COMPUTING

Basic 2 — Illustrated Learning Workbook

Learn • Explore • Practise • Play • Challenge

15 lessons | 75 Play questions | 150 Challenge questions

Basic 1–3: supplementary digital literacy progression, not an official NaCCA Computing syllabus.

Course guide and lesson list

Start with the picture and five important ideas. Read the Ghanaian example, complete the practice activity and answer the quizzes. An adult should supervise device use and online activities.

01. Reviewing Computer Devices — Computing Systems

02. Typing Words and Sentences — Computing Systems

03. Clicking and Dragging — Computing Systems

04. Opening the Desktop — Computer Applications

05. Creating a Classwork Folder — Computer Applications

06. Save and Find Work — Computer Applications

07. Collecting Classroom Data — Data and Information

08. Sorting Information — Data and Information

09. Making a Picture Chart — Data and Information

10. Writing a Simple Document — Word Processing

11. Planning a Slide — Presentation

12. Safe Messages and Calls — Internet and Communication

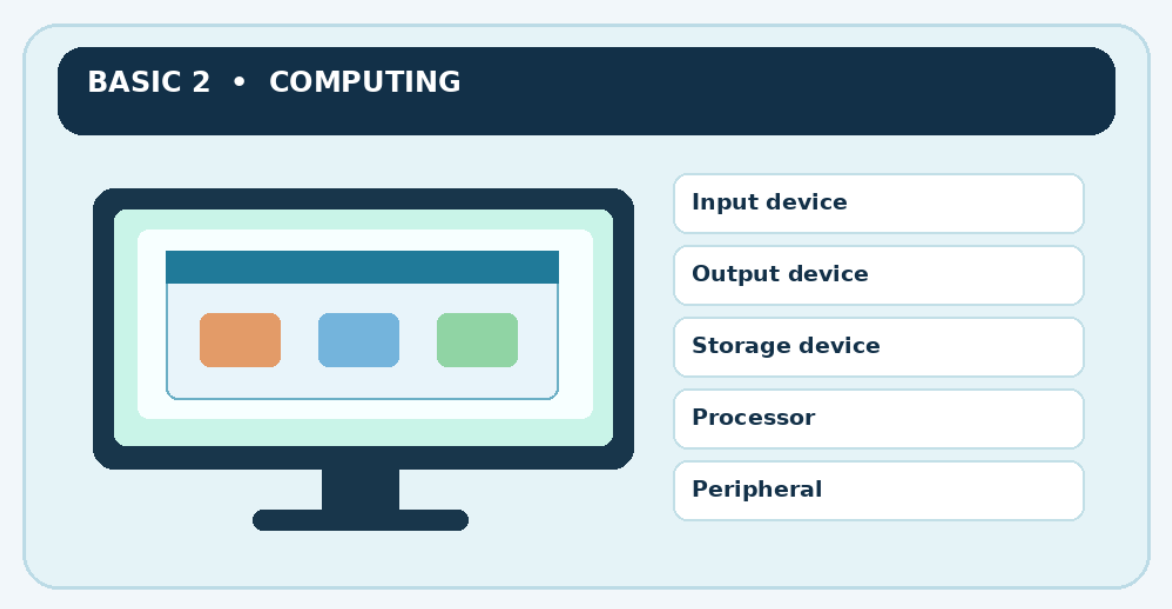

13. Learning With a Browser — Internet and Communication

14. Protecting Private Information — Digital Citizenship

15. My Technology Project — Digital Creation

Lesson 1: Reviewing Computer Devices

We will learn to: Identify, explain and apply the important ideas behind reviewing computer devices.

Five important ideas

Input device: sends information into a computer.

Output device: shows or plays results.

Storage device: keeps digital files.

Processor: helps follow computing instructions.

Peripheral: is an extra device connected to a computer.

Our Ghanaian story

During a tour of the computer room, Kojo had a question about reviewing computer devices. The group discovered that input device sends information into a computer, while output device shows or plays results. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of input device, output device and storage device. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches reviewing computer devices. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-01

Lesson 1: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that sends information into a computer.

A. Storage device B. Processor C. Peripheral D. Input device

2. Your friend says, "This shows or plays results." What is the friend describing?

A. Storage device B. Processor C. Output device D. Input device

3. Which idea from reviewing computer devices matches the clue "keeps digital files"?

A. Output device B. Input device C. Storage device D. Processor

4. The teacher asks for an example that helps follow computing instructions. Which answer fits?

A. Storage device B. Output device C. Processor D. Input device

5. Can you identify the term described here: is an extra device connected to a computer?

A. Processor B. Storage device C. Peripheral D. Output device

CHALLENGE — Think and apply.

1. Which concept matches the explanation "is an extra device connected to a computer" when you review reviewing computer devices?

A. Processor B. Storage device C. Output device D. Peripheral

2. Which answer would fit on a poster beside the words "sends information into a computer"?

A. Processor B. Input device C. Peripheral D. Storage device

3. During a school ICT lesson, Yaw wants to show something that sends information into a computer. Which idea should be labelled?

A. Storage device B. Input device C. Peripheral D. Processor

4. Imagine helping a younger pupil understand something that keeps digital files. Which term would you teach?

A. Input device B. Processor C. Output device D. Storage device

5. At home, Yaw remembers a class rule or concept that helps follow computing instructions. What was it called?

A. Input device B. Output device C. Processor D. Storage device

6. A group makes a display on reviewing computer devices. Their first clue is "shows or plays results". Which label is correct?

A. Processor B. Storage device C. Input device D. Output device

7. At the community learning centre, someone describes a tool or idea that is an extra device connected to a computer. Which one is it?

A. Processor B. Peripheral C. Output device D. Storage device

8. A classmate confuses several ideas about reviewing computer devices. Which one actually shows or plays results?

A. Storage device B. Output device C. Processor D. Input device

9. Your class is solving a practical problem. One useful thing helps follow computing instructions. What is its name?

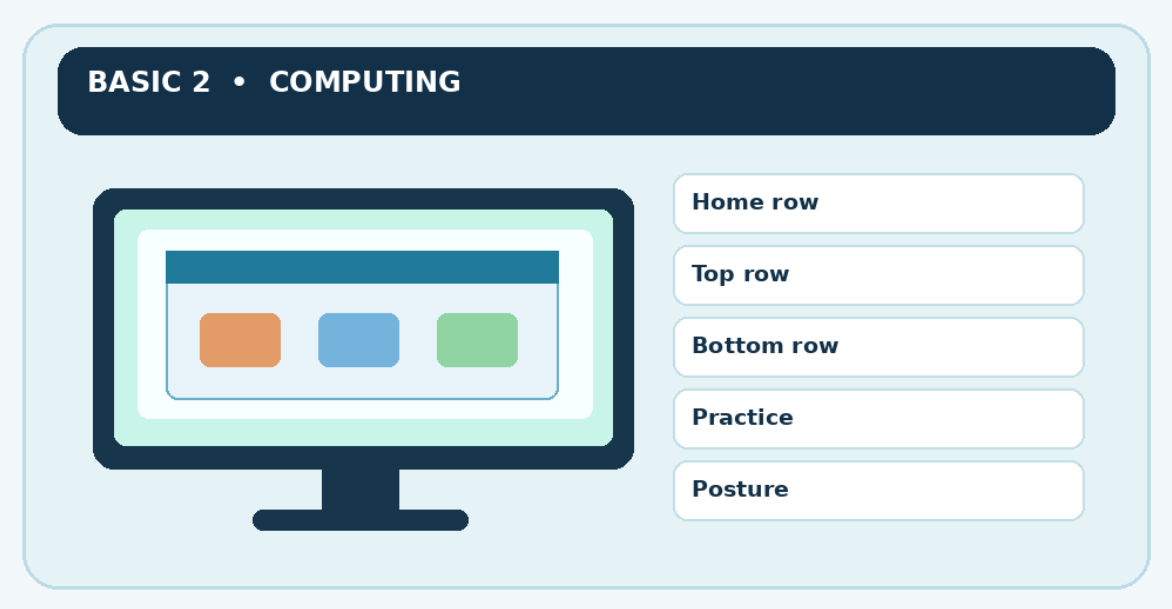

A. Output device B. Input device C. Processor D. Storage device

10. For a short demonstration, the teacher needs an example that keeps digital files. Which choice would you select?

A. Processor B. Output device C. Storage device D. Input device

Lesson 2: Typing Words and Sentences

We will learn to: Identify, explain and apply the important ideas behind typing words and sentences.

Five important ideas

Home row: is the resting row for touch typing.

Top row: contains letters Q through P.

Bottom row: contains letters Z through M.

Practice: helps develop accuracy before speed.

Posture: keeps shoulders relaxed while typing.

Our Ghanaian story

At an ICT typing competition, Esi had a question about typing words and sentences. The group discovered that home row is the resting row for touch typing, while top row contains letters Q through P. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise home row and top row using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches typing words and sentences. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-02

Lesson 2: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that is the resting row for touch typing.

A. Home row B. Bottom row C. Practice D. Posture

2. Your friend says, "This contains letters Q through P." What is the friend describing?

A. Posture B. Home row C. Top row D. Practice

3. Which idea from typing words and sentences matches the clue "contains letters Z through M"?

A. Top row B. Bottom row C. Practice D. Home row

4. The teacher asks for an example that helps develop accuracy before speed. Which answer fits?

A. Home row B. Practice C. Bottom row D. Posture

5. Can you identify the term described here: keeps shoulders relaxed while typing?

A. Top row B. Practice C. Posture D. Bottom row

CHALLENGE — Think and apply.

1. For a short demonstration, the teacher needs an example that contains letters Z through M. Which choice would you select?

A. Top row B. Home row C. Bottom row D. Practice

2. A classmate confuses several ideas about typing words and sentences. Which one actually contains letters Q through P?

A. Practice B. Home row C. Posture D. Top row

3. During a school ICT lesson, Kofi wants to show something that is the resting row for touch typing. Which idea should be labelled?

