a: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates controlled take-off and safe landing.

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] The key differences and similarities in jog and a run, a hop and a: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Repeat the same error without checking feedback

C. Make up results instead of practising

D. Stop immediately without reflection

14. [Challenge] The key differences and similarities in jog and a run, a hop and a: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Change answers randomly without a reason

D. Revisit the steps and strengthen controlled take-off and safe landing.

15. [Challenge] The key differences and similarities in jog and a run, a hop and a: Which choice would show responsible use of today’s skill?

A. Apply the lesson about explain the key differences and similarities in jog and a run, a hop and a jump, and a gallop and a slide to a suitable real-life situation.

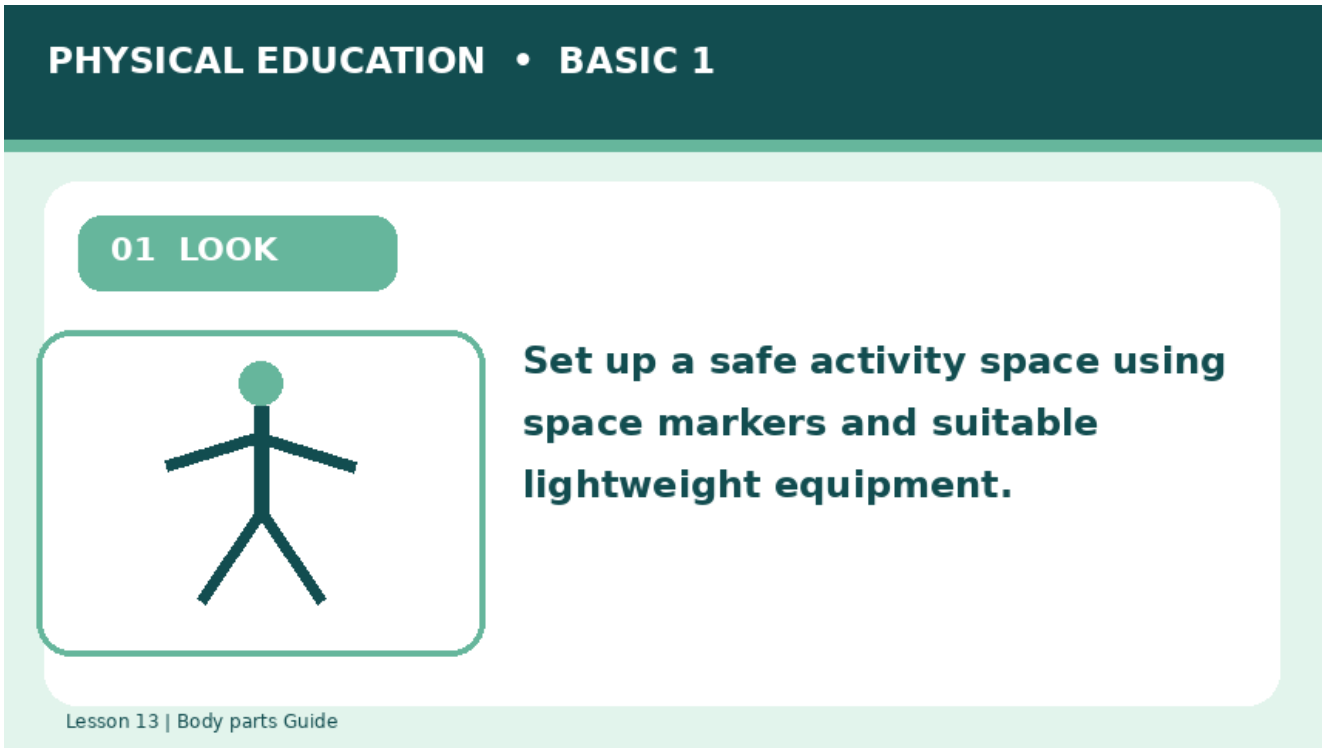

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Avoid explaining how the skill could be used

LESSON 13: Body parts Guide

Goal: Identify body parts Guide

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify body parts Guide.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 13: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Body parts Guide: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Identify body parts Guide

D. Practise unsafe tricks without learning the basic skill

2. [Play] Body parts Guide: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. heavy unsafe equipment in a crowded space

C. a slippery or obstructed practice area

D. a sharp object placed on the sports ground

3. [Play] Body parts Guide: Which action should come first?

A. Skip all practice and guess the result.

B. Finish before looking at the instructions.

C. Set up a safe activity space using space markers and suitable lightweight equipment.

D. Ignore the main task and do something unrelated.

4. [Play] Body parts Guide: Which setting does this grade use?

