Physical Education
Basic 5

Illustrated lessons · Practical activities · Play and Challenge questions

Independently authored learning companion aligned to selected NaCCA 2019 topics. This is not an official NaCCA publication.

LESSON 01: Walk on straight lines edges. Draw a straight line on the floor for

Goal: Walk on straight lines edges. Draw a straight line on the floor for

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Walk on straight lines edges. Draw a straight line on the floor for.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 01: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Walk on straight lines edges. Draw a straight line on the floor for: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Rush into a demanding activity without warming up

C. Walk on straight lines edges. Draw a straight line on the floor for

D. Ignore the movement task and do only an unrelated game

2. [Play] Walk on straight lines edges. Draw a straight line on the floor for: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. space markers and suitable lightweight equipment

C. heavy unsafe equipment in a crowded space

D. a sharp object placed on the sports ground

3. [Play] Walk on straight lines edges. Draw a straight line on the floor for: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Finish before looking at the instructions.

D. Ignore the main task and do something unrelated.

4. [Play] Walk on straight lines edges. Draw a straight line on the floor for: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. an unrelated imagined city

D. movement strategies and health awareness

5. [Play] Walk on straight lines edges. Draw a straight line on the floor for: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] Walk on straight lines edges. Draw a straight line on the floor for: Which action comes after the opening step?

A. Skip to marking before learning

B. Only watch others without trying

C. Change to an unrelated lesson immediately

D. Practise the skill slowly: Walk on straight lines edges. Draw a straight line on the floor for.

7. [Challenge] Walk on straight lines edges. Draw a straight line on the floor for: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Stop after reading the title

C. Give a guess without trying the activity

D. Observe a demonstration, practise slowly, then reflect on one improvement.

8. [Challenge] Walk on straight lines edges. Draw a straight line on the floor for: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. careful, safe movement

D. an opinion without observation or practice

9. [Challenge] Walk on straight lines edges. Draw a straight line on the floor for: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

B. Take unnecessary risks to finish first.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Walk on straight lines edges. Draw a straight line on the floor for: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Complete a different lesson instead

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Copy another learner’s response without trying

11. [Challenge] Walk on straight lines edges. Draw a straight line on the floor for: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

12. [Challenge] Walk on straight lines edges. Draw a straight line on the floor for: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can avoid answering questions

C. Whether you can ignore the agreed task

D. Whether your work demonstrates careful, safe movement.

13. [Challenge] Walk on straight lines edges. Draw a straight line on the floor for: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Make up results instead of practising

D. Stop immediately without reflection

14. [Challenge] Walk on straight lines edges. Draw a straight line on the floor for: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Revisit the steps and strengthen careful, safe movement.

C. Change answers randomly without a reason

D. Ignore all comments and leave the task incomplete

15. [Challenge] Walk on straight lines edges. Draw a straight line on the floor for: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