A. Home row B. Posture C. Practice D. Bottom row

4. A group makes a display on typing words and sentences. Their first clue is "contains letters Q through P". Which label is correct?

A. Practice B. Home row C. Top row D. Posture

5. Which concept matches the explanation "keeps shoulders relaxed while typing" when you review typing words and sentences?

A. Posture B. Bottom row C. Top row D. Practice

6. Which answer would fit on a poster beside the words "is the resting row for touch typing"?

A. Bottom row B. Home row C. Posture D. Practice

7. At home, Kofi remembers a class rule or concept that helps develop accuracy before speed. What was it called?

A. Bottom row B. Practice C. Home row D. Posture

8. Imagine helping a younger pupil understand something that contains letters Z through M. Which term would you teach?

A. Home row B. Top row C. Bottom row D. Practice

9. At the community learning centre, someone describes a tool or idea that keeps shoulders relaxed while typing. Which one is it?

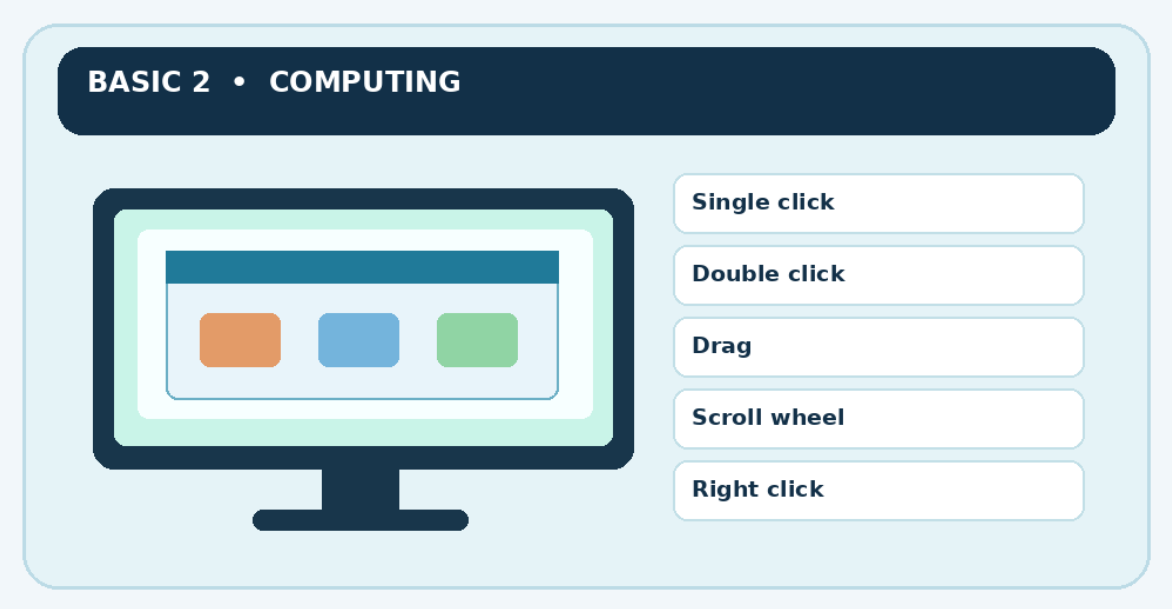

A. Top row B. Posture C. Bottom row D. Practice

10. Your class is solving a practical problem. One useful thing helps develop accuracy before speed. What is its name?

A. Home row B. Practice C. Bottom row D. Posture

Lesson 3: Clicking and Dragging

We will learn to: Identify, explain and apply the important ideas behind clicking and dragging.

Five important ideas

Single click: selects an item.

Double click: opens many files or apps.

Drag: holds the button while moving an item.

Scroll wheel: moves through a page.

Right click: opens a context menu in many systems.

Our Ghanaian story

At a shared classroom computer, Yaw had a question about clicking and dragging. The group discovered that single click selects an item, while double click opens many files or apps. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise single click and double click using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches clicking and dragging. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-03

Lesson 3: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that selects an item.

A. Scroll wheel B. Right click C. Single click D. Drag

2. Your friend says, "This opens many files or apps." What is the friend describing?

A. Double click B. Scroll wheel C. Right click D. Drag

3. Which idea from clicking and dragging matches the clue "holds the button while moving an item"?

A. Drag B. Scroll wheel C. Double click D. Single click

4. The teacher asks for an example that moves through a page. Which answer fits?

A. Drag B. Double click C. Single click D. Scroll wheel

5. Can you identify the term described here: opens a context menu in many systems?

A. Double click B. Scroll wheel C. Right click D. Drag

CHALLENGE — Think and apply.

1. At home, Akosua remembers a class rule or concept that moves through a page. What was it called?

A. Double click B. Single click C. Drag D. Scroll wheel

2. Imagine helping a younger pupil understand something that holds the button while moving an item. Which term would you teach?

A. Drag B. Single click C. Double click D. Scroll wheel

3. Which concept matches the explanation "opens a context menu in many systems" when you review clicking and dragging?

A. Scroll wheel B. Double click C. Right click D. Drag

4. During a school ICT lesson, Akosua wants to show something that selects an item. Which idea should be labelled?

A. Right click B. Single click C. Drag D. Scroll wheel

5. At the community learning centre, someone describes a tool or idea that opens a context menu in many systems. Which one is it?

A. Double click B. Scroll wheel C. Right click D. Drag

6. Which answer would fit on a poster beside the words "selects an item"?

A. Right click B. Scroll wheel C. Drag D. Single click

7. For a short demonstration, the teacher needs an example that holds the button while moving an item. Which choice would you select?

A. Scroll wheel B. Single click C. Double click D. Drag

8. A classmate confuses several ideas about clicking and dragging. Which one actually opens many files or apps?

A. Drag B. Right click C. Double click D. Scroll wheel

9. Your class is solving a practical problem. One useful thing moves through a page. What is its name?

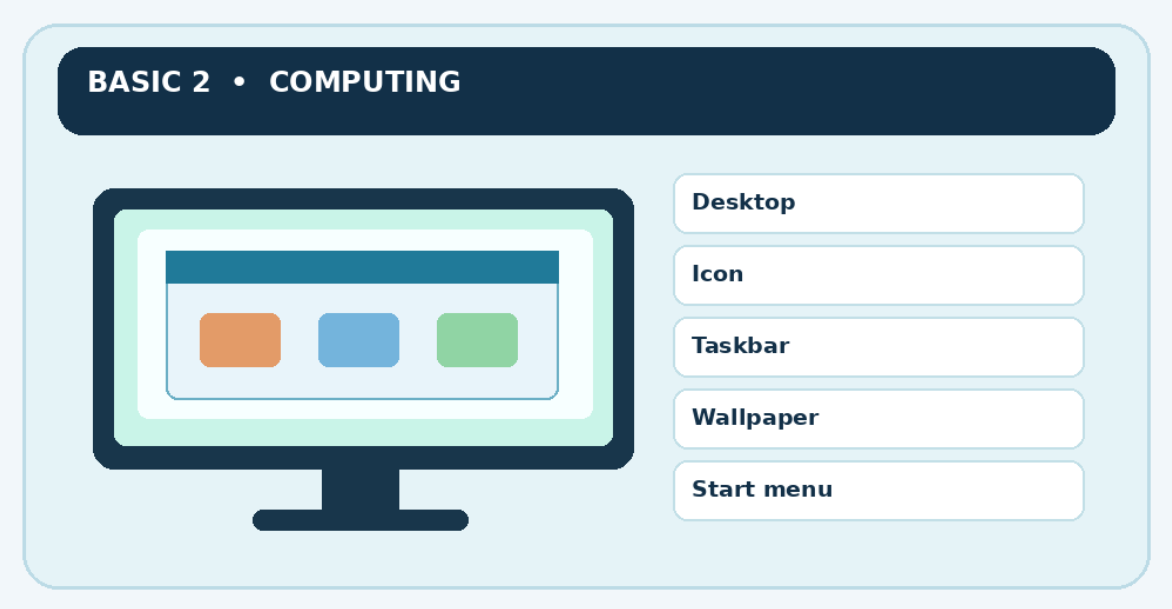

A. Single click B. Double click C. Scroll wheel D. Drag

10. A group makes a display on clicking and dragging. Their first clue is "opens many files or apps". Which label is correct?

A. Right click B. Scroll wheel C. Double click D. Drag

Lesson 4: Opening the Desktop

We will learn to: Identify, explain and apply the important ideas behind opening the desktop.

Five important ideas

Desktop: is a main computer work area.

Icon: is a small picture representing an item.

Taskbar: helps find open apps and tools.

Wallpaper: is the desktop background picture.

Start menu: offers a way to open programs.

Our Ghanaian story

When the computer starts, Abena had a question about opening the desktop. The group discovered that desktop is a main computer work area, while icon is a small picture representing an item. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise desktop and icon using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches opening the desktop. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-04

Lesson 4: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that is a main computer work area.

A. Desktop B. Taskbar C. Icon D. Wallpaper

2. Your friend says, "This is a small picture representing an item." What is the friend describing?

A. Desktop B. Icon C. Start menu D. Wallpaper

3. Which idea from opening the desktop matches the clue "helps find open apps and tools"?

A. Desktop B. Icon C. Taskbar D. Wallpaper

4. The teacher asks for an example that is the desktop background picture. Which answer fits?

A. Icon B. Taskbar C. Wallpaper D. Desktop

5. Can you identify the term described here: offers a way to open programs?

A. Start menu B. Icon C. Taskbar D. Wallpaper

CHALLENGE — Think and apply.

1. At home, Esi remembers a class rule or concept that is the desktop background picture. What was it called?

A. Wallpaper B. Desktop C. Taskbar D. Icon

2. Imagine helping a younger pupil understand something that helps find open apps and tools. Which term would you teach?

A. Taskbar B. Wallpaper C. Desktop D. Icon

3. A classmate confuses several ideas about opening the desktop. Which one actually is a small picture representing an item?

