Basic 2

Illustrated lessons · Practical activities · Play and Challenge questions

Independently authored learning companion aligned to selected NaCCA 2019 topics. This is not an official NaCCA publication.

LESSON 01: Forward and backward skip without a rope

Goal: Forward and backward skip without a rope.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Forward and backward skip without a rope.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 01: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Forward and backward skip without a rope: What is this lesson mainly about?

A. Forward and backward skip without a rope.

B. Rush into a demanding activity without warming up

C. Practise unsafe tricks without learning the basic skill

D. Ignore the movement task and do only an unrelated game

2. [Play] Forward and backward skip without a rope: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. heavy unsafe equipment in a crowded space

C. a slippery or obstructed practice area

D. space markers and suitable lightweight equipment

3. [Play] Forward and backward skip without a rope: Which action should come first?

A. Skip all practice and guess the result.

B. Finish before looking at the instructions.

C. Ignore the main task and do something unrelated.

D. Set up a safe activity space using space markers and suitable lightweight equipment.

4. [Play] Forward and backward skip without a rope: Which setting does this grade use?

A. only a future space colony

B. paired coordination and movement games

C. a topic unrelated to the current class

D. an unrelated imagined city

5. [Play] Forward and backward skip without a rope: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. a response that does not show the lesson skill

C. an unrelated picture with no explanation

D. an unsupported claim with no classroom practice

6. [Challenge] Forward and backward skip without a rope: Which action comes after the opening step?

A. Practise the skill slowly: Forward and backward skip without a rope.

B. Only watch others without trying

C. Change to an unrelated lesson immediately

D. Skip to marking before learning

7. [Challenge] Forward and backward skip without a rope: Which practice completes the three lesson stages?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Stop after reading the title

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] Forward and backward skip without a rope: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. careful, safe movement

C. an unrelated example that does not test the skill

D. a random answer with no supporting detail

9. [Challenge] Forward and backward skip without a rope: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] Forward and backward skip without a rope: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Complete a different lesson instead

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Avoid the stated task and its materials

11. [Challenge] Forward and backward skip without a rope: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. The lesson has no connection to life or skills

12. [Challenge] Forward and backward skip without a rope: What should a partner help you check?

A. Whether your work demonstrates careful, safe movement.

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Forward and backward skip without a rope: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Make up results instead of practising

C. Stop immediately without reflection

D. Repeat the same error without checking feedback

14. [Challenge] Forward and backward skip without a rope: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Revisit the steps and strengthen careful, safe movement.

15. [Challenge] Forward and backward skip without a rope: Which choice would show responsible use of today’s skill?

A. Apply the lesson about forward and backward skip without a rope to a suitable real-life situation.

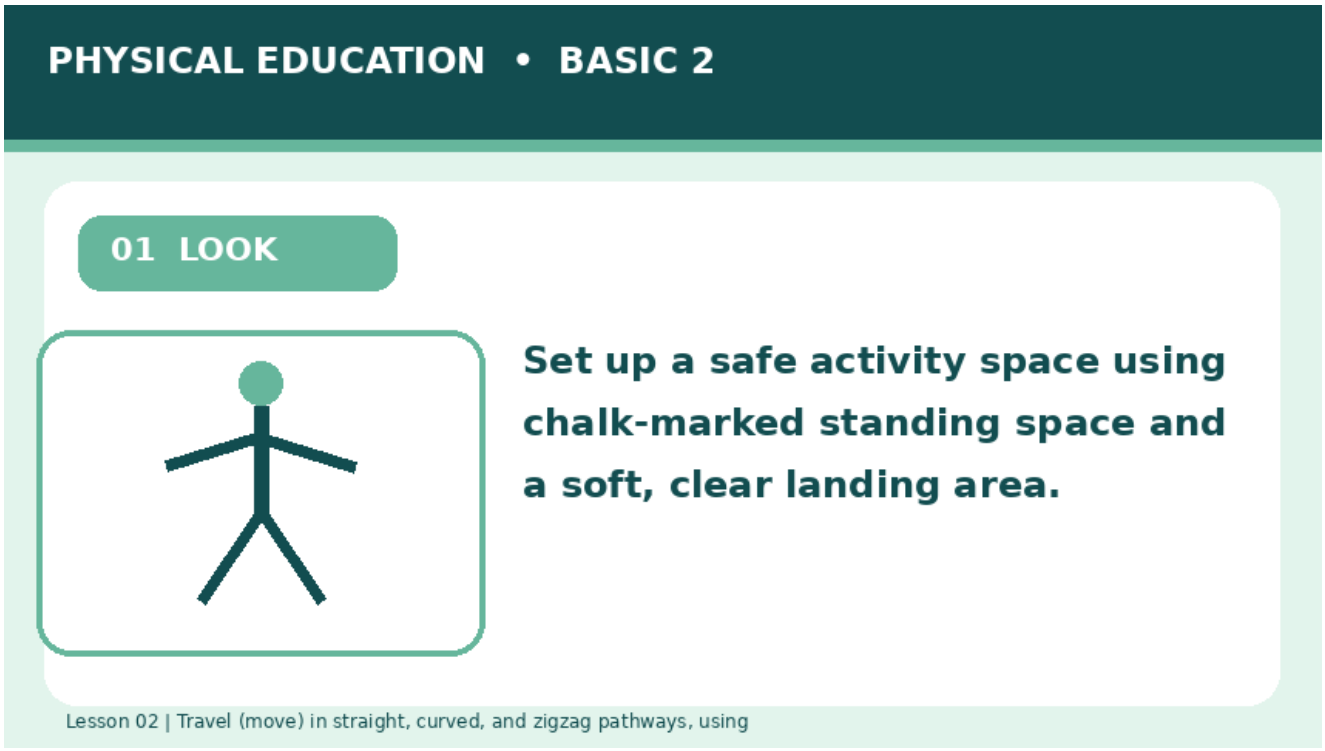

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Avoid explaining how the skill could be used

LESSON 02: Travel (move) in straight, curved, and zigzag pathways, using the

Goal: Travel (move) in straight, curved, and zigzag pathways, using the following locomotor movements: walking, running, leaping, jumping, and

Learn it

A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

Useful material: chalk-marked standing space and a soft, clear landing area

Do it in three steps

1. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

2. Practise the skill slowly: Travel (move) in straight, curved, and zigzag pathways, using the following locomotor movements: walking, running, leaping, jumping, and.

3. Practise take-off, landing, then describe which landing felt more balanced.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

Try this: Practise take-off, landing, then describe which landing felt more balanced.

Show your learning: controlled take-off and safe landing. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 02: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Travel (move) in straight, curved, and zigzag pathways, using the: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Travel (move) in straight, curved, and zigzag pathways, using the following locomotor movements: walking, running, leaping, jumping, and

C. Practise unsafe tricks without learning the basic skill

D. Rush into a demanding activity without warming up

2. [Play] Travel (move) in straight, curved, and zigzag pathways, using the: What useful learning material or support is listed?

A. chalk-marked standing space and a soft, clear landing area

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Travel (move) in straight, curved, and zigzag pathways, using the: Which action should come first?

A. Skip all practice and guess the result.

B. Finish before looking at the instructions.

C. Ignore the main task and do something unrelated.

D. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

4. [Play] Travel (move) in straight, curved, and zigzag pathways, using the: Which setting does this grade use?

A. only a future space colony

B. a topic unrelated to the current class

C. paired coordination and movement games

D. an unrelated imagined city

5. [Play] Travel (move) in straight, curved, and zigzag pathways, using the: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. an unrelated picture with no explanation

C. a response that does not show the lesson skill

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] Travel (move) in straight, curved, and zigzag pathways, using the: Which action comes after the opening step?

A. Skip to marking before learning

B. Practise the skill slowly: Travel (move) in straight, curved, and zigzag pathways, using the following locomotor movements: walking, running, leaping, jumping, and.

C. Change to an unrelated lesson immediately

D. Only watch others without trying

7. [Challenge] Travel (move) in straight, curved, and zigzag pathways, using the: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Practise take-off, landing, then describe which landing felt more balanced.

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] Travel (move) in straight, curved, and zigzag pathways, using the: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. an unrelated example that does not test the skill

C. controlled take-off and safe landing

D. a random answer with no supporting detail

9. [Challenge] Travel (move) in straight, curved, and zigzag pathways, using the: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

D. Do the activity without considering other people.

10. [Challenge] Travel (move) in straight, curved, and zigzag pathways, using the: Which classroom activity helps apply the lesson?

A. Practise take-off, landing, then describe which landing felt more balanced.

B. Avoid the stated task and its materials

C. Copy another learner’s response without trying

D. Complete a different lesson instead

11. [Challenge] Travel (move) in straight, curved, and zigzag pathways, using the: Which explanation best supports this lesson?

A. A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. Learning means only guessing and never checking

12. [Challenge] Travel (move) in straight, curved, and zigzag pathways, using the: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates controlled take-off and safe landing.

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Travel (move) in straight, curved, and zigzag pathways, using the: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] Travel (move) in straight, curved, and zigzag pathways, using the: How should a learner improve after feedback?

A. Revisit the steps and strengthen controlled take-off and safe landing.

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Change answers randomly without a reason

15. [Challenge] Travel (move) in straight, curved, and zigzag pathways, using the: Which choice would show responsible use of today’s skill?

A. Apply the lesson about travel (move) in straight, curved, and zigzag pathways, using the following locomotor movements: walking, running, leaping, jumping, and to a suitable real-life situation.

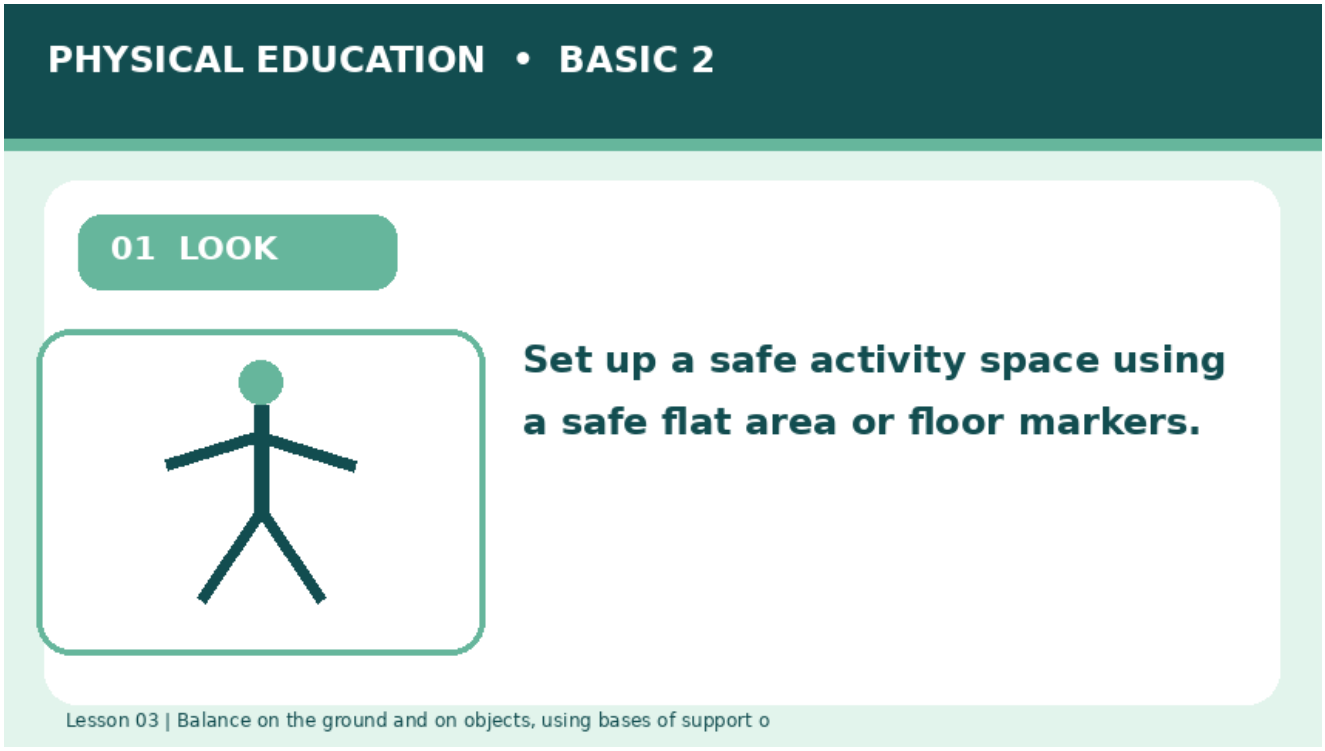

B. Avoid explaining how the skill could be used

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 03: Balance on the ground and on objects, using bases of support other

Goal: Demonstrate balance on the ground and on objects, using bases of support other than both feet.

