Basic 3

Illustrated lessons · Practical activities · Play and Challenge questions

Independently authored learning companion aligned to selected NaCCA 2019 topics. This is not an official NaCCA publication.

LESSON 01: Roll forward from standing position many times to a distance in a

Goal: Roll forward from standing position many times to a distance in a round form.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Roll forward from standing position many times to a distance in a round form.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 01: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Roll forward from standing position many times to a distance in a: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Roll forward from standing position many times to a distance in a round form.

2. [Play] Roll forward from standing position many times to a distance in a: What useful learning material or support is listed?

A. a soft, lightweight ball and enough clear space

B. a sharp object placed on the sports ground

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] Roll forward from standing position many times to a distance in a: Which action should come first?

A. Finish before looking at the instructions.

B. Ignore the main task and do something unrelated.

C. Skip all practice and guess the result.

D. Set up a safe activity space using a soft, lightweight ball and enough clear space.

4. [Play] Roll forward from standing position many times to a distance in a: Which setting does this grade use?

A. an unrelated imagined city

B. only a future space colony

C. a topic unrelated to the current class

D. combining basic movement skills

5. [Play] Roll forward from standing position many times to a distance in a: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a demonstrated movement or fitness task with self-assessment

C. an unsupported claim with no classroom practice

D. a response that does not show the lesson skill

6. [Challenge] Roll forward from standing position many times to a distance in a: Which action comes after the opening step?

A. Practise the skill slowly: Roll forward from standing position many times to a distance in a round form.

B. Only watch others without trying

C. Skip to marking before learning

D. Change to an unrelated lesson immediately

7. [Challenge] Roll forward from standing position many times to a distance in a: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Practise at a short distance; check your direction and try again with feedback.

C. Leave the task unfinished without explaining

D. Stop after reading the title

8. [Challenge] Roll forward from standing position many times to a distance in a: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. a random answer with no supporting detail

D. accurate controlled ball movement

9. [Challenge] Roll forward from standing position many times to a distance in a: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] Roll forward from standing position many times to a distance in a: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Avoid the stated task and its materials

C. Complete a different lesson instead

D. Practise at a short distance; check your direction and try again with feedback.

11. [Challenge] Roll forward from standing position many times to a distance in a: Which explanation best supports this lesson?

A. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] Roll forward from standing position many times to a distance in a: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can avoid answering questions

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can finish without showing your work

13. [Challenge] Roll forward from standing position many times to a distance in a: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Stop immediately without reflection

D. Repeat the same error without checking feedback

14. [Challenge] Roll forward from standing position many times to a distance in a: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen accurate controlled ball movement.

D. Ignore all comments and leave the task incomplete

15. [Challenge] Roll forward from standing position many times to a distance in a: Which choice would show responsible use of today’s skill?

A. Apply the lesson about roll forward from standing position many times to a distance in a round form to a suitable real-life situation.

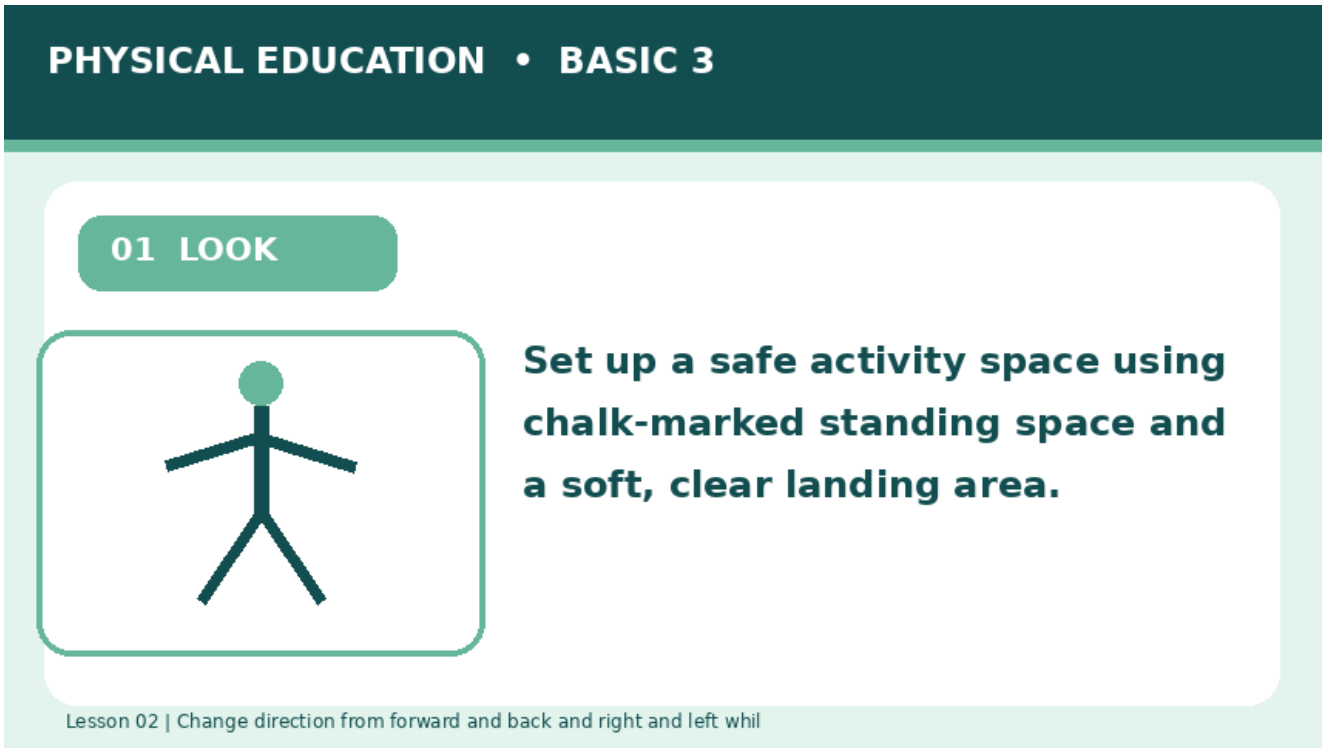

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Claim expertise without trying the skill

LESSON 02: Change direction from forward and back and right and left while

Goal: Change direction from forward and back and right and left while walking, running, hopping, and jumping (i.e., locomotor skills).

Learn it

A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

Useful material: chalk-marked standing space and a soft, clear landing area

Do it in three steps

1. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

2. Practise the skill slowly: Change direction from forward and back and right and left while walking, running, hopping, and jumping (i.e., locomotor skills).

3. Practise take-off, landing, then describe which landing felt more balanced.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

Try this: Practise take-off, landing, then describe which landing felt more balanced.

Show your learning: controlled take-off and safe landing. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 02: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Change direction from forward and back and right and left while: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Change direction from forward and back and right and left while walking, running, hopping, and jumping (i.e., locomotor skills).

2. [Play] Change direction from forward and back and right and left while: What useful learning material or support is listed?

A. chalk-marked standing space and a soft, clear landing area

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Change direction from forward and back and right and left while: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

D. Skip all practice and guess the result.

4. [Play] Change direction from forward and back and right and left while: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. combining basic movement skills

D. an unrelated imagined city

5. [Play] Change direction from forward and back and right and left while: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unrelated picture with no explanation

C. a response that does not show the lesson skill

D. an unsupported claim with no classroom practice

6. [Challenge] Change direction from forward and back and right and left while: Which action comes after the opening step?

A. Skip to marking before learning

B. Change to an unrelated lesson immediately

C. Only watch others without trying

D. Practise the skill slowly: Change direction from forward and back and right and left while walking, running, hopping, and jumping (i.e., locomotor skills).

7. [Challenge] Change direction from forward and back and right and left while: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Stop after reading the title

C. Practise take-off, landing, then describe which landing felt more balanced.

D. Leave the task unfinished without explaining

8. [Challenge] Change direction from forward and back and right and left while: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. controlled take-off and safe landing

C. an opinion without observation or practice

D. an unrelated example that does not test the skill

9. [Challenge] Change direction from forward and back and right and left while: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Change direction from forward and back and right and left while: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Practise take-off, landing, then describe which landing felt more balanced.

C. Copy another learner’s response without trying

D. Complete a different lesson instead

11. [Challenge] Change direction from forward and back and right and left while: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] Change direction from forward and back and right and left while: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can finish without showing your work

C. Whether your work demonstrates controlled take-off and safe landing.

D. Whether you can ignore the agreed task

13. [Challenge] Change direction from forward and back and right and left while: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Repeat the same error without checking feedback

C. Stop immediately without reflection

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Change direction from forward and back and right and left while: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Change answers randomly without a reason

C. Revisit the steps and strengthen controlled take-off and safe landing.

D. Skip a difficult part without asking for help

15. [Challenge] Change direction from forward and back and right and left while: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

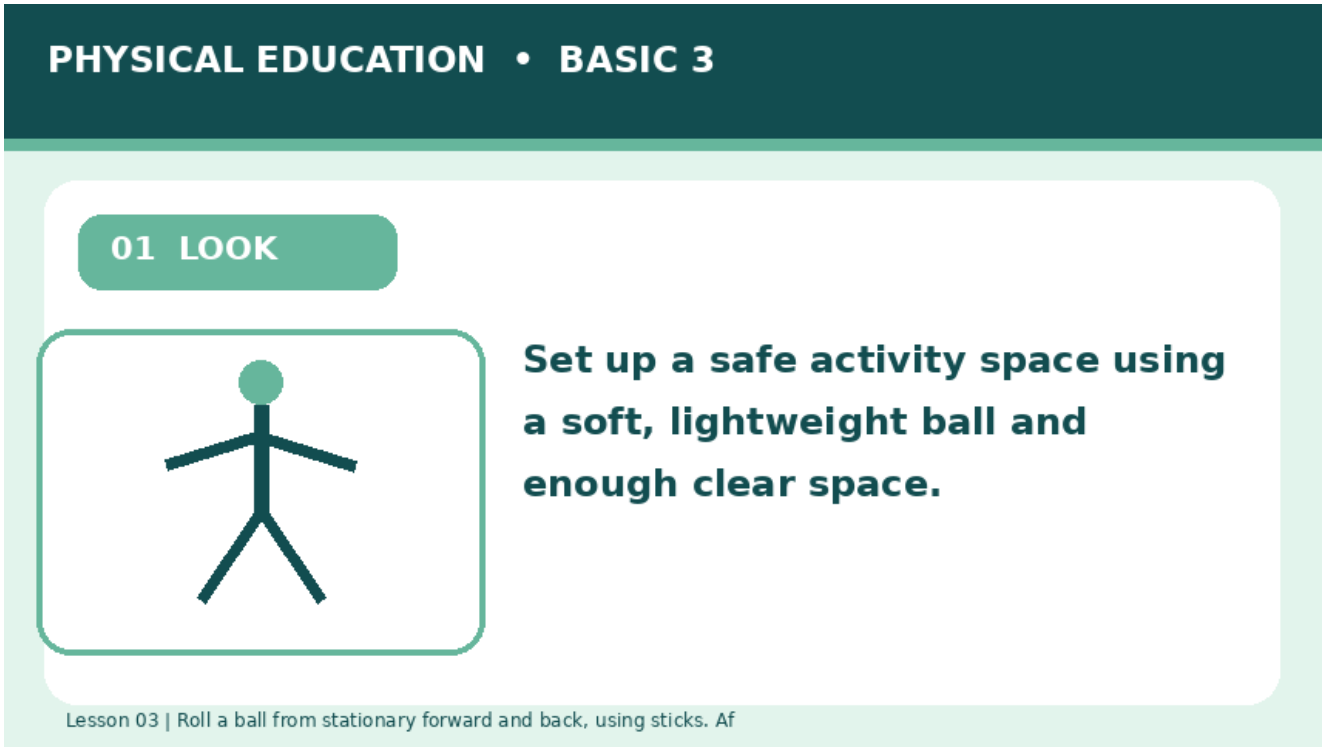

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Apply the lesson about change direction from forward and back and right and left while walking, running, hopping, and jumping (i.e., locomotor skills) to a suitable real-life situation.

LESSON 03: Roll a ball from stationary forward and back, using sticks. After

Goal: Roll a ball from stationary forward and back, using sticks. After warm-ups

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Roll a ball from stationary forward and back, using sticks. After warm-ups.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 03: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Roll a ball from stationary forward and back, using sticks. After: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Roll a ball from stationary forward and back, using sticks. After warm-ups

C. Ignore the movement task and do only an unrelated game

D. Practise unsafe tricks without learning the basic skill

2. [Play] Roll a ball from stationary forward and back, using sticks. After: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a soft, lightweight ball and enough clear space

D. a slippery or obstructed practice area

3. [Play] Roll a ball from stationary forward and back, using sticks. After: Which action should come first?

A. Set up a safe activity space using a soft, lightweight ball and enough clear space.

B. Ignore the main task and do something unrelated.

C. Finish before looking at the instructions.

D. Skip all practice and guess the result.

4. [Play] Roll a ball from stationary forward and back, using sticks. After: Which setting does this grade use?

A. a topic unrelated to the current class

B. combining basic movement skills

C. an unrelated imagined city

D. only a future space colony

5. [Play] Roll a ball from stationary forward and back, using sticks. After: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. an unsupported claim with no classroom practice

6. [Challenge] Roll a ball from stationary forward and back, using sticks. After: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Only watch others without trying

C. Skip to marking before learning

D. Practise the skill slowly: Roll a ball from stationary forward and back, using sticks. After warm-ups.

7. [Challenge] Roll a ball from stationary forward and back, using sticks. After: Which practice completes the three lesson stages?