A. Icon B. Desktop C. Wallpaper D. Start menu

4. A group makes a display on opening the desktop. Their first clue is "is a small picture representing an item". Which label is correct?

A. Wallpaper B. Start menu C. Desktop D. Icon

5. Which concept matches the explanation "offers a way to open programs" when you review opening the desktop?

A. Wallpaper B. Start menu C. Icon D. Taskbar

6. Which answer would fit on a poster beside the words "is a main computer work area"?

A. Wallpaper B. Desktop C. Taskbar D. Icon

7. During a school ICT lesson, Esi wants to show something that is a main computer work area. Which idea should be labelled?

A. Taskbar B. Icon C. Desktop D. Wallpaper

8. At the community learning centre, someone describes a tool or idea that offers a way to open programs. Which one is it?

A. Icon B. Wallpaper C. Taskbar D. Start menu

9. For a short demonstration, the teacher needs an example that helps find open apps and tools. Which choice would you select?

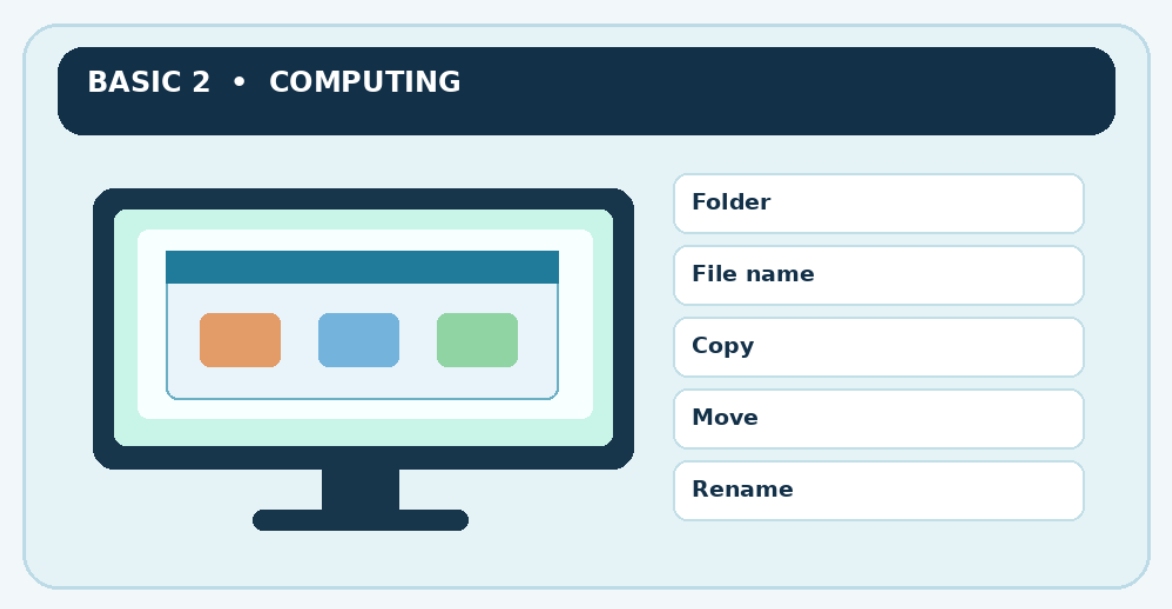

A. Desktop B. Icon C. Taskbar D. Wallpaper

10. Your class is solving a practical problem. One useful thing is the desktop background picture. What is its name?

A. Desktop B. Wallpaper C. Taskbar D. Icon

Lesson 5: Creating a Classwork Folder

We will learn to: Identify, explain and apply the important ideas behind creating a classwork folder.

Five important ideas

Folder: organises related digital files.

File name: helps identify a saved item.

Copy: makes a second version of an item.

Move: changes where an item is stored.

Rename: changes the label without changing the file content.

Our Ghanaian story

While organising class projects, Kofi had a question about creating a classwork folder. The group discovered that folder organises related digital files, while file name helps identify a saved item. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise folder and file name using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches creating a classwork folder. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-05

Lesson 5: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that organises related digital files.

A. Rename B. Move C. File name D. Folder

2. Your friend says, "This helps identify a saved item." What is the friend describing?

A. File name B. Rename C. Copy D. Folder

3. Which idea from creating a classwork folder matches the clue "makes a second version of an item"?

A. Copy B. Move C. Rename D. Folder

4. The teacher asks for an example that changes where an item is stored. Which answer fits?

A. Copy B. Move C. File name D. Rename

5. Can you identify the term described here: changes the label without changing the file content?

A. Rename B. File name C. Folder D. Move

CHALLENGE — Think and apply.

1. For a short demonstration, the teacher needs an example that makes a second version of an item. Which choice would you select?

A. Move B. Rename C. Copy D. Folder

2. At the community learning centre, someone describes a tool or idea that changes the label without changing the file content. Which one is it?

A. File name B. Folder C. Move D. Rename

3. Imagine helping a younger pupil understand something that makes a second version of an item. Which term would you teach?

A. Folder B. Rename C. Copy D. Move

4. Your class is solving a practical problem. One useful thing changes where an item is stored. What is its name?

A. Rename B. Copy C. File name D. Move

5. A classmate confuses several ideas about creating a classwork folder. Which one actually helps identify a saved item?

A. Rename B. Copy C. Folder D. File name

6. Which answer would fit on a poster beside the words "organises related digital files"?

A. Move B. Rename C. File name D. Folder

7. At home, Ama remembers a class rule or concept that changes where an item is stored. What was it called?

A. File name B. Copy C. Move D. Rename

8. A group makes a display on creating a classwork folder. Their first clue is "helps identify a saved item". Which label is correct?

A. Folder B. File name C. Rename D. Copy

9. During a school ICT lesson, Ama wants to show something that organises related digital files. Which idea should be labelled?

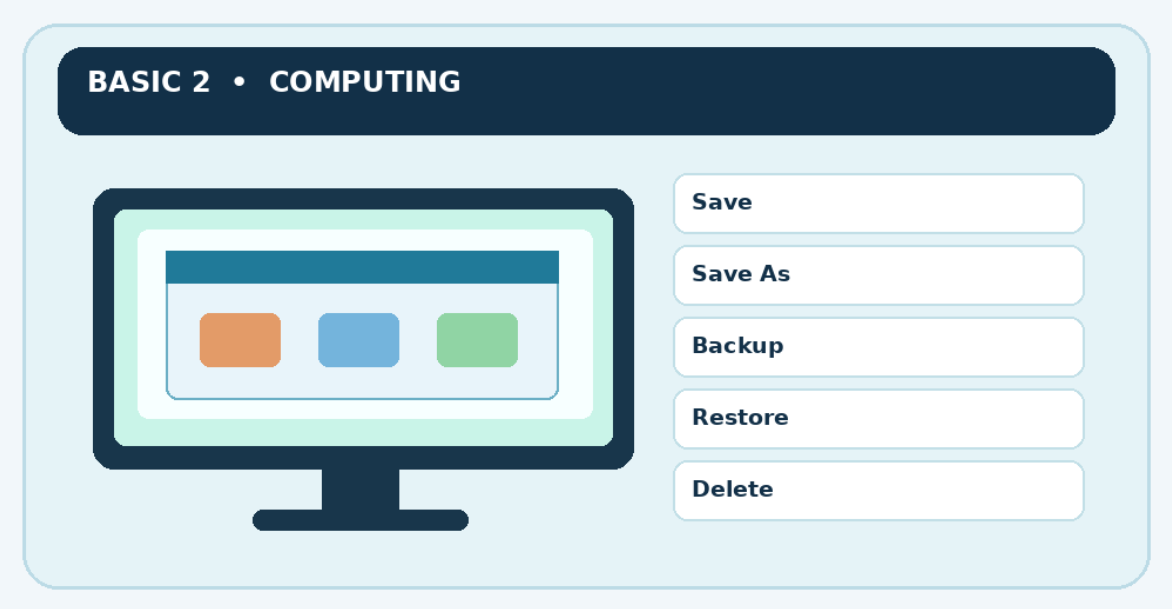

A. Move B. File name C. Rename D. Folder

10. Which concept matches the explanation "changes the label without changing the file content" when you review creating a classwork folder?

A. Rename B. File name C. Folder D. Move

Lesson 6: Save and Find Work

We will learn to: Identify, explain and apply the important ideas behind save and find work.

Five important ideas

Save: stores changes to a document.

Save As: can create a copy with a new name.

Backup: is an extra copy kept for safety.

Restore: brings back a recoverable item.

Delete: removes a selected item.

Our Ghanaian story

After writing a story, Ama had a question about save and find work. The group discovered that save stores changes to a document, while save as can create a copy with a new name. They drew an example and explained it to their classmates.

Try it!

With an adult supervising, practise save and save as using a computer if one is available. Without a computer, draw the screen and explain each step to a partner.

Create and share

Make a colourful, labelled poster that teaches save and find work. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-06

Lesson 6: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that stores changes to a document.

A. Save As B. Restore C. Delete D. Save

2. Your friend says, "This can create a copy with a new name." What is the friend describing?

A. Save B. Save As C. Backup D. Restore

3. Which idea from save and find work matches the clue "is an extra copy kept for safety"?

A. Backup B. Delete C. Restore D. Save As

4. The teacher asks for an example that brings back a recoverable item. Which answer fits?

A. Restore B. Save C. Backup D. Delete

5. Can you identify the term described here: removes a selected item?

A. Save B. Save As C. Delete D. Backup

CHALLENGE — Think and apply.

1. Which concept matches the explanation "removes a selected item" when you review save and find work?

A. Save B. Delete C. Backup D. Save As

2. During a school ICT lesson, Yaw wants to show something that stores changes to a document. Which idea should be labelled?