Learn it

Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

Useful material: a safe flat area or floor markers

Do it in three steps

1. Set up a safe activity space using a safe flat area or floor markers.

2. Practise the skill slowly: Demonstrate balance on the ground and on objects, using bases of support other than both feet.

3. Hold a comfortable balance briefly and explain what made it steady.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

Try this: Hold a comfortable balance briefly and explain what made it steady.

Show your learning: stable body position. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 03: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Balance on the ground and on objects, using bases of support other: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Demonstrate balance on the ground and on objects, using bases of support other than both feet.

C. Ignore the movement task and do only an unrelated game

D. Practise unsafe tricks without learning the basic skill

2. [Play] Balance on the ground and on objects, using bases of support other: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. a safe flat area or floor markers

3. [Play] Balance on the ground and on objects, using bases of support other: Which action should come first?

A. Finish before looking at the instructions.

B. Set up a safe activity space using a safe flat area or floor markers.

C. Ignore the main task and do something unrelated.

D. Skip all practice and guess the result.

4. [Play] Balance on the ground and on objects, using bases of support other: Which setting does this grade use?

A. an unrelated imagined city

B. only a future space colony

C. a topic unrelated to the current class

D. paired coordination and movement games

5. [Play] Balance on the ground and on objects, using bases of support other: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unrelated picture with no explanation

C. an unsupported claim with no classroom practice

D. a response that does not show the lesson skill

6. [Challenge] Balance on the ground and on objects, using bases of support other: Which action comes after the opening step?

A. Practise the skill slowly: Demonstrate balance on the ground and on objects, using bases of support other than both feet.

B. Skip to marking before learning

C. Change to an unrelated lesson immediately

D. Only watch others without trying

7. [Challenge] Balance on the ground and on objects, using bases of support other: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Hold a comfortable balance briefly and explain what made it steady.

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] Balance on the ground and on objects, using bases of support other: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. stable body position

C. an opinion without observation or practice

D. an unrelated example that does not test the skill

9. [Challenge] Balance on the ground and on objects, using bases of support other: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Balance on the ground and on objects, using bases of support other: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Hold a comfortable balance briefly and explain what made it steady.

C. Complete a different lesson instead

D. Copy another learner’s response without trying

11. [Challenge] Balance on the ground and on objects, using bases of support other: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. The topic can be completed without observing or practising

C. Learning means only guessing and never checking

D. Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

12. [Challenge] Balance on the ground and on objects, using bases of support other: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can finish without showing your work

C. Whether your work demonstrates stable body position.

D. Whether you can avoid answering questions

13. [Challenge] Balance on the ground and on objects, using bases of support other: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Repeat the same error without checking feedback

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] Balance on the ground and on objects, using bases of support other: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Revisit the steps and strengthen stable body position.

15. [Challenge] Balance on the ground and on objects, using bases of support other: Which choice would show responsible use of today’s skill?

A. Apply the lesson about demonstrate balance on the ground and on objects, using bases of support other than both feet to a suitable real-life situation.

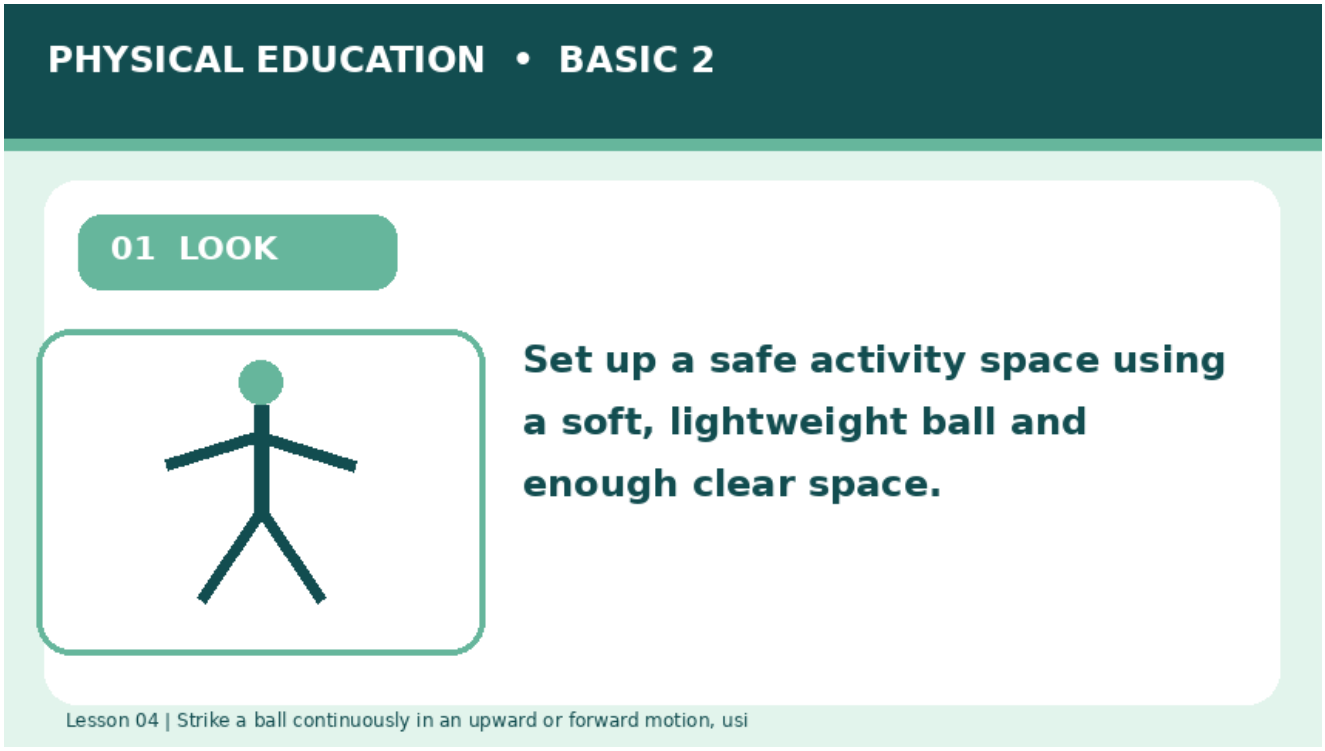

B. Claim expertise without trying the skill

C. Avoid explaining how the skill could be used

D. Use the topic to mislead others

LESSON 04: Strike a ball continuously in an upward or forward motion, using a

Goal: Strike a ball continuously in an upward or forward motion, using a hand and foot

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Strike a ball continuously in an upward or forward motion, using a hand and foot.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 04: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Strike a ball continuously in an upward or forward motion, using a: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Strike a ball continuously in an upward or forward motion, using a hand and foot

D. Ignore the movement task and do only an unrelated game

2. [Play] Strike a ball continuously in an upward or forward motion, using a: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a slippery or obstructed practice area

D. a soft, lightweight ball and enough clear space

3. [Play] Strike a ball continuously in an upward or forward motion, using a: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Set up a safe activity space using a soft, lightweight ball and enough clear space.

C. Skip all practice and guess the result.

D. Finish before looking at the instructions.

4. [Play] Strike a ball continuously in an upward or forward motion, using a: Which setting does this grade use?

A. paired coordination and movement games

B. a topic unrelated to the current class

C. only a future space colony

D. an unrelated imagined city

5. [Play] Strike a ball continuously in an upward or forward motion, using a: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] Strike a ball continuously in an upward or forward motion, using a: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Skip to marking before learning

C. Practise the skill slowly: Strike a ball continuously in an upward or forward motion, using a hand and foot.

D. Only watch others without trying

7. [Challenge] Strike a ball continuously in an upward or forward motion, using a: Which practice completes the three lesson stages?

A. Practise at a short distance; check your direction and try again with feedback.

B. Leave the task unfinished without explaining

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] Strike a ball continuously in an upward or forward motion, using a: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. an opinion without observation or practice

D. accurate controlled ball movement

9. [Challenge] Strike a ball continuously in an upward or forward motion, using a: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Strike a ball continuously in an upward or forward motion, using a: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Practise at a short distance; check your direction and try again with feedback.

C. Complete a different lesson instead

D. Avoid the stated task and its materials

11. [Challenge] Strike a ball continuously in an upward or forward motion, using a: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. The topic can be completed without observing or practising

C. Learning means only guessing and never checking

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] Strike a ball continuously in an upward or forward motion, using a: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Strike a ball continuously in an upward or forward motion, using a: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Repeat the same error without checking feedback

C. Stop immediately without reflection

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Strike a ball continuously in an upward or forward motion, using a: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Change answers randomly without a reason

C. Skip a difficult part without asking for help

D. Revisit the steps and strengthen accurate controlled ball movement.

15. [Challenge] Strike a ball continuously in an upward or forward motion, using a: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

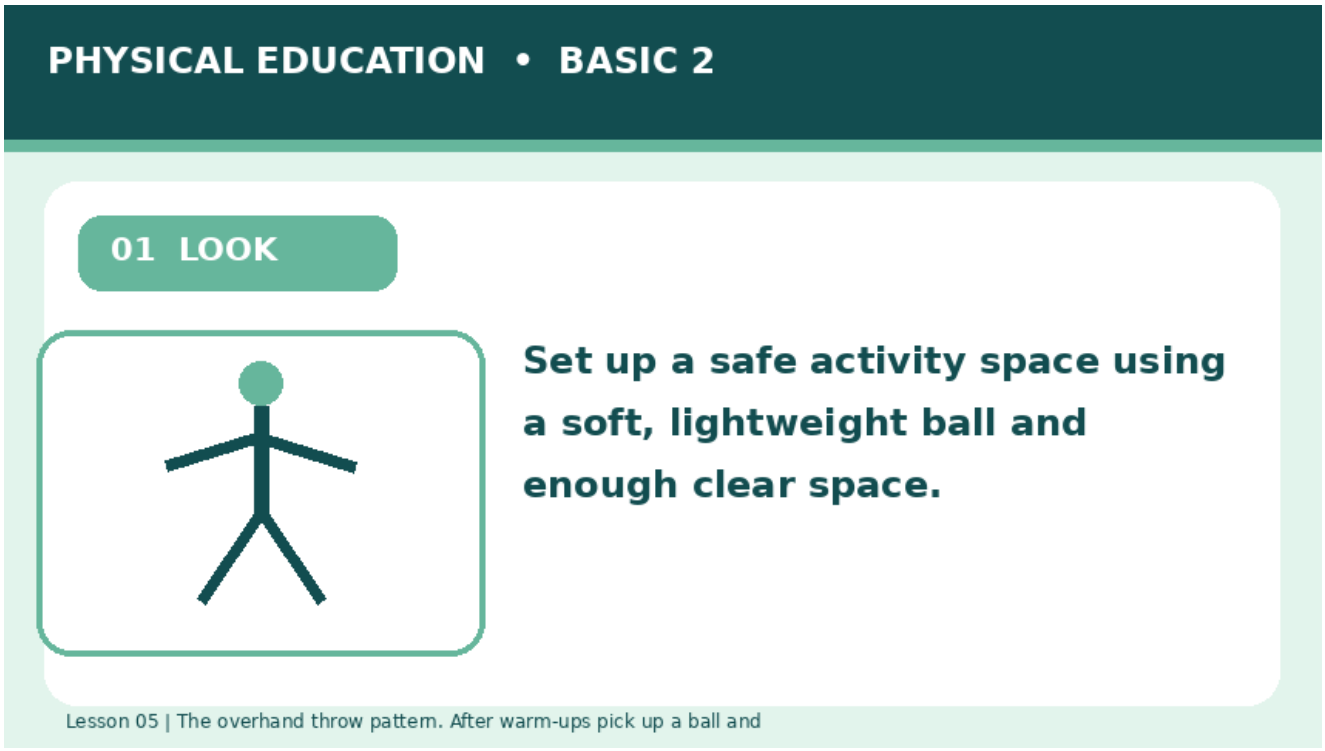

B. Avoid explaining how the skill could be used

C. Apply the lesson about strike a ball continuously in an upward or forward motion, using a hand and foot to a suitable real-life situation.