A. an unrelated imagined city

B. only a future space colony

C. a topic unrelated to the current class

D. safe simple movement and play

5. [Play] Body parts Guide: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] Body parts Guide: Which action comes after the opening step?

A. Skip to marking before learning

B. Practise the skill slowly: Identify body parts Guide.

C. Change to an unrelated lesson immediately

D. Only watch others without trying

7. [Challenge] Body parts Guide: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Leave the task unfinished without explaining

D. Stop after reading the title

8. [Challenge] Body parts Guide: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. an unrelated example that does not test the skill

C. careful, safe movement

D. a random answer with no supporting detail

9. [Challenge] Body parts Guide: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

B. Ignore the teacher’s safety instructions.

C. Take unnecessary risks to finish first.

D. Do the activity without considering other people.

10. [Challenge] Body parts Guide: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy another learner’s response without trying

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Avoid the stated task and its materials

11. [Challenge] Body parts Guide: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The lesson has no connection to life or skills

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. The topic can be completed without observing or practising

12. [Challenge] Body parts Guide: What should a partner help you check?

A. Whether your work demonstrates careful, safe movement.

B. Whether you can avoid answering questions

C. Whether you can finish without showing your work

D. Whether you can ignore the agreed task

13. [Challenge] Body parts Guide: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Body parts Guide: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Change answers randomly without a reason

C. Revisit the steps and strengthen careful, safe movement.

D. Ignore all comments and leave the task incomplete

15. [Challenge] Body parts Guide: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

B. Avoid explaining how the skill could be used

C. Apply the lesson about identify body parts guide to a suitable real-life situation.

D. Use the topic to mislead others

LESSON 14: Different opportunities to use striking skills. Lead

Goal: Identify different opportunities to use striking skills. Lead

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify different opportunities to use striking skills. Lead.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 14: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Different opportunities to use striking skills. Lead: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Identify different opportunities to use striking skills. Lead

C. Ignore the movement task and do only an unrelated game

D. Practise unsafe tricks without learning the basic skill

2. [Play] Different opportunities to use striking skills. Lead: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Different opportunities to use striking skills. Lead: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Finish before looking at the instructions.

D. Skip all practice and guess the result.

4. [Play] Different opportunities to use striking skills. Lead: Which setting does this grade use?

A. only a future space colony

B. safe simple movement and play

C. a topic unrelated to the current class

D. an unrelated imagined city

5. [Play] Different opportunities to use striking skills. Lead: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. a demonstrated movement or fitness task with self-assessment

C. an unsupported claim with no classroom practice

D. an unrelated picture with no explanation

6. [Challenge] Different opportunities to use striking skills. Lead: Which action comes after the opening step?

A. Practise the skill slowly: Identify different opportunities to use striking skills. Lead.

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Only watch others without trying

7. [Challenge] Different opportunities to use striking skills. Lead: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Give a guess without trying the activity

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Stop after reading the title

8. [Challenge] Different opportunities to use striking skills. Lead: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an unrelated example that does not test the skill

C. careful, safe movement

D. an opinion without observation or practice

9. [Challenge] Different opportunities to use striking skills. Lead: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] Different opportunities to use striking skills. Lead: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Copy another learner’s response without trying

C. Avoid the stated task and its materials

D. Complete a different lesson instead

11. [Challenge] Different opportunities to use striking skills. Lead: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] Different opportunities to use striking skills. Lead: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can finish without showing your work

C. Whether you can avoid answering questions

D. Whether your work demonstrates careful, safe movement.

13. [Challenge] Different opportunities to use striking skills. Lead: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Make up results instead of practising

D. Repeat the same error without checking feedback

14. [Challenge] Different opportunities to use striking skills. Lead: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Change answers randomly without a reason

C. Revisit the steps and strengthen careful, safe movement.

D. Skip a difficult part without asking for help

15. [Challenge] Different opportunities to use striking skills. Lead: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