A. Delete B. Save As C. Restore D. Save

3. Your class is solving a practical problem. One useful thing brings back a recoverable item. What is its name?

A. Save B. Delete C. Backup D. Restore

4. A group makes a display on save and find work. Their first clue is "can create a copy with a new name". Which label is correct?

A. Restore B. Save As C. Save D. Backup

5. For a short demonstration, the teacher needs an example that is an extra copy kept for safety. Which choice would you select?

A. Restore B. Save As C. Backup D. Delete

6. Which answer would fit on a poster beside the words "stores changes to a document"?

A. Delete B. Save As C. Save D. Restore

7. Imagine helping a younger pupil understand something that is an extra copy kept for safety. Which term would you teach?

A. Delete B. Backup C. Restore D. Save As

8. A classmate confuses several ideas about save and find work. Which one actually can create a copy with a new name?

A. Backup B. Restore C. Save As D. Save

9. At the community learning centre, someone describes a tool or idea that removes a selected item. Which one is it?

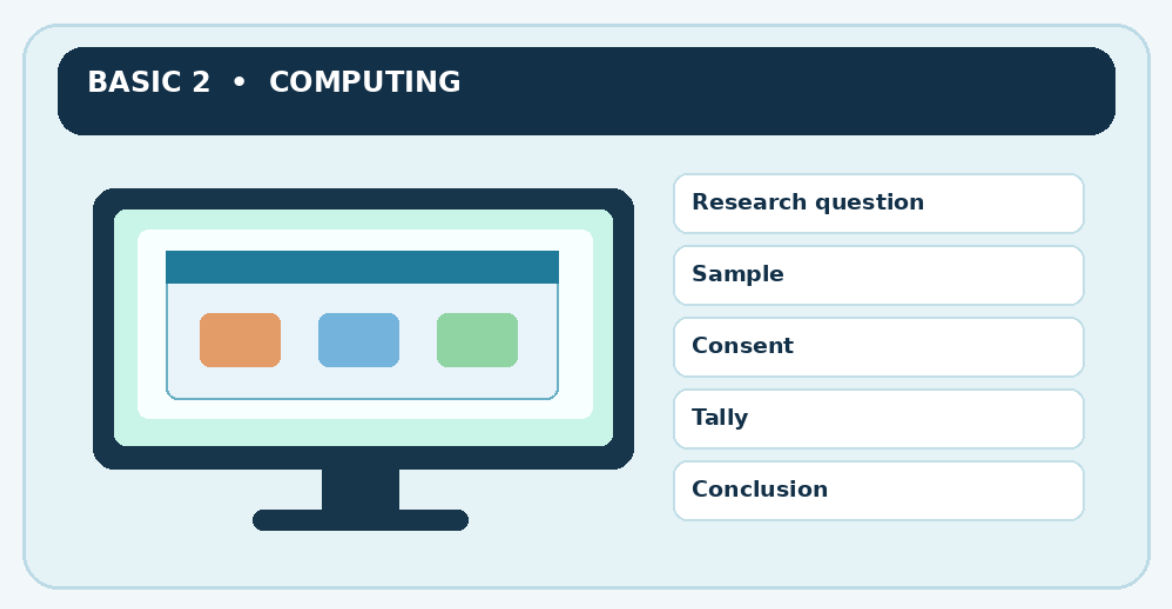

A. Backup B. Save C. Save As D. Delete

10. At home, Yaw remembers a class rule or concept that brings back a recoverable item. What was it called?

A. Save B. Delete C. Backup D. Restore

Lesson 7: Collecting Classroom Data

We will learn to: Identify, explain and apply the important ideas behind collecting classroom data.

Five important ideas

Research question: states what we want to discover.

Sample: is a smaller selected group.

Consent: means someone agrees to participate.

Tally: records counts using marks.

Conclusion: explains what the collected results suggest.

Our Ghanaian story

When interviewing classmates about favourite fruits, Kojo had a question about collecting classroom data. The group discovered that research question states what we want to discover, while sample is a smaller selected group. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Research question, Sample and Consent; explain what each means.

Create and share

Make a colourful, labelled poster that teaches collecting classroom data. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-07

Lesson 7: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that states what we want to discover.

A. Consent B. Research question C. Tally D. Sample

2. Your friend says, "This is a smaller selected group." What is the friend describing?

A. Consent B. Tally C. Research question D. Sample

3. Which idea from collecting classroom data matches the clue "means someone agrees to participate"?

A. Research question B. Conclusion C. Consent D. Tally

4. The teacher asks for an example that records counts using marks. Which answer fits?

A. Consent B. Conclusion C. Tally D. Sample

5. Can you identify the term described here: explains what the collected results suggest?

A. Research question B. Tally C. Conclusion D. Sample

CHALLENGE — Think and apply.

1. At home, Kofi remembers a class rule or concept that records counts using marks. What was it called?

A. Tally B. Sample C. Consent D. Conclusion

2. Which answer would fit on a poster beside the words "states what we want to discover"?

A. Tally B. Sample C. Research question D. Consent

3. Imagine helping a younger pupil understand something that means someone agrees to participate. Which term would you teach?

A. Tally B. Research question C. Conclusion D. Consent

4. For a short demonstration, the teacher needs an example that means someone agrees to participate. Which choice would you select?

A. Research question B. Consent C. Tally D. Conclusion

5. Your class is solving a practical problem. One useful thing records counts using marks. What is its name?

A. Conclusion B. Consent C. Tally D. Sample

6. A group makes a display on collecting classroom data. Their first clue is "is a smaller selected group". Which label is correct?

A. Consent B. Sample C. Tally D. Research question

7. Which concept matches the explanation "explains what the collected results suggest" when you review collecting classroom data?

A. Research question B. Conclusion C. Tally D. Sample

8. During a school ICT lesson, Kofi wants to show something that states what we want to discover. Which idea should be labelled?

A. Research question B. Consent C. Tally D. Sample

9. A classmate confuses several ideas about collecting classroom data. Which one actually is a smaller selected group?

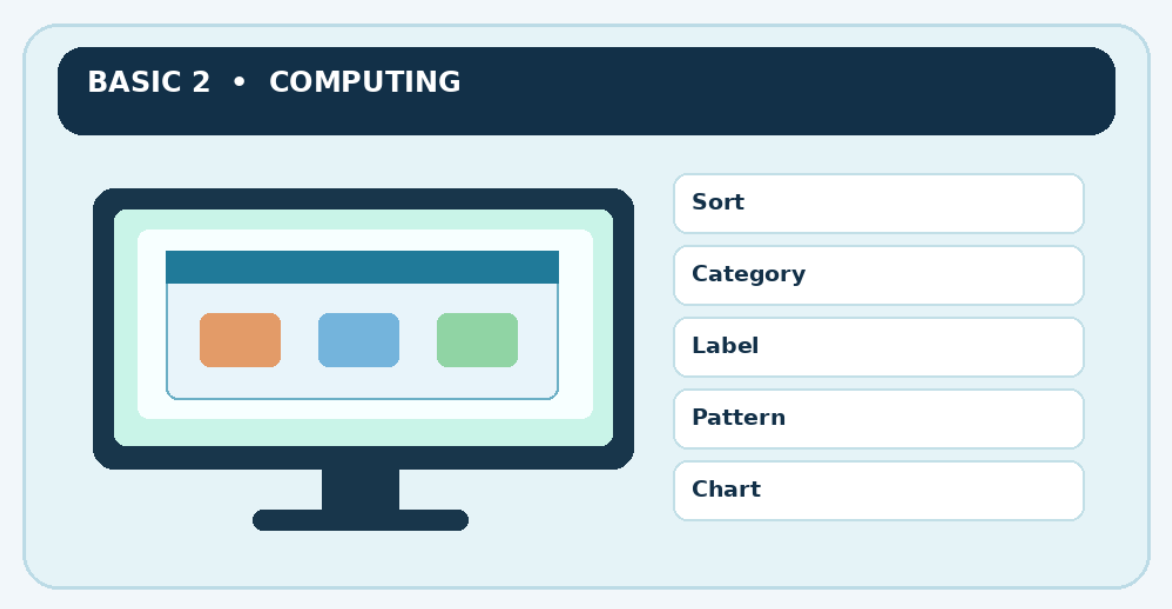

A. Sample B. Research question C. Tally D. Consent

10. At the community learning centre, someone describes a tool or idea that explains what the collected results suggest. Which one is it?

A. Tally B. Sample C. Research question D. Conclusion

Lesson 8: Sorting Information

We will learn to: Identify, explain and apply the important ideas behind sorting information.

Five important ideas

Sort: arranges data into an order.

Category: groups items sharing a feature.

Label: gives a clear name to a group.

Pattern: is a regular feature seen in data.

Chart: shows data visually.

Our Ghanaian story

When sorting market-day information, Esi had a question about sorting information. The group discovered that sort arranges data into an order, while category groups items sharing a feature. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Sort, Category and Label; explain what each means.

Create and share

Make a colourful, labelled poster that teaches sorting information. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-08

Lesson 8: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that arranges data into an order.

A. Sort B. Label C. Chart D. Pattern

2. Your friend says, "This groups items sharing a feature." What is the friend describing?

A. Sort B. Chart C. Pattern D. Category

3. Which idea from sorting information matches the clue "gives a clear name to a group"?

A. Chart B. Sort C. Label D. Pattern

4. The teacher asks for an example that is a regular feature seen in data. Which answer fits?

A. Pattern B. Chart C. Sort D. Label

5. Can you identify the term described here: shows data visually?

A. Label B. Sort C. Pattern D. Chart

CHALLENGE — Think and apply.

1. At home, Akosua remembers a class rule or concept that is a regular feature seen in data. What was it called?

A. Label B. Sort C. Pattern D. Chart

2. During a school ICT lesson, Akosua wants to show something that arranges data into an order. Which idea should be labelled?

A. Sort B. Label C. Pattern D. Chart

3. A group makes a display on sorting information. Their first clue is "groups items sharing a feature". Which label is correct?