D. Claim expertise without trying the skill

LESSON 05: The overhand throw pattern. After warm-ups pick up a ball and stand

Goal: Perform the overhand throw pattern. After warm-ups pick up a ball and stand shoulder width apart. Extent the arm with the

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Perform the overhand throw pattern. After warm-ups pick up a ball and stand shoulder width apart. Extent the arm with the.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 05: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The overhand throw pattern. After warm-ups pick up a ball and stand: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Perform the overhand throw pattern. After warm-ups pick up a ball and stand shoulder width apart. Extent the arm with the

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] The overhand throw pattern. After warm-ups pick up a ball and stand: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. heavy unsafe equipment in a crowded space

C. a sharp object placed on the sports ground

D. a soft, lightweight ball and enough clear space

3. [Play] The overhand throw pattern. After warm-ups pick up a ball and stand: Which action should come first?

A. Set up a safe activity space using a soft, lightweight ball and enough clear space.

B. Skip all practice and guess the result.

C. Ignore the main task and do something unrelated.

D. Finish before looking at the instructions.

4. [Play] The overhand throw pattern. After warm-ups pick up a ball and stand: Which setting does this grade use?

A. only a future space colony

B. paired coordination and movement games

C. a topic unrelated to the current class

D. an unrelated imagined city

5. [Play] The overhand throw pattern. After warm-ups pick up a ball and stand: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a response that does not show the lesson skill

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] The overhand throw pattern. After warm-ups pick up a ball and stand: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Perform the overhand throw pattern. After warm-ups pick up a ball and stand shoulder width apart. Extent the arm with the.

D. Only watch others without trying

7. [Challenge] The overhand throw pattern. After warm-ups pick up a ball and stand: Which practice completes the three lesson stages?

A. Practise at a short distance; check your direction and try again with feedback.

B. Give a guess without trying the activity

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] The overhand throw pattern. After warm-ups pick up a ball and stand: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. accurate controlled ball movement

C. a random answer with no supporting detail

D. an unrelated example that does not test the skill

9. [Challenge] The overhand throw pattern. After warm-ups pick up a ball and stand: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

B. Ignore the teacher’s safety instructions.

C. Take unnecessary risks to finish first.

D. Do the activity without considering other people.

10. [Challenge] The overhand throw pattern. After warm-ups pick up a ball and stand: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Complete a different lesson instead

C. Copy another learner’s response without trying

D. Practise at a short distance; check your direction and try again with feedback.

11. [Challenge] The overhand throw pattern. After warm-ups pick up a ball and stand: Which explanation best supports this lesson?

A. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] The overhand throw pattern. After warm-ups pick up a ball and stand: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates accurate controlled ball movement.

C. Whether you can finish without showing your work

D. Whether you can avoid answering questions

13. [Challenge] The overhand throw pattern. After warm-ups pick up a ball and stand: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] The overhand throw pattern. After warm-ups pick up a ball and stand: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Ignore all comments and leave the task incomplete

D. Change answers randomly without a reason

15. [Challenge] The overhand throw pattern. After warm-ups pick up a ball and stand: Which choice would show responsible use of today’s skill?

A. Apply the lesson about perform the overhand throw pattern. after warm-ups pick up a ball and stand shoulder width apart. extent the arm with the to a suitable real-life situation.

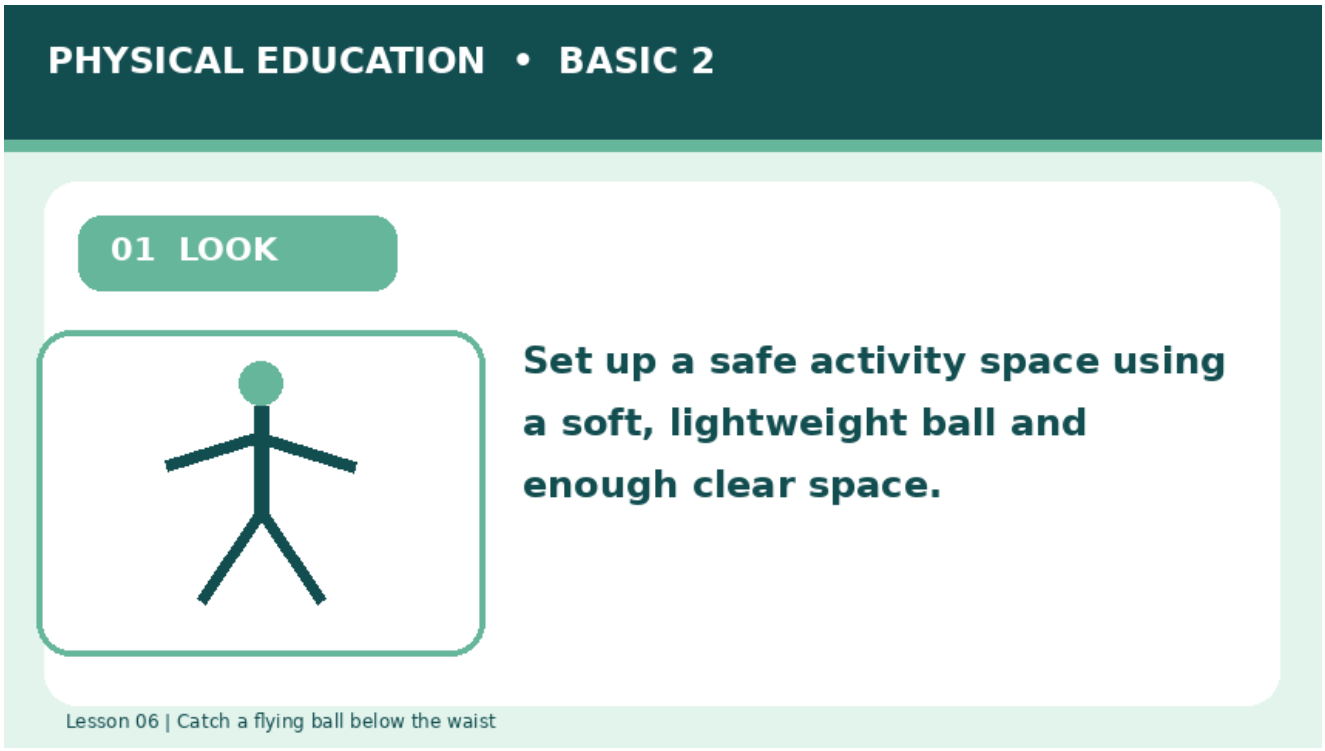

B. Avoid explaining how the skill could be used

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 06: Catch a flying ball below the waist

Goal: Catch a flying ball below the waist.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Catch a flying ball below the waist.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 06: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Catch a flying ball below the waist: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Rush into a demanding activity without warming up

C. Ignore the movement task and do only an unrelated game

D. Catch a flying ball below the waist.

2. [Play] Catch a flying ball below the waist: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a slippery or obstructed practice area

C. a soft, lightweight ball and enough clear space

D. heavy unsafe equipment in a crowded space

3. [Play] Catch a flying ball below the waist: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using a soft, lightweight ball and enough clear space.

C. Ignore the main task and do something unrelated.

D. Finish before looking at the instructions.

4. [Play] Catch a flying ball below the waist: Which setting does this grade use?

A. a topic unrelated to the current class

B. paired coordination and movement games

C. an unrelated imagined city

D. only a future space colony

5. [Play] Catch a flying ball below the waist: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unrelated picture with no explanation

C. an unsupported claim with no classroom practice

D. a response that does not show the lesson skill

6. [Challenge] Catch a flying ball below the waist: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Only watch others without trying

C. Practise the skill slowly: Catch a flying ball below the waist.

D. Skip to marking before learning

7. [Challenge] Catch a flying ball below the waist: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Stop after reading the title

C. Practise at a short distance; check your direction and try again with feedback.

D. Leave the task unfinished without explaining

8. [Challenge] Catch a flying ball below the waist: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. a random answer with no supporting detail

D. accurate controlled ball movement

9. [Challenge] Catch a flying ball below the waist: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

B. Ignore the teacher’s safety instructions.

C. Take unnecessary risks to finish first.

D. Do the activity without considering other people.

10. [Challenge] Catch a flying ball below the waist: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Avoid the stated task and its materials

C. Practise at a short distance; check your direction and try again with feedback.

D. Complete a different lesson instead

11. [Challenge] Catch a flying ball below the waist: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] Catch a flying ball below the waist: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether your work demonstrates accurate controlled ball movement.

C. Whether you can ignore the agreed task

D. Whether you can avoid answering questions

13. [Challenge] Catch a flying ball below the waist: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Make up results instead of practising

D. Stop immediately without reflection

14. [Challenge] Catch a flying ball below the waist: How should a learner improve after feedback?

A. Revisit the steps and strengthen accurate controlled ball movement.

B. Ignore all comments and leave the task incomplete

C. Change answers randomly without a reason

D. Skip a difficult part without asking for help

15. [Challenge] Catch a flying ball below the waist: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

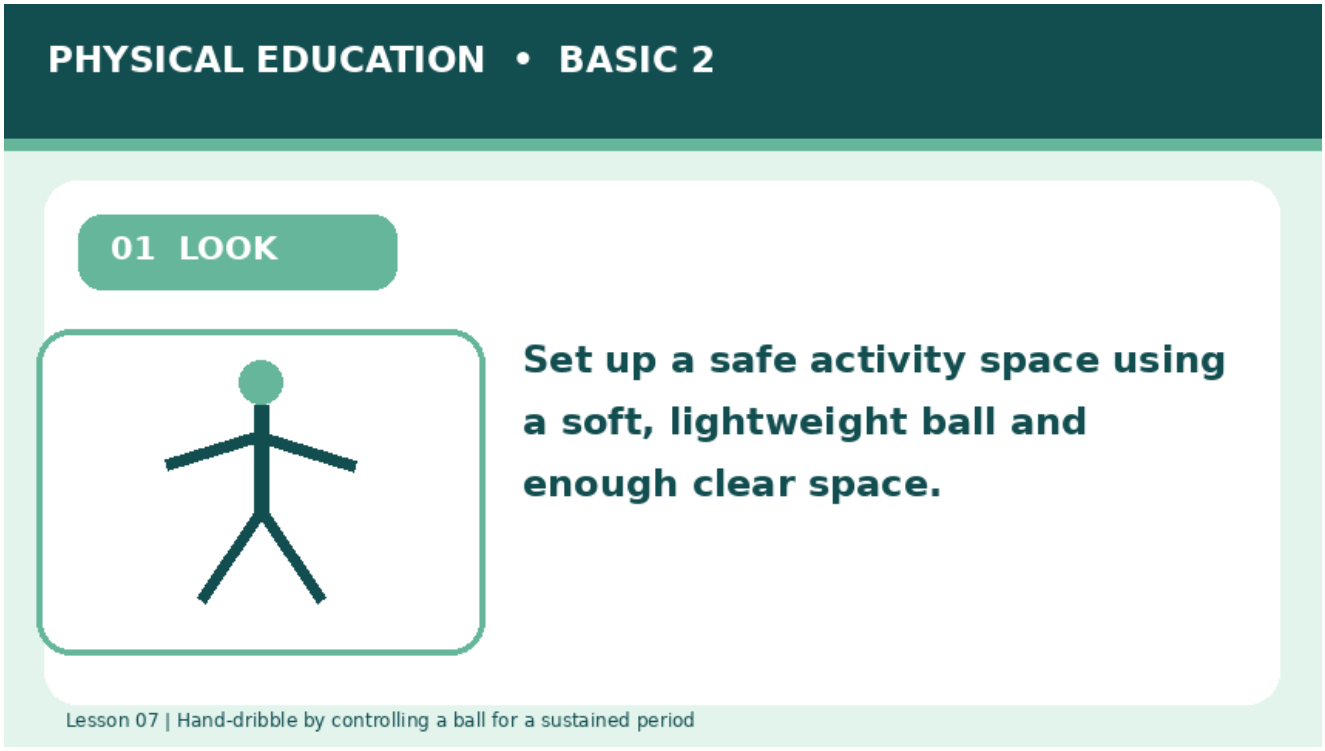

B. Use the topic to mislead others

C. Apply the lesson about catch a flying ball below the waist to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 07: Hand-dribble by controlling a ball for a sustained period

Goal: Hand-dribble by controlling a ball for a sustained period.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Hand-dribble by controlling a ball for a sustained period.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 07: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Hand-dribble by controlling a ball for a sustained period: What is this lesson mainly about?