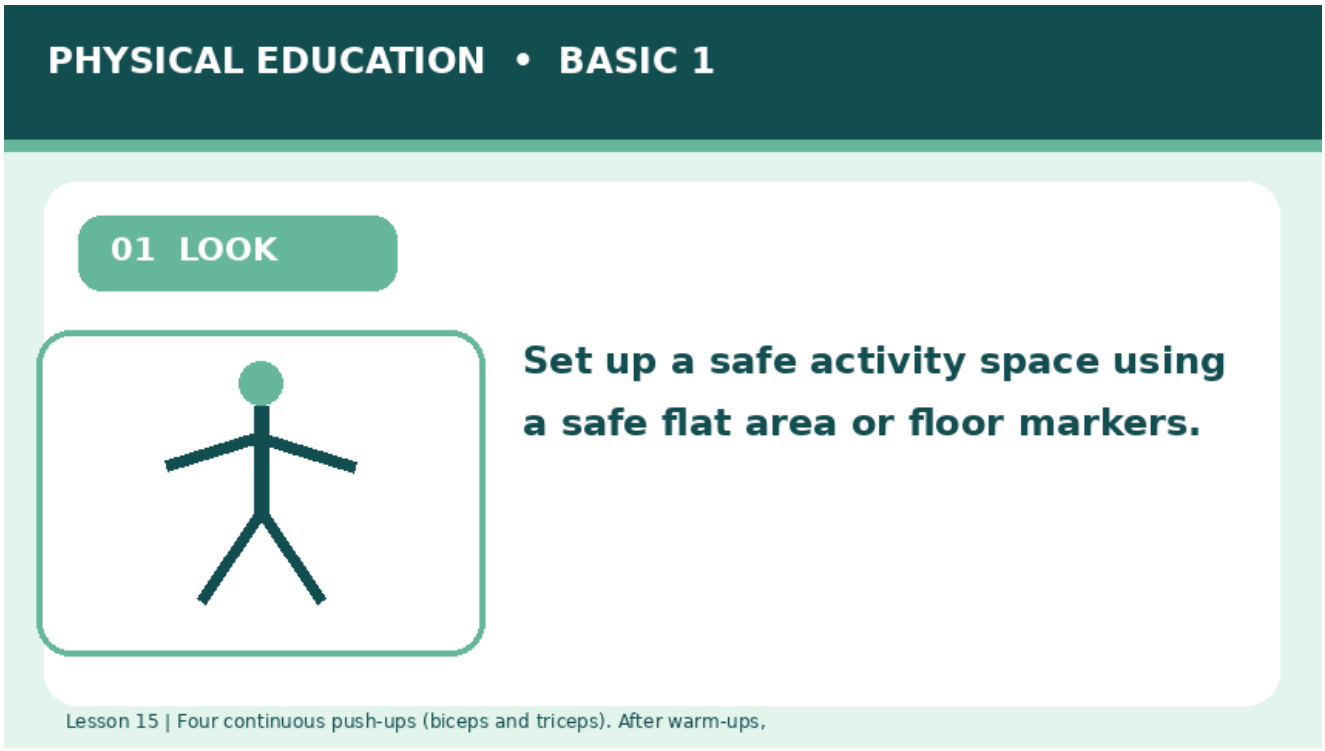

B. Apply the lesson about identify different opportunities to use striking skills. lead to a suitable real-life situation.

C. Use the topic to mislead others

D. Claim expertise without trying the skill

LESSON 15: Four continuous push-ups (biceps and triceps). After warm-ups, lie

Goal: Perform four continuous push-ups (biceps and triceps). After warm-ups, lie on the ground face down with hands supporting chest. Extend the

Learn it

Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

Useful material: a safe flat area or floor markers

Do it in three steps

1. Set up a safe activity space using a safe flat area or floor markers.

2. Practise the skill slowly: Perform four continuous push-ups (biceps and triceps). After warm-ups, lie on the ground face down with hands supporting chest. Extend the.

3. Hold a comfortable balance briefly and explain what made it steady.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

Try this: Hold a comfortable balance briefly and explain what made it steady.

Show your learning: stable body position. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 15: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Four continuous push-ups (biceps and triceps). After warm-ups, lie: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Practise unsafe tricks without learning the basic skill

C. Rush into a demanding activity without warming up

D. Perform four continuous push-ups (biceps and triceps). After warm-ups, lie on the ground face down with hands supporting chest. Extend the

2. [Play] Four continuous push-ups (biceps and triceps). After warm-ups, lie: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a safe flat area or floor markers

C. heavy unsafe equipment in a crowded space

D. a sharp object placed on the sports ground

3. [Play] Four continuous push-ups (biceps and triceps). After warm-ups, lie: Which action should come first?

A. Skip all practice and guess the result.

B. Ignore the main task and do something unrelated.

C. Finish before looking at the instructions.

D. Set up a safe activity space using a safe flat area or floor markers.

4. [Play] Four continuous push-ups (biceps and triceps). After warm-ups, lie: Which setting does this grade use?

A. an unrelated imagined city

B. a topic unrelated to the current class

C. only a future space colony

D. safe simple movement and play

5. [Play] Four continuous push-ups (biceps and triceps). After warm-ups, lie: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. a demonstrated movement or fitness task with self-assessment

C. an unsupported claim with no classroom practice

D. an unrelated picture with no explanation

6. [Challenge] Four continuous push-ups (biceps and triceps). After warm-ups, lie: Which action comes after the opening step?