A. Sort B. Category C. Chart D. Pattern

4. Imagine helping a younger pupil understand something that gives a clear name to a group. Which term would you teach?

A. Pattern B. Chart C. Sort D. Label

5. At the community learning centre, someone describes a tool or idea that shows data visually. Which one is it?

A. Label B. Pattern C. Sort D. Chart

6. Your class is solving a practical problem. One useful thing is a regular feature seen in data. What is its name?

A. Chart B. Label C. Sort D. Pattern

7. For a short demonstration, the teacher needs an example that gives a clear name to a group. Which choice would you select?

A. Label B. Pattern C. Chart D. Sort

8. Which concept matches the explanation "shows data visually" when you review sorting information?

A. Label B. Pattern C. Chart D. Sort

9. Which answer would fit on a poster beside the words "arranges data into an order"?

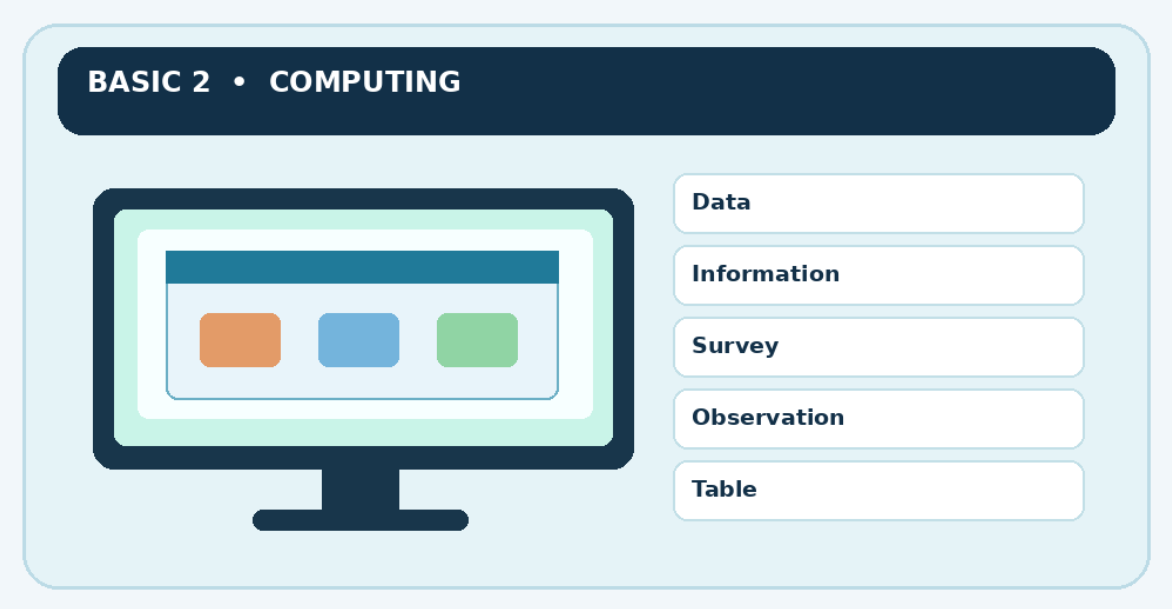

A. Pattern B. Sort C. Label D. Chart

10. A classmate confuses several ideas about sorting information. Which one actually groups items sharing a feature?

A. Pattern B. Category C. Chart D. Sort

Lesson 9: Making a Picture Chart

We will learn to: Identify, explain and apply the important ideas behind making a picture chart.

Five important ideas

Data: raw facts gathered for a purpose.

Information: data organised to make sense.

Survey: asks people selected questions.

Observation: records what someone notices.

Table: arranges facts into rows and columns.

Our Ghanaian story

During a survey of the school, Yaw had a question about making a picture chart. The group discovered that data raw facts gathered for a purpose, while information data organised to make sense. They drew an example and explained it to their classmates.

Try it!

Collect a few harmless facts about classroom materials, NOT personal details. Make a paper chart with the terms Data, Information and Survey; explain what each means.

Create and share

Make a colourful, labelled poster that teaches making a picture chart. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-09

Lesson 9: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that raw facts gathered for a purpose.

A. Observation B. Data C. Survey D. Information

2. Your friend says, "This data organised to make sense." What is the friend describing?

A. Data B. Table C. Information D. Survey

3. Which idea from making a picture chart matches the clue "asks people selected questions"?

A. Data B. Information C. Survey D. Observation

4. The teacher asks for an example that records what someone notices. Which answer fits?

A. Data B. Table C. Observation D. Information

5. Can you identify the term described here: arranges facts into rows and columns?

A. Survey B. Observation C. Information D. Table

CHALLENGE — Think and apply.

1. During a school ICT lesson, Esi wants to show something that raw facts gathered for a purpose. Which idea should be labelled?

A. Observation B. Data C. Survey D. Information

2. A group makes a display on making a picture chart. Their first clue is "data organised to make sense". Which label is correct?

A. Data B. Survey C. Table D. Information

3. At the community learning centre, someone describes a tool or idea that arranges facts into rows and columns. Which one is it?

A. Survey B. Information C. Observation D. Table

4. Which answer would fit on a poster beside the words "raw facts gathered for a purpose"?

A. Observation B. Survey C. Information D. Data

5. Imagine helping a younger pupil understand something that asks people selected questions. Which term would you teach?

A. Information B. Observation C. Survey D. Data

6. Which concept matches the explanation "arranges facts into rows and columns" when you review making a picture chart?

A. Observation B. Table C. Survey D. Information

7. For a short demonstration, the teacher needs an example that asks people selected questions. Which choice would you select?

A. Data B. Information C. Survey D. Observation

8. Your class is solving a practical problem. One useful thing records what someone notices. What is its name?

A. Observation B. Information C. Data D. Table

9. At home, Esi remembers a class rule or concept that records what someone notices. What was it called?

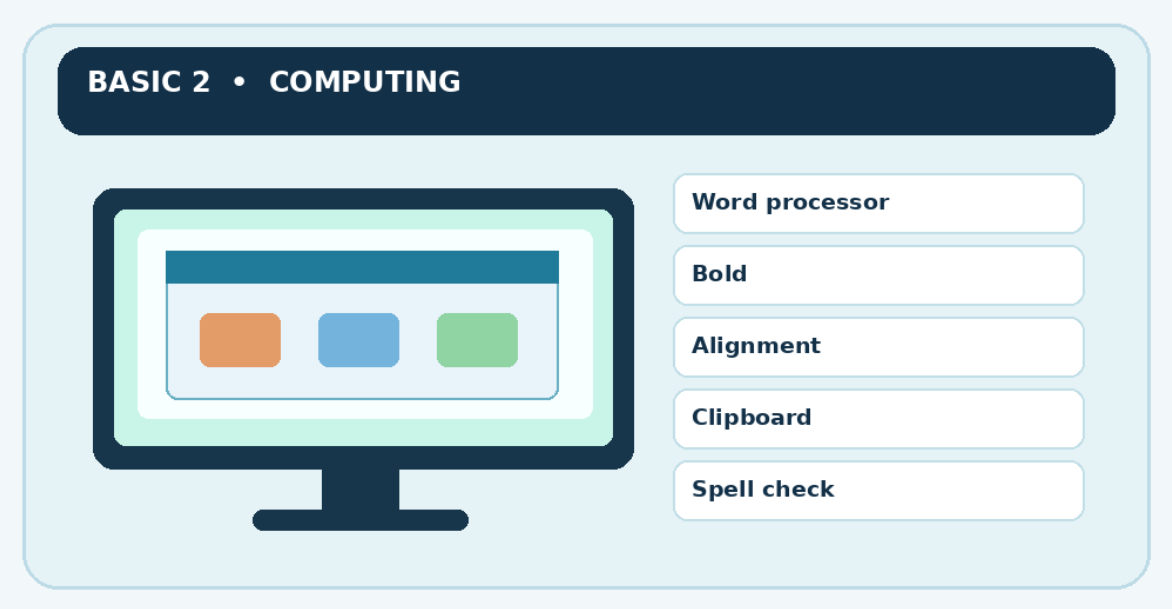

A. Table B. Data C. Information D. Observation

10. A classmate confuses several ideas about making a picture chart. Which one actually data organised to make sense?

A. Table B. Survey C. Information D. Data

Lesson 10: Writing a Simple Document

We will learn to: Identify, explain and apply the important ideas behind writing a simple document.

Five important ideas

Word processor: creates and edits text documents.

Bold: makes important words stand out.

Alignment: positions text on the page.

Clipboard: temporarily holds copied material.

Spell check: helps find possible spelling mistakes.

Our Ghanaian story

While typing a school announcement, Abena had a question about writing a simple document. The group discovered that word processor creates and edits text documents, while bold makes important words stand out. They drew an example and explained it to their classmates.

Try it!

Make a one-page paper example about your school or a Ghanaian festival. Include word processor, bold and alignment; present it clearly to a partner.

Create and share

Make a colourful, labelled poster that teaches writing a simple document. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-10

Lesson 10: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that creates and edits text documents.

A. Word processor B. Spell check C. Bold D. Alignment

2. Your friend says, "This makes important words stand out." What is the friend describing?

A. Clipboard B. Spell check C. Alignment D. Bold

3. Which idea from writing a simple document matches the clue "positions text on the page"?

A. Bold B. Word processor C. Alignment D. Spell check

4. The teacher asks for an example that temporarily holds copied material. Which answer fits?

A. Bold B. Word processor C. Alignment D. Clipboard

5. Can you identify the term described here: helps find possible spelling mistakes?

A. Clipboard B. Bold C. Spell check D. Word processor

CHALLENGE — Think and apply.

1. At home, Ama remembers a class rule or concept that temporarily holds copied material. What was it called?

A. Clipboard B. Word processor C. Alignment D. Bold

2. Imagine helping a younger pupil understand something that positions text on the page. Which term would you teach?

A. Alignment B. Bold C. Spell check D. Word processor

3. For a short demonstration, the teacher needs an example that positions text on the page. Which choice would you select?