A. Hand-dribble by controlling a ball for a sustained period.

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] Hand-dribble by controlling a ball for a sustained period: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a soft, lightweight ball and enough clear space

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] Hand-dribble by controlling a ball for a sustained period: Which action should come first?

A. Skip all practice and guess the result.

B. Ignore the main task and do something unrelated.

C. Set up a safe activity space using a soft, lightweight ball and enough clear space.

D. Finish before looking at the instructions.

4. [Play] Hand-dribble by controlling a ball for a sustained period: Which setting does this grade use?

A. an unrelated imagined city

B. only a future space colony

C. a topic unrelated to the current class

D. paired coordination and movement games

5. [Play] Hand-dribble by controlling a ball for a sustained period: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a demonstrated movement or fitness task with self-assessment

C. a response that does not show the lesson skill

D. an unsupported claim with no classroom practice

6. [Challenge] Hand-dribble by controlling a ball for a sustained period: Which action comes after the opening step?

A. Only watch others without trying

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Practise the skill slowly: Hand-dribble by controlling a ball for a sustained period.

7. [Challenge] Hand-dribble by controlling a ball for a sustained period: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Practise at a short distance; check your direction and try again with feedback.

D. Give a guess without trying the activity

8. [Challenge] Hand-dribble by controlling a ball for a sustained period: What counts as good evidence of learning here?

A. accurate controlled ball movement

B. an opinion without observation or practice

C. an unrelated example that does not test the skill

D. a random answer with no supporting detail

9. [Challenge] Hand-dribble by controlling a ball for a sustained period: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] Hand-dribble by controlling a ball for a sustained period: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Practise at a short distance; check your direction and try again with feedback.

C. Avoid the stated task and its materials

D. Complete a different lesson instead

11. [Challenge] Hand-dribble by controlling a ball for a sustained period: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. The topic can be completed without observing or practising

C. Learning means only guessing and never checking

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] Hand-dribble by controlling a ball for a sustained period: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can avoid answering questions

C. Whether you can ignore the agreed task

D. Whether you can finish without showing your work

13. [Challenge] Hand-dribble by controlling a ball for a sustained period: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Repeat the same error without checking feedback

D. Make up results instead of practising

14. [Challenge] Hand-dribble by controlling a ball for a sustained period: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Change answers randomly without a reason

C. Ignore all comments and leave the task incomplete

D. Revisit the steps and strengthen accurate controlled ball movement.

15. [Challenge] Hand-dribble by controlling a ball for a sustained period: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

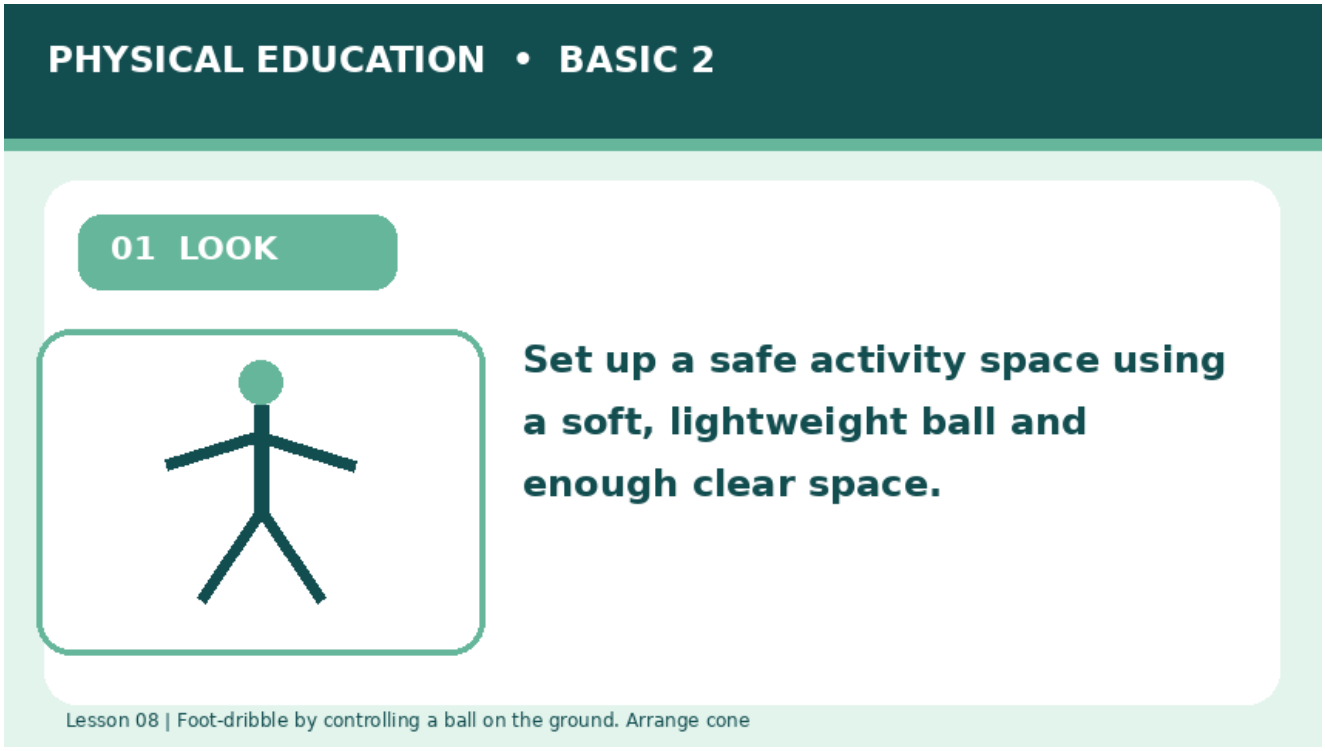

B. Claim expertise without trying the skill

C. Avoid explaining how the skill could be used

D. Apply the lesson about hand-dribble by controlling a ball for a sustained period to a suitable real-life situation.

LESSON 08: Foot-dribble by controlling a ball on the ground. Arrange cones in

Goal: Foot-dribble by controlling a ball on the ground. Arrange cones in different patterns and

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Foot-dribble by controlling a ball on the ground. Arrange cones in different patterns and.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 08: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Foot-dribble by controlling a ball on the ground. Arrange cones in: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Foot-dribble by controlling a ball on the ground. Arrange cones in different patterns and

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] Foot-dribble by controlling a ball on the ground. Arrange cones in: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. a soft, lightweight ball and enough clear space

3. [Play] Foot-dribble by controlling a ball on the ground. Arrange cones in: Which action should come first?

A. Finish before looking at the instructions.

B. Skip all practice and guess the result.

C. Ignore the main task and do something unrelated.

D. Set up a safe activity space using a soft, lightweight ball and enough clear space.

4. [Play] Foot-dribble by controlling a ball on the ground. Arrange cones in: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. an unrelated imagined city

D. paired coordination and movement games

5. [Play] Foot-dribble by controlling a ball on the ground. Arrange cones in: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a demonstrated movement or fitness task with self-assessment

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] Foot-dribble by controlling a ball on the ground. Arrange cones in: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Only watch others without trying

C. Practise the skill slowly: Foot-dribble by controlling a ball on the ground. Arrange cones in different patterns and.

D. Skip to marking before learning

7. [Challenge] Foot-dribble by controlling a ball on the ground. Arrange cones in: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Practise at a short distance; check your direction and try again with feedback.

C. Stop after reading the title

D. Give a guess without trying the activity

8. [Challenge] Foot-dribble by controlling a ball on the ground. Arrange cones in: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. accurate controlled ball movement

D. an opinion without observation or practice

9. [Challenge] Foot-dribble by controlling a ball on the ground. Arrange cones in: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

C. Take unnecessary risks to finish first.

D. Do the activity without considering other people.

10. [Challenge] Foot-dribble by controlling a ball on the ground. Arrange cones in: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Practise at a short distance; check your direction and try again with feedback.

C. Avoid the stated task and its materials

D. Complete a different lesson instead

11. [Challenge] Foot-dribble by controlling a ball on the ground. Arrange cones in: Which explanation best supports this lesson?

A. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. Learning means only guessing and never checking

12. [Challenge] Foot-dribble by controlling a ball on the ground. Arrange cones in: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can avoid answering questions

13. [Challenge] Foot-dribble by controlling a ball on the ground. Arrange cones in: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] Foot-dribble by controlling a ball on the ground. Arrange cones in: How should a learner improve after feedback?

A. Revisit the steps and strengthen accurate controlled ball movement.

B. Skip a difficult part without asking for help

C. Change answers randomly without a reason

D. Ignore all comments and leave the task incomplete

15. [Challenge] Foot-dribble by controlling a ball on the ground. Arrange cones in: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

B. Apply the lesson about foot-dribble by controlling a ball on the ground. arrange cones in different patterns and to a suitable real-life situation.

C. Avoid explaining how the skill could be used

D. Use the topic to mislead others

LESSON 09: The right and left sides of the body and movement from right to left

Goal: Identify the right and left sides of the body and movement from right to left.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify the right and left sides of the body and movement from right to left.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 09: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The right and left sides of the body and movement from right to left: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Identify the right and left sides of the body and movement from right to left.

C. Ignore the movement task and do only an unrelated game

D. Practise unsafe tricks without learning the basic skill

2. [Play] The right and left sides of the body and movement from right to left: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. heavy unsafe equipment in a crowded space

C. a sharp object placed on the sports ground

D. a slippery or obstructed practice area

3. [Play] The right and left sides of the body and movement from right to left: Which action should come first?

A. Set up a safe activity space using space markers and suitable lightweight equipment.

B. Ignore the main task and do something unrelated.

C. Skip all practice and guess the result.

D. Finish before looking at the instructions.

4. [Play] The right and left sides of the body and movement from right to left: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. an unrelated imagined city

D. paired coordination and movement games

5. [Play] The right and left sides of the body and movement from right to left: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a response that does not show the lesson skill

C. an unsupported claim with no classroom practice

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] The right and left sides of the body and movement from right to left: Which action comes after the opening step?

A. Only watch others without trying

B. Skip to marking before learning

C. Practise the skill slowly: Identify the right and left sides of the body and movement from right to left.

D. Change to an unrelated lesson immediately

7. [Challenge] The right and left sides of the body and movement from right to left: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] The right and left sides of the body and movement from right to left: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. careful, safe movement

C. an opinion without observation or practice

D. an unrelated example that does not test the skill

9. [Challenge] The right and left sides of the body and movement from right to left: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Do the activity without considering other people.

10. [Challenge] The right and left sides of the body and movement from right to left: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Complete a different lesson instead

C. Avoid the stated task and its materials

D. Copy another learner’s response without trying

11. [Challenge] The right and left sides of the body and movement from right to left: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] The right and left sides of the body and movement from right to left: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can finish without showing your work

C. Whether your work demonstrates careful, safe movement.

D. Whether you can ignore the agreed task

13. [Challenge] The right and left sides of the body and movement from right to left: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Make up results instead of practising

14. [Challenge] The right and left sides of the body and movement from right to left: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen careful, safe movement.

D. Ignore all comments and leave the task incomplete

15. [Challenge] The right and left sides of the body and movement from right to left: Which choice would show responsible use of today’s skill?

A. Apply the lesson about identify the right and left sides of the body and movement from right to left to a suitable real-life situation.