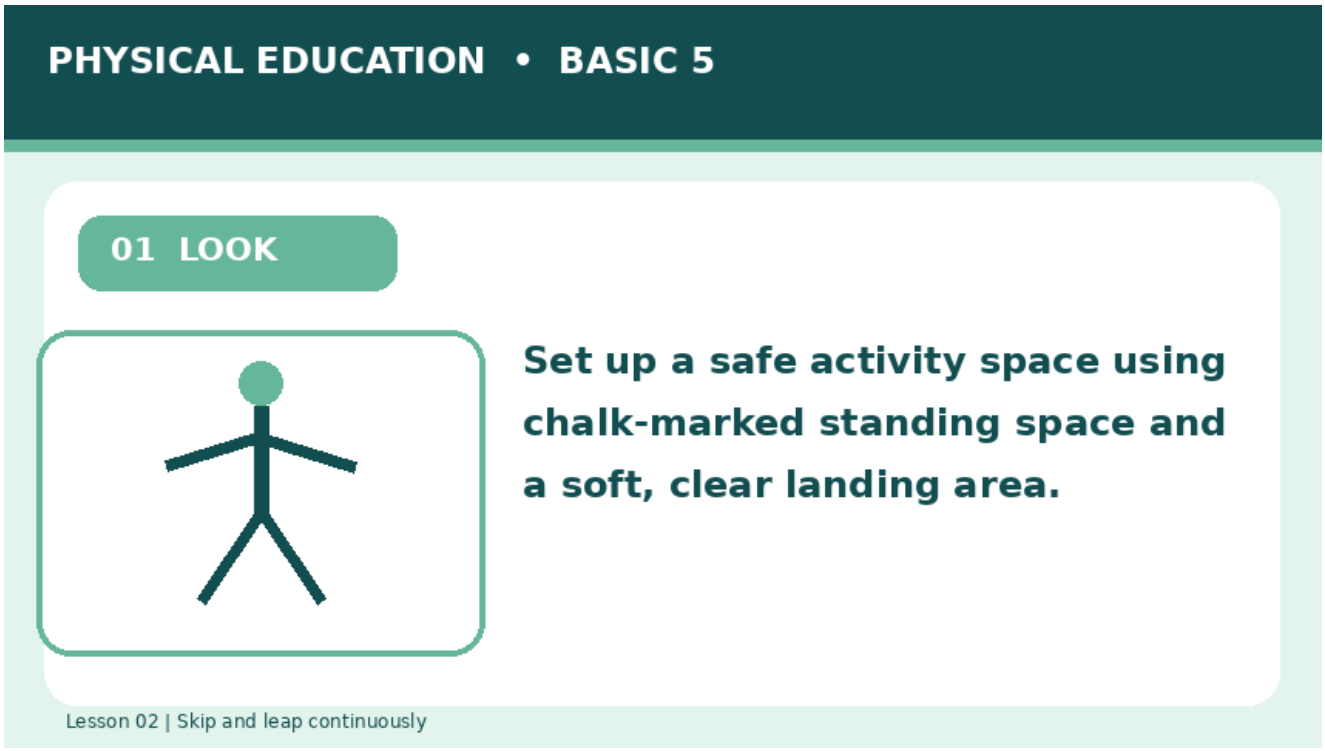

B. Use the topic to mislead others

C. Apply the lesson about walk on straight lines edges. draw a straight line on the floor for to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 02: Skip and leap continuously

Goal: Skip and leap continuously

Learn it

A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

Useful material: chalk-marked standing space and a soft, clear landing area

Do it in three steps

1. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

2. Practise the skill slowly: Skip and leap continuously.

3. Practise take-off, landing, then describe which landing felt more balanced.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

Try this: Practise take-off, landing, then describe which landing felt more balanced.

Show your learning: controlled take-off and safe landing. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 02: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Skip and leap continuously: What is this lesson mainly about?

A. Skip and leap continuously

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Rush into a demanding activity without warming up

2. [Play] Skip and leap continuously: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a slippery or obstructed practice area

D. chalk-marked standing space and a soft, clear landing area

3. [Play] Skip and leap continuously: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

C. Finish before looking at the instructions.

D. Skip all practice and guess the result.

4. [Play] Skip and leap continuously: Which setting does this grade use?

A. a topic unrelated to the current class

B. movement strategies and health awareness

C. only a future space colony

D. an unrelated imagined city

5. [Play] Skip and leap continuously: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. a response that does not show the lesson skill

6. [Challenge] Skip and leap continuously: Which action comes after the opening step?

A. Only watch others without trying

B. Change to an unrelated lesson immediately

C. Skip to marking before learning

D. Practise the skill slowly: Skip and leap continuously.

7. [Challenge] Skip and leap continuously: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Practise take-off, landing, then describe which landing felt more balanced.

D. Give a guess without trying the activity

8. [Challenge] Skip and leap continuously: What counts as good evidence of learning here?

A. controlled take-off and safe landing

B. an unrelated example that does not test the skill

C. a random answer with no supporting detail

D. an opinion without observation or practice

9. [Challenge] Skip and leap continuously: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

B. Ignore the teacher’s safety instructions.

C. Do the activity without considering other people.

D. Take unnecessary risks to finish first.

10. [Challenge] Skip and leap continuously: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Practise take-off, landing, then describe which landing felt more balanced.

C. Complete a different lesson instead

D. Copy another learner’s response without trying

11. [Challenge] Skip and leap continuously: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Learning means only guessing and never checking

C. A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

D. The lesson has no connection to life or skills

12. [Challenge] Skip and leap continuously: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether you can finish without showing your work

D. Whether your work demonstrates controlled take-off and safe landing.

13. [Challenge] Skip and leap continuously: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Make up results instead of practising

D. Repeat the same error without checking feedback

14. [Challenge] Skip and leap continuously: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Change answers randomly without a reason

C. Ignore all comments and leave the task incomplete

D. Revisit the steps and strengthen controlled take-off and safe landing.

15. [Challenge] Skip and leap continuously: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