A. Practise the skill slowly: Perform four continuous push-ups (biceps and triceps). After warm-ups, lie on the ground face down with hands supporting chest. Extend the.

B. Only watch others without trying

C. Skip to marking before learning

D. Change to an unrelated lesson immediately

7. [Challenge] Four continuous push-ups (biceps and triceps). After warm-ups, lie: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Hold a comfortable balance briefly and explain what made it steady.

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] Four continuous push-ups (biceps and triceps). After warm-ups, lie: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an opinion without observation or practice

C. an unrelated example that does not test the skill

D. stable body position

9. [Challenge] Four continuous push-ups (biceps and triceps). After warm-ups, lie: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Do the activity without considering other people.

C. Take unnecessary risks to finish first.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

10. [Challenge] Four continuous push-ups (biceps and triceps). After warm-ups, lie: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Hold a comfortable balance briefly and explain what made it steady.

C. Avoid the stated task and its materials

D. Complete a different lesson instead

11. [Challenge] Four continuous push-ups (biceps and triceps). After warm-ups, lie: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

D. Learning means only guessing and never checking

12. [Challenge] Four continuous push-ups (biceps and triceps). After warm-ups, lie: What should a partner help you check?

A. Whether your work demonstrates stable body position.

B. Whether you can ignore the agreed task

C. Whether you can finish without showing your work

D. Whether you can avoid answering questions

13. [Challenge] Four continuous push-ups (biceps and triceps). After warm-ups, lie: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Stop immediately without reflection

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Repeat the same error without checking feedback

14. [Challenge] Four continuous push-ups (biceps and triceps). After warm-ups, lie: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Ignore all comments and leave the task incomplete

C. Change answers randomly without a reason

D. Revisit the steps and strengthen stable body position.

15. [Challenge] Four continuous push-ups (biceps and triceps). After warm-ups, lie: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

B. Claim expertise without trying the skill

C. Apply the lesson about perform four continuous push-ups (biceps and triceps). after warm-ups, lie on the ground face down with hands supporting chest. extend the to a suitable real-life situation.

D. Use the topic to mislead others

LESSON 16: Human body parts. Use pictures and videos to help

Goal: Identify human body parts. Use pictures and videos to help

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify human body parts. Use pictures and videos to help.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 16: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Human body parts. Use pictures and videos to help: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Ignore the movement task and do only an unrelated game

C. Identify human body parts. Use pictures and videos to help

D. Rush into a demanding activity without warming up

2. [Play] Human body parts. Use pictures and videos to help: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. heavy unsafe equipment in a crowded space

C. a sharp object placed on the sports ground

D. space markers and suitable lightweight equipment

3. [Play] Human body parts. Use pictures and videos to help: Which action should come first?

A. Set up a safe activity space using space markers and suitable lightweight equipment.

B. Skip all practice and guess the result.

C. Finish before looking at the instructions.

D. Ignore the main task and do something unrelated.

4. [Play] Human body parts. Use pictures and videos to help: Which setting does this grade use?

A. only a future space colony

B. an unrelated imagined city

C. safe simple movement and play

D. a topic unrelated to the current class

5. [Play] Human body parts. Use pictures and videos to help: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] Human body parts. Use pictures and videos to help: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Only watch others without trying

D. Practise the skill slowly: Identify human body parts. Use pictures and videos to help.

7. [Challenge] Human body parts. Use pictures and videos to help: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Stop after reading the title

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Give a guess without trying the activity

8. [Challenge] Human body parts. Use pictures and videos to help: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. careful, safe movement

D. an opinion without observation or practice

9. [Challenge] Human body parts. Use pictures and videos to help: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

B. Take unnecessary risks to finish first.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Human body parts. Use pictures and videos to help: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy another learner’s response without trying

C. Avoid the stated task and its materials

D. Observe a demonstration, practise slowly, then reflect on one improvement.

11. [Challenge] Human body parts. Use pictures and videos to help: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Learning means only guessing and never checking

C. The topic can be completed without observing or practising

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] Human body parts. Use pictures and videos to help: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether your work demonstrates careful, safe movement.