A. Practise at a short distance; check your direction and try again with feedback.

B. Stop after reading the title

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] Roll a ball from stationary forward and back, using sticks. After: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. accurate controlled ball movement

C. an opinion without observation or practice

D. a random answer with no supporting detail

9. [Challenge] Roll a ball from stationary forward and back, using sticks. After: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Do the activity without considering other people.

10. [Challenge] Roll a ball from stationary forward and back, using sticks. After: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Practise at a short distance; check your direction and try again with feedback.

11. [Challenge] Roll a ball from stationary forward and back, using sticks. After: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] Roll a ball from stationary forward and back, using sticks. After: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can avoid answering questions

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can ignore the agreed task

13. [Challenge] Roll a ball from stationary forward and back, using sticks. After: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Make up results instead of practising

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Repeat the same error without checking feedback

14. [Challenge] Roll a ball from stationary forward and back, using sticks. After: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Change answers randomly without a reason

D. Skip a difficult part without asking for help

15. [Challenge] Roll a ball from stationary forward and back, using sticks. After: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

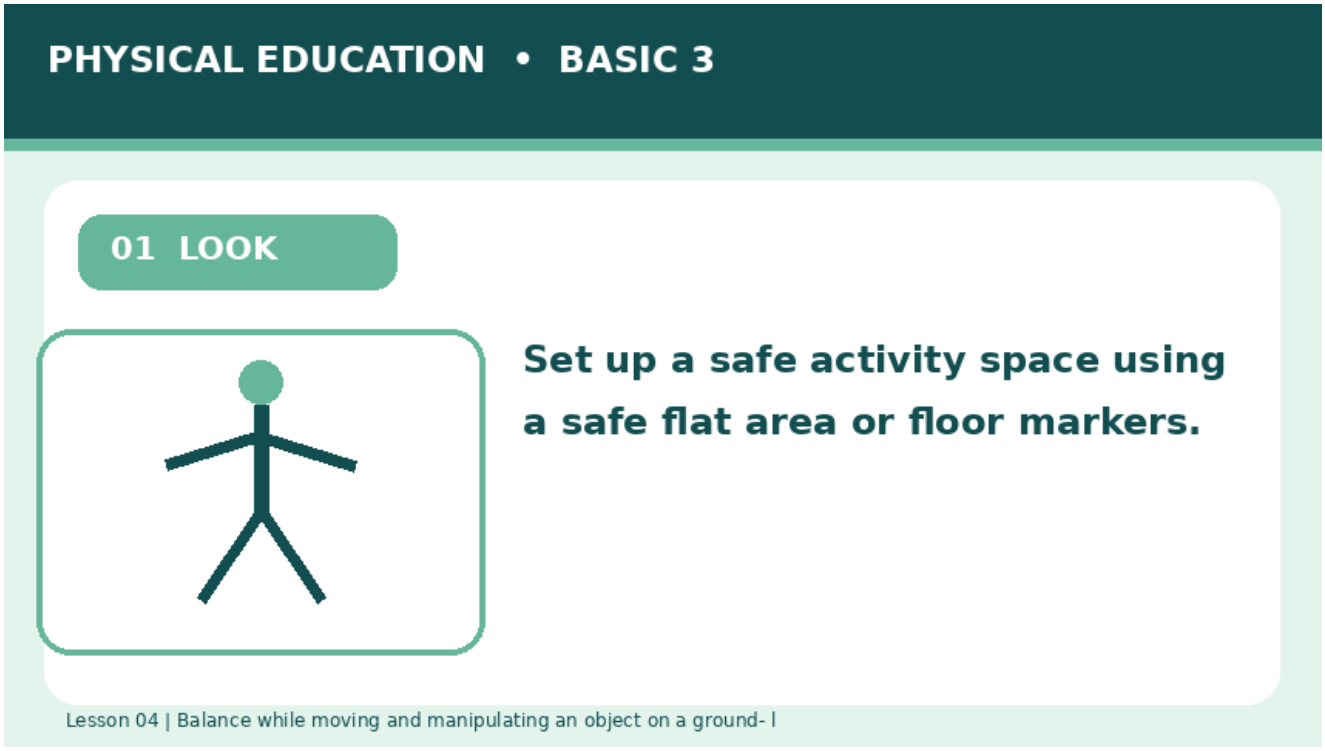

B. Use the topic to mislead others

C. Apply the lesson about roll a ball from stationary forward and back, using sticks. after warm-ups to a suitable real-life situation.

D. Claim expertise without trying the skill

LESSON 04: Balance while moving and manipulating an object on a ground- level

Goal: Balance while moving and manipulating an object on a ground- level balance beam.

Learn it

Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

Useful material: a safe flat area or floor markers

Do it in three steps

1. Set up a safe activity space using a safe flat area or floor markers.

2. Practise the skill slowly: Balance while moving and manipulating an object on a ground- level balance beam.

3. Hold a comfortable balance briefly and explain what made it steady.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

Try this: Hold a comfortable balance briefly and explain what made it steady.

Show your learning: stable body position. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 04: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Balance while moving and manipulating an object on a ground- level: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Balance while moving and manipulating an object on a ground- level balance beam.

D. Ignore the movement task and do only an unrelated game

2. [Play] Balance while moving and manipulating an object on a ground- level: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a safe flat area or floor markers

D. a slippery or obstructed practice area

3. [Play] Balance while moving and manipulating an object on a ground- level: Which action should come first?

A. Finish before looking at the instructions.

B. Skip all practice and guess the result.

C. Set up a safe activity space using a safe flat area or floor markers.

D. Ignore the main task and do something unrelated.

4. [Play] Balance while moving and manipulating an object on a ground- level: Which setting does this grade use?

A. combining basic movement skills

B. an unrelated imagined city

C. only a future space colony

D. a topic unrelated to the current class

5. [Play] Balance while moving and manipulating an object on a ground- level: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. a response that does not show the lesson skill

6. [Challenge] Balance while moving and manipulating an object on a ground- level: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Practise the skill slowly: Balance while moving and manipulating an object on a ground- level balance beam.

C. Skip to marking before learning

D. Only watch others without trying

7. [Challenge] Balance while moving and manipulating an object on a ground- level: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Hold a comfortable balance briefly and explain what made it steady.

D. Leave the task unfinished without explaining

8. [Challenge] Balance while moving and manipulating an object on a ground- level: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. stable body position

D. an opinion without observation or practice

9. [Challenge] Balance while moving and manipulating an object on a ground- level: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Balance while moving and manipulating an object on a ground- level: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Complete a different lesson instead

C. Hold a comfortable balance briefly and explain what made it steady.

D. Copy another learner’s response without trying

11. [Challenge] Balance while moving and manipulating an object on a ground- level: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] Balance while moving and manipulating an object on a ground- level: What should a partner help you check?

A. Whether your work demonstrates stable body position.

B. Whether you can ignore the agreed task

C. Whether you can finish without showing your work

D. Whether you can avoid answering questions

13. [Challenge] Balance while moving and manipulating an object on a ground- level: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Make up results instead of practising

D. Stop immediately without reflection

14. [Challenge] Balance while moving and manipulating an object on a ground- level: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen stable body position.

D. Ignore all comments and leave the task incomplete

15. [Challenge] Balance while moving and manipulating an object on a ground- level: Which choice would show responsible use of today’s skill?

A. Apply the lesson about balance while moving and manipulating an object on a ground- level balance beam to a suitable real-life situation.

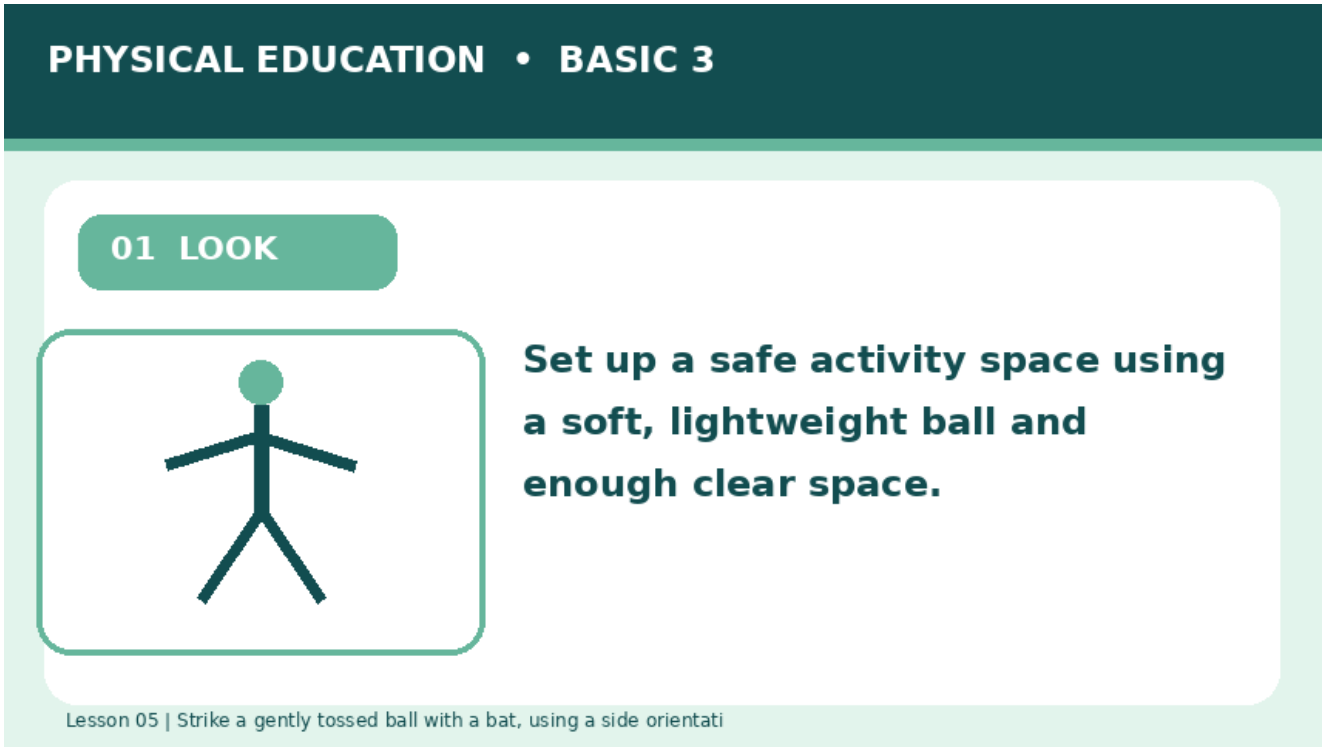

B. Avoid explaining how the skill could be used

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 05: Strike a gently tossed ball with a bat, using a side orientation

Goal: Strike a gently tossed ball with a bat, using a side orientation (movement).

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Strike a gently tossed ball with a bat, using a side orientation (movement).

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 05: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Strike a gently tossed ball with a bat, using a side orientation: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Practise unsafe tricks without learning the basic skill

C. Rush into a demanding activity without warming up

D. Strike a gently tossed ball with a bat, using a side orientation (movement).

2. [Play] Strike a gently tossed ball with a bat, using a side orientation: What useful learning material or support is listed?

A. a soft, lightweight ball and enough clear space

B. heavy unsafe equipment in a crowded space

C. a slippery or obstructed practice area

D. a sharp object placed on the sports ground

3. [Play] Strike a gently tossed ball with a bat, using a side orientation: Which action should come first?

A. Set up a safe activity space using a soft, lightweight ball and enough clear space.

B. Ignore the main task and do something unrelated.

C. Skip all practice and guess the result.

D. Finish before looking at the instructions.

4. [Play] Strike a gently tossed ball with a bat, using a side orientation: Which setting does this grade use?

A. an unrelated imagined city

B. only a future space colony

C. a topic unrelated to the current class

D. combining basic movement skills

5. [Play] Strike a gently tossed ball with a bat, using a side orientation: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. an unrelated picture with no explanation

C. a response that does not show the lesson skill

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] Strike a gently tossed ball with a bat, using a side orientation: Which action comes after the opening step?

A. Only watch others without trying

B. Practise the skill slowly: Strike a gently tossed ball with a bat, using a side orientation (movement).

C. Skip to marking before learning

D. Change to an unrelated lesson immediately

7. [Challenge] Strike a gently tossed ball with a bat, using a side orientation: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Practise at a short distance; check your direction and try again with feedback.

D. Give a guess without trying the activity

8. [Challenge] Strike a gently tossed ball with a bat, using a side orientation: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an opinion without observation or practice

C. accurate controlled ball movement

D. an unrelated example that does not test the skill

9. [Challenge] Strike a gently tossed ball with a bat, using a side orientation: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

10. [Challenge] Strike a gently tossed ball with a bat, using a side orientation: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Avoid the stated task and its materials

C. Practise at a short distance; check your direction and try again with feedback.

D. Copy another learner’s response without trying

11. [Challenge] Strike a gently tossed ball with a bat, using a side orientation: Which explanation best supports this lesson?

A. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. Learning means only guessing and never checking

12. [Challenge] Strike a gently tossed ball with a bat, using a side orientation: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can avoid answering questions

C. Whether you can finish without showing your work

D. Whether you can ignore the agreed task

13. [Challenge] Strike a gently tossed ball with a bat, using a side orientation: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] Strike a gently tossed ball with a bat, using a side orientation: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Change answers randomly without a reason

D. Ignore all comments and leave the task incomplete

15. [Challenge] Strike a gently tossed ball with a bat, using a side orientation: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

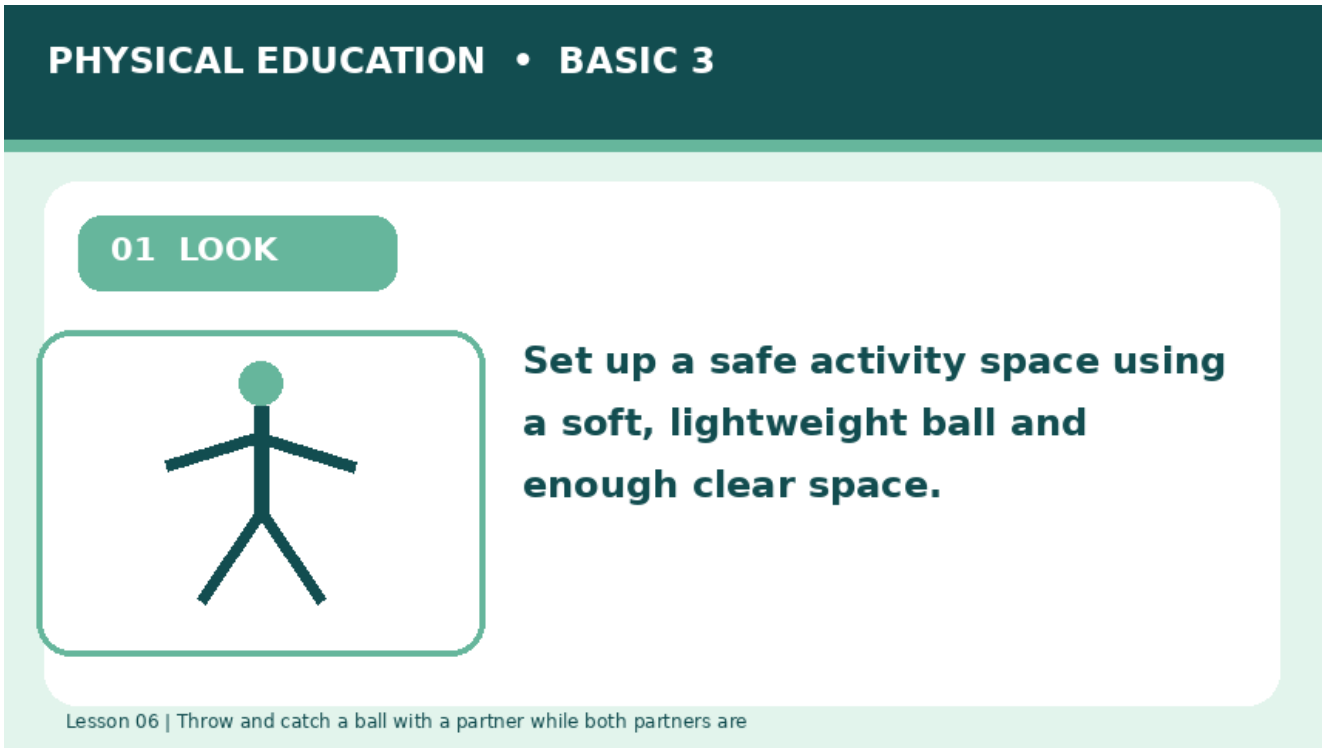

B. Apply the lesson about strike a gently tossed ball with a bat, using a side orientation (movement) to a suitable real-life situation.

C. Avoid explaining how the skill could be used

D. Use the topic to mislead others

LESSON 06: Throw and catch a ball with a partner while both partners are

Goal: Throw and catch a ball with a partner while both partners are moving using underhand, overhand and sidearm throw patterns.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Throw and catch a ball with a partner while both partners are moving using underhand, overhand and sidearm throw patterns.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 06: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Throw and catch a ball with a partner while both partners are: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Throw and catch a ball with a partner while both partners are moving using underhand, overhand and sidearm throw patterns.

C. Ignore the movement task and do only an unrelated game

D. Practise unsafe tricks without learning the basic skill

2. [Play] Throw and catch a ball with a partner while both partners are: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a soft, lightweight ball and enough clear space

C. a sharp object placed on the sports ground

D. a slippery or obstructed practice area

3. [Play] Throw and catch a ball with a partner while both partners are: Which action should come first?

A. Finish before looking at the instructions.

B. Skip all practice and guess the result.

C. Ignore the main task and do something unrelated.

D. Set up a safe activity space using a soft, lightweight ball and enough clear space.

4. [Play] Throw and catch a ball with a partner while both partners are: Which setting does this grade use?

A. only a future space colony

B. an unrelated imagined city

C. combining basic movement skills

D. a topic unrelated to the current class

5. [Play] Throw and catch a ball with a partner while both partners are: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a demonstrated movement or fitness task with self-assessment

C. an unsupported claim with no classroom practice

D. a response that does not show the lesson skill

6. [Challenge] Throw and catch a ball with a partner while both partners are: Which action comes after the opening step?

A. Practise the skill slowly: Throw and catch a ball with a partner while both partners are moving using underhand, overhand and sidearm throw patterns.

B. Skip to marking before learning

C. Change to an unrelated lesson immediately

D. Only watch others without trying

7. [Challenge] Throw and catch a ball with a partner while both partners are: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Stop after reading the title

C. Practise at a short distance; check your direction and try again with feedback.

D. Leave the task unfinished without explaining

8. [Challenge] Throw and catch a ball with a partner while both partners are: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. accurate controlled ball movement

C. a random answer with no supporting detail

D. an unrelated example that does not test the skill

9. [Challenge] Throw and catch a ball with a partner while both partners are: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] Throw and catch a ball with a partner while both partners are: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Practise at a short distance; check your direction and try again with feedback.

11. [Challenge] Throw and catch a ball with a partner while both partners are: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

C. The lesson has no connection to life or skills

D. Learning means only guessing and never checking

12. [Challenge] Throw and catch a ball with a partner while both partners are: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can finish without showing your work

C. Whether you can avoid answering questions

D. Whether your work demonstrates accurate controlled ball movement.

13. [Challenge] Throw and catch a ball with a partner while both partners are: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Stop immediately without reflection

D. Repeat the same error without checking feedback

14. [Challenge] Throw and catch a ball with a partner while both partners are: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Ignore all comments and leave the task incomplete

C. Revisit the steps and strengthen accurate controlled ball movement.

D. Change answers randomly without a reason

15. [Challenge] Throw and catch a ball with a partner while both partners are: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

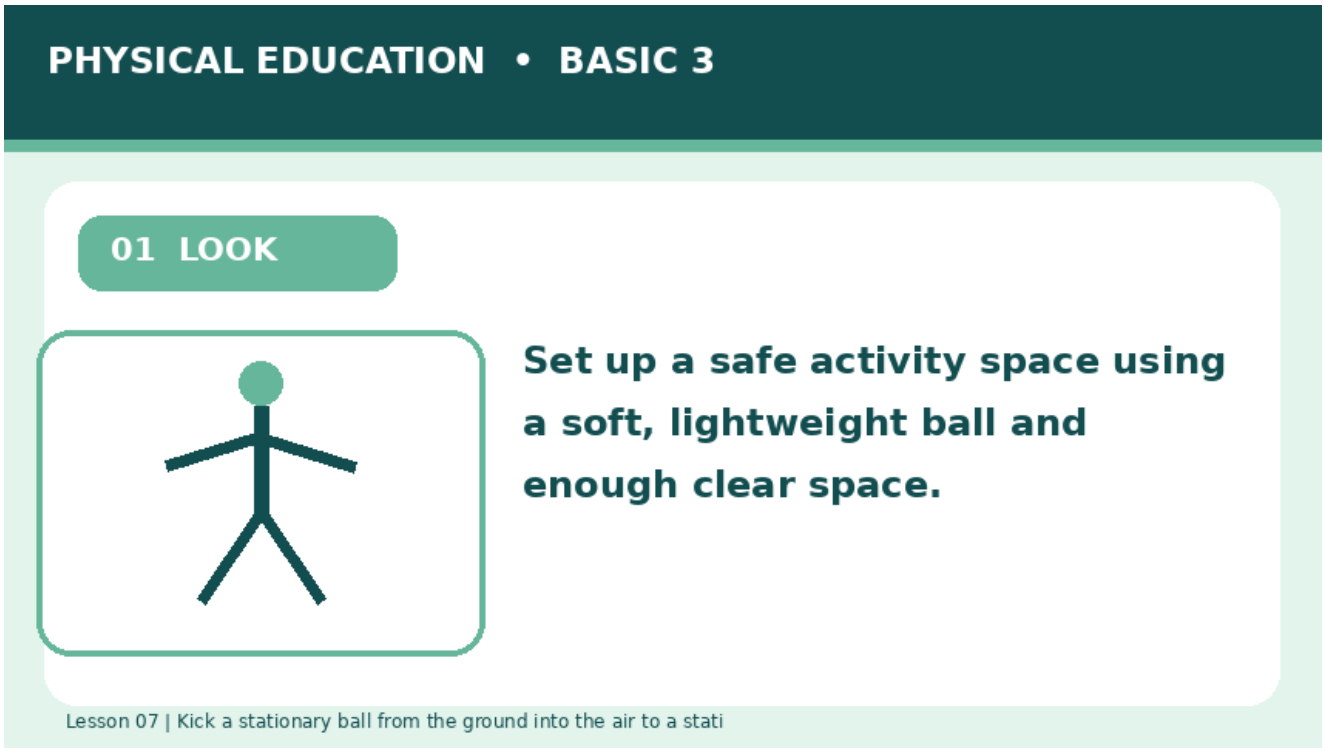

B. Use the topic to mislead others

C. Apply the lesson about throw and catch a ball with a partner while both partners are moving using underhand, overhand and sidearm throw patterns to a suitable real-life situation.

D. Claim expertise without trying the skill

LESSON 07: Kick a stationary ball from the ground into the air to a stationary

Goal: Kick a stationary ball from the ground into the air to a stationary partner and a moving partner using the inside of the foot.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Kick a stationary ball from the ground into the air to a stationary partner and a moving partner using the inside of the foot.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 07: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Kick a stationary ball from the ground into the air to a stationary: What is this lesson mainly about?

A. Kick a stationary ball from the ground into the air to a stationary partner and a moving partner using the inside of the foot.

B. Ignore the movement task and do only an unrelated game

C. Rush into a demanding activity without warming up

D. Practise unsafe tricks without learning the basic skill

2. [Play] Kick a stationary ball from the ground into the air to a stationary: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a soft, lightweight ball and enough clear space

D. a slippery or obstructed practice area

3. [Play] Kick a stationary ball from the ground into the air to a stationary: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Set up a safe activity space using a soft, lightweight ball and enough clear space.

D. Finish before looking at the instructions.

4. [Play] Kick a stationary ball from the ground into the air to a stationary: Which setting does this grade use?

A. an unrelated imagined city

B. a topic unrelated to the current class

C. combining basic movement skills

D. only a future space colony

5. [Play] Kick a stationary ball from the ground into the air to a stationary: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] Kick a stationary ball from the ground into the air to a stationary: Which action comes after the opening step?

A. Only watch others without trying

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Kick a stationary ball from the ground into the air to a stationary partner and a moving partner using the inside of the foot.

D. Skip to marking before learning

7. [Challenge] Kick a stationary ball from the ground into the air to a stationary: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Practise at a short distance; check your direction and try again with feedback.

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] Kick a stationary ball from the ground into the air to a stationary: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. an opinion without observation or practice

D. accurate controlled ball movement

9. [Challenge] Kick a stationary ball from the ground into the air to a stationary: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

10. [Challenge] Kick a stationary ball from the ground into the air to a stationary: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Avoid the stated task and its materials

C. Practise at a short distance; check your direction and try again with feedback.

D. Copy another learner’s response without trying

11. [Challenge] Kick a stationary ball from the ground into the air to a stationary: Which explanation best supports this lesson?

A. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] Kick a stationary ball from the ground into the air to a stationary: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can finish without showing your work

C. Whether you can ignore the agreed task

D. Whether you can avoid answering questions

13. [Challenge] Kick a stationary ball from the ground into the air to a stationary: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Make up results instead of practising

C. Stop immediately without reflection

D. Repeat the same error without checking feedback

14. [Challenge] Kick a stationary ball from the ground into the air to a stationary: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Change answers randomly without a reason

D. Skip a difficult part without asking for help

15. [Challenge] Kick a stationary ball from the ground into the air to a stationary: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

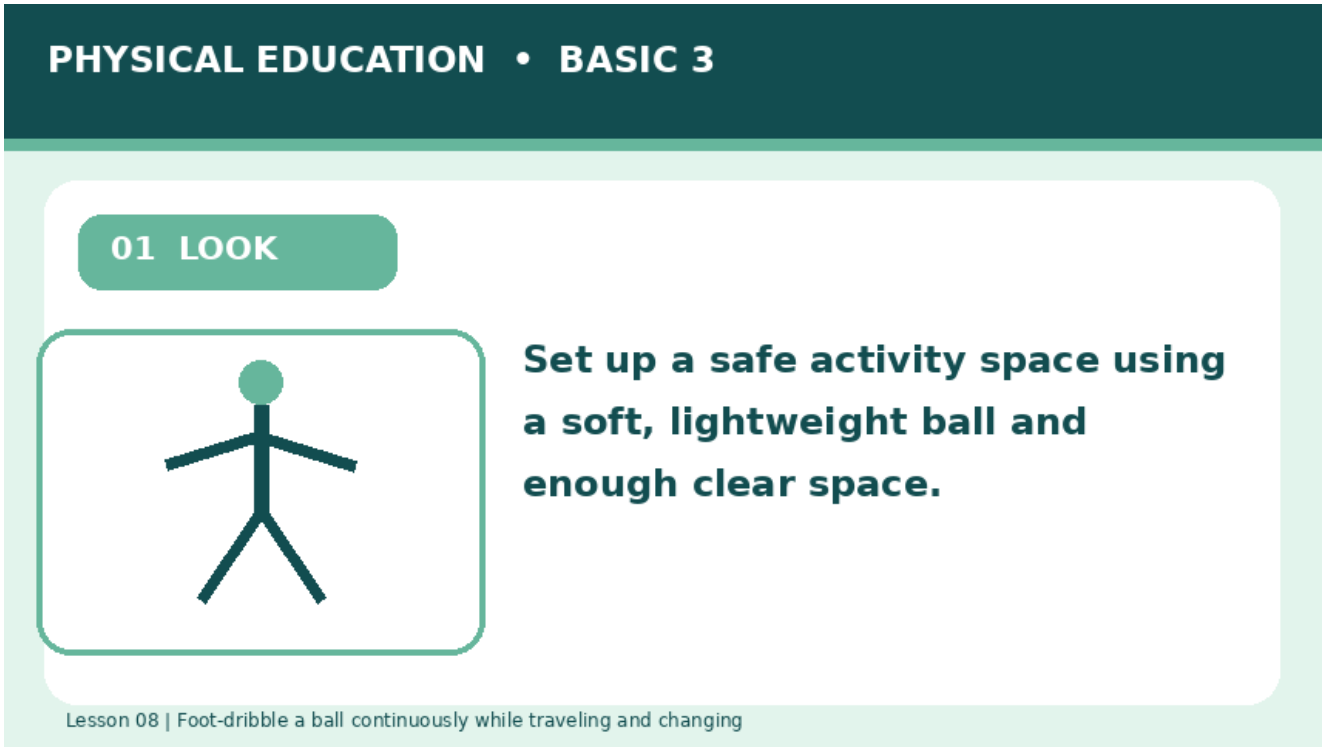

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Apply the lesson about kick a stationary ball from the ground into the air to a stationary partner and a moving partner using the inside of the foot to a suitable real-life situation.

LESSON 08: Foot-dribble a ball continuously while traveling and changing

Goal: Foot-dribble a ball continuously while traveling and changing direction. Arrange cones or skittles.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Foot-dribble a ball continuously while traveling and changing direction. Arrange cones or skittles.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 08: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Foot-dribble a ball continuously while traveling and changing: What is this lesson mainly about?

A. Foot-dribble a ball continuously while traveling and changing direction. Arrange cones or skittles.

B. Practise unsafe tricks without learning the basic skill

C. Rush into a demanding activity without warming up

D. Ignore the movement task and do only an unrelated game

2. [Play] Foot-dribble a ball continuously while traveling and changing: What useful learning material or support is listed?

A. a soft, lightweight ball and enough clear space

B. heavy unsafe equipment in a crowded space

C. a sharp object placed on the sports ground

D. a slippery or obstructed practice area

3. [Play] Foot-dribble a ball continuously while traveling and changing: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Set up a safe activity space using a soft, lightweight ball and enough clear space.

C. Finish before looking at the instructions.

D. Skip all practice and guess the result.

4. [Play] Foot-dribble a ball continuously while traveling and changing: Which setting does this grade use?

A. only a future space colony

B. a topic unrelated to the current class

C. combining basic movement skills

D. an unrelated imagined city

5. [Play] Foot-dribble a ball continuously while traveling and changing: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a response that does not show the lesson skill

C. a demonstrated movement or fitness task with self-assessment

D. an unsupported claim with no classroom practice

6. [Challenge] Foot-dribble a ball continuously while traveling and changing: Which action comes after the opening step?

A. Only watch others without trying

B. Skip to marking before learning

C. Practise the skill slowly: Foot-dribble a ball continuously while traveling and changing direction. Arrange cones or skittles.

D. Change to an unrelated lesson immediately

7. [Challenge] Foot-dribble a ball continuously while traveling and changing: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Stop after reading the title

C. Practise at a short distance; check your direction and try again with feedback.

D. Leave the task unfinished without explaining

8. [Challenge] Foot-dribble a ball continuously while traveling and changing: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. accurate controlled ball movement

C. a random answer with no supporting detail

D. an opinion without observation or practice

9. [Challenge] Foot-dribble a ball continuously while traveling and changing: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Do the activity without considering other people.

C. Take unnecessary risks to finish first.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

10. [Challenge] Foot-dribble a ball continuously while traveling and changing: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Complete a different lesson instead

C. Avoid the stated task and its materials

D. Practise at a short distance; check your direction and try again with feedback.

11. [Challenge] Foot-dribble a ball continuously while traveling and changing: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The lesson has no connection to life or skills

C. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

D. The topic can be completed without observing or practising

12. [Challenge] Foot-dribble a ball continuously while traveling and changing: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can finish without showing your work

13. [Challenge] Foot-dribble a ball continuously while traveling and changing: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Stop immediately without reflection

C. Make up results instead of practising

D. Repeat the same error without checking feedback

14. [Challenge] Foot-dribble a ball continuously while traveling and changing: How should a learner improve after feedback?

A. Revisit the steps and strengthen accurate controlled ball movement.

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Change answers randomly without a reason

15. [Challenge] Foot-dribble a ball continuously while traveling and changing: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

B. Apply the lesson about foot-dribble a ball continuously while traveling and changing direction. arrange cones or skittles to a suitable real-life situation.

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 09: The difference between a jog and a run, a hop and a jump, and a

Goal: Demonstrate the difference between a jog and a run, a hop and a jump, and a gallop and a slide.

Learn it

A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

Useful material: chalk-marked standing space and a soft, clear landing area

Do it in three steps

1. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

2. Practise the skill slowly: Demonstrate the difference between a jog and a run, a hop and a jump, and a gallop and a slide.

3. Practise take-off, landing, then describe which landing felt more balanced.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

Try this: Practise take-off, landing, then describe which landing felt more balanced.

Show your learning: controlled take-off and safe landing. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 09: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The difference between a jog and a run, a hop and a jump, and a: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Demonstrate the difference between a jog and a run, a hop and a jump, and a gallop and a slide.

2. [Play] The difference between a jog and a run, a hop and a jump, and a: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a slippery or obstructed practice area

C. chalk-marked standing space and a soft, clear landing area

D. a sharp object placed on the sports ground

3. [Play] The difference between a jog and a run, a hop and a jump, and a: Which action should come first?

A. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

B. Finish before looking at the instructions.

C. Skip all practice and guess the result.

D. Ignore the main task and do something unrelated.

4. [Play] The difference between a jog and a run, a hop and a jump, and a: Which setting does this grade use?

A. only a future space colony

B. an unrelated imagined city

C. a topic unrelated to the current class

D. combining basic movement skills

5. [Play] The difference between a jog and a run, a hop and a jump, and a: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. an unsupported claim with no classroom practice

6. [Challenge] The difference between a jog and a run, a hop and a jump, and a: Which action comes after the opening step?

A. Practise the skill slowly: Demonstrate the difference between a jog and a run, a hop and a jump, and a gallop and a slide.

B. Change to an unrelated lesson immediately

C. Only watch others without trying

D. Skip to marking before learning

7. [Challenge] The difference between a jog and a run, a hop and a jump, and a: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Leave the task unfinished without explaining

C. Stop after reading the title

D. Practise take-off, landing, then describe which landing felt more balanced.

8. [Challenge] The difference between a jog and a run, a hop and a jump, and a: What counts as good evidence of learning here?

A. controlled take-off and safe landing

B. an unrelated example that does not test the skill

C. a random answer with no supporting detail

D. an opinion without observation or practice

9. [Challenge] The difference between a jog and a run, a hop and a jump, and a: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] The difference between a jog and a run, a hop and a jump, and a: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Practise take-off, landing, then describe which landing felt more balanced.

C. Complete a different lesson instead

D. Avoid the stated task and its materials

11. [Challenge] The difference between a jog and a run, a hop and a jump, and a: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

12. [Challenge] The difference between a jog and a run, a hop and a jump, and a: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can avoid answering questions

C. Whether your work demonstrates controlled take-off and safe landing.

D. Whether you can finish without showing your work

13. [Challenge] The difference between a jog and a run, a hop and a jump, and a: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Make up results instead of practising

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Repeat the same error without checking feedback

14. [Challenge] The difference between a jog and a run, a hop and a jump, and a: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Ignore all comments and leave the task incomplete

C. Revisit the steps and strengthen controlled take-off and safe landing.

D. Change answers randomly without a reason

15. [Challenge] The difference between a jog and a run, a hop and a jump, and a: Which choice would show responsible use of today’s skill?

A. Apply the lesson about demonstrate the difference between a jog and a run, a hop and a jump, and a gallop and a slide to a suitable real-life situation.

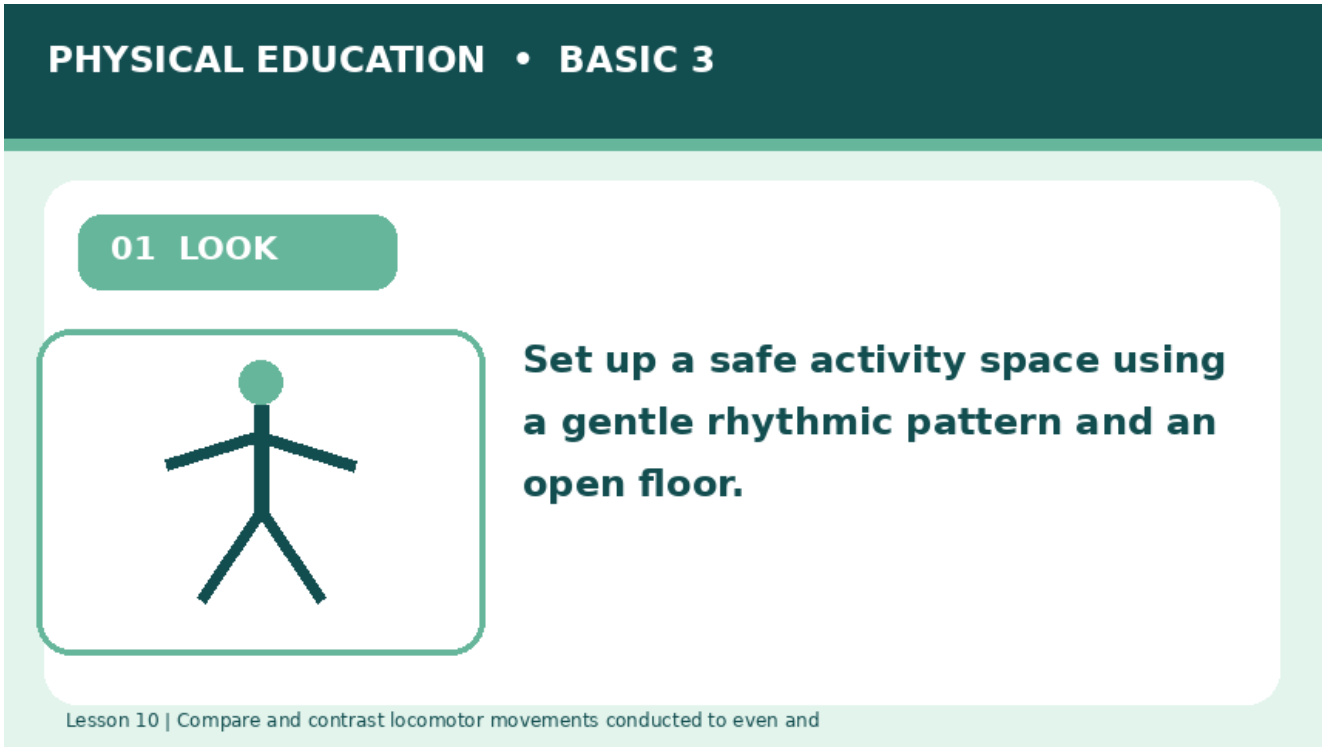

B. Claim expertise without trying the skill

C. Avoid explaining how the skill could be used

D. Use the topic to mislead others

LESSON 10: Compare and contrast locomotor movements conducted to even and

Goal: Compare and contrast locomotor movements conducted to even and uneven beats.

Learn it

Rhythm helps a group coordinate movements in time. Listening and careful spacing support safe group practice.

Useful material: a gentle rhythmic pattern and an open floor

Do it in three steps

1. Set up a safe activity space using a gentle rhythmic pattern and an open floor.

2. Practise the skill slowly: Compare and contrast locomotor movements conducted to even and uneven beats.

3. Copy a short movement phrase, then make a safe variation with a partner.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid collisions or uncomfortable movements.

Try this: Copy a short movement phrase, then make a safe variation with a partner.

Show your learning: coordinated steps and respectful space. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 10: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Compare and contrast locomotor movements conducted to even and: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Compare and contrast locomotor movements conducted to even and uneven beats.

2. [Play] Compare and contrast locomotor movements conducted to even and: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a gentle rhythmic pattern and an open floor

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] Compare and contrast locomotor movements conducted to even and: Which action should come first?

A. Finish before looking at the instructions.

B. Skip all practice and guess the result.

C. Ignore the main task and do something unrelated.

D. Set up a safe activity space using a gentle rhythmic pattern and an open floor.

4. [Play] Compare and contrast locomotor movements conducted to even and: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. combining basic movement skills

D. an unrelated imagined city

5. [Play] Compare and contrast locomotor movements conducted to even and: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] Compare and contrast locomotor movements conducted to even and: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Practise the skill slowly: Compare and contrast locomotor movements conducted to even and uneven beats.