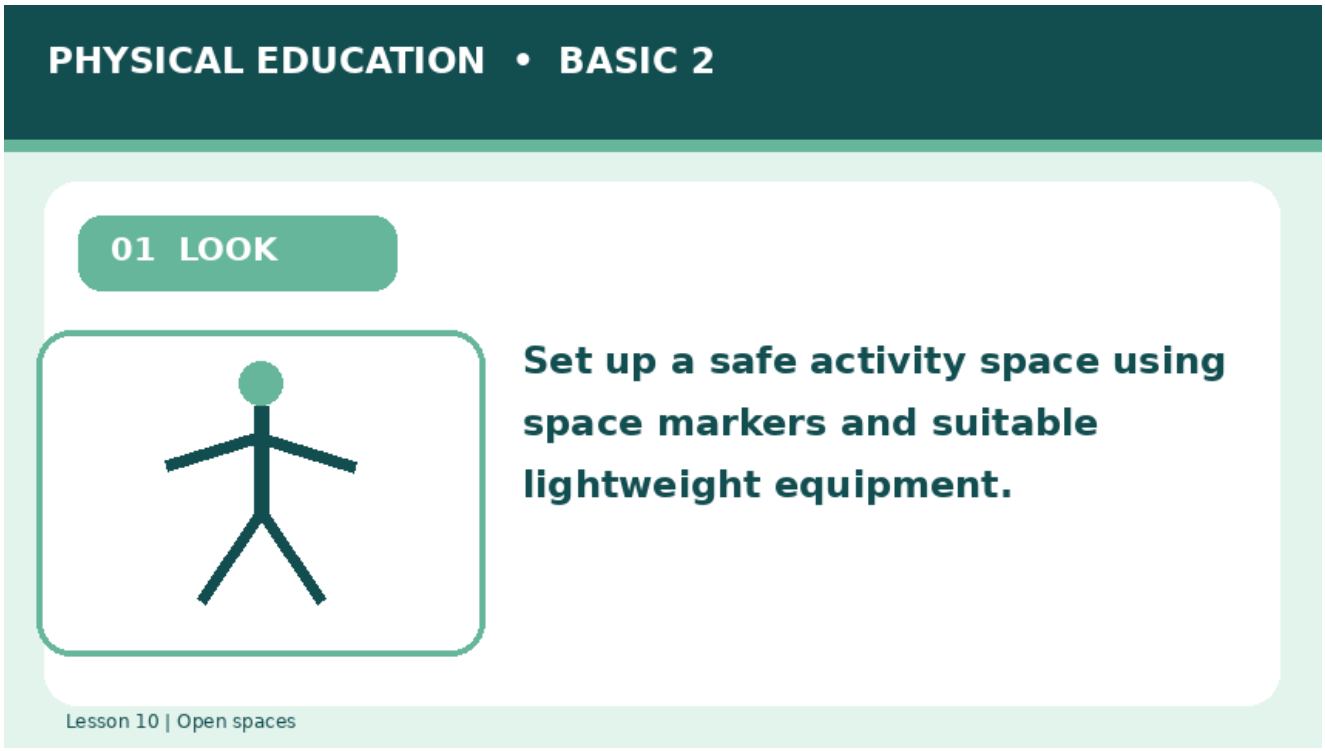

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Claim expertise without trying the skill

LESSON 10: Open spaces

Goal: Explain open spaces

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Explain open spaces.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 10: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Open spaces: What is this lesson mainly about?

A. Explain open spaces

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] Open spaces: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. heavy unsafe equipment in a crowded space

C. a slippery or obstructed practice area

D. a sharp object placed on the sports ground

3. [Play] Open spaces: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Ignore the main task and do something unrelated.

D. Finish before looking at the instructions.

4. [Play] Open spaces: Which setting does this grade use?

A. only a future space colony

B. an unrelated imagined city

C. a topic unrelated to the current class

D. paired coordination and movement games

5. [Play] Open spaces: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. a response that does not show the lesson skill

6. [Challenge] Open spaces: Which action comes after the opening step?

A. Skip to marking before learning

B. Only watch others without trying

C. Practise the skill slowly: Explain open spaces.

D. Change to an unrelated lesson immediately

7. [Challenge] Open spaces: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Stop after reading the title

C. Give a guess without trying the activity

D. Observe a demonstration, practise slowly, then reflect on one improvement.

8. [Challenge] Open spaces: What counts as good evidence of learning here?

A. careful, safe movement

B. an opinion without observation or practice

C. an unrelated example that does not test the skill

D. a random answer with no supporting detail

9. [Challenge] Open spaces: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

B. Ignore the teacher’s safety instructions.

C. Take unnecessary risks to finish first.

D. Do the activity without considering other people.

10. [Challenge] Open spaces: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy another learner’s response without trying

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Avoid the stated task and its materials

11. [Challenge] Open spaces: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] Open spaces: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether your work demonstrates careful, safe movement.

C. Whether you can finish without showing your work

D. Whether you can ignore the agreed task

13. [Challenge] Open spaces: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Make up results instead of practising

14. [Challenge] Open spaces: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen careful, safe movement.

D. Change answers randomly without a reason

15. [Challenge] Open spaces: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

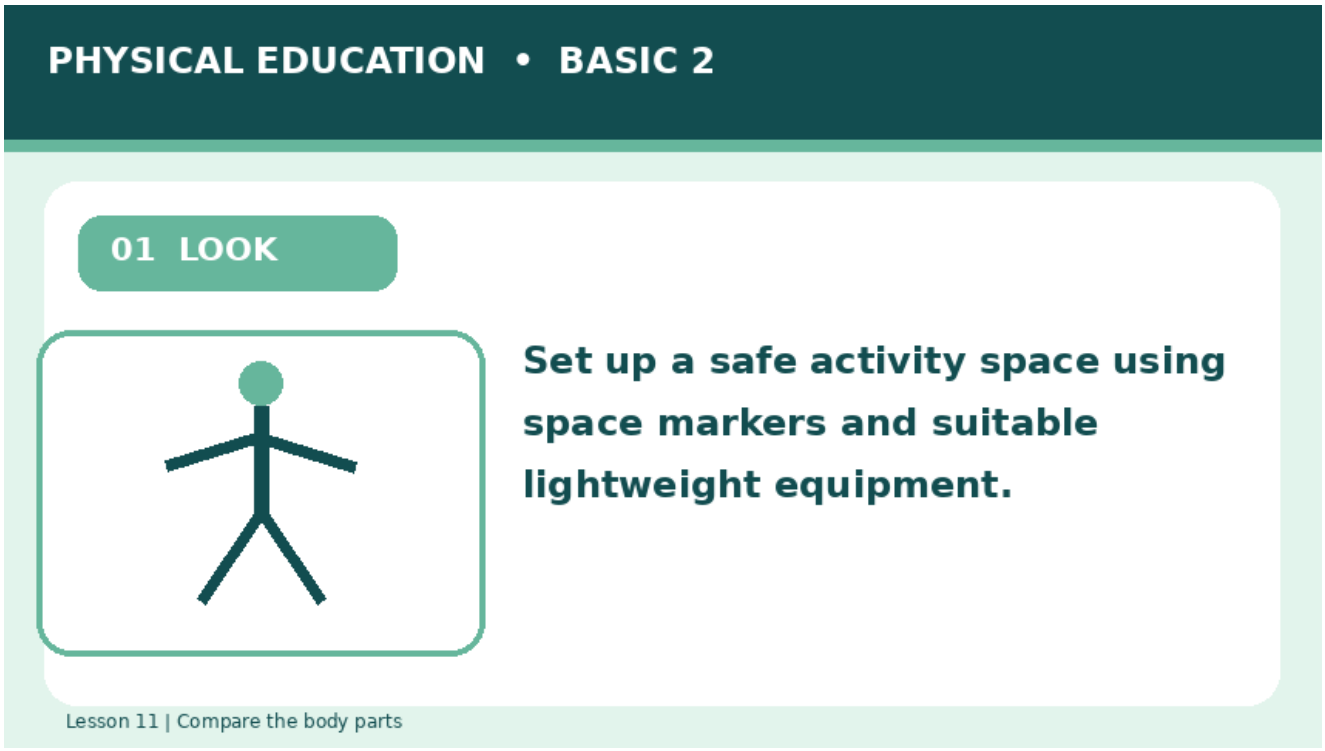

B. Use the topic to mislead others

C. Apply the lesson about explain open spaces to a suitable real-life situation.

D. Claim expertise without trying the skill

LESSON 11: Compare the body parts

Goal: Compare the body parts.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Compare the body parts.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 11: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Compare the body parts: What is this lesson mainly about?

A. Compare the body parts.

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] Compare the body parts: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. a sharp object placed on the sports ground

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] Compare the body parts: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Finish before looking at the instructions.

D. Skip all practice and guess the result.

4. [Play] Compare the body parts: Which setting does this grade use?

A. paired coordination and movement games

B. only a future space colony

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] Compare the body parts: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. a response that does not show the lesson skill

6. [Challenge] Compare the body parts: Which action comes after the opening step?

A. Only watch others without trying

B. Skip to marking before learning

C. Practise the skill slowly: Compare the body parts.

D. Change to an unrelated lesson immediately

7. [Challenge] Compare the body parts: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Leave the task unfinished without explaining

8. [Challenge] Compare the body parts: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. careful, safe movement

C. an opinion without observation or practice

D. an unrelated example that does not test the skill

9. [Challenge] Compare the body parts: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Compare the body parts: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy another learner’s response without trying

C. Avoid the stated task and its materials

D. Observe a demonstration, practise slowly, then reflect on one improvement.

11. [Challenge] Compare the body parts: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. The lesson has no connection to life or skills

12. [Challenge] Compare the body parts: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether your work demonstrates careful, safe movement.

D. Whether you can avoid answering questions

13. [Challenge] Compare the body parts: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Make up results instead of practising

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Stop immediately without reflection

14. [Challenge] Compare the body parts: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen careful, safe movement.

D. Change answers randomly without a reason

15. [Challenge] Compare the body parts: Which choice would show responsible use of today’s skill?

A. Apply the lesson about compare the body parts to a suitable real-life situation.

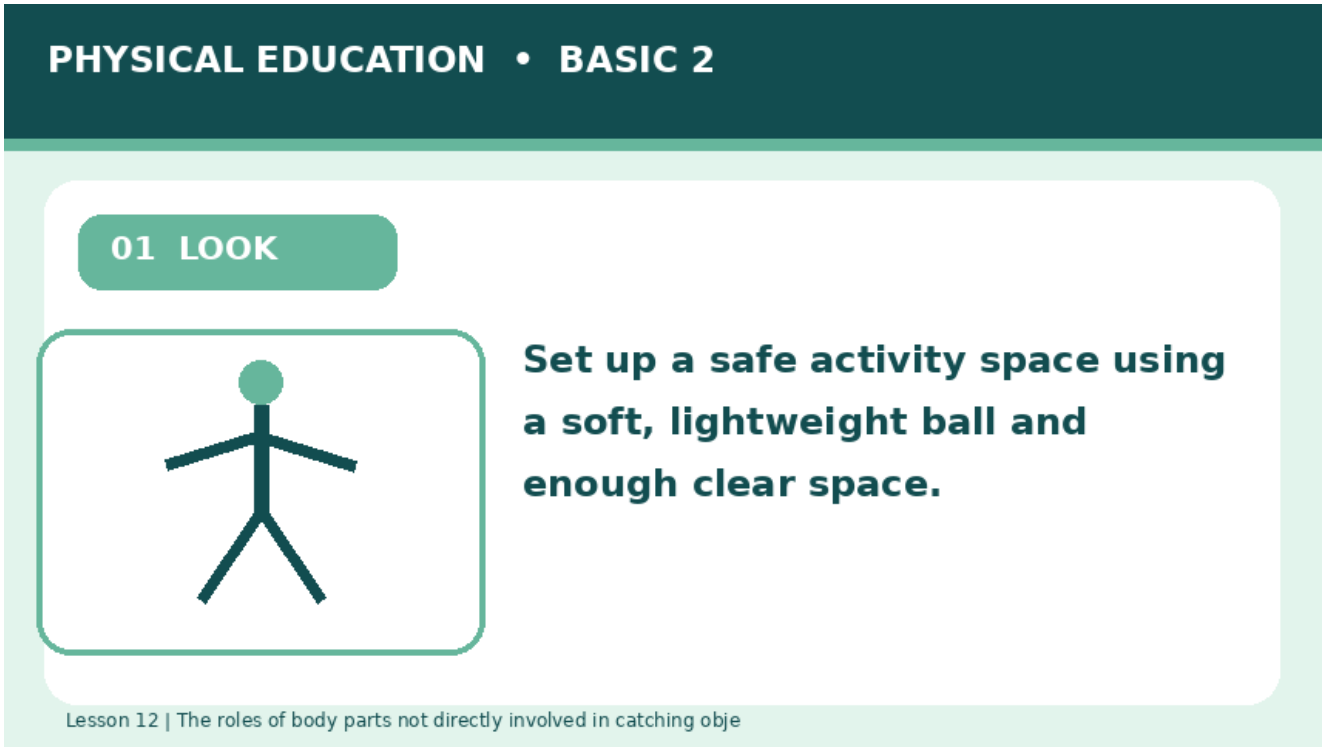

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Avoid explaining how the skill could be used

LESSON 12: The roles of body parts not directly involved in catching objects

Goal: Identify the roles of body parts not directly involved in catching objects.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Identify the roles of body parts not directly involved in catching objects.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 12: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The roles of body parts not directly involved in catching objects: What is this lesson mainly about?