D. Whether you can avoid answering questions

13. [Challenge] Human body parts. Use pictures and videos to help: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Repeat the same error without checking feedback

C. Stop immediately without reflection

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Human body parts. Use pictures and videos to help: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Change answers randomly without a reason

C. Skip a difficult part without asking for help

D. Revisit the steps and strengthen careful, safe movement.

15. [Challenge] Human body parts. Use pictures and videos to help: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

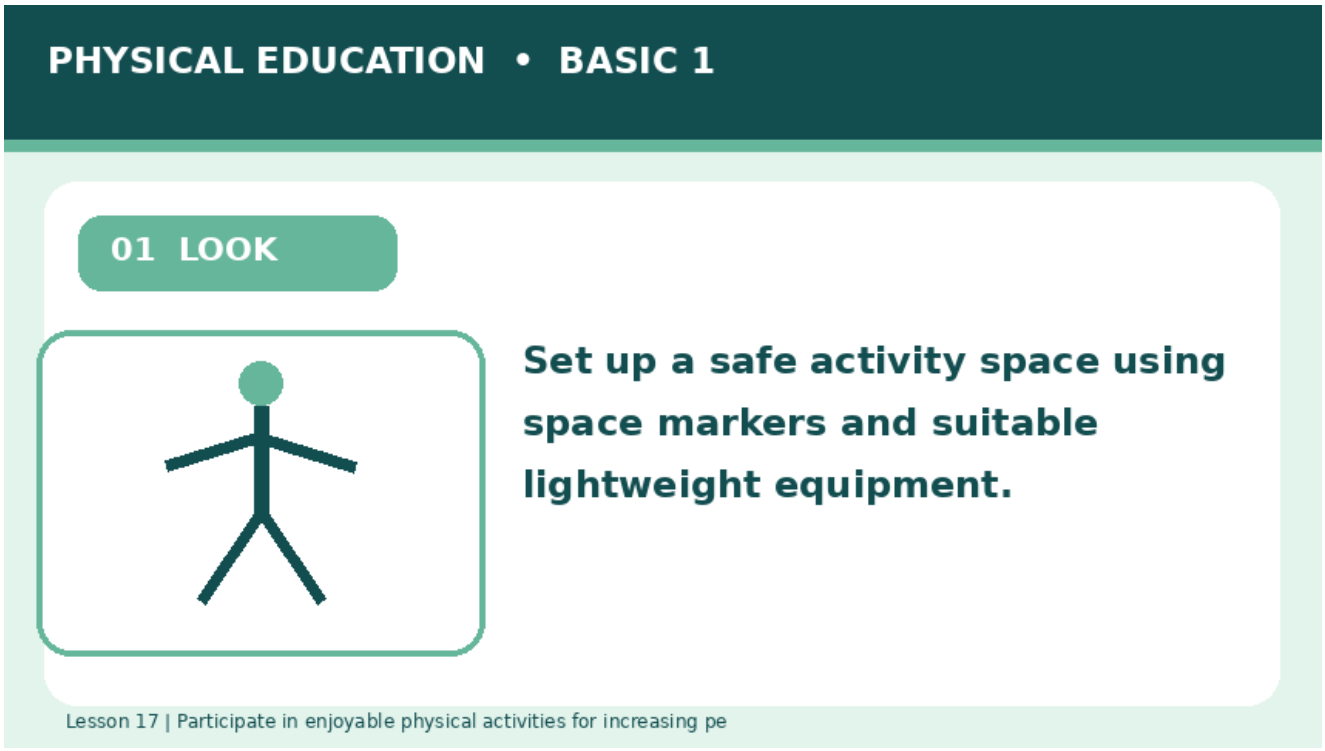

B. Avoid explaining how the skill could be used

C. Apply the lesson about identify human body parts. use pictures and videos to help to a suitable real-life situation.

D. Claim expertise without trying the skill

LESSON 17: Participate in enjoyable physical activities for increasing periods

Goal: Participate in enjoyable physical activities for increasing periods of time. Observe and record the activities

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Participate in enjoyable physical activities for increasing periods of time. Observe and record the activities.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 17: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Participate in enjoyable physical activities for increasing periods: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Rush into a demanding activity without warming up

C. Participate in enjoyable physical activities for increasing periods of time. Observe and record the activities

D. Ignore the movement task and do only an unrelated game

2. [Play] Participate in enjoyable physical activities for increasing periods: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a sharp object placed on the sports ground

C. space markers and suitable lightweight equipment

D. heavy unsafe equipment in a crowded space

3. [Play] Participate in enjoyable physical activities for increasing periods: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Finish before looking at the instructions.

D. Skip all practice and guess the result.

4. [Play] Participate in enjoyable physical activities for increasing periods: Which setting does this grade use?