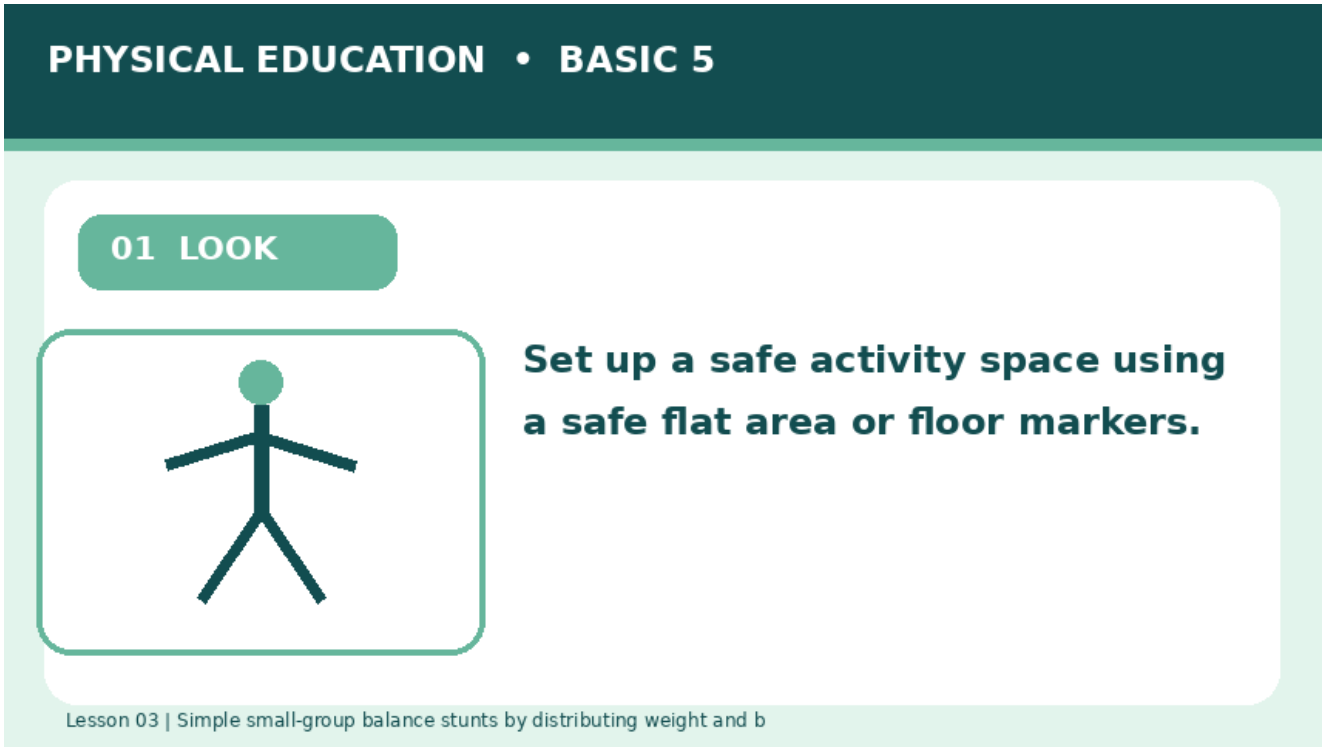

B. Use the topic to mislead others

C. Avoid explaining how the skill could be used

D. Apply the lesson about skip and leap continuously to a suitable real-life situation.

LESSON 03: Simple small-group balance stunts by distributing weight and base

Goal: Perform simple small-group balance stunts by distributing weight and base of support.

Learn it

Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

Useful material: a safe flat area or floor markers

Do it in three steps

1. Set up a safe activity space using a safe flat area or floor markers.

2. Practise the skill slowly: Perform simple small-group balance stunts by distributing weight and base of support.

3. Hold a comfortable balance briefly and explain what made it steady.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

Try this: Hold a comfortable balance briefly and explain what made it steady.

Show your learning: stable body position. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 03: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Simple small-group balance stunts by distributing weight and base: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Perform simple small-group balance stunts by distributing weight and base of support.

C. Practise unsafe tricks without learning the basic skill

D. Rush into a demanding activity without warming up

2. [Play] Simple small-group balance stunts by distributing weight and base: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a safe flat area or floor markers

C. a slippery or obstructed practice area

D. heavy unsafe equipment in a crowded space

3. [Play] Simple small-group balance stunts by distributing weight and base: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Set up a safe activity space using a safe flat area or floor markers.

D. Finish before looking at the instructions.

4. [Play] Simple small-group balance stunts by distributing weight and base: Which setting does this grade use?

A. movement strategies and health awareness

B. a topic unrelated to the current class

C. only a future space colony

D. an unrelated imagined city

5. [Play] Simple small-group balance stunts by distributing weight and base: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. an unrelated picture with no explanation

C. a response that does not show the lesson skill

D. a demonstrated movement or fitness task with self-assessment

6. [Challenge] Simple small-group balance stunts by distributing weight and base: Which action comes after the opening step?

A. Practise the skill slowly: Perform simple small-group balance stunts by distributing weight and base of support.

B. Skip to marking before learning

C. Change to an unrelated lesson immediately

D. Only watch others without trying

7. [Challenge] Simple small-group balance stunts by distributing weight and base: Which practice completes the three lesson stages?

A. Hold a comfortable balance briefly and explain what made it steady.

B. Leave the task unfinished without explaining

C. Stop after reading the title

D. Give a guess without trying the activity

8. [Challenge] Simple small-group balance stunts by distributing weight and base: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. stable body position

C. an unrelated example that does not test the skill

D. an opinion without observation or practice

9. [Challenge] Simple small-group balance stunts by distributing weight and base: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Do the activity without considering other people.

C. Ignore the teacher’s safety instructions.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

10. [Challenge] Simple small-group balance stunts by distributing weight and base: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Hold a comfortable balance briefly and explain what made it steady.

C. Avoid the stated task and its materials

D. Complete a different lesson instead

11. [Challenge] Simple small-group balance stunts by distributing weight and base: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

C. The lesson has no connection to life or skills

D. Learning means only guessing and never checking

12. [Challenge] Simple small-group balance stunts by distributing weight and base: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether your work demonstrates stable body position.

C. Whether you can avoid answering questions

D. Whether you can ignore the agreed task

13. [Challenge] Simple small-group balance stunts by distributing weight and base: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Make up results instead of practising

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Simple small-group balance stunts by distributing weight and base: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Revisit the steps and strengthen stable body position.