A. Identify the roles of body parts not directly involved in catching objects.

B. Rush into a demanding activity without warming up

C. Ignore the movement task and do only an unrelated game

D. Practise unsafe tricks without learning the basic skill

2. [Play] The roles of body parts not directly involved in catching objects: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. a soft, lightweight ball and enough clear space

3. [Play] The roles of body parts not directly involved in catching objects: Which action should come first?

A. Finish before looking at the instructions.

B. Skip all practice and guess the result.

C. Ignore the main task and do something unrelated.

D. Set up a safe activity space using a soft, lightweight ball and enough clear space.

4. [Play] The roles of body parts not directly involved in catching objects: Which setting does this grade use?

A. a topic unrelated to the current class

B. paired coordination and movement games

C. only a future space colony

D. an unrelated imagined city

5. [Play] The roles of body parts not directly involved in catching objects: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. a response that does not show the lesson skill

6. [Challenge] The roles of body parts not directly involved in catching objects: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Only watch others without trying

C. Practise the skill slowly: Identify the roles of body parts not directly involved in catching objects.

D. Skip to marking before learning

7. [Challenge] The roles of body parts not directly involved in catching objects: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Practise at a short distance; check your direction and try again with feedback.

D. Leave the task unfinished without explaining

8. [Challenge] The roles of body parts not directly involved in catching objects: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. accurate controlled ball movement

D. a random answer with no supporting detail

9. [Challenge] The roles of body parts not directly involved in catching objects: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Ignore the teacher’s safety instructions.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Take unnecessary risks to finish first.

10. [Challenge] The roles of body parts not directly involved in catching objects: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy another learner’s response without trying

C. Practise at a short distance; check your direction and try again with feedback.

D. Avoid the stated task and its materials

11. [Challenge] The roles of body parts not directly involved in catching objects: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] The roles of body parts not directly involved in catching objects: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates accurate controlled ball movement.

C. Whether you can finish without showing your work

D. Whether you can avoid answering questions

13. [Challenge] The roles of body parts not directly involved in catching objects: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] The roles of body parts not directly involved in catching objects: How should a learner improve after feedback?

A. Revisit the steps and strengthen accurate controlled ball movement.

B. Ignore all comments and leave the task incomplete

C. Skip a difficult part without asking for help

D. Change answers randomly without a reason

15. [Challenge] The roles of body parts not directly involved in catching objects: Which choice would show responsible use of today’s skill?

A. Apply the lesson about identify the roles of body parts not directly involved in catching objects to a suitable real-life situation.

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Claim expertise without trying the skill

LESSON 13: And maintain a level of physical fitness to

Goal: Assess and maintain a level of physical fitness to

Learn it

Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

Useful material: a clock or timer and drinking water

Do it in three steps

1. Set up a safe activity space using a clock or timer and drinking water.

2. Practise the skill slowly: Assess and maintain a level of physical fitness to.

3. Try a gentle activity, check how you feel, and talk about an appropriate rest.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

Try this: Try a gentle activity, check how you feel, and talk about an appropriate rest.

Show your learning: a safe personal activity plan. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 13: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] And maintain a level of physical fitness to: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Assess and maintain a level of physical fitness to

C. Ignore the movement task and do only an unrelated game

D. Practise unsafe tricks without learning the basic skill

2. [Play] And maintain a level of physical fitness to: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. heavy unsafe equipment in a crowded space

C. a sharp object placed on the sports ground

D. a clock or timer and drinking water

3. [Play] And maintain a level of physical fitness to: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Finish before looking at the instructions.

D. Set up a safe activity space using a clock or timer and drinking water.

4. [Play] And maintain a level of physical fitness to: Which setting does this grade use?

A. paired coordination and movement games

B. only a future space colony

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] And maintain a level of physical fitness to: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. a response that does not show the lesson skill

C. an unrelated picture with no explanation

D. an unsupported claim with no classroom practice

6. [Challenge] And maintain a level of physical fitness to: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Assess and maintain a level of physical fitness to.

D. Only watch others without trying

7. [Challenge] And maintain a level of physical fitness to: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Leave the task unfinished without explaining

C. Stop after reading the title

D. Try a gentle activity, check how you feel, and talk about an appropriate rest.

8. [Challenge] And maintain a level of physical fitness to: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. a safe personal activity plan

C. an unrelated example that does not test the skill

D. a random answer with no supporting detail

9. [Challenge] And maintain a level of physical fitness to: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

C. Ignore the teacher’s safety instructions.

D. Take unnecessary risks to finish first.

10. [Challenge] And maintain a level of physical fitness to: Which classroom activity helps apply the lesson?

A. Try a gentle activity, check how you feel, and talk about an appropriate rest.

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Avoid the stated task and its materials

11. [Challenge] And maintain a level of physical fitness to: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

D. The lesson has no connection to life or skills

12. [Challenge] And maintain a level of physical fitness to: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can avoid answering questions

C. Whether your work demonstrates a safe personal activity plan.

D. Whether you can finish without showing your work

13. [Challenge] And maintain a level of physical fitness to: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Make up results instead of practising

14. [Challenge] And maintain a level of physical fitness to: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Revisit the steps and strengthen a safe personal activity plan.

C. Ignore all comments and leave the task incomplete

D. Change answers randomly without a reason

15. [Challenge] And maintain a level of physical fitness to: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

B. Avoid explaining how the skill could be used

C. Claim expertise without trying the skill

D. Apply the lesson about assess and maintain a level of physical fitness to to a suitable real-life situation.

LESSON 14: Two set of four continuous abdominal curls. After warm-ups

Goal: Perform two set of four continuous abdominal curls. After warm-ups

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Perform two set of four continuous abdominal curls. After warm-ups.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 14: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Two set of four continuous abdominal curls. After warm-ups: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Perform two set of four continuous abdominal curls. After warm-ups

D. Ignore the movement task and do only an unrelated game

2. [Play] Two set of four continuous abdominal curls. After warm-ups: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. space markers and suitable lightweight equipment

C. a slippery or obstructed practice area

D. heavy unsafe equipment in a crowded space

3. [Play] Two set of four continuous abdominal curls. After warm-ups: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Finish before looking at the instructions.

D. Set up a safe activity space using space markers and suitable lightweight equipment.

4. [Play] Two set of four continuous abdominal curls. After warm-ups: Which setting does this grade use?

A. an unrelated imagined city

B. a topic unrelated to the current class

C. paired coordination and movement games

D. only a future space colony

5. [Play] Two set of four continuous abdominal curls. After warm-ups: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] Two set of four continuous abdominal curls. After warm-ups: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Skip to marking before learning

C. Practise the skill slowly: Perform two set of four continuous abdominal curls. After warm-ups.

D. Only watch others without trying

7. [Challenge] Two set of four continuous abdominal curls. After warm-ups: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Give a guess without trying the activity

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Stop after reading the title

8. [Challenge] Two set of four continuous abdominal curls. After warm-ups: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. an unrelated example that does not test the skill

C. careful, safe movement

D. a random answer with no supporting detail

9. [Challenge] Two set of four continuous abdominal curls. After warm-ups: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

B. Take unnecessary risks to finish first.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Two set of four continuous abdominal curls. After warm-ups: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Copy another learner’s response without trying

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Complete a different lesson instead

11. [Challenge] Two set of four continuous abdominal curls. After warm-ups: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] Two set of four continuous abdominal curls. After warm-ups: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether your work demonstrates careful, safe movement.

C. Whether you can finish without showing your work

D. Whether you can ignore the agreed task

13. [Challenge] Two set of four continuous abdominal curls. After warm-ups: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Make up results instead of practising

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Stop immediately without reflection

14. [Challenge] Two set of four continuous abdominal curls. After warm-ups: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Revisit the steps and strengthen careful, safe movement.

C. Change answers randomly without a reason

D. Skip a difficult part without asking for help

15. [Challenge] Two set of four continuous abdominal curls. After warm-ups: Which choice would show responsible use of today’s skill?

A. Apply the lesson about perform two set of four continuous abdominal curls. after warm-ups to a suitable real-life situation.

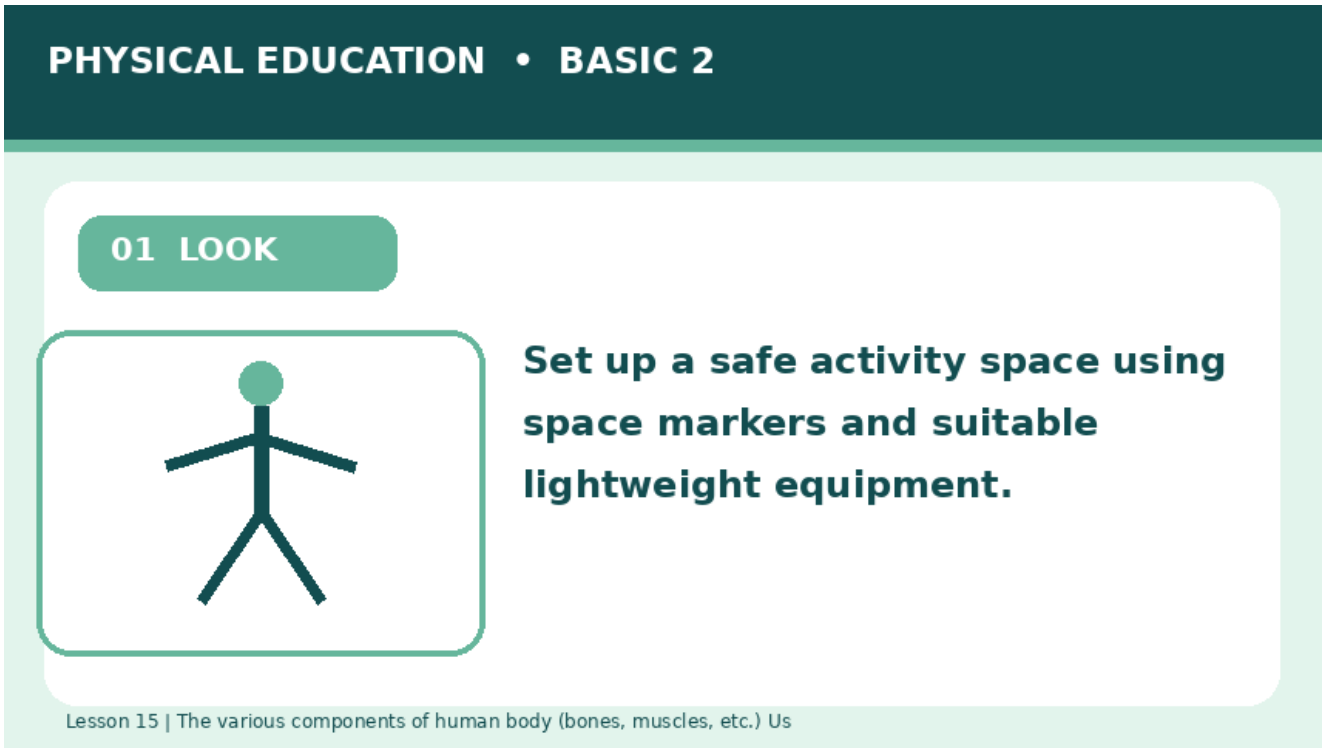

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Avoid explaining how the skill could be used

LESSON 15: The various components of human body (bones, muscles, etc.) Use a

Goal: Identify the various components of human body (bones, muscles, etc.) Use a wall chart of human skeletal system to discuss various components of human

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify the various components of human body (bones, muscles, etc.) Use a wall chart of human skeletal system to discuss various components of human.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 15: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The various components of human body (bones, muscles, etc.) Use a: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Identify the various components of human body (bones, muscles, etc.) Use a wall chart of human skeletal system to discuss various components of human

2. [Play] The various components of human body (bones, muscles, etc.) Use a: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] The various components of human body (bones, muscles, etc.) Use a: Which action should come first?