C. Only watch others without trying

D. Skip to marking before learning

7. [Challenge] Compare and contrast locomotor movements conducted to even and: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Stop after reading the title

C. Give a guess without trying the activity

D. Copy a short movement phrase, then make a safe variation with a partner.

8. [Challenge] Compare and contrast locomotor movements conducted to even and: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. coordinated steps and respectful space

C. an unrelated example that does not test the skill

D. an opinion without observation or practice

9. [Challenge] Compare and contrast locomotor movements conducted to even and: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid collisions or uncomfortable movements.

B. Ignore the teacher’s safety instructions.

C. Do the activity without considering other people.

D. Take unnecessary risks to finish first.

10. [Challenge] Compare and contrast locomotor movements conducted to even and: Which classroom activity helps apply the lesson?

A. Copy a short movement phrase, then make a safe variation with a partner.

B. Avoid the stated task and its materials

C. Complete a different lesson instead

D. Copy another learner’s response without trying

11. [Challenge] Compare and contrast locomotor movements conducted to even and: Which explanation best supports this lesson?

A. Rhythm helps a group coordinate movements in time. Listening and careful spacing support safe group practice.

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. Learning means only guessing and never checking

12. [Challenge] Compare and contrast locomotor movements conducted to even and: What should a partner help you check?

A. Whether your work demonstrates coordinated steps and respectful space.

B. Whether you can finish without showing your work

C. Whether you can ignore the agreed task

D. Whether you can avoid answering questions

13. [Challenge] Compare and contrast locomotor movements conducted to even and: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Compare and contrast locomotor movements conducted to even and: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen coordinated steps and respectful space.

D. Change answers randomly without a reason

15. [Challenge] Compare and contrast locomotor movements conducted to even and: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

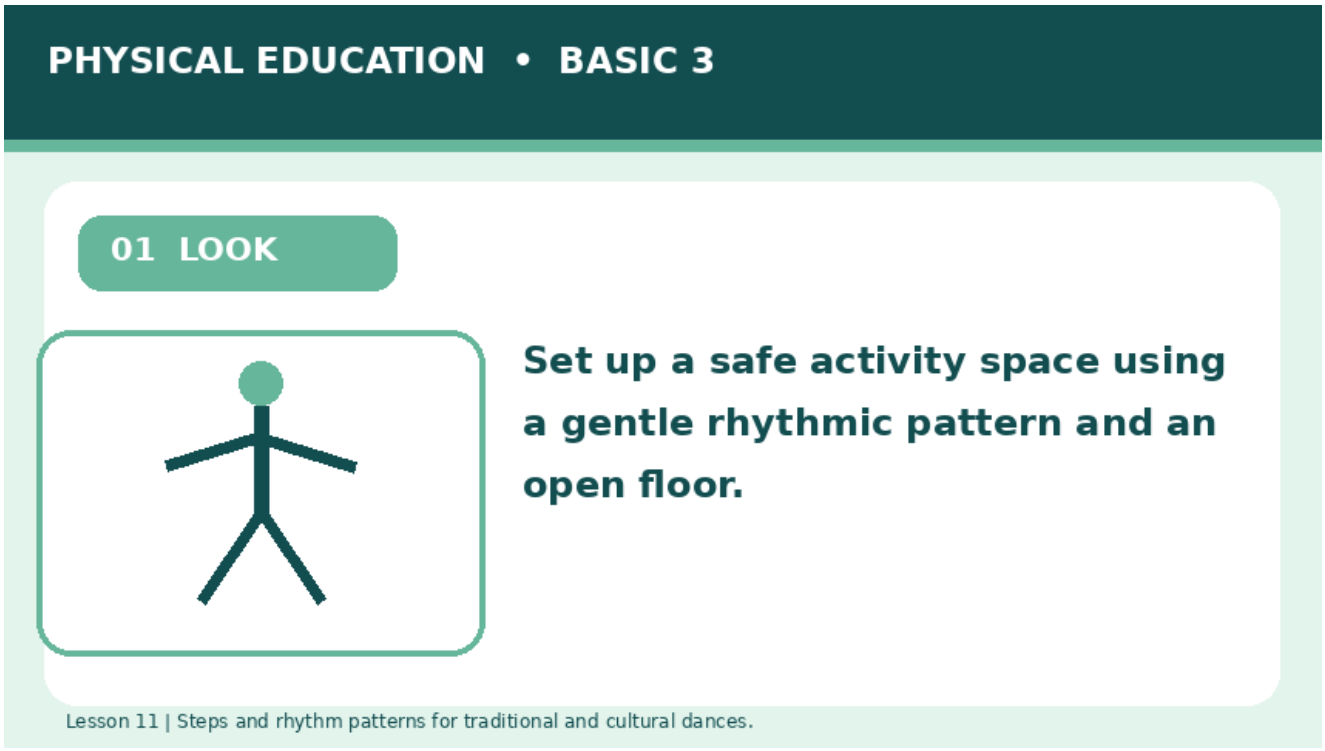

B. Claim expertise without trying the skill

C. Apply the lesson about compare and contrast locomotor movements conducted to even and uneven beats to a suitable real-life situation.

D. Use the topic to mislead others

LESSON 11: Steps and rhythm patterns for traditional and cultural dances. Show

Goal: Identify steps and rhythm patterns for traditional and cultural dances. Show video of traditional and cultural dances of Ghana such as agbadza, adowa, etc

Learn it

Rhythm helps a group coordinate movements in time. Listening and careful spacing support safe group practice.

Useful material: a gentle rhythmic pattern and an open floor

Do it in three steps

1. Set up a safe activity space using a gentle rhythmic pattern and an open floor.

2. Practise the skill slowly: Identify steps and rhythm patterns for traditional and cultural dances. Show video of traditional and cultural dances of Ghana such as agbadza, adowa, etc.

3. Copy a short movement phrase, then make a safe variation with a partner.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid collisions or uncomfortable movements.

Try this: Copy a short movement phrase, then make a safe variation with a partner.

Show your learning: coordinated steps and respectful space. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 11: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Steps and rhythm patterns for traditional and cultural dances. Show: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Identify steps and rhythm patterns for traditional and cultural dances. Show video of traditional and cultural dances of Ghana such as agbadza, adowa, etc

2. [Play] Steps and rhythm patterns for traditional and cultural dances. Show: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. heavy unsafe equipment in a crowded space

C. a gentle rhythmic pattern and an open floor

D. a slippery or obstructed practice area

3. [Play] Steps and rhythm patterns for traditional and cultural dances. Show: Which action should come first?

A. Skip all practice and guess the result.

B. Finish before looking at the instructions.

C. Set up a safe activity space using a gentle rhythmic pattern and an open floor.

D. Ignore the main task and do something unrelated.

4. [Play] Steps and rhythm patterns for traditional and cultural dances. Show: Which setting does this grade use?

A. only a future space colony

B. a topic unrelated to the current class

C. an unrelated imagined city

D. combining basic movement skills

5. [Play] Steps and rhythm patterns for traditional and cultural dances. Show: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. an unsupported claim with no classroom practice

6. [Challenge] Steps and rhythm patterns for traditional and cultural dances. Show: Which action comes after the opening step?

A. Only watch others without trying

B. Skip to marking before learning

C. Change to an unrelated lesson immediately

D. Practise the skill slowly: Identify steps and rhythm patterns for traditional and cultural dances. Show video of traditional and cultural dances of Ghana such as agbadza, adowa, etc.

7. [Challenge] Steps and rhythm patterns for traditional and cultural dances. Show: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Stop after reading the title

C. Copy a short movement phrase, then make a safe variation with a partner.

D. Give a guess without trying the activity

8. [Challenge] Steps and rhythm patterns for traditional and cultural dances. Show: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. coordinated steps and respectful space

D. an opinion without observation or practice

9. [Challenge] Steps and rhythm patterns for traditional and cultural dances. Show: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Do the activity without considering other people.

C. Ignore the teacher’s safety instructions.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid collisions or uncomfortable movements.

10. [Challenge] Steps and rhythm patterns for traditional and cultural dances. Show: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy a short movement phrase, then make a safe variation with a partner.

C. Avoid the stated task and its materials

D. Copy another learner’s response without trying

11. [Challenge] Steps and rhythm patterns for traditional and cultural dances. Show: Which explanation best supports this lesson?

A. Rhythm helps a group coordinate movements in time. Listening and careful spacing support safe group practice.

B. The topic can be completed without observing or practising

C. Learning means only guessing and never checking

D. The lesson has no connection to life or skills

12. [Challenge] Steps and rhythm patterns for traditional and cultural dances. Show: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether your work demonstrates coordinated steps and respectful space.

C. Whether you can avoid answering questions

D. Whether you can ignore the agreed task

13. [Challenge] Steps and rhythm patterns for traditional and cultural dances. Show: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] Steps and rhythm patterns for traditional and cultural dances. Show: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Revisit the steps and strengthen coordinated steps and respectful space.

C. Skip a difficult part without asking for help

D. Change answers randomly without a reason

15. [Challenge] Steps and rhythm patterns for traditional and cultural dances. Show: Which choice would show responsible use of today’s skill?

A. Apply the lesson about identify steps and rhythm patterns for traditional and cultural dances. show video of traditional and cultural dances of ghana such as agbadza, adowa, etc to a suitable real-life situation.

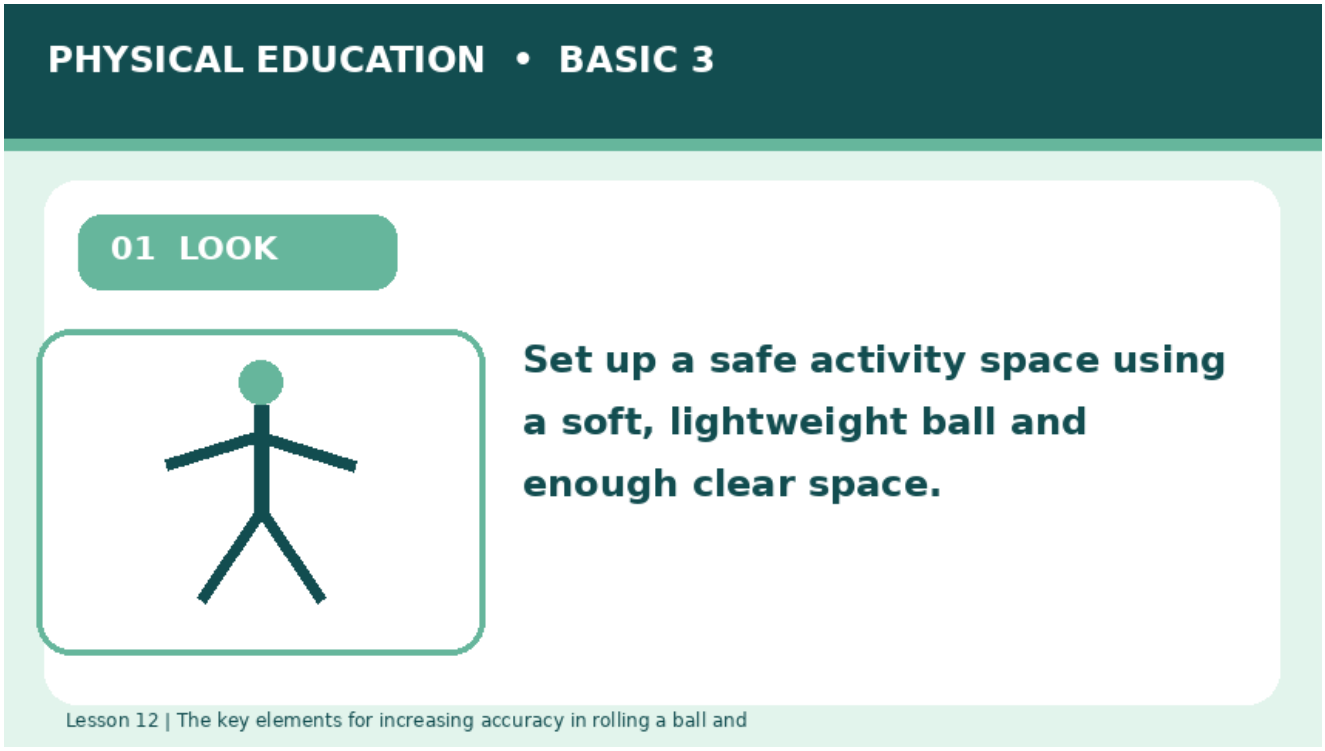

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Avoid explaining how the skill could be used

LESSON 12: The key elements for increasing accuracy in rolling a ball and

Goal: Identify the key elements for increasing accuracy in rolling a ball and throwing a ball.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Identify the key elements for increasing accuracy in rolling a ball and throwing a ball.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 12: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The key elements for increasing accuracy in rolling a ball and: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Identify the key elements for increasing accuracy in rolling a ball and throwing a ball.

C. Practise unsafe tricks without learning the basic skill

D. Rush into a demanding activity without warming up

2. [Play] The key elements for increasing accuracy in rolling a ball and: What useful learning material or support is listed?

A. a soft, lightweight ball and enough clear space

B. a sharp object placed on the sports ground

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] The key elements for increasing accuracy in rolling a ball and: Which action should come first?

A. Finish before looking at the instructions.

B. Ignore the main task and do something unrelated.

C. Set up a safe activity space using a soft, lightweight ball and enough clear space.

D. Skip all practice and guess the result.

4. [Play] The key elements for increasing accuracy in rolling a ball and: Which setting does this grade use?