C. Skip a difficult part without asking for help

D. Ignore all comments and leave the task incomplete

15. [Challenge] Simple small-group balance stunts by distributing weight and base: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

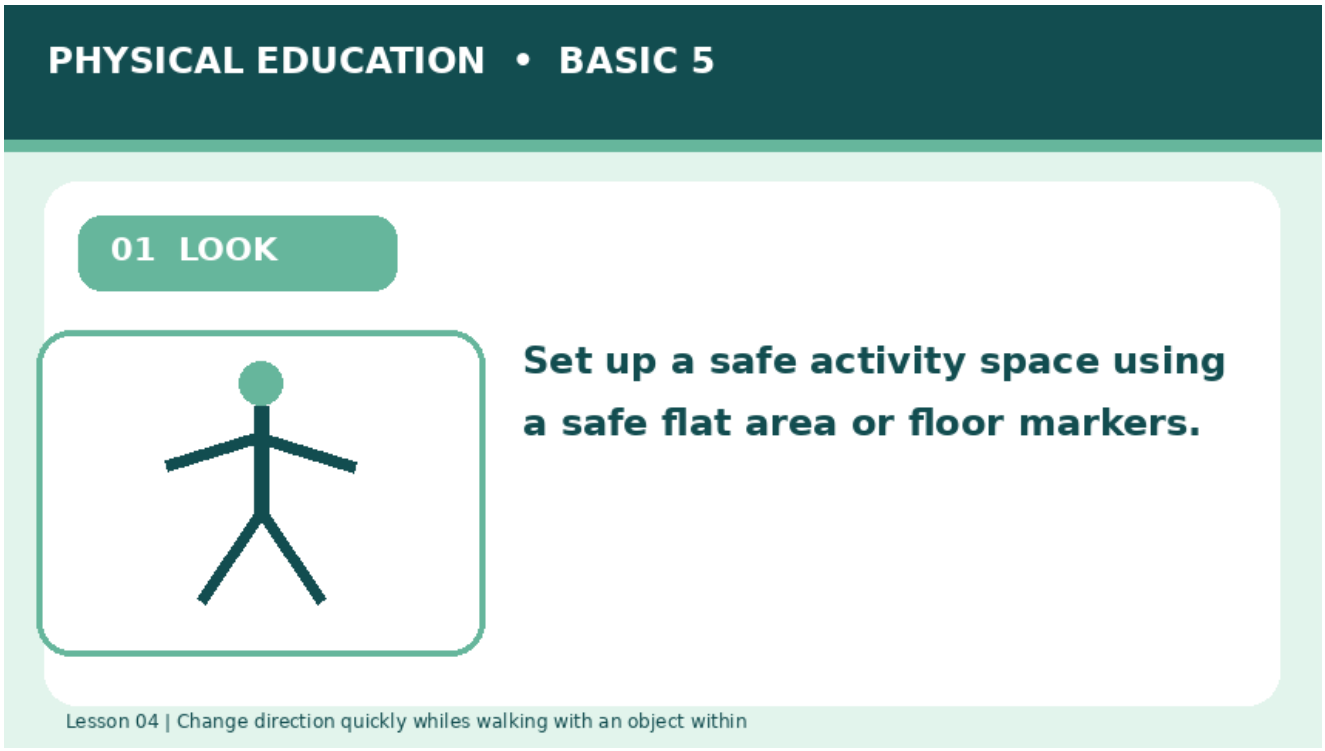

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Apply the lesson about perform simple small-group balance stunts by distributing weight and base of support to a suitable real-life situation.

LESSON 04: Change direction quickly whiles walking with an object within

Goal: Change direction quickly whiles walking with an object within obstacles but keep one’s balance. After general and specific warm ups

Learn it

Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

Useful material: a safe flat area or floor markers

Do it in three steps

1. Set up a safe activity space using a safe flat area or floor markers.

2. Practise the skill slowly: Change direction quickly whiles walking with an object within obstacles but keep one’s balance. After general and specific warm ups.

3. Hold a comfortable balance briefly and explain what made it steady.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

Try this: Hold a comfortable balance briefly and explain what made it steady.

Show your learning: stable body position. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 04: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Change direction quickly whiles walking with an object within: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Rush into a demanding activity without warming up

C. Ignore the movement task and do only an unrelated game

D. Change direction quickly whiles walking with an object within obstacles but keep one’s balance. After general and specific warm ups

2. [Play] Change direction quickly whiles walking with an object within: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. a safe flat area or floor markers

3. [Play] Change direction quickly whiles walking with an object within: Which action should come first?

A. Skip all practice and guess the result.

B. Finish before looking at the instructions.

C. Set up a safe activity space using a safe flat area or floor markers.

D. Ignore the main task and do something unrelated.

4. [Play] Change direction quickly whiles walking with an object within: Which setting does this grade use?

A. only a future space colony

B. movement strategies and health awareness

C. a topic unrelated to the current class

D. an unrelated imagined city

5. [Play] Change direction quickly whiles walking with an object within: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] Change direction quickly whiles walking with an object within: Which action comes after the opening step?

A. Practise the skill slowly: Change direction quickly whiles walking with an object within obstacles but keep one’s balance. After general and specific warm ups.

B. Only watch others without trying

C. Change to an unrelated lesson immediately

D. Skip to marking before learning

7. [Challenge] Change direction quickly whiles walking with an object within: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Hold a comfortable balance briefly and explain what made it steady.

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] Change direction quickly whiles walking with an object within: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. a random answer with no supporting detail

C. an unrelated example that does not test the skill

D. stable body position

9. [Challenge] Change direction quickly whiles walking with an object within: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Do not perform inverted balances or stunts without qualified supervision.