A. Skip all practice and guess the result.

B. Finish before looking at the instructions.

C. Ignore the main task and do something unrelated.

D. Set up a safe activity space using space markers and suitable lightweight equipment.

4. [Play] The various components of human body (bones, muscles, etc.) Use a: Which setting does this grade use?

A. an unrelated imagined city

B. only a future space colony

C. a topic unrelated to the current class

D. paired coordination and movement games

5. [Play] The various components of human body (bones, muscles, etc.) Use a: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. an unrelated picture with no explanation

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] The various components of human body (bones, muscles, etc.) Use a: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Skip to marking before learning

C. Practise the skill slowly: Identify the various components of human body (bones, muscles, etc.) Use a wall chart of human skeletal system to discuss various components of human.

D. Only watch others without trying

7. [Challenge] The various components of human body (bones, muscles, etc.) Use a: Which practice completes the three lesson stages?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Leave the task unfinished without explaining

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] The various components of human body (bones, muscles, etc.) Use a: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. careful, safe movement

C. an opinion without observation or practice

D. an unrelated example that does not test the skill

9. [Challenge] The various components of human body (bones, muscles, etc.) Use a: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Ignore the teacher’s safety instructions.

10. [Challenge] The various components of human body (bones, muscles, etc.) Use a: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Copy another learner’s response without trying

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Complete a different lesson instead

11. [Challenge] The various components of human body (bones, muscles, etc.) Use a: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. Learning means only guessing and never checking

12. [Challenge] The various components of human body (bones, muscles, etc.) Use a: What should a partner help you check?

A. Whether your work demonstrates careful, safe movement.

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] The various components of human body (bones, muscles, etc.) Use a: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] The various components of human body (bones, muscles, etc.) Use a: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Change answers randomly without a reason

D. Revisit the steps and strengthen careful, safe movement.

15. [Challenge] The various components of human body (bones, muscles, etc.) Use a: Which choice would show responsible use of today’s skill?

A. Apply the lesson about identify the various components of human body (bones, muscles, etc.) use a wall chart of human skeletal system to discuss various components of human to a suitable real-life situation.

B. Use the topic to mislead others

C. Avoid explaining how the skill could be used

D. Claim expertise without trying the skill

LESSON 16: Mention the components of physical fitness

Goal: Mention the components of physical fitness.

Learn it

Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

Useful material: a clock or timer and drinking water

Do it in three steps

1. Set up a safe activity space using a clock or timer and drinking water.

2. Practise the skill slowly: Mention the components of physical fitness.

3. Try a gentle activity, check how you feel, and talk about an appropriate rest.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

Try this: Try a gentle activity, check how you feel, and talk about an appropriate rest.

Show your learning: a safe personal activity plan. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 16: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Mention the components of physical fitness: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Ignore the movement task and do only an unrelated game

C. Rush into a demanding activity without warming up

D. Mention the components of physical fitness.

2. [Play] Mention the components of physical fitness: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a slippery or obstructed practice area

C. heavy unsafe equipment in a crowded space

D. a clock or timer and drinking water

3. [Play] Mention the components of physical fitness: Which action should come first?

A. Set up a safe activity space using a clock or timer and drinking water.

B. Skip all practice and guess the result.

C. Finish before looking at the instructions.

D. Ignore the main task and do something unrelated.

4. [Play] Mention the components of physical fitness: Which setting does this grade use?

A. only a future space colony

B. a topic unrelated to the current class

C. an unrelated imagined city

D. paired coordination and movement games

5. [Play] Mention the components of physical fitness: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] Mention the components of physical fitness: Which action comes after the opening step?

A. Only watch others without trying

B. Practise the skill slowly: Mention the components of physical fitness.

C. Change to an unrelated lesson immediately

D. Skip to marking before learning

7. [Challenge] Mention the components of physical fitness: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Try a gentle activity, check how you feel, and talk about an appropriate rest.

C. Leave the task unfinished without explaining

D. Stop after reading the title

8. [Challenge] Mention the components of physical fitness: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. a safe personal activity plan

D. an opinion without observation or practice

9. [Challenge] Mention the components of physical fitness: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Do the activity without considering other people.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

10. [Challenge] Mention the components of physical fitness: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Try a gentle activity, check how you feel, and talk about an appropriate rest.

C. Complete a different lesson instead

D. Copy another learner’s response without trying

11. [Challenge] Mention the components of physical fitness: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

C. Learning means only guessing and never checking

D. The lesson has no connection to life or skills

12. [Challenge] Mention the components of physical fitness: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can avoid answering questions

C. Whether your work demonstrates a safe personal activity plan.

D. Whether you can finish without showing your work

13. [Challenge] Mention the components of physical fitness: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Make up results instead of practising

D. Repeat the same error without checking feedback

14. [Challenge] Mention the components of physical fitness: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Change answers randomly without a reason

C. Ignore all comments and leave the task incomplete

D. Revisit the steps and strengthen a safe personal activity plan.

15. [Challenge] Mention the components of physical fitness: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

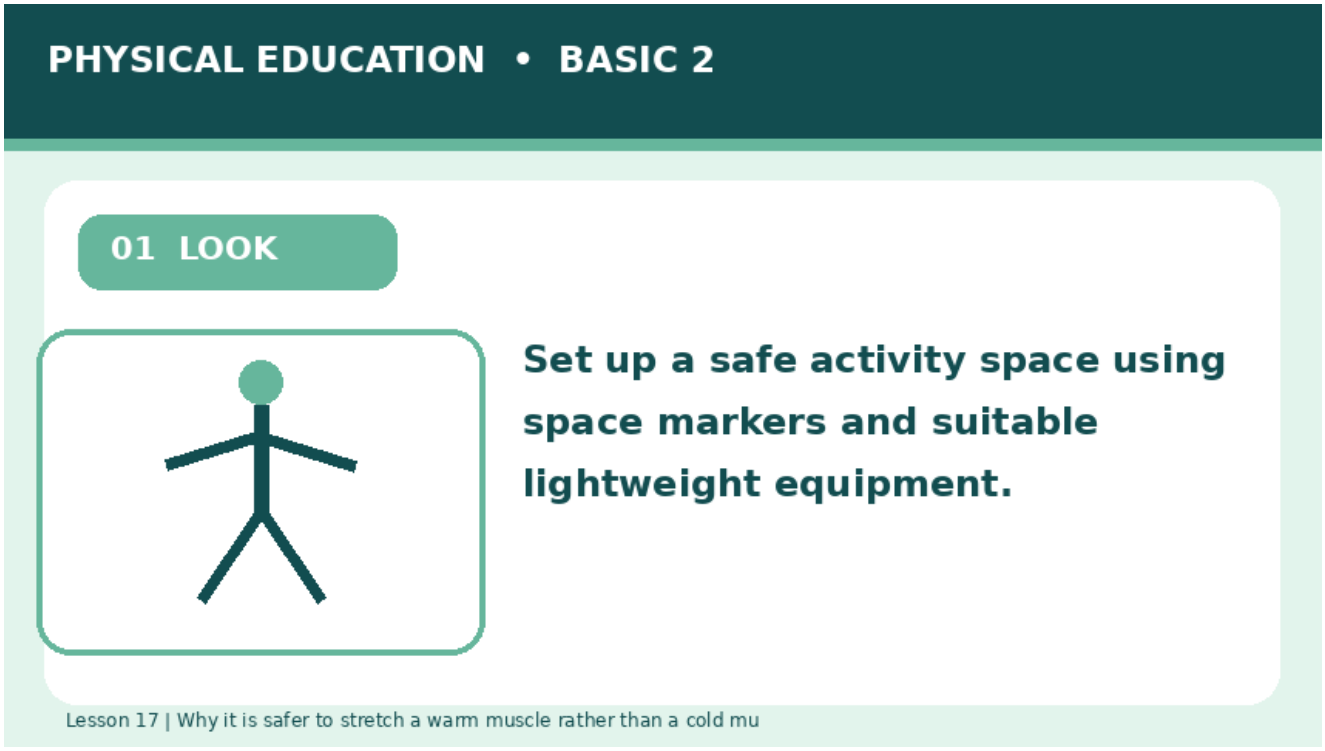

B. Apply the lesson about mention the components of physical fitness to a suitable real-life situation.

C. Avoid explaining how the skill could be used

D. Use the topic to mislead others

LESSON 17: Why it is safer to stretch a warm muscle rather than a cold muscle

Goal: Explain why it is safer to stretch a warm muscle rather than a cold muscle.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Explain why it is safer to stretch a warm muscle rather than a cold muscle.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 17: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Why it is safer to stretch a warm muscle rather than a cold muscle: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Explain why it is safer to stretch a warm muscle rather than a cold muscle.

2. [Play] Why it is safer to stretch a warm muscle rather than a cold muscle: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a sharp object placed on the sports ground

C. space markers and suitable lightweight equipment

D. heavy unsafe equipment in a crowded space

3. [Play] Why it is safer to stretch a warm muscle rather than a cold muscle: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Skip all practice and guess the result.

D. Finish before looking at the instructions.

4. [Play] Why it is safer to stretch a warm muscle rather than a cold muscle: Which setting does this grade use?

A. only a future space colony

B. paired coordination and movement games

C. a topic unrelated to the current class

D. an unrelated imagined city

5. [Play] Why it is safer to stretch a warm muscle rather than a cold muscle: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] Why it is safer to stretch a warm muscle rather than a cold muscle: Which action comes after the opening step?

A. Practise the skill slowly: Explain why it is safer to stretch a warm muscle rather than a cold muscle.

B. Skip to marking before learning

C. Only watch others without trying

D. Change to an unrelated lesson immediately

7. [Challenge] Why it is safer to stretch a warm muscle rather than a cold muscle: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Leave the task unfinished without explaining

D. Observe a demonstration, practise slowly, then reflect on one improvement.

8. [Challenge] Why it is safer to stretch a warm muscle rather than a cold muscle: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an opinion without observation or practice

C. careful, safe movement

D. an unrelated example that does not test the skill

9. [Challenge] Why it is safer to stretch a warm muscle rather than a cold muscle: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Do the activity without considering other people.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Why it is safer to stretch a warm muscle rather than a cold muscle: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Avoid the stated task and its materials

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Copy another learner’s response without trying

11. [Challenge] Why it is safer to stretch a warm muscle rather than a cold muscle: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] Why it is safer to stretch a warm muscle rather than a cold muscle: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether your work demonstrates careful, safe movement.

D. Whether you can finish without showing your work

13. [Challenge] Why it is safer to stretch a warm muscle rather than a cold muscle: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Repeat the same error without checking feedback

C. Make up results instead of practising

D. Stop immediately without reflection

14. [Challenge] Why it is safer to stretch a warm muscle rather than a cold muscle: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Change answers randomly without a reason

C. Ignore all comments and leave the task incomplete

D. Revisit the steps and strengthen careful, safe movement.

15. [Challenge] Why it is safer to stretch a warm muscle rather than a cold muscle: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

B. Apply the lesson about explain why it is safer to stretch a warm muscle rather than a cold muscle to a suitable real-life situation.