A. Word processor B. Spell check C. Alignment D. Bold

4. Which answer would fit on a poster beside the words "creates and edits text documents"?

A. Bold B. Word processor C. Alignment D. Spell check

5. A classmate confuses several ideas about writing a simple document. Which one actually makes important words stand out?

A. Spell check B. Bold C. Clipboard D. Alignment

6. Your class is solving a practical problem. One useful thing temporarily holds copied material. What is its name?

A. Bold B. Word processor C. Alignment D. Clipboard

7. At the community learning centre, someone describes a tool or idea that helps find possible spelling mistakes. Which one is it?

A. Word processor B. Spell check C. Clipboard D. Bold

8. During a school ICT lesson, Ama wants to show something that creates and edits text documents. Which idea should be labelled?

A. Bold B. Spell check C. Alignment D. Word processor

9. Which concept matches the explanation "helps find possible spelling mistakes" when you review writing a simple document?

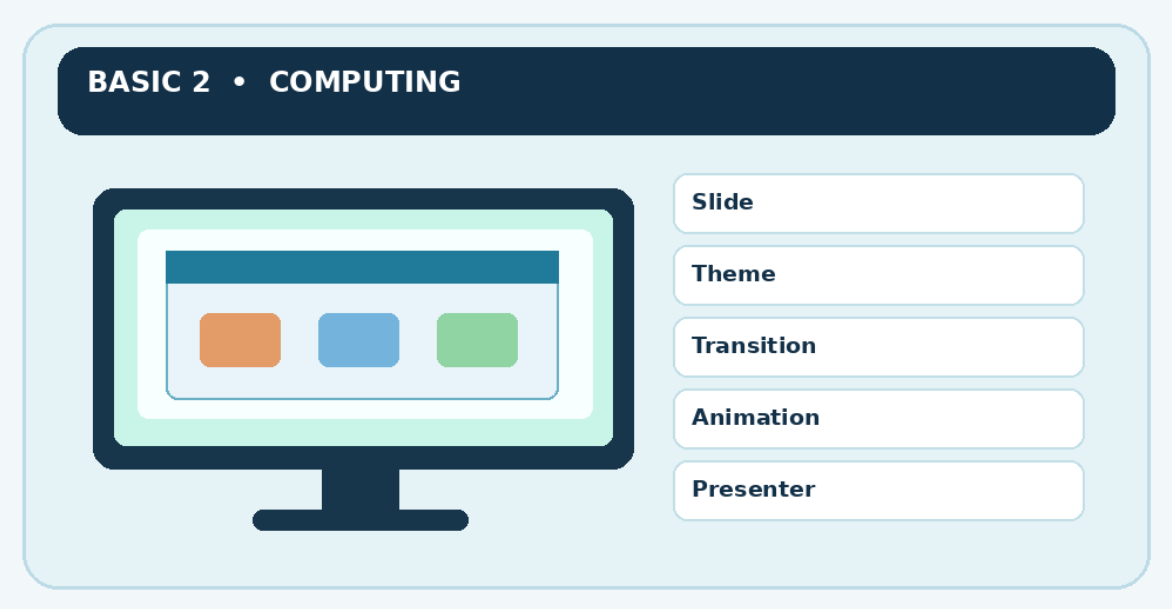

A. Clipboard B. Spell check C. Bold D. Word processor

10. A group makes a display on writing a simple document. Their first clue is "makes important words stand out". Which label is correct?

A. Alignment B. Clipboard C. Bold D. Spell check

Lesson 11: Planning a Slide

We will learn to: Identify, explain and apply the important ideas behind planning a slide.

Five important ideas

Slide: is one screen of a presentation.

Theme: gives slides a coordinated design.

Transition: controls how one slide changes to another.

Animation: makes an object appear or move.

Presenter: speaks clearly while showing the slides.

Our Ghanaian story

While preparing a school assembly talk, Kofi had a question about planning a slide. The group discovered that slide is one screen of a presentation, while theme gives slides a coordinated design. They drew an example and explained it to their classmates.

Try it!

Make a one-page paper example about your school or a Ghanaian festival. Include slide, theme and transition; present it clearly to a partner.

Create and share

Make a colourful, labelled poster that teaches planning a slide. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-11

Lesson 11: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that is one screen of a presentation.

A. Slide B. Presenter C. Animation D. Theme

2. Your friend says, "This gives slides a coordinated design." What is the friend describing?

A. Animation B. Transition C. Presenter D. Theme

3. Which idea from planning a slide matches the clue "controls how one slide changes to another"?

A. Animation B. Transition C. Presenter D. Theme

4. The teacher asks for an example that makes an object appear or move. Which answer fits?

A. Theme B. Slide C. Presenter D. Animation

5. Can you identify the term described here: speaks clearly while showing the slides?

A. Theme B. Slide C. Presenter D. Transition

CHALLENGE — Think and apply.

1. Which answer would fit on a poster beside the words "is one screen of a presentation"?

A. Presenter B. Theme C. Slide D. Animation

2. Imagine helping a younger pupil understand something that controls how one slide changes to another. Which term would you teach?

A. Transition B. Animation C. Theme D. Presenter

3. A classmate confuses several ideas about planning a slide. Which one actually gives slides a coordinated design?

A. Theme B. Animation C. Transition D. Presenter

4. A group makes a display on planning a slide. Their first clue is "gives slides a coordinated design". Which label is correct?

A. Transition B. Presenter C. Theme D. Animation

5. During a school ICT lesson, Yaw wants to show something that is one screen of a presentation. Which idea should be labelled?

A. Presenter B. Theme C. Slide D. Animation

6. Which concept matches the explanation "speaks clearly while showing the slides" when you review planning a slide?

A. Slide B. Transition C. Theme D. Presenter

7. For a short demonstration, the teacher needs an example that controls how one slide changes to another. Which choice would you select?

A. Animation B. Transition C. Presenter D. Theme

8. Your class is solving a practical problem. One useful thing makes an object appear or move. What is its name?

A. Slide B. Animation C. Theme D. Presenter

9. At home, Yaw remembers a class rule or concept that makes an object appear or move. What was it called?

A. Theme B. Presenter C. Slide D. Animation

10. At the community learning centre, someone describes a tool or idea that speaks clearly while showing the slides. Which one is it?

A. Presenter B. Theme C. Slide D. Transition

Lesson 12: Safe Messages and Calls

We will learn to: Identify, explain and apply the important ideas behind safe messages and calls.

Five important ideas

Mobile phone: allows calls and messages.

Radio: broadcasts sound to listeners.

Television: shares moving pictures and sound.

Email: sends digital written messages.

Video call: lets distant people see and hear one another.

Our Ghanaian story

When contacting relatives in another region, Ama had a question about safe messages and calls. The group discovered that mobile phone allows calls and messages, while radio broadcasts sound to listeners. They drew an example and explained it to their classmates.

Try it!

In a small group, draw or safely examine pictures of mobile phone, radio and television. Explain one real-life use for each in Ghana.

Create and share

Make a colourful, labelled poster that teaches safe messages and calls. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-12

Lesson 12: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that allows calls and messages.

A. Television B. Mobile phone C. Radio D. Email

2. Your friend says, "This broadcasts sound to listeners." What is the friend describing?

A. Television B. Email C. Mobile phone D. Radio

3. Which idea from safe messages and calls matches the clue "shares moving pictures and sound"?

A. Email B. Video call C. Radio D. Television

4. The teacher asks for an example that sends digital written messages. Which answer fits?

A. Email B. Video call C. Mobile phone D. Radio

5. Can you identify the term described here: lets distant people see and hear one another?

A. Email B. Video call C. Television D. Mobile phone

CHALLENGE — Think and apply.

1. Your class is solving a practical problem. One useful thing sends digital written messages. What is its name?

A. Email B. Mobile phone C. Video call D. Radio

2. Which concept matches the explanation "lets distant people see and hear one another" when you review safe messages and calls?

A. Television B. Mobile phone C. Email D. Video call

3. Imagine helping a younger pupil understand something that shares moving pictures and sound. Which term would you teach?

A. Video call B. Email C. Radio D. Television

4. At the community learning centre, someone describes a tool or idea that lets distant people see and hear one another. Which one is it?

A. Email B. Mobile phone C. Video call D. Television

5. A classmate confuses several ideas about safe messages and calls. Which one actually broadcasts sound to listeners?

A. Mobile phone B. Radio C. Television D. Email

6. For a short demonstration, the teacher needs an example that shares moving pictures and sound. Which choice would you select?

A. Radio B. Television C. Video call D. Email

7. During a school ICT lesson, Kofi wants to show something that allows calls and messages. Which idea should be labelled?

A. Radio B. Television C. Mobile phone D. Email

8. A group makes a display on safe messages and calls. Their first clue is "broadcasts sound to listeners". Which label is correct?