A. an unrelated imagined city

B. only a future space colony

C. safe simple movement and play

D. a topic unrelated to the current class

5. [Play] Participate in enjoyable physical activities for increasing periods: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] Participate in enjoyable physical activities for increasing periods: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Only watch others without trying

D. Practise the skill slowly: Participate in enjoyable physical activities for increasing periods of time. Observe and record the activities.

7. [Challenge] Participate in enjoyable physical activities for increasing periods: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Stop after reading the title

C. Give a guess without trying the activity

D. Observe a demonstration, practise slowly, then reflect on one improvement.

8. [Challenge] Participate in enjoyable physical activities for increasing periods: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an unrelated example that does not test the skill

C. an opinion without observation or practice

D. careful, safe movement

9. [Challenge] Participate in enjoyable physical activities for increasing periods: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Ignore the teacher’s safety instructions.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Take unnecessary risks to finish first.

10. [Challenge] Participate in enjoyable physical activities for increasing periods: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] Participate in enjoyable physical activities for increasing periods: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] Participate in enjoyable physical activities for increasing periods: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether your work demonstrates careful, safe movement.

D. Whether you can finish without showing your work

13. [Challenge] Participate in enjoyable physical activities for increasing periods: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Stop immediately without reflection

C. Make up results instead of practising

D. Repeat the same error without checking feedback

14. [Challenge] Participate in enjoyable physical activities for increasing periods: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Revisit the steps and strengthen careful, safe movement.

C. Change answers randomly without a reason

D. Skip a difficult part without asking for help

15. [Challenge] Participate in enjoyable physical activities for increasing periods: Which choice would show responsible use of today’s skill?

A. Apply the lesson about participate in enjoyable physical activities for increasing periods of time. observe and record the activities to a suitable real-life situation.

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Claim expertise without trying the skill

LESSON 18: The purpose of warming up before physical activity and cooling down

Goal: Explain the purpose of warming up before physical activity and cooling down after physical activity.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Explain the purpose of warming up before physical activity and cooling down after physical activity.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 18: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The purpose of warming up before physical activity and cooling down: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Explain the purpose of warming up before physical activity and cooling down after physical activity.

2. [Play] The purpose of warming up before physical activity and cooling down: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a sharp object placed on the sports ground

C. space markers and suitable lightweight equipment

D. heavy unsafe equipment in a crowded space

3. [Play] The purpose of warming up before physical activity and cooling down: Which action should come first?

A. Finish before looking at the instructions.

B. Skip all practice and guess the result.

C. Ignore the main task and do something unrelated.

D. Set up a safe activity space using space markers and suitable lightweight equipment.

4. [Play] The purpose of warming up before physical activity and cooling down: Which setting does this grade use?

A. only a future space colony

B. safe simple movement and play

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] The purpose of warming up before physical activity and cooling down: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. an unrelated picture with no explanation

D. a response that does not show the lesson skill

6. [Challenge] The purpose of warming up before physical activity and cooling down: Which action comes after the opening step?

A. Skip to marking before learning

B. Only watch others without trying

C. Change to an unrelated lesson immediately

D. Practise the skill slowly: Explain the purpose of warming up before physical activity and cooling down after physical activity.

7. [Challenge] The purpose of warming up before physical activity and cooling down: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Give a guess without trying the activity

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Stop after reading the title

8. [Challenge] The purpose of warming up before physical activity and cooling down: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. careful, safe movement

C. an unrelated example that does not test the skill

D. an opinion without observation or practice

9. [Challenge] The purpose of warming up before physical activity and cooling down: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Ignore the teacher’s safety instructions.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Do the activity without considering other people.

10. [Challenge] The purpose of warming up before physical activity and cooling down: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Copy another learner’s response without trying

C. Avoid the stated task and its materials

D. Complete a different lesson instead

11. [Challenge] The purpose of warming up before physical activity and cooling down: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. Learning means only guessing and never checking

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] The purpose of warming up before physical activity and cooling down: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether your work demonstrates careful, safe movement.

D. Whether you can finish without showing your work

13. [Challenge] The purpose of warming up before physical activity and cooling down: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Make up results instead of practising

14. [Challenge] The purpose of warming up before physical activity and cooling down: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Ignore all comments and leave the task incomplete

C. Revisit the steps and strengthen careful, safe movement.

D. Change answers randomly without a reason

15. [Challenge] The purpose of warming up before physical activity and cooling down: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

B. Claim expertise without trying the skill

C. Apply the lesson about explain the purpose of warming up before physical activity and cooling down after physical activity to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 19: The characteristics of sharing and cooperation in physical activity

Goal: Demonstrate the characteristics of sharing and cooperation in physical activity.