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 18: Types of drugs commonly used by adolescents. Lead

Goal: Identify types of drugs commonly used by adolescents. Lead

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify types of drugs commonly used by adolescents. Lead.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 18: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Types of drugs commonly used by adolescents. Lead: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Rush into a demanding activity without warming up

C. Identify types of drugs commonly used by adolescents. Lead

D. Ignore the movement task and do only an unrelated game

2. [Play] Types of drugs commonly used by adolescents. Lead: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. heavy unsafe equipment in a crowded space

C. a slippery or obstructed practice area

D. a sharp object placed on the sports ground

3. [Play] Types of drugs commonly used by adolescents. Lead: Which action should come first?

A. Set up a safe activity space using space markers and suitable lightweight equipment.

B. Skip all practice and guess the result.

C. Finish before looking at the instructions.

D. Ignore the main task and do something unrelated.

4. [Play] Types of drugs commonly used by adolescents. Lead: Which setting does this grade use?

A. a topic unrelated to the current class

B. an unrelated imagined city

C. only a future space colony

D. paired coordination and movement games

5. [Play] Types of drugs commonly used by adolescents. Lead: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. a response that does not show the lesson skill

6. [Challenge] Types of drugs commonly used by adolescents. Lead: Which action comes after the opening step?

A. Practise the skill slowly: Identify types of drugs commonly used by adolescents. Lead.

B. Only watch others without trying

C. Change to an unrelated lesson immediately

D. Skip to marking before learning

7. [Challenge] Types of drugs commonly used by adolescents. Lead: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Leave the task unfinished without explaining

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Stop after reading the title

8. [Challenge] Types of drugs commonly used by adolescents. Lead: What counts as good evidence of learning here?

A. careful, safe movement

B. an opinion without observation or practice

C. a random answer with no supporting detail

D. an unrelated example that does not test the skill

9. [Challenge] Types of drugs commonly used by adolescents. Lead: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Do the activity without considering other people.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Take unnecessary risks to finish first.

10. [Challenge] Types of drugs commonly used by adolescents. Lead: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Complete a different lesson instead

C. Avoid the stated task and its materials

D. Copy another learner’s response without trying

11. [Challenge] Types of drugs commonly used by adolescents. Lead: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Learning means only guessing and never checking

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. The topic can be completed without observing or practising

12. [Challenge] Types of drugs commonly used by adolescents. Lead: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether your work demonstrates careful, safe movement.

C. Whether you can ignore the agreed task

D. Whether you can finish without showing your work

13. [Challenge] Types of drugs commonly used by adolescents. Lead: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Repeat the same error without checking feedback

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] Types of drugs commonly used by adolescents. Lead: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Ignore all comments and leave the task incomplete

C. Revisit the steps and strengthen careful, safe movement.

D. Change answers randomly without a reason

15. [Challenge] Types of drugs commonly used by adolescents. Lead: Which choice would show responsible use of today’s skill?

A. Apply the lesson about identify types of drugs commonly used by adolescents. lead to a suitable real-life situation.

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Avoid explaining how the skill could be used

LESSON 19: Participate in a variety of group settings (e.g., partners, small

Goal: Participate in a variety of group settings (e.g., partners, small groups, and large groups) without interfering with others.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Participate in a variety of group settings (e.g., partners, small groups, and large groups) without interfering with others.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 19: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Participate in a variety of group settings (e.g., partners, small: What is this lesson mainly about?

A. Participate in a variety of group settings (e.g., partners, small groups, and large groups) without interfering with others.

B. Rush into a demanding activity without warming up

C. Ignore the movement task and do only an unrelated game

D. Practise unsafe tricks without learning the basic skill

2. [Play] Participate in a variety of group settings (e.g., partners, small: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. space markers and suitable lightweight equipment

3. [Play] Participate in a variety of group settings (e.g., partners, small: Which action should come first?

A. Finish before looking at the instructions.

B. Ignore the main task and do something unrelated.

C. Set up a safe activity space using space markers and suitable lightweight equipment.

D. Skip all practice and guess the result.

4. [Play] Participate in a variety of group settings (e.g., partners, small: Which setting does this grade use?

A. an unrelated imagined city

B. only a future space colony

C. a topic unrelated to the current class

D. paired coordination and movement games

5. [Play] Participate in a variety of group settings (e.g., partners, small: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. a response that does not show the lesson skill

6. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Skip to marking before learning

C. Only watch others without trying

D. Practise the skill slowly: Participate in a variety of group settings (e.g., partners, small groups, and large groups) without interfering with others.

7. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Give a guess without trying the activity

C. Stop after reading the title

D. Observe a demonstration, practise slowly, then reflect on one improvement.

8. [Challenge] Participate in a variety of group settings (e.g., partners, small: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. careful, safe movement

C. an opinion without observation or practice

D. an unrelated example that does not test the skill

9. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Ignore the teacher’s safety instructions.

C. Do the activity without considering other people.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

10. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Complete a different lesson instead

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. The lesson has no connection to life or skills

C. The topic can be completed without observing or practising

D. Learning means only guessing and never checking

12. [Challenge] Participate in a variety of group settings (e.g., partners, small: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether your work demonstrates careful, safe movement.

C. Whether you can ignore the agreed task

D. Whether you can finish without showing your work

13. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] Participate in a variety of group settings (e.g., partners, small: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Ignore all comments and leave the task incomplete

C. Revisit the steps and strengthen careful, safe movement.

D. Skip a difficult part without asking for help

15. [Challenge] Participate in a variety of group settings (e.g., partners, small: Which choice would show responsible use of today’s skill?

A. Apply the lesson about participate in a variety of group settings (e.g., partners, small groups, and large groups) without interfering with others to a suitable real-life situation.

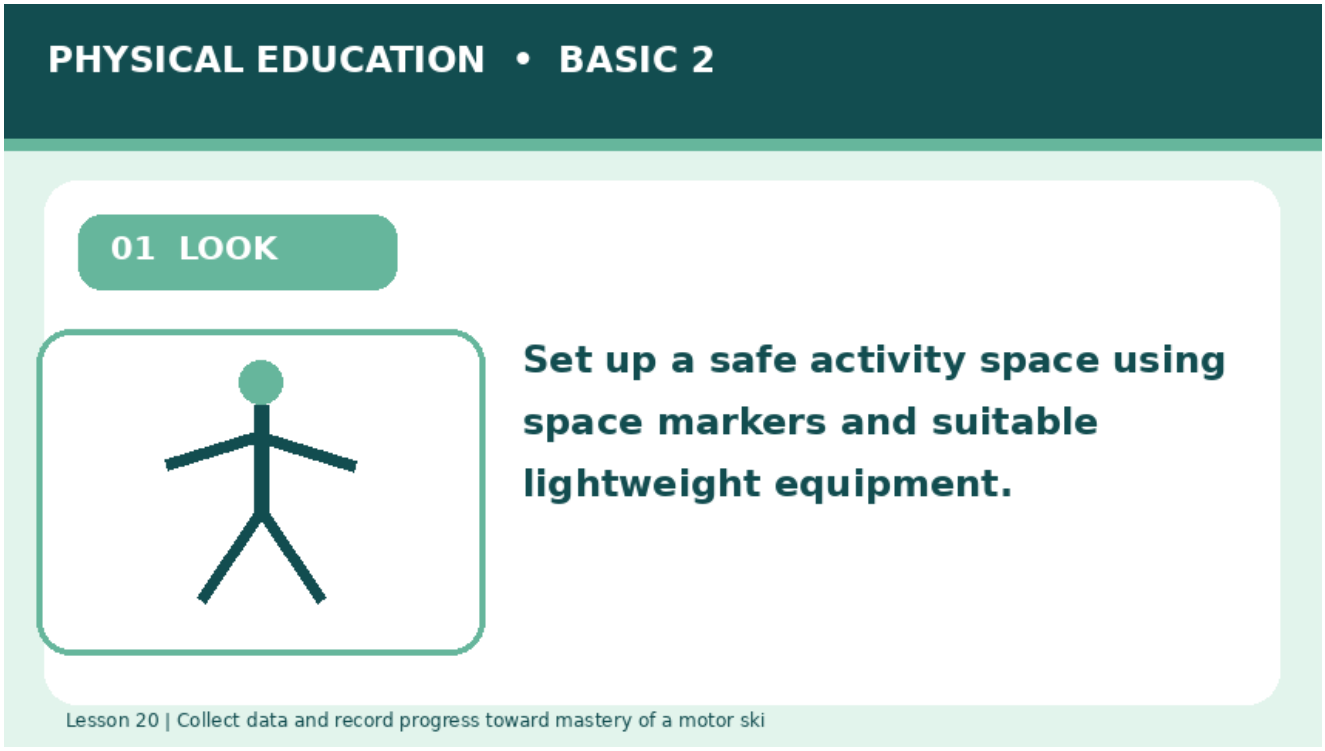

B. Claim expertise without trying the skill

C. Avoid explaining how the skill could be used

D. Use the topic to mislead others

LESSON 20: Collect data and record progress toward mastery of a motor skill in

Goal: Collect data and record progress toward mastery of a motor skill in physical activity.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Collect data and record progress toward mastery of a motor skill in physical activity.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 20: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Collect data and record progress toward mastery of a motor skill in: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Collect data and record progress toward mastery of a motor skill in physical activity.

2. [Play] Collect data and record progress toward mastery of a motor skill in: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. space markers and suitable lightweight equipment

C. a slippery or obstructed practice area

D. a sharp object placed on the sports ground

3. [Play] Collect data and record progress toward mastery of a motor skill in: Which action should come first?

A. Finish before looking at the instructions.

B. Skip all practice and guess the result.

C. Ignore the main task and do something unrelated.

D. Set up a safe activity space using space markers and suitable lightweight equipment.

4. [Play] Collect data and record progress toward mastery of a motor skill in: Which setting does this grade use?

A. a topic unrelated to the current class

B. paired coordination and movement games

C. an unrelated imagined city

D. only a future space colony

5. [Play] Collect data and record progress toward mastery of a motor skill in: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a demonstrated movement or fitness task with self-assessment

C. a response that does not show the lesson skill

D. an unsupported claim with no classroom practice

6. [Challenge] Collect data and record progress toward mastery of a motor skill in: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Only watch others without trying

C. Practise the skill slowly: Collect data and record progress toward mastery of a motor skill in physical activity.

D. Skip to marking before learning

7. [Challenge] Collect data and record progress toward mastery of a motor skill in: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Give a guess without trying the activity

C. Stop after reading the title

D. Observe a demonstration, practise slowly, then reflect on one improvement.

8. [Challenge] Collect data and record progress toward mastery of a motor skill in: What counts as good evidence of learning here?

A. careful, safe movement

B. an unrelated example that does not test the skill

C. a random answer with no supporting detail

D. an opinion without observation or practice

9. [Challenge] Collect data and record progress toward mastery of a motor skill in: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Do the activity without considering other people.

C. Take unnecessary risks to finish first.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

10. [Challenge] Collect data and record progress toward mastery of a motor skill in: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Complete a different lesson instead

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] Collect data and record progress toward mastery of a motor skill in: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Learning means only guessing and never checking

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. The topic can be completed without observing or practising

12. [Challenge] Collect data and record progress toward mastery of a motor skill in: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether your work demonstrates careful, safe movement.

D. Whether you can finish without showing your work

13. [Challenge] Collect data and record progress toward mastery of a motor skill in: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Repeat the same error without checking feedback

C. Make up results instead of practising

D. Stop immediately without reflection

14. [Challenge] Collect data and record progress toward mastery of a motor skill in: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Ignore all comments and leave the task incomplete

C. Revisit the steps and strengthen careful, safe movement.

D. Skip a difficult part without asking for help

15. [Challenge] Collect data and record progress toward mastery of a motor skill in: Which choice would show responsible use of today’s skill?

A. Apply the lesson about collect data and record progress toward mastery of a motor skill in physical activity to a suitable real-life situation.

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Avoid explaining how the skill could be used