A. Email B. Television C. Radio D. Mobile phone

9. Which answer would fit on a poster beside the words "allows calls and messages"?

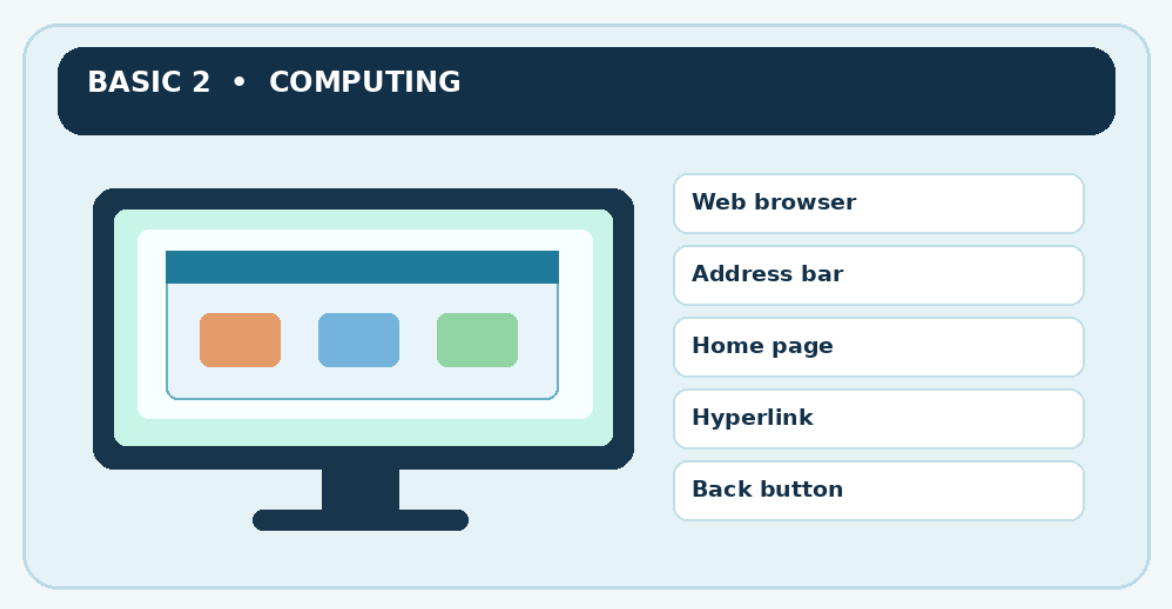

A. Television B. Mobile phone C. Radio D. Email

10. At home, Kofi remembers a class rule or concept that sends digital written messages. What was it called?

A. Mobile phone B. Radio C. Email D. Video call

Lesson 13: Learning With a Browser

We will learn to: Identify, explain and apply the important ideas behind learning with a browser.

Five important ideas

Web browser: opens websites and web pages.

Address bar: shows or accepts a website address.

Home page: is the main starting page of a website.

Hyperlink: opens another page or resource when selected.

Back button: returns to a previously visited page.

Our Ghanaian story

While exploring a teacher-approved website, Kojo had a question about learning with a browser. The group discovered that web browser opens websites and web pages, while address bar shows or accepts a website address. They drew an example and explained it to their classmates.

Try it!

Use an imaginary example or a teacher-approved offline screenshot. Discuss when to use web browser and address bar. Never enter a real password or share private details in this activity.

Create and share

Make a colourful, labelled poster that teaches learning with a browser. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-13

Lesson 13: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that opens websites and web pages.

A. Web browser B. Hyperlink C. Home page D. Address bar

2. Your friend says, "This shows or accepts a website address." What is the friend describing?

A. Back button B. Address bar C. Home page D. Hyperlink

3. Which idea from learning with a browser matches the clue "is the main starting page of a website"?

A. Home page B. Hyperlink C. Back button D. Web browser

4. The teacher asks for an example that opens another page or resource when selected. Which answer fits?

A. Hyperlink B. Back button C. Address bar D. Web browser

5. Can you identify the term described here: returns to a previously visited page?

A. Home page B. Back button C. Web browser D. Address bar

CHALLENGE — Think and apply.

1. Your class is solving a practical problem. One useful thing opens another page or resource when selected. What is its name?

A. Web browser B. Hyperlink C. Back button D. Address bar

2. A group makes a display on learning with a browser. Their first clue is "shows or accepts a website address". Which label is correct?

A. Hyperlink B. Home page C. Back button D. Address bar

3. At home, Akosua remembers a class rule or concept that opens another page or resource when selected. What was it called?

A. Web browser B. Hyperlink C. Back button D. Address bar

4. For a short demonstration, the teacher needs an example that is the main starting page of a website. Which choice would you select?

A. Back button B. Web browser C. Home page D. Hyperlink

5. A classmate confuses several ideas about learning with a browser. Which one actually shows or accepts a website address?

A. Hyperlink B. Home page C. Back button D. Address bar

6. During a school ICT lesson, Akosua wants to show something that opens websites and web pages. Which idea should be labelled?

A. Home page B. Web browser C. Hyperlink D. Address bar

7. Which answer would fit on a poster beside the words "opens websites and web pages"?

A. Home page B. Address bar C. Web browser D. Hyperlink

8. Imagine helping a younger pupil understand something that is the main starting page of a website. Which term would you teach?

A. Web browser B. Hyperlink C. Back button D. Home page

9. At the community learning centre, someone describes a tool or idea that returns to a previously visited page. Which one is it?

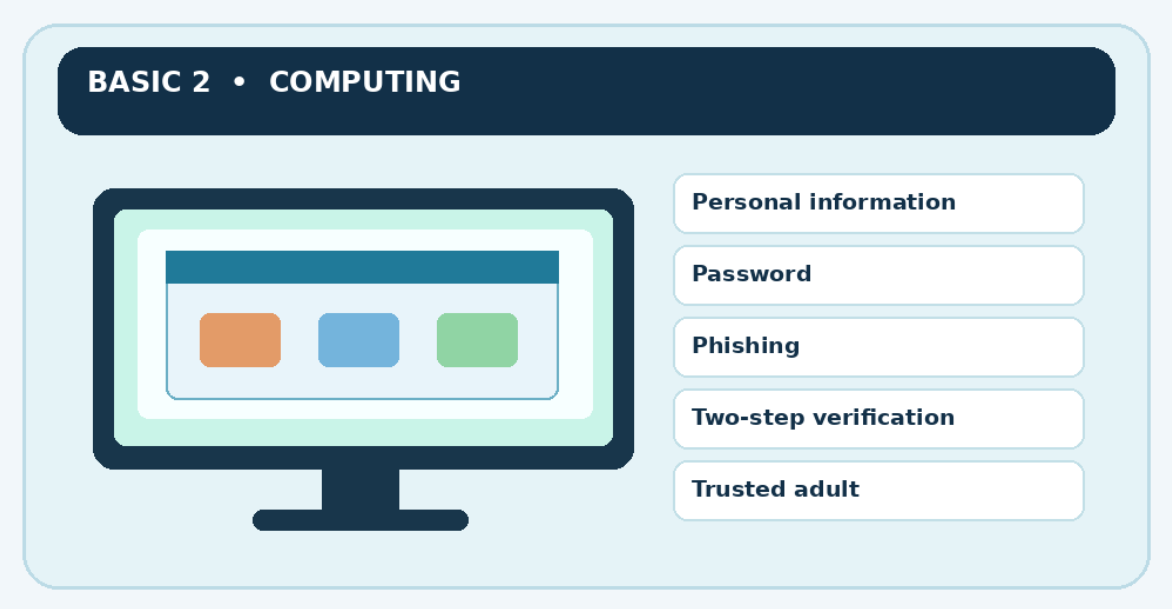

A. Back button B. Web browser C. Address bar D. Home page

10. Which concept matches the explanation "returns to a previously visited page" when you review learning with a browser?

A. Address bar B. Back button C. Web browser D. Home page

Lesson 14: Protecting Private Information

We will learn to: Identify, explain and apply the important ideas behind protecting private information.

Five important ideas

Personal information: includes home address and passwords.

Password: is a private account secret.

Phishing: is a trick to obtain private details.

Two-step verification: adds another account-protection check.

Trusted adult: helps children decide what to share.

Our Ghanaian story

While playing an online safety role-play, Esi had a question about protecting private information. The group discovered that personal information includes home address and passwords, while password is a private account secret. They drew an example and explained it to their classmates.

Try it!

Use an imaginary example or a teacher-approved offline screenshot. Discuss when to use personal information and password. Never enter a real password or share private details in this activity.

Create and share

Make a colourful, labelled poster that teaches protecting private information. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-14

Lesson 14: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that includes home address and passwords.

A. Trusted adult B. Password C. Personal information D. Phishing

2. Your friend says, "This is a private account secret." What is the friend describing?

A. Personal information B. Two-step verification C. Password D. Phishing

3. Which idea from protecting private information matches the clue "is a trick to obtain private details"?

A. Trusted adult B. Password C. Personal information D. Phishing

4. The teacher asks for an example that adds another account-protection check. Which answer fits?

A. Phishing B. Personal information C. Password D. Two-step verification

5. Can you identify the term described here: helps children decide what to share?

A. Two-step verification B. Personal information C. Password D. Trusted adult

CHALLENGE — Think and apply.

1. Which answer would fit on a poster beside the words "includes home address and passwords"?

A. Phishing B. Personal information C. Trusted adult D. Password

2. A group makes a display on protecting private information. Their first clue is "is a private account secret". Which label is correct?

A. Personal information B. Password C. Two-step verification D. Phishing

3. At home, Esi remembers a class rule or concept that adds another account-protection check. What was it called?

A. Personal information B. Password C. Two-step verification D. Phishing

4. During a school ICT lesson, Esi wants to show something that includes home address and passwords. Which idea should be labelled?

A. Personal information B. Password C. Phishing D. Trusted adult

5. At the community learning centre, someone describes a tool or idea that helps children decide what to share. Which one is it?

A. Password B. Trusted adult C. Personal information D. Two-step verification

6. For a short demonstration, the teacher needs an example that is a trick to obtain private details. Which choice would you select?

A. Password B. Personal information C. Phishing D. Trusted adult

7. Imagine helping a younger pupil understand something that is a trick to obtain private details. Which term would you teach?

A. Trusted adult B. Phishing C. Personal information D. Password

8. Your class is solving a practical problem. One useful thing adds another account-protection check. What is its name?

A. Two-step verification B. Phishing C. Personal information D. Password

9. Which concept matches the explanation "helps children decide what to share" when you review protecting private information?