B. Do the activity without considering other people.

C. Take unnecessary risks to finish first.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Change direction quickly whiles walking with an object within: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Copy another learner’s response without trying

C. Hold a comfortable balance briefly and explain what made it steady.

D. Complete a different lesson instead

11. [Challenge] Change direction quickly whiles walking with an object within: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Learning means only guessing and never checking

C. The topic can be completed without observing or practising

D. Balance depends on body position and a stable base of support. Small controlled adjustments help maintain balance.

12. [Challenge] Change direction quickly whiles walking with an object within: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether your work demonstrates stable body position.

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Change direction quickly whiles walking with an object within: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Change direction quickly whiles walking with an object within: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Revisit the steps and strengthen stable body position.

15. [Challenge] Change direction quickly whiles walking with an object within: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

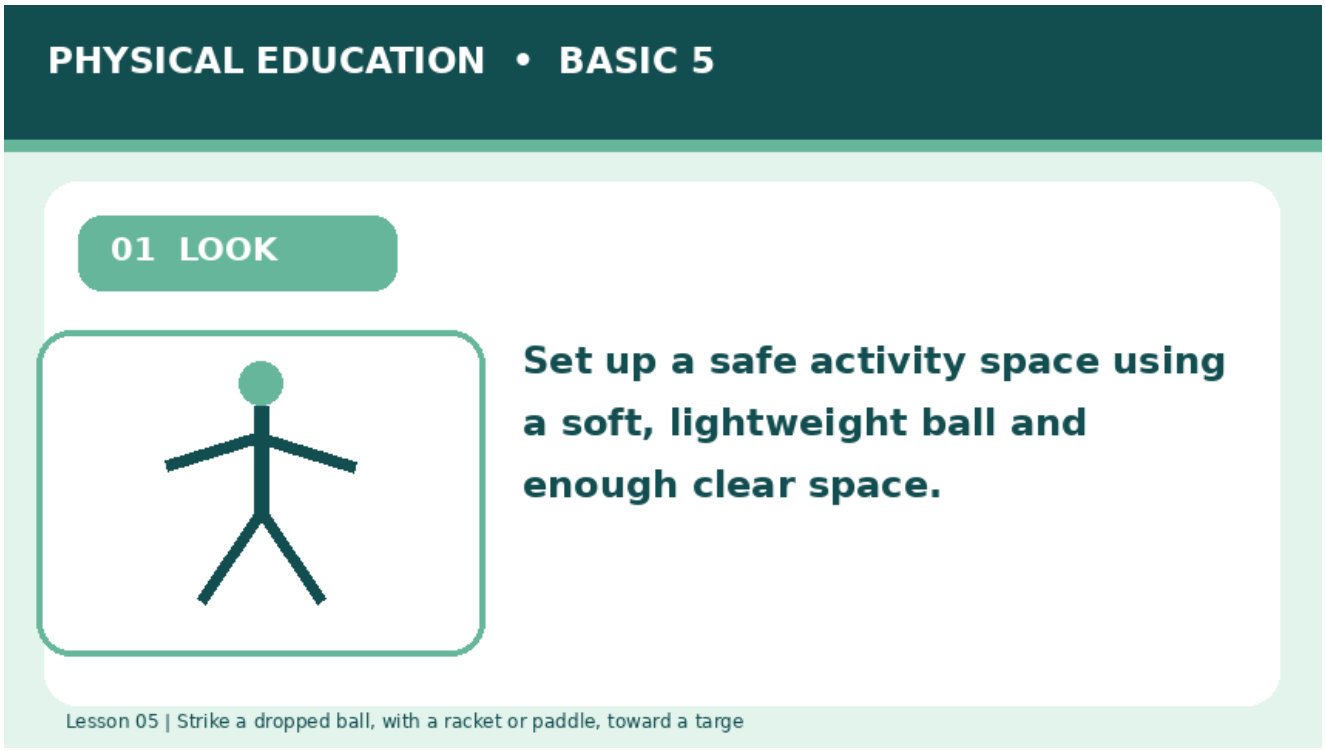

B. Use the topic to mislead others

C. Avoid explaining how the skill could be used

D. Apply the lesson about change direction quickly whiles walking with an object within obstacles but keep one’s balance. after general and specific warm ups to a suitable real-life situation.

LESSON 05: Strike a dropped ball, with a racket or paddle, toward a target by

Goal: Strike a dropped ball, with a racket or paddle, toward a target by using the forehand and back hand movement pattern to a

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Strike a dropped ball, with a racket or paddle, toward a target by using the forehand and back hand movement pattern to a.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 05: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Strike a dropped ball, with a racket or paddle, toward a target by: What is this lesson mainly about?

A. Strike a dropped ball, with a racket or paddle, toward a target by using the forehand and back hand movement pattern to a

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Rush into a demanding activity without warming up

2. [Play] Strike a dropped ball, with a racket or paddle, toward a target by: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. heavy unsafe equipment in a crowded space

C. a soft, lightweight ball and enough clear space

D. a slippery or obstructed practice area

3. [Play] Strike a dropped ball, with a racket or paddle, toward a target by: Which action should come first?