A. only a future space colony

B. combining basic movement skills

C. a topic unrelated to the current class

D. an unrelated imagined city

5. [Play] The key elements for increasing accuracy in rolling a ball and: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a response that does not show the lesson skill

C. an unrelated picture with no explanation

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] The key elements for increasing accuracy in rolling a ball and: Which action comes after the opening step?

A. Practise the skill slowly: Identify the key elements for increasing accuracy in rolling a ball and throwing a ball.

B. Change to an unrelated lesson immediately

C. Only watch others without trying

D. Skip to marking before learning

7. [Challenge] The key elements for increasing accuracy in rolling a ball and: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Practise at a short distance; check your direction and try again with feedback.

C. Leave the task unfinished without explaining

D. Stop after reading the title

8. [Challenge] The key elements for increasing accuracy in rolling a ball and: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. accurate controlled ball movement

D. a random answer with no supporting detail

9. [Challenge] The key elements for increasing accuracy in rolling a ball and: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

B. Take unnecessary risks to finish first.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] The key elements for increasing accuracy in rolling a ball and: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Practise at a short distance; check your direction and try again with feedback.

C. Avoid the stated task and its materials

D. Copy another learner’s response without trying

11. [Challenge] The key elements for increasing accuracy in rolling a ball and: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. The topic can be completed without observing or practising

C. Learning means only guessing and never checking

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] The key elements for increasing accuracy in rolling a ball and: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates accurate controlled ball movement.

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] The key elements for increasing accuracy in rolling a ball and: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Repeat the same error without checking feedback

D. Make up results instead of practising

14. [Challenge] The key elements for increasing accuracy in rolling a ball and: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Skip a difficult part without asking for help

D. Change answers randomly without a reason

15. [Challenge] The key elements for increasing accuracy in rolling a ball and: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

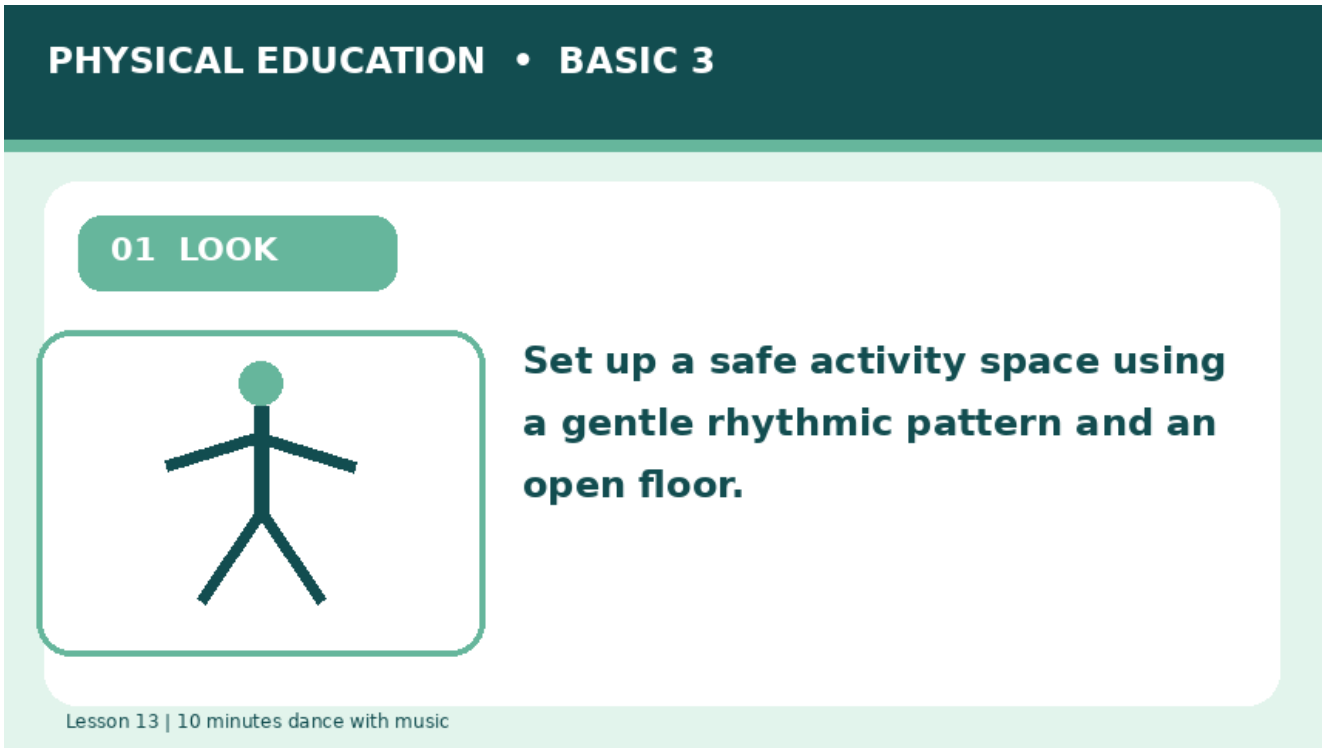

B. Use the topic to mislead others

C. Apply the lesson about identify the key elements for increasing accuracy in rolling a ball and throwing a ball to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 13: 10 minutes dance with music

Goal: Perform 10 minutes dance with music.

Learn it

Rhythm helps a group coordinate movements in time. Listening and careful spacing support safe group practice.

Useful material: a gentle rhythmic pattern and an open floor

Do it in three steps

1. Set up a safe activity space using a gentle rhythmic pattern and an open floor.

2. Practise the skill slowly: Perform 10 minutes dance with music.

3. Copy a short movement phrase, then make a safe variation with a partner.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid collisions or uncomfortable movements.

Try this: Copy a short movement phrase, then make a safe variation with a partner.

Show your learning: coordinated steps and respectful space. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 13: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] 10 minutes dance with music: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Rush into a demanding activity without warming up

C. Perform 10 minutes dance with music.

D. Ignore the movement task and do only an unrelated game

2. [Play] 10 minutes dance with music: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. heavy unsafe equipment in a crowded space

C. a gentle rhythmic pattern and an open floor

D. a sharp object placed on the sports ground

3. [Play] 10 minutes dance with music: Which action should come first?

A. Skip all practice and guess the result.

B. Ignore the main task and do something unrelated.

C. Set up a safe activity space using a gentle rhythmic pattern and an open floor.

D. Finish before looking at the instructions.

4. [Play] 10 minutes dance with music: Which setting does this grade use?

A. only a future space colony

B. an unrelated imagined city

C. a topic unrelated to the current class

D. combining basic movement skills

5. [Play] 10 minutes dance with music: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a demonstrated movement or fitness task with self-assessment

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] 10 minutes dance with music: Which action comes after the opening step?

A. Practise the skill slowly: Perform 10 minutes dance with music.

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Only watch others without trying

7. [Challenge] 10 minutes dance with music: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Stop after reading the title

C. Give a guess without trying the activity

D. Copy a short movement phrase, then make a safe variation with a partner.

8. [Challenge] 10 minutes dance with music: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an unrelated example that does not test the skill

C. coordinated steps and respectful space

D. an opinion without observation or practice

9. [Challenge] 10 minutes dance with music: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid collisions or uncomfortable movements.

D. Ignore the teacher’s safety instructions.

10. [Challenge] 10 minutes dance with music: Which classroom activity helps apply the lesson?

A. Copy a short movement phrase, then make a safe variation with a partner.

B. Copy another learner’s response without trying

C. Avoid the stated task and its materials

D. Complete a different lesson instead

11. [Challenge] 10 minutes dance with music: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Rhythm helps a group coordinate movements in time. Listening and careful spacing support safe group practice.

C. The lesson has no connection to life or skills

D. Learning means only guessing and never checking

12. [Challenge] 10 minutes dance with music: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can avoid answering questions

C. Whether you can ignore the agreed task

D. Whether your work demonstrates coordinated steps and respectful space.

13. [Challenge] 10 minutes dance with music: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] 10 minutes dance with music: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen coordinated steps and respectful space.

D. Change answers randomly without a reason

15. [Challenge] 10 minutes dance with music: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

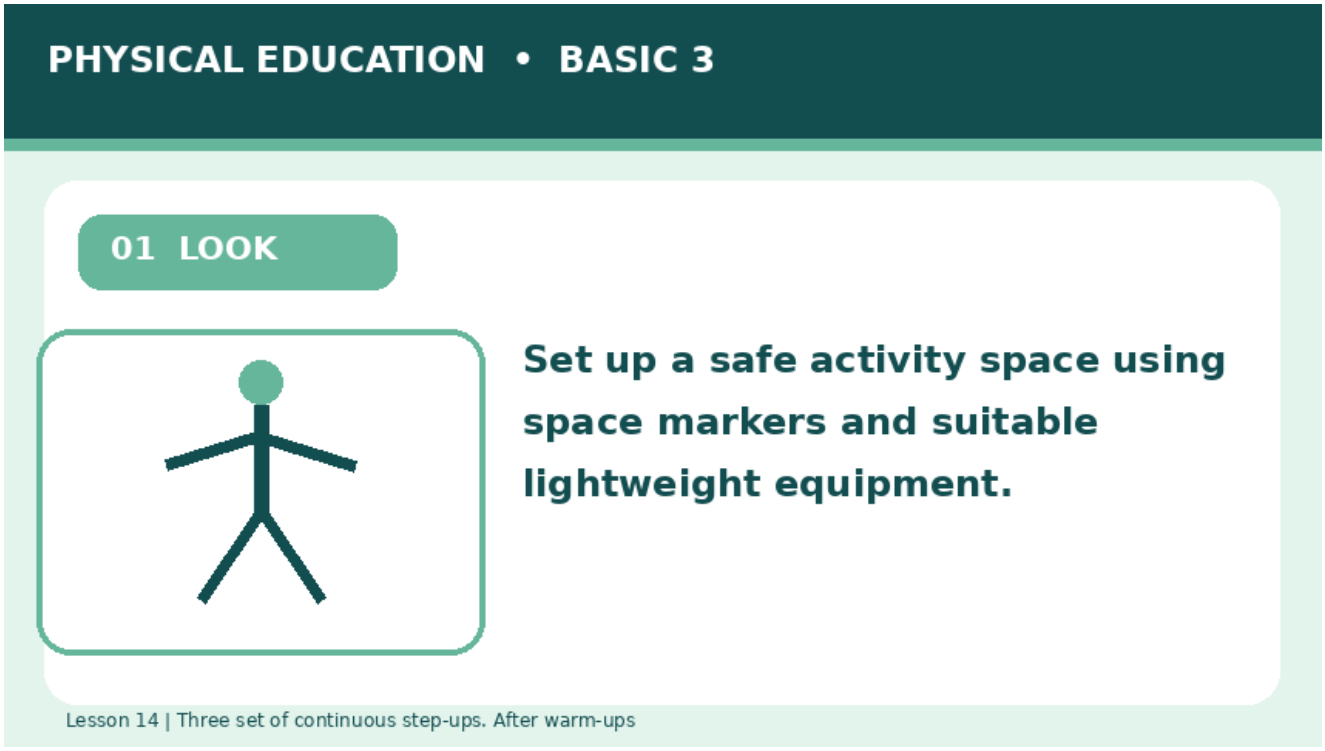

B. Claim expertise without trying the skill

C. Apply the lesson about perform 10 minutes dance with music to a suitable real-life situation.

D. Use the topic to mislead others

LESSON 14: Three set of continuous step-ups. After warm-ups

Goal: Perform three set of continuous step-ups. After warm-ups

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Perform three set of continuous step-ups. After warm-ups.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 14: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Three set of continuous step-ups. After warm-ups: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Ignore the movement task and do only an unrelated game

C. Rush into a demanding activity without warming up

D. Perform three set of continuous step-ups. After warm-ups

2. [Play] Three set of continuous step-ups. After warm-ups: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. space markers and suitable lightweight equipment

C. a sharp object placed on the sports ground

D. a slippery or obstructed practice area

3. [Play] Three set of continuous step-ups. After warm-ups: Which action should come first?

A. Skip all practice and guess the result.

B. Finish before looking at the instructions.

C. Ignore the main task and do something unrelated.

D. Set up a safe activity space using space markers and suitable lightweight equipment.

4. [Play] Three set of continuous step-ups. After warm-ups: Which setting does this grade use?

A. only a future space colony

B. combining basic movement skills

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] Three set of continuous step-ups. After warm-ups: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unrelated picture with no explanation

C. a response that does not show the lesson skill

D. an unsupported claim with no classroom practice

6. [Challenge] Three set of continuous step-ups. After warm-ups: Which action comes after the opening step?

A. Practise the skill slowly: Perform three set of continuous step-ups. After warm-ups.

B. Only watch others without trying

C. Skip to marking before learning

D. Change to an unrelated lesson immediately

7. [Challenge] Three set of continuous step-ups. After warm-ups: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Leave the task unfinished without explaining

D. Observe a demonstration, practise slowly, then reflect on one improvement.

8. [Challenge] Three set of continuous step-ups. After warm-ups: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. a random answer with no supporting detail

D. careful, safe movement

9. [Challenge] Three set of continuous step-ups. After warm-ups: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Do the activity without considering other people.

10. [Challenge] Three set of continuous step-ups. After warm-ups: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Complete a different lesson instead

D. Copy another learner’s response without trying

11. [Challenge] Three set of continuous step-ups. After warm-ups: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. The topic can be completed without observing or practising

C. Learning means only guessing and never checking

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] Three set of continuous step-ups. After warm-ups: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can finish without showing your work

C. Whether your work demonstrates careful, safe movement.

D. Whether you can avoid answering questions

13. [Challenge] Three set of continuous step-ups. After warm-ups: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Repeat the same error without checking feedback

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] Three set of continuous step-ups. After warm-ups: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Revisit the steps and strengthen careful, safe movement.