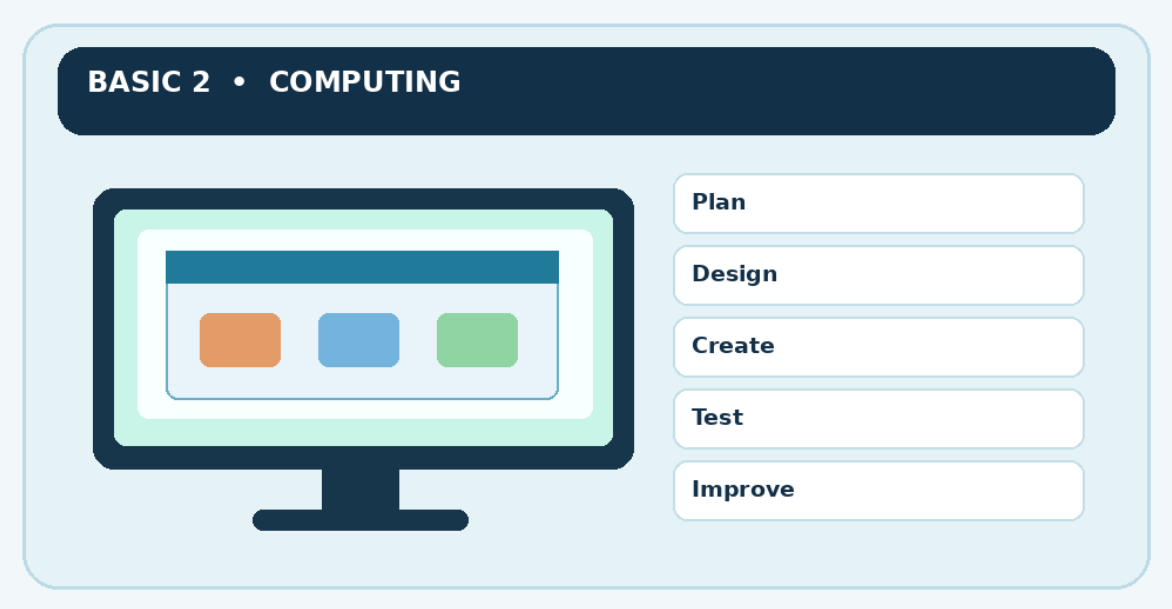

A. Two-step verification B. Trusted adult C. Personal information D. Password

10. A classmate confuses several ideas about protecting private information. Which one actually is a private account secret?

A. Personal information B. Phishing C. Two-step verification D. Password

Lesson 15: My Technology Project

We will learn to: Identify, explain and apply the important ideas behind my technology project.

Five important ideas

Plan: identifies steps and materials before work.

Design: shows how the finished result should look.

Create: builds the digital product.

Test: checks that the product works as intended.

Improve: makes changes using feedback.

Our Ghanaian story

At the start of a class project, Yaw had a question about my technology project. The group discovered that plan identifies steps and materials before work, while design shows how the finished result should look. They drew an example and explained it to their classmates.

Try it!

Design a simple paper model explaining plan, design and create. Trade models with a classmate and explain how your design works.

Create and share

Make a colourful, labelled poster that teaches my technology project. Include a local example and explain two of the five ideas in your own words.

Teacher mapping: SUP-B2-15

Lesson 15: Play & Challenge

PLAY — Choose one best answer for each question.

1. Choose the correct name for something that identifies steps and materials before work.

A. Plan B. Create C. Design D. Improve

2. Your friend says, "This shows how the finished result should look." What is the friend describing?

A. Test B. Plan C. Improve D. Design

3. Which idea from my technology project matches the clue "builds the digital product"?

A. Test B. Improve C. Plan D. Create

4. The teacher asks for an example that checks that the product works as intended. Which answer fits?

A. Improve B. Design C. Plan D. Test

5. Can you identify the term described here: makes changes using feedback?

A. Create B. Improve C. Plan D. Test

CHALLENGE — Think and apply.

1. A classmate confuses several ideas about my technology project. Which one actually shows how the finished result should look?

A. Test B. Design C. Improve D. Plan

2. For a short demonstration, the teacher needs an example that builds the digital product. Which choice would you select?

A. Test B. Plan C. Improve D. Create

3. During a school ICT lesson, Ama wants to show something that identifies steps and materials before work. Which idea should be labelled?

A. Improve B. Design C. Create D. Plan

4. At home, Ama remembers a class rule or concept that checks that the product works as intended. What was it called?

A. Plan B. Design C. Improve D. Test

5. Which answer would fit on a poster beside the words "identifies steps and materials before work"?

A. Improve B. Design C. Create D. Plan

6. A group makes a display on my technology project. Their first clue is "shows how the finished result should look". Which label is correct?

A. Test B. Plan C. Improve D. Design

7. Which concept matches the explanation "makes changes using feedback" when you review my technology project?

A. Test B. Create C. Plan D. Improve

8. Imagine helping a younger pupil understand something that builds the digital product. Which term would you teach?

A. Plan B. Create C. Test D. Improve

9. Your class is solving a practical problem. One useful thing checks that the product works as intended. What is its name?

A. Plan B. Improve C. Test D. Design

10. At the community learning centre, someone describes a tool or idea that makes changes using feedback. Which one is it?

A. Create B. Plan C. Improve D. Test

Teacher answer guide

Review the correct term and ask each learner to explain why it fits.

Lesson 1 — Reviewing Computer Devices

Play: 1. Input device | 2. Output device | 3. Storage device | 4. Processor | 5. Peripheral

Challenge: 1. Peripheral | 2. Input device | 3. Input device | 4. Storage device | 5. Processor | 6. Output device | 7. Peripheral | 8. Output device | 9. Processor | 10. Storage device

Lesson 2 — Typing Words and Sentences

Play: 1. Home row | 2. Top row | 3. Bottom row | 4. Practice | 5. Posture

Challenge: 1. Bottom row | 2. Top row | 3. Home row | 4. Top row | 5. Posture | 6. Home row | 7. Practice | 8. Bottom row | 9. Posture | 10. Practice

Lesson 3 — Clicking and Dragging

Play: 1. Single click | 2. Double click | 3. Drag | 4. Scroll wheel | 5. Right click

Challenge: 1. Scroll wheel | 2. Drag | 3. Right click | 4. Single click | 5. Right click | 6. Single click | 7. Drag | 8. Double click | 9. Scroll wheel | 10. Double click

Lesson 4 — Opening the Desktop

Play: 1. Desktop | 2. Icon | 3. Taskbar | 4. Wallpaper | 5. Start menu

Challenge: 1. Wallpaper | 2. Taskbar | 3. Icon | 4. Icon | 5. Start menu | 6. Desktop | 7. Desktop | 8. Start menu | 9. Taskbar | 10. Wallpaper

Lesson 5 — Creating a Classwork Folder

Play: 1. Folder | 2. File name | 3. Copy | 4. Move | 5. Rename

Challenge: 1. Copy | 2. Rename | 3. Copy | 4. Move | 5. File name | 6. Folder | 7. Move | 8. File name | 9. Folder | 10. Rename

Lesson 6 — Save and Find Work

Play: 1. Save | 2. Save As | 3. Backup | 4. Restore | 5. Delete

Challenge: 1. Delete | 2. Save | 3. Restore | 4. Save As | 5. Backup | 6. Save | 7. Backup | 8. Save As | 9. Delete | 10. Restore

Lesson 7 — Collecting Classroom Data

Play: 1. Research question | 2. Sample | 3. Consent | 4. Tally | 5. Conclusion

Challenge: 1. Tally | 2. Research question | 3. Consent | 4. Consent | 5. Tally | 6. Sample | 7. Conclusion | 8. Research question | 9. Sample | 10. Conclusion

Lesson 8 — Sorting Information

Play: 1. Sort | 2. Category | 3. Label | 4. Pattern | 5. Chart

Challenge: 1. Pattern | 2. Sort | 3. Category | 4. Label | 5. Chart | 6. Pattern | 7. Label | 8. Chart | 9. Sort | 10. Category

Lesson 9 — Making a Picture Chart

Play: 1. Data | 2. Information | 3. Survey | 4. Observation | 5. Table

Challenge: 1. Data | 2. Information | 3. Table | 4. Data | 5. Survey | 6. Table | 7. Survey | 8. Observation | 9. Observation | 10. Information

Lesson 10 — Writing a Simple Document

Play: 1. Word processor | 2. Bold | 3. Alignment | 4. Clipboard | 5. Spell check

Challenge: 1. Clipboard | 2. Alignment | 3. Alignment | 4. Word processor | 5. Bold | 6. Clipboard | 7. Spell check | 8. Word processor | 9. Spell check | 10. Bold

Lesson 11 — Planning a Slide

Play: 1. Slide | 2. Theme | 3. Transition | 4. Animation | 5. Presenter

Challenge: 1. Slide | 2. Transition | 3. Theme | 4. Theme | 5. Slide | 6. Presenter | 7. Transition | 8. Animation | 9. Animation | 10. Presenter

Lesson 12 — Safe Messages and Calls

Play: 1. Mobile phone | 2. Radio | 3. Television | 4. Email | 5. Video call

Challenge: 1. Email | 2. Video call | 3. Television | 4. Video call | 5. Radio | 6. Television | 7. Mobile phone | 8. Radio | 9. Mobile phone | 10. Email

Lesson 13 — Learning With a Browser

Play: 1. Web browser | 2. Address bar | 3. Home page | 4. Hyperlink | 5. Back button

Challenge: 1. Hyperlink | 2. Address bar | 3. Hyperlink | 4. Home page | 5. Address bar | 6. Web browser | 7. Web browser | 8. Home page | 9. Back button | 10. Back button

Lesson 14 — Protecting Private Information

Play: 1. Personal information | 2. Password | 3. Phishing | 4. Two-step verification | 5. Trusted adult

Challenge: 1. Personal information | 2. Password | 3. Two-step verification | 4. Personal information | 5. Trusted adult | 6. Phishing | 7. Phishing | 8. Two-step verification | 9. Trusted adult | 10. Password

Lesson 15 — My Technology Project

Play: 1. Plan | 2. Design | 3. Create | 4. Test | 5. Improve

Challenge: 1. Design | 2. Create | 3. Plan | 4. Test | 5. Plan | 6. Design | 7. Improve | 8. Create | 9. Test | 10. Improve