A. Finish before looking at the instructions.

B. Set up a safe activity space using a soft, lightweight ball and enough clear space.

C. Skip all practice and guess the result.

D. Ignore the main task and do something unrelated.

4. [Play] Strike a dropped ball, with a racket or paddle, toward a target by: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. movement strategies and health awareness

D. an unrelated imagined city

5. [Play] Strike a dropped ball, with a racket or paddle, toward a target by: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a response that does not show the lesson skill

C. a demonstrated movement or fitness task with self-assessment

D. an unsupported claim with no classroom practice

6. [Challenge] Strike a dropped ball, with a racket or paddle, toward a target by: Which action comes after the opening step?

A. Only watch others without trying

B. Skip to marking before learning

C. Practise the skill slowly: Strike a dropped ball, with a racket or paddle, toward a target by using the forehand and back hand movement pattern to a.

D. Change to an unrelated lesson immediately

7. [Challenge] Strike a dropped ball, with a racket or paddle, toward a target by: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Leave the task unfinished without explaining

C. Stop after reading the title

D. Practise at a short distance; check your direction and try again with feedback.

8. [Challenge] Strike a dropped ball, with a racket or paddle, toward a target by: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an unrelated example that does not test the skill

C. accurate controlled ball movement

D. an opinion without observation or practice

9. [Challenge] Strike a dropped ball, with a racket or paddle, toward a target by: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Do the activity without considering other people.

10. [Challenge] Strike a dropped ball, with a racket or paddle, toward a target by: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Avoid the stated task and its materials

C. Practise at a short distance; check your direction and try again with feedback.

D. Complete a different lesson instead

11. [Challenge] Strike a dropped ball, with a racket or paddle, toward a target by: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

D. Learning means only guessing and never checking

12. [Challenge] Strike a dropped ball, with a racket or paddle, toward a target by: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether your work demonstrates accurate controlled ball movement.

C. Whether you can ignore the agreed task

D. Whether you can finish without showing your work

13. [Challenge] Strike a dropped ball, with a racket or paddle, toward a target by: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Repeat the same error without checking feedback

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] Strike a dropped ball, with a racket or paddle, toward a target by: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Ignore all comments and leave the task incomplete

C. Revisit the steps and strengthen accurate controlled ball movement.

D. Skip a difficult part without asking for help

15. [Challenge] Strike a dropped ball, with a racket or paddle, toward a target by: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

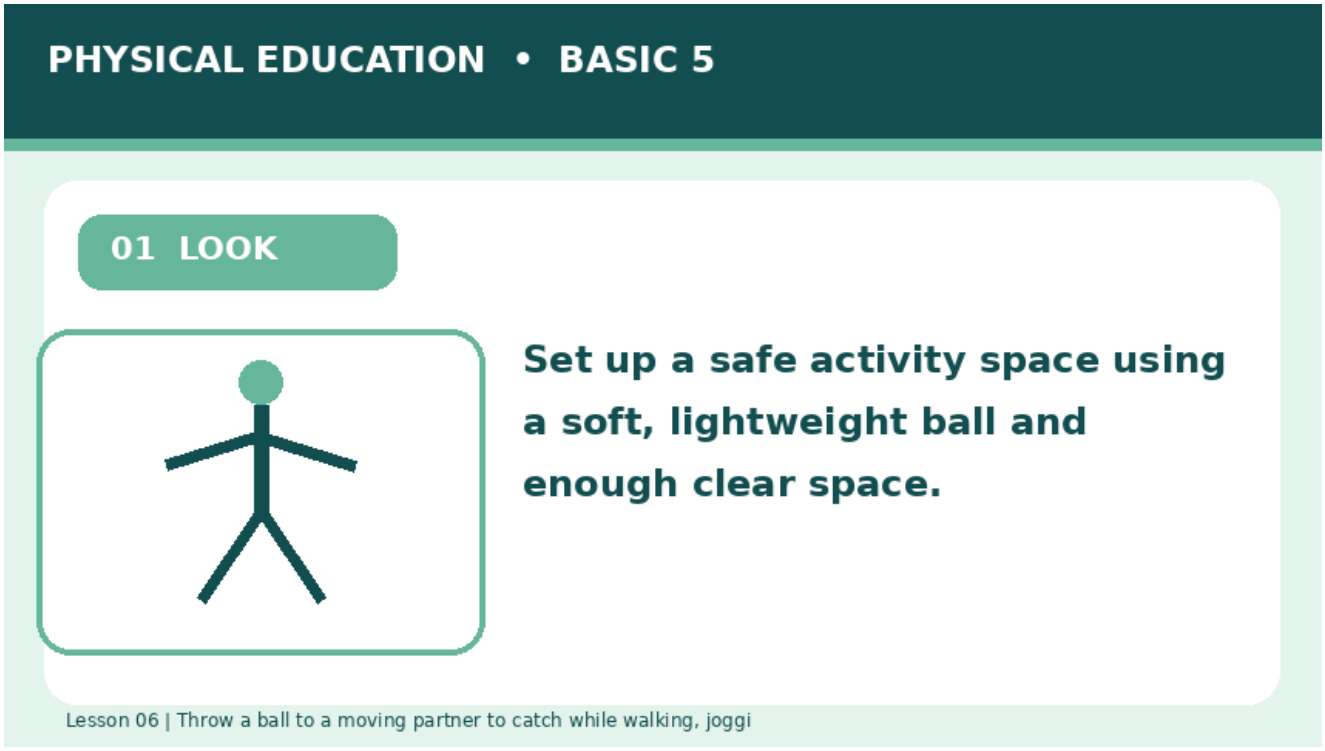

B. Claim expertise without trying the skill

C. Apply the lesson about strike a dropped ball, with a racket or paddle, toward a target by using the forehand and back hand movement pattern to a to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 06: Throw a ball to a moving partner to catch while walking, jogging

Goal: Throw a ball to a moving partner to catch while walking, jogging and running.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Throw a ball to a moving partner to catch while walking, jogging and running.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 06: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Throw a ball to a moving partner to catch while walking, jogging: What is this lesson mainly about?