D. Change answers randomly without a reason

15. [Challenge] Three set of continuous step-ups. After warm-ups: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

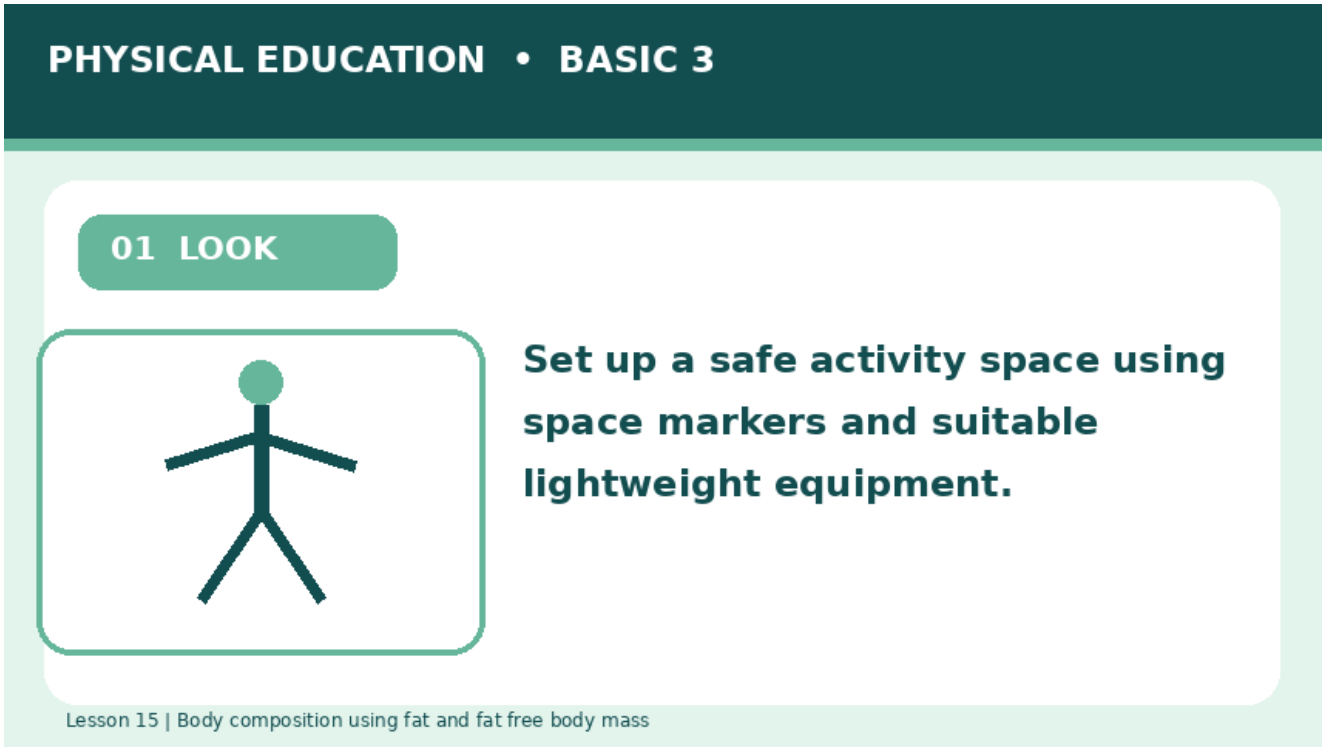

B. Apply the lesson about perform three set of continuous step-ups. after warm-ups to a suitable real-life situation.

C. Avoid explaining how the skill could be used

D. Use the topic to mislead others

LESSON 15: Body composition using fat and fat free body mass

Goal: Identify body composition using fat and fat free body mass.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify body composition using fat and fat free body mass.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 15: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Body composition using fat and fat free body mass: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Identify body composition using fat and fat free body mass.

C. Rush into a demanding activity without warming up

D. Ignore the movement task and do only an unrelated game

2. [Play] Body composition using fat and fat free body mass: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. heavy unsafe equipment in a crowded space

C. a sharp object placed on the sports ground

D. space markers and suitable lightweight equipment

3. [Play] Body composition using fat and fat free body mass: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Set up a safe activity space using space markers and suitable lightweight equipment.

D. Finish before looking at the instructions.

4. [Play] Body composition using fat and fat free body mass: Which setting does this grade use?

A. an unrelated imagined city

B. only a future space colony

C. combining basic movement skills

D. a topic unrelated to the current class

5. [Play] Body composition using fat and fat free body mass: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. an unsupported claim with no classroom practice

6. [Challenge] Body composition using fat and fat free body mass: Which action comes after the opening step?

A. Practise the skill slowly: Identify body composition using fat and fat free body mass.

B. Only watch others without trying

C. Skip to marking before learning

D. Change to an unrelated lesson immediately

7. [Challenge] Body composition using fat and fat free body mass: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Leave the task unfinished without explaining

D. Stop after reading the title

8. [Challenge] Body composition using fat and fat free body mass: What counts as good evidence of learning here?

A. careful, safe movement

B. an unrelated example that does not test the skill

C. an opinion without observation or practice

D. a random answer with no supporting detail

9. [Challenge] Body composition using fat and fat free body mass: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Do the activity without considering other people.

10. [Challenge] Body composition using fat and fat free body mass: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Observe a demonstration, practise slowly, then reflect on one improvement.

11. [Challenge] Body composition using fat and fat free body mass: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. The lesson has no connection to life or skills

12. [Challenge] Body composition using fat and fat free body mass: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates careful, safe movement.

C. Whether you can finish without showing your work

D. Whether you can avoid answering questions

13. [Challenge] Body composition using fat and fat free body mass: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Make up results instead of practising

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Body composition using fat and fat free body mass: How should a learner improve after feedback?

A. Revisit the steps and strengthen careful, safe movement.

B. Skip a difficult part without asking for help

C. Change answers randomly without a reason

D. Ignore all comments and leave the task incomplete

15. [Challenge] Body composition using fat and fat free body mass: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

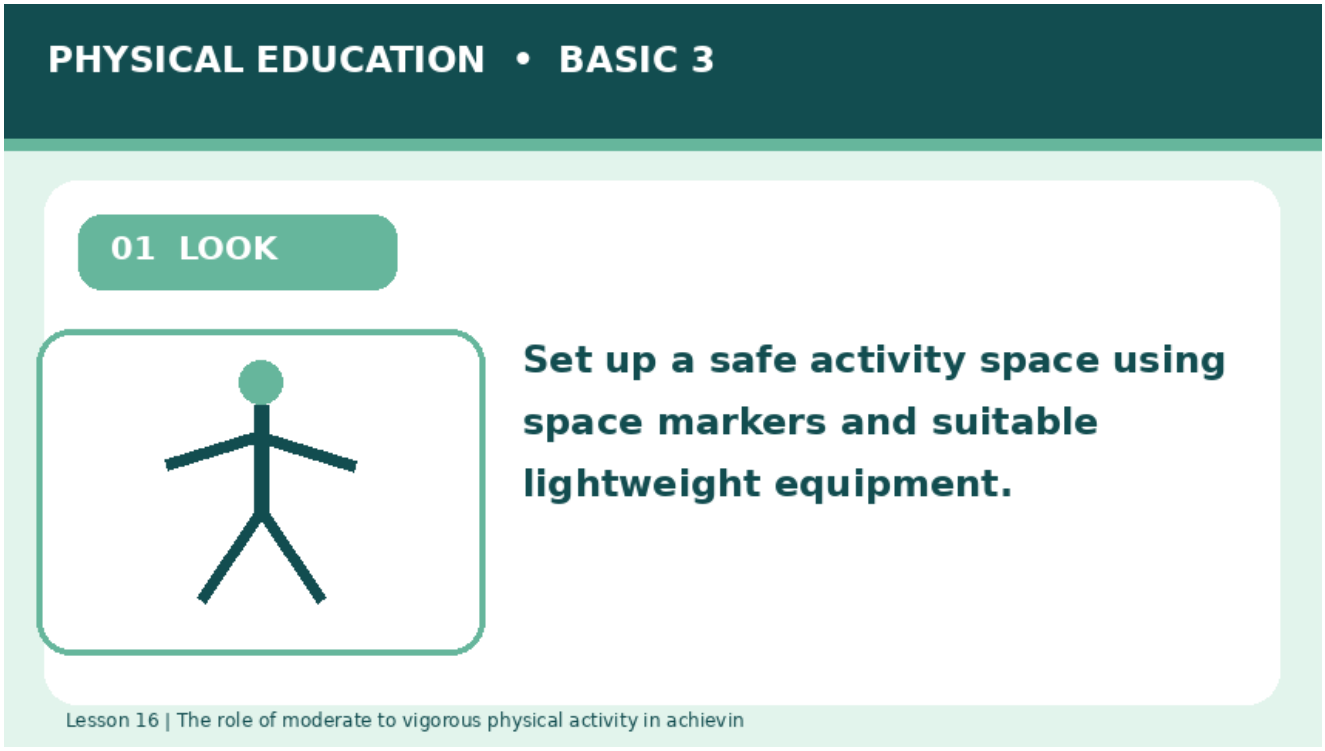

B. Avoid explaining how the skill could be used

C. Apply the lesson about identify body composition using fat and fat free body mass to a suitable real-life situation.

D. Use the topic to mislead others

LESSON 16: The role of moderate to vigorous physical activity in achieving or

Goal: Describe the role of moderate to vigorous physical activity in achieving or maintaining good health.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Describe the role of moderate to vigorous physical activity in achieving or maintaining good health.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 16: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The role of moderate to vigorous physical activity in achieving or: What is this lesson mainly about?

A. Describe the role of moderate to vigorous physical activity in achieving or maintaining good health.

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Rush into a demanding activity without warming up

2. [Play] The role of moderate to vigorous physical activity in achieving or: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. space markers and suitable lightweight equipment

C. a slippery or obstructed practice area

D. a sharp object placed on the sports ground

3. [Play] The role of moderate to vigorous physical activity in achieving or: Which action should come first?

A. Skip all practice and guess the result.

B. Ignore the main task and do something unrelated.

C. Finish before looking at the instructions.

D. Set up a safe activity space using space markers and suitable lightweight equipment.

4. [Play] The role of moderate to vigorous physical activity in achieving or: Which setting does this grade use?

A. combining basic movement skills

B. an unrelated imagined city

C. a topic unrelated to the current class

D. only a future space colony

5. [Play] The role of moderate to vigorous physical activity in achieving or: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. an unsupported claim with no classroom practice

6. [Challenge] The role of moderate to vigorous physical activity in achieving or: Which action comes after the opening step?

A. Only watch others without trying

B. Skip to marking before learning

C. Practise the skill slowly: Describe the role of moderate to vigorous physical activity in achieving or maintaining good health.

D. Change to an unrelated lesson immediately

7. [Challenge] The role of moderate to vigorous physical activity in achieving or: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Leave the task unfinished without explaining

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Stop after reading the title

8. [Challenge] The role of moderate to vigorous physical activity in achieving or: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. careful, safe movement

C. a random answer with no supporting detail

D. an opinion without observation or practice

9. [Challenge] The role of moderate to vigorous physical activity in achieving or: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

B. Ignore the teacher’s safety instructions.

C. Take unnecessary risks to finish first.

D. Do the activity without considering other people.

10. [Challenge] The role of moderate to vigorous physical activity in achieving or: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Complete a different lesson instead

C. Avoid the stated task and its materials

D. Observe a demonstration, practise slowly, then reflect on one improvement.

11. [Challenge] The role of moderate to vigorous physical activity in achieving or: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] The role of moderate to vigorous physical activity in achieving or: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates careful, safe movement.

C. Whether you can finish without showing your work

D. Whether you can avoid answering questions

13. [Challenge] The role of moderate to vigorous physical activity in achieving or: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] The role of moderate to vigorous physical activity in achieving or: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Revisit the steps and strengthen careful, safe movement.

C. Change answers randomly without a reason

D. Ignore all comments and leave the task incomplete

15. [Challenge] The role of moderate to vigorous physical activity in achieving or: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

B. Avoid explaining how the skill could be used

C. Claim expertise without trying the skill

D. Apply the lesson about describe the role of moderate to vigorous physical activity in achieving or maintaining good health to a suitable real-life situation.

LESSON 17: Flexibility exercises that are not safe for the joints and should

Goal: Identify flexibility exercises that are not safe for the joints and should be avoided.

Learn it

Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

Useful material: a clock or timer and drinking water

Do it in three steps

1. Set up a safe activity space using a clock or timer and drinking water.

2. Practise the skill slowly: Identify flexibility exercises that are not safe for the joints and should be avoided.

3. Try a gentle activity, check how you feel, and talk about an appropriate rest.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

Try this: Try a gentle activity, check how you feel, and talk about an appropriate rest.

Show your learning: a safe personal activity plan. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 17: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Flexibility exercises that are not safe for the joints and should: What is this lesson mainly about?

A. Identify flexibility exercises that are not safe for the joints and should be avoided.

B. Rush into a demanding activity without warming up

C. Ignore the movement task and do only an unrelated game

D. Practise unsafe tricks without learning the basic skill

2. [Play] Flexibility exercises that are not safe for the joints and should: What useful learning material or support is listed?

A. a clock or timer and drinking water

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Flexibility exercises that are not safe for the joints and should: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using a clock or timer and drinking water.

C. Ignore the main task and do something unrelated.

D. Finish before looking at the instructions.

4. [Play] Flexibility exercises that are not safe for the joints and should: Which setting does this grade use?