Learn it

Fair play means respecting rules, teammates and opponents. A good team encourages everybody to participate.

Useful material: a small-group game and agreed rules

Do it in three steps

1. Set up a safe activity space using a small-group game and agreed rules.

2. Practise the skill slowly: Demonstrate the characteristics of sharing and cooperation in physical activity.

3. Practise a short game; show how to encourage someone and resolve a disagreement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Adjust the game so all learners can take part.

Try this: Practise a short game; show how to encourage someone and resolve a disagreement.

Show your learning: respectful participation. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 19: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The characteristics of sharing and cooperation in physical activity: What is this lesson mainly about?

A. Demonstrate the characteristics of sharing and cooperation in physical activity.

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] The characteristics of sharing and cooperation in physical activity: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. heavy unsafe equipment in a crowded space

C. a sharp object placed on the sports ground

D. a small-group game and agreed rules

3. [Play] The characteristics of sharing and cooperation in physical activity: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using a small-group game and agreed rules.

C. Ignore the main task and do something unrelated.

D. Finish before looking at the instructions.

4. [Play] The characteristics of sharing and cooperation in physical activity: Which setting does this grade use?

A. safe simple movement and play

B. an unrelated imagined city

C. a topic unrelated to the current class

D. only a future space colony

5. [Play] The characteristics of sharing and cooperation in physical activity: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. a response that does not show the lesson skill

6. [Challenge] The characteristics of sharing and cooperation in physical activity: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Practise the skill slowly: Demonstrate the characteristics of sharing and cooperation in physical activity.

C. Only watch others without trying

D. Skip to marking before learning

7. [Challenge] The characteristics of sharing and cooperation in physical activity: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Practise a short game; show how to encourage someone and resolve a disagreement.

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] The characteristics of sharing and cooperation in physical activity: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an opinion without observation or practice

C. an unrelated example that does not test the skill

D. respectful participation

9. [Challenge] The characteristics of sharing and cooperation in physical activity: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Adjust the game so all learners can take part.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] The characteristics of sharing and cooperation in physical activity: Which classroom activity helps apply the lesson?

A. Practise a short game; show how to encourage someone and resolve a disagreement.

B. Avoid the stated task and its materials

C. Complete a different lesson instead

D. Copy another learner’s response without trying

11. [Challenge] The characteristics of sharing and cooperation in physical activity: Which explanation best supports this lesson?

A. Fair play means respecting rules, teammates and opponents. A good team encourages everybody to participate.

B. Learning means only guessing and never checking

C. The lesson has no connection to life or skills

D. The topic can be completed without observing or practising

12. [Challenge] The characteristics of sharing and cooperation in physical activity: What should a partner help you check?

A. Whether your work demonstrates respectful participation.

B. Whether you can avoid answering questions

C. Whether you can ignore the agreed task

D. Whether you can finish without showing your work

13. [Challenge] The characteristics of sharing and cooperation in physical activity: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Make up results instead of practising

D. Repeat the same error without checking feedback

14. [Challenge] The characteristics of sharing and cooperation in physical activity: How should a learner improve after feedback?

A. Revisit the steps and strengthen respectful participation.

B. Change answers randomly without a reason

C. Skip a difficult part without asking for help

D. Ignore all comments and leave the task incomplete

15. [Challenge] The characteristics of sharing and cooperation in physical activity: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