A. Throw a ball to a moving partner to catch while walking, jogging and running.

B. Ignore the movement task and do only an unrelated game

C. Rush into a demanding activity without warming up

D. Practise unsafe tricks without learning the basic skill

2. [Play] Throw a ball to a moving partner to catch while walking, jogging: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. a soft, lightweight ball and enough clear space

D. a slippery or obstructed practice area

3. [Play] Throw a ball to a moving partner to catch while walking, jogging: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Finish before looking at the instructions.

D. Set up a safe activity space using a soft, lightweight ball and enough clear space.

4. [Play] Throw a ball to a moving partner to catch while walking, jogging: Which setting does this grade use?

A. a topic unrelated to the current class

B. an unrelated imagined city

C. movement strategies and health awareness

D. only a future space colony

5. [Play] Throw a ball to a moving partner to catch while walking, jogging: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a demonstrated movement or fitness task with self-assessment

C. a response that does not show the lesson skill

D. an unsupported claim with no classroom practice

6. [Challenge] Throw a ball to a moving partner to catch while walking, jogging: Which action comes after the opening step?

A. Skip to marking before learning

B. Practise the skill slowly: Throw a ball to a moving partner to catch while walking, jogging and running.

C. Change to an unrelated lesson immediately

D. Only watch others without trying

7. [Challenge] Throw a ball to a moving partner to catch while walking, jogging: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Give a guess without trying the activity

C. Leave the task unfinished without explaining

D. Practise at a short distance; check your direction and try again with feedback.

8. [Challenge] Throw a ball to a moving partner to catch while walking, jogging: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. an opinion without observation or practice

D. accurate controlled ball movement

9. [Challenge] Throw a ball to a moving partner to catch while walking, jogging: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Ignore the teacher’s safety instructions.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Do the activity without considering other people.

10. [Challenge] Throw a ball to a moving partner to catch while walking, jogging: Which classroom activity helps apply the lesson?

A. Practise at a short distance; check your direction and try again with feedback.

B. Complete a different lesson instead

C. Avoid the stated task and its materials

D. Copy another learner’s response without trying

11. [Challenge] Throw a ball to a moving partner to catch while walking, jogging: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. The topic can be completed without observing or practising

C. Learning means only guessing and never checking

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] Throw a ball to a moving partner to catch while walking, jogging: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can finish without showing your work

C. Whether your work demonstrates accurate controlled ball movement.

D. Whether you can ignore the agreed task

13. [Challenge] Throw a ball to a moving partner to catch while walking, jogging: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Make up results instead of practising

C. Repeat the same error without checking feedback

D. Stop immediately without reflection

14. [Challenge] Throw a ball to a moving partner to catch while walking, jogging: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Change answers randomly without a reason

C. Revisit the steps and strengthen accurate controlled ball movement.

D. Skip a difficult part without asking for help

15. [Challenge] Throw a ball to a moving partner to catch while walking, jogging: Which choice would show responsible use of today’s skill?

A. Claim expertise without trying the skill

B. Use the topic to mislead others

C. Avoid explaining how the skill could be used

D. Apply the lesson about throw a ball to a moving partner to catch while walking, jogging and running to a suitable real-life situation.

LESSON 07: Stop a kicked ball by trapping it with the foot while standing or

Goal: Stop a kicked ball by trapping it with the foot while standing or moving.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Stop a kicked ball by trapping it with the foot while standing or moving.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 07: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Stop a kicked ball by trapping it with the foot while standing or: What is this lesson mainly about?

A. Stop a kicked ball by trapping it with the foot while standing or moving.

B. Practise unsafe tricks without learning the basic skill

C. Rush into a demanding activity without warming up

D. Ignore the movement task and do only an unrelated game

2. [Play] Stop a kicked ball by trapping it with the foot while standing or: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. a soft, lightweight ball and enough clear space

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] Stop a kicked ball by trapping it with the foot while standing or: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Set up a safe activity space using a soft, lightweight ball and enough clear space.

C. Skip all practice and guess the result.

D. Finish before looking at the instructions.

4. [Play] Stop a kicked ball by trapping it with the foot while standing or: Which setting does this grade use?

A. only a future space colony

B. a topic unrelated to the current class

C. movement strategies and health awareness

D. an unrelated imagined city

5. [Play] Stop a kicked ball by trapping it with the foot while standing or: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a demonstrated movement or fitness task with self-assessment

C. an unrelated picture with no explanation

D. a response that does not show the lesson skill

6. [Challenge] Stop a kicked ball by trapping it with the foot while standing or: Which action comes after the opening step?

A. Only watch others without trying

B. Practise the skill slowly: Stop a kicked ball by trapping it with the foot while standing or moving.

C. Skip to marking before learning

D. Change to an unrelated lesson immediately

7. [Challenge] Stop a kicked ball by trapping it with the foot while standing or: Which practice completes the three lesson stages?