A. combining basic movement skills

B. an unrelated imagined city

C. only a future space colony

D. a topic unrelated to the current class

5. [Play] Flexibility exercises that are not safe for the joints and should: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. an unrelated picture with no explanation

D. a response that does not show the lesson skill

6. [Challenge] Flexibility exercises that are not safe for the joints and should: Which action comes after the opening step?

A. Skip to marking before learning

B. Practise the skill slowly: Identify flexibility exercises that are not safe for the joints and should be avoided.

C. Only watch others without trying

D. Change to an unrelated lesson immediately

7. [Challenge] Flexibility exercises that are not safe for the joints and should: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Leave the task unfinished without explaining

D. Try a gentle activity, check how you feel, and talk about an appropriate rest.

8. [Challenge] Flexibility exercises that are not safe for the joints and should: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. a random answer with no supporting detail

D. a safe personal activity plan

9. [Challenge] Flexibility exercises that are not safe for the joints and should: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] Flexibility exercises that are not safe for the joints and should: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Complete a different lesson instead

C. Copy another learner’s response without trying

D. Try a gentle activity, check how you feel, and talk about an appropriate rest.

11. [Challenge] Flexibility exercises that are not safe for the joints and should: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

12. [Challenge] Flexibility exercises that are not safe for the joints and should: What should a partner help you check?

A. Whether your work demonstrates a safe personal activity plan.

B. Whether you can avoid answering questions

C. Whether you can finish without showing your work

D. Whether you can ignore the agreed task

13. [Challenge] Flexibility exercises that are not safe for the joints and should: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Stop immediately without reflection

C. Make up results instead of practising

D. Repeat the same error without checking feedback

14. [Challenge] Flexibility exercises that are not safe for the joints and should: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Skip a difficult part without asking for help

C. Change answers randomly without a reason

D. Revisit the steps and strengthen a safe personal activity plan.

15. [Challenge] Flexibility exercises that are not safe for the joints and should: Which choice would show responsible use of today’s skill?

A. Apply the lesson about identify flexibility exercises that are not safe for the joints and should be avoided to a suitable real-life situation.

B. Claim expertise without trying the skill

C. Avoid explaining how the skill could be used

D. Use the topic to mislead others

LESSON 18: The meaning of body composition using fat and fat free body mass

Goal: Explain the meaning of body composition using fat and fat free body mass.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Explain the meaning of body composition using fat and fat free body mass.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 18: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The meaning of body composition using fat and fat free body mass: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Explain the meaning of body composition using fat and fat free body mass.

C. Ignore the movement task and do only an unrelated game

D. Practise unsafe tricks without learning the basic skill

2. [Play] The meaning of body composition using fat and fat free body mass: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. space markers and suitable lightweight equipment

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] The meaning of body composition using fat and fat free body mass: Which action should come first?

A. Skip all practice and guess the result.

B. Finish before looking at the instructions.

C. Ignore the main task and do something unrelated.

D. Set up a safe activity space using space markers and suitable lightweight equipment.

4. [Play] The meaning of body composition using fat and fat free body mass: Which setting does this grade use?

A. an unrelated imagined city

B. combining basic movement skills

C. a topic unrelated to the current class

D. only a future space colony

5. [Play] The meaning of body composition using fat and fat free body mass: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a demonstrated movement or fitness task with self-assessment

C. a response that does not show the lesson skill

D. an unsupported claim with no classroom practice

6. [Challenge] The meaning of body composition using fat and fat free body mass: Which action comes after the opening step?

A. Only watch others without trying

B. Practise the skill slowly: Explain the meaning of body composition using fat and fat free body mass.

C. Change to an unrelated lesson immediately

D. Skip to marking before learning

7. [Challenge] The meaning of body composition using fat and fat free body mass: Which practice completes the three lesson stages?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Give a guess without trying the activity

C. Stop after reading the title

D. Leave the task unfinished without explaining

8. [Challenge] The meaning of body composition using fat and fat free body mass: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. careful, safe movement

D. a random answer with no supporting detail

9. [Challenge] The meaning of body composition using fat and fat free body mass: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

C. Do the activity without considering other people.

D. Take unnecessary risks to finish first.

10. [Challenge] The meaning of body composition using fat and fat free body mass: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Observe a demonstration, practise slowly, then reflect on one improvement.

11. [Challenge] The meaning of body composition using fat and fat free body mass: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

C. The topic can be completed without observing or practising

D. Learning means only guessing and never checking

12. [Challenge] The meaning of body composition using fat and fat free body mass: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether your work demonstrates careful, safe movement.

D. Whether you can finish without showing your work

13. [Challenge] The meaning of body composition using fat and fat free body mass: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] The meaning of body composition using fat and fat free body mass: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Revisit the steps and strengthen careful, safe movement.

C. Skip a difficult part without asking for help

D. Change answers randomly without a reason

15. [Challenge] The meaning of body composition using fat and fat free body mass: Which choice would show responsible use of today’s skill?

A. Apply the lesson about explain the meaning of body composition using fat and fat free body mass to a suitable real-life situation.

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Avoid explaining how the skill could be used

LESSON 19: Appropriate cues for movement and positive words of encouragement

Goal: Use appropriate cues for movement and positive words of encouragement while coaching others in physical activities.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Use appropriate cues for movement and positive words of encouragement while coaching others in physical activities.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 19: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Appropriate cues for movement and positive words of encouragement: What is this lesson mainly about?

A. Use appropriate cues for movement and positive words of encouragement while coaching others in physical activities.

B. Practise unsafe tricks without learning the basic skill

C. Rush into a demanding activity without warming up

D. Ignore the movement task and do only an unrelated game

2. [Play] Appropriate cues for movement and positive words of encouragement: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. heavy unsafe equipment in a crowded space

C. a sharp object placed on the sports ground

D. a slippery or obstructed practice area

3. [Play] Appropriate cues for movement and positive words of encouragement: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Finish before looking at the instructions.

D. Ignore the main task and do something unrelated.

4. [Play] Appropriate cues for movement and positive words of encouragement: Which setting does this grade use?

A. combining basic movement skills

B. an unrelated imagined city

C. a topic unrelated to the current class

D. only a future space colony

5. [Play] Appropriate cues for movement and positive words of encouragement: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] Appropriate cues for movement and positive words of encouragement: Which action comes after the opening step?

A. Practise the skill slowly: Use appropriate cues for movement and positive words of encouragement while coaching others in physical activities.

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Only watch others without trying

7. [Challenge] Appropriate cues for movement and positive words of encouragement: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Give a guess without trying the activity

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Stop after reading the title

8. [Challenge] Appropriate cues for movement and positive words of encouragement: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. an unrelated example that does not test the skill

C. careful, safe movement

D. a random answer with no supporting detail

9. [Challenge] Appropriate cues for movement and positive words of encouragement: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Do the activity without considering other people.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

10. [Challenge] Appropriate cues for movement and positive words of encouragement: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Copy another learner’s response without trying

C. Avoid the stated task and its materials

D. Complete a different lesson instead

11. [Challenge] Appropriate cues for movement and positive words of encouragement: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. The lesson has no connection to life or skills

12. [Challenge] Appropriate cues for movement and positive words of encouragement: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether you can finish without showing your work

D. Whether your work demonstrates careful, safe movement.

13. [Challenge] Appropriate cues for movement and positive words of encouragement: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Stop immediately without reflection

D. Repeat the same error without checking feedback

14. [Challenge] Appropriate cues for movement and positive words of encouragement: How should a learner improve after feedback?

A. Revisit the steps and strengthen careful, safe movement.

B. Skip a difficult part without asking for help

C. Change answers randomly without a reason

D. Ignore all comments and leave the task incomplete

15. [Challenge] Appropriate cues for movement and positive words of encouragement: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

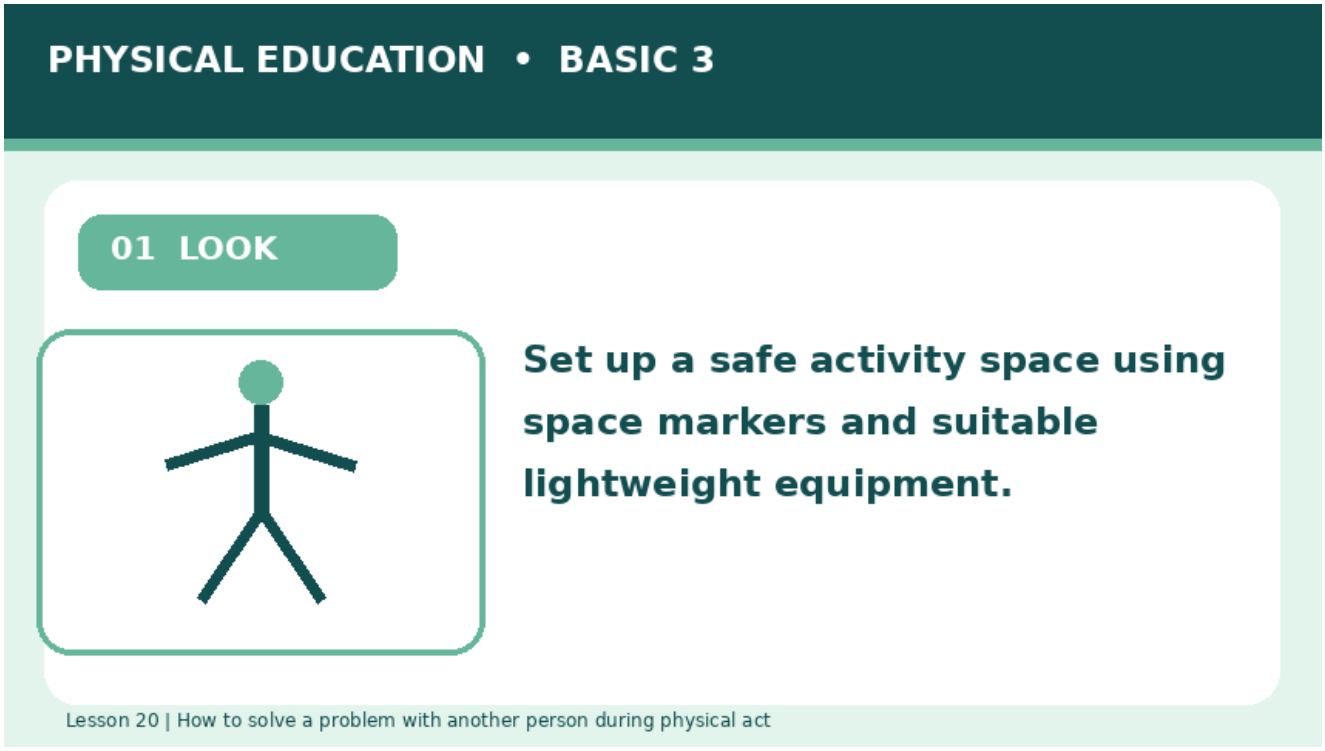

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Apply the lesson about use appropriate cues for movement and positive words of encouragement while coaching others in physical activities to a suitable real-life situation.

LESSON 20: How to solve a problem with another person during physical activity

Goal: Demonstrate how to solve a problem with another person during physical activity.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Demonstrate how to solve a problem with another person during physical activity.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 20: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] How to solve a problem with another person during physical activity: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Demonstrate how to solve a problem with another person during physical activity.

2. [Play] How to solve a problem with another person during physical activity: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. space markers and suitable lightweight equipment

C. a slippery or obstructed practice area

D. heavy unsafe equipment in a crowded space

3. [Play] How to solve a problem with another person during physical activity: Which action should come first?

A. Finish before looking at the instructions.

B. Skip all practice and guess the result.

C. Set up a safe activity space using space markers and suitable lightweight equipment.

D. Ignore the main task and do something unrelated.

4. [Play] How to solve a problem with another person during physical activity: Which setting does this grade use?

A. only a future space colony

B. combining basic movement skills

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] How to solve a problem with another person during physical activity: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a response that does not show the lesson skill

C. an unrelated picture with no explanation

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] How to solve a problem with another person during physical activity: Which action comes after the opening step?

A. Practise the skill slowly: Demonstrate how to solve a problem with another person during physical activity.

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Only watch others without trying

7. [Challenge] How to solve a problem with another person during physical activity: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Stop after reading the title

C. Leave the task unfinished without explaining

D. Observe a demonstration, practise slowly, then reflect on one improvement.

8. [Challenge] How to solve a problem with another person during physical activity: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. careful, safe movement

C. an opinion without observation or practice

D. an unrelated example that does not test the skill

9. [Challenge] How to solve a problem with another person during physical activity: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Do the activity without considering other people.

C. Ignore the teacher’s safety instructions.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

10. [Challenge] How to solve a problem with another person during physical activity: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Avoid the stated task and its materials

D. Copy another learner’s response without trying

11. [Challenge] How to solve a problem with another person during physical activity: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. The lesson has no connection to life or skills

C. The topic can be completed without observing or practising

D. Learning means only guessing and never checking

12. [Challenge] How to solve a problem with another person during physical activity: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether your work demonstrates careful, safe movement.

D. Whether you can finish without showing your work

13. [Challenge] How to solve a problem with another person during physical activity: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] How to solve a problem with another person during physical activity: How should a learner improve after feedback?

A. Revisit the steps and strengthen careful, safe movement.

B. Change answers randomly without a reason

C. Ignore all comments and leave the task incomplete

D. Skip a difficult part without asking for help

15. [Challenge] How to solve a problem with another person during physical activity: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Apply the lesson about demonstrate how to solve a problem with another person during physical activity to a suitable real-life situation.