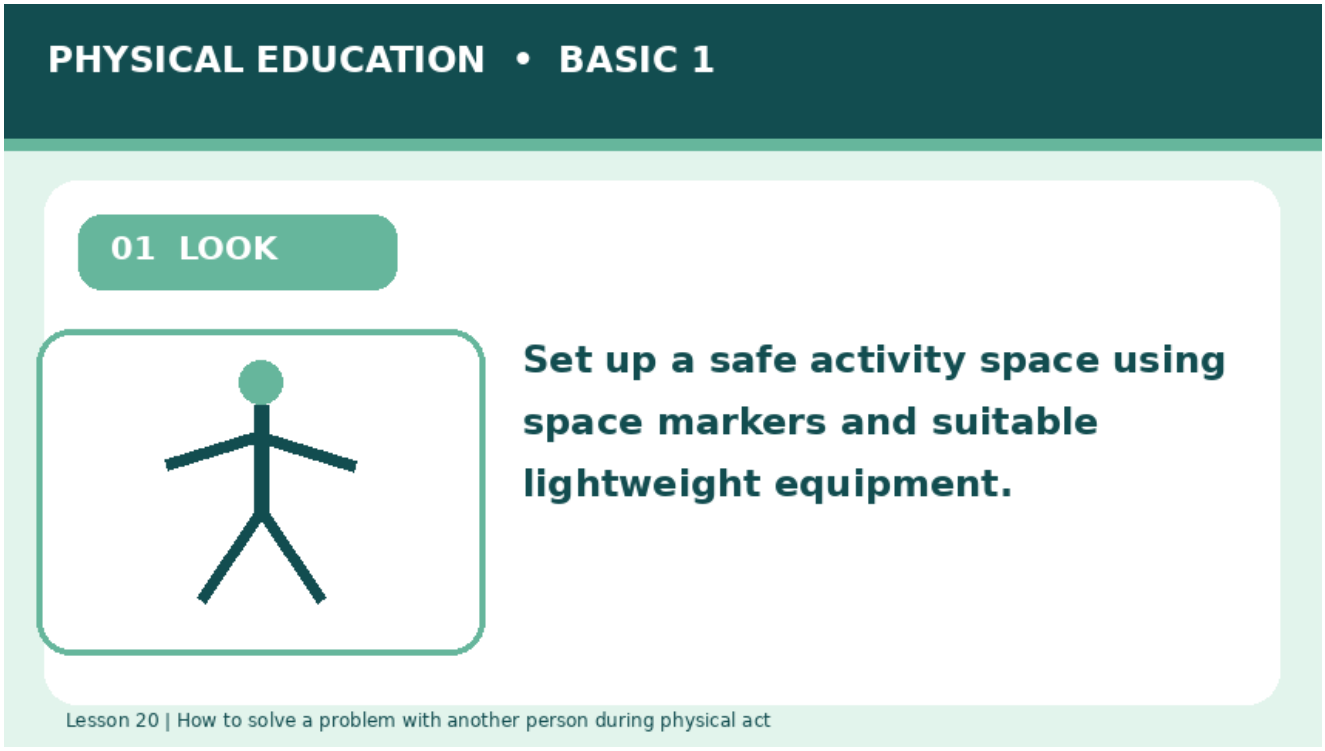

B. Claim expertise without trying the skill

C. Apply the lesson about demonstrate the characteristics of sharing and cooperation in physical activity to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 20: How to solve a problem with another person during physical activity

Goal: Demonstrate how to solve a problem with another person during physical activity.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Demonstrate how to solve a problem with another person during physical activity.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 20: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] How to solve a problem with another person during physical activity: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Demonstrate how to solve a problem with another person during physical activity.

2. [Play] How to solve a problem with another person during physical activity: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. heavy unsafe equipment in a crowded space

C. a slippery or obstructed practice area

D. a sharp object placed on the sports ground

3. [Play] How to solve a problem with another person during physical activity: Which action should come first?

A. Finish before looking at the instructions.

B. Ignore the main task and do something unrelated.

C. Skip all practice and guess the result.

D. Set up a safe activity space using space markers and suitable lightweight equipment.

4. [Play] How to solve a problem with another person during physical activity: Which setting does this grade use?

A. a topic unrelated to the current class

B. safe simple movement and play

C. only a future space colony

D. an unrelated imagined city

5. [Play] How to solve a problem with another person during physical activity: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. an unrelated picture with no explanation

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] How to solve a problem with another person during physical activity: Which action comes after the opening step?

A. Only watch others without trying

B. Skip to marking before learning

C. Practise the skill slowly: Demonstrate how to solve a problem with another person during physical activity.

D. Change to an unrelated lesson immediately

7. [Challenge] How to solve a problem with another person during physical activity: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Leave the task unfinished without explaining

8. [Challenge] How to solve a problem with another person during physical activity: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. careful, safe movement

C. an opinion without observation or practice

D. an unrelated example that does not test the skill

9. [Challenge] How to solve a problem with another person during physical activity: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

C. Take unnecessary risks to finish first.

D. Ignore the teacher’s safety instructions.

10. [Challenge] How to solve a problem with another person during physical activity: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Complete a different lesson instead

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] How to solve a problem with another person during physical activity: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. Learning means only guessing and never checking

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] How to solve a problem with another person during physical activity: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates careful, safe movement.

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] How to solve a problem with another person during physical activity: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Make up results instead of practising

D. Stop immediately without reflection

14. [Challenge] How to solve a problem with another person during physical activity: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Change answers randomly without a reason

C. Revisit the steps and strengthen careful, safe movement.

D. Skip a difficult part without asking for help

15. [Challenge] How to solve a problem with another person during physical activity: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

B. Apply the lesson about demonstrate how to solve a problem with another person during physical activity to a suitable real-life situation.

C. Avoid explaining how the skill could be used

D. Claim expertise without trying the skill