A. Practise at a short distance; check your direction and try again with feedback.

B. Stop after reading the title

C. Leave the task unfinished without explaining

D. Give a guess without trying the activity

8. [Challenge] Stop a kicked ball by trapping it with the foot while standing or: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. an opinion without observation or practice

D. accurate controlled ball movement

9. [Challenge] Stop a kicked ball by trapping it with the foot while standing or: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

B. Do the activity without considering other people.

C. Take unnecessary risks to finish first.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Stop a kicked ball by trapping it with the foot while standing or: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Copy another learner’s response without trying

C. Practise at a short distance; check your direction and try again with feedback.

D. Complete a different lesson instead

11. [Challenge] Stop a kicked ball by trapping it with the foot while standing or: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The lesson has no connection to life or skills

C. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

D. The topic can be completed without observing or practising

12. [Challenge] Stop a kicked ball by trapping it with the foot while standing or: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Stop a kicked ball by trapping it with the foot while standing or: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Make up results instead of practising

14. [Challenge] Stop a kicked ball by trapping it with the foot while standing or: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Revisit the steps and strengthen accurate controlled ball movement.

15. [Challenge] Stop a kicked ball by trapping it with the foot while standing or: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

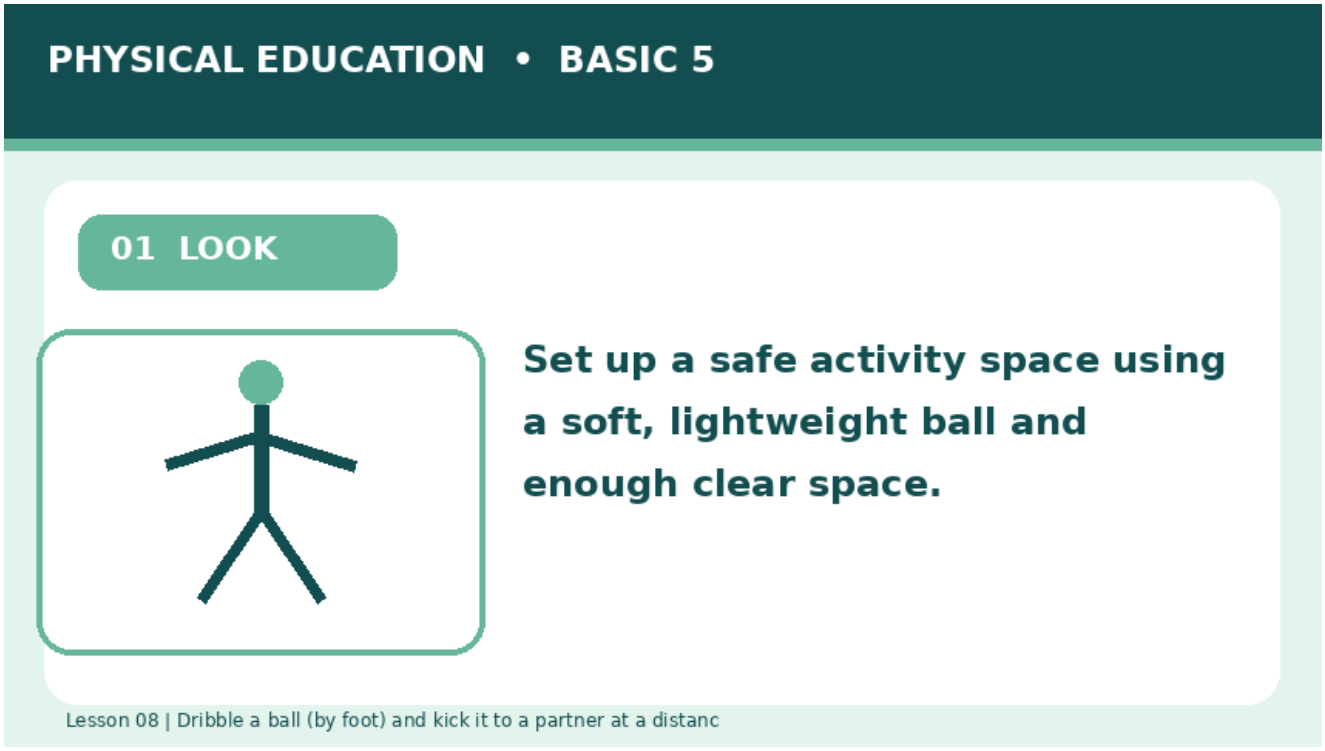

B. Use the topic to mislead others

C. Claim expertise without trying the skill

D. Apply the lesson about stop a kicked ball by trapping it with the foot while standing or moving to a suitable real-life situation.

LESSON 08: Dribble a ball (by foot) and kick it to a partner at a distance of

Goal: Dribble a ball (by foot) and kick it to a partner at a distance of about five metres. Put

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Dribble a ball (by foot) and kick it to a partner at a distance of about five metres. Put.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 08: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Dribble a ball (by foot) and kick it to a partner at a distance of: What is this lesson mainly about?

A. Dribble a ball (by foot) and kick it to a partner at a distance of about five metres. Put

B. Practise unsafe tricks without learning the basic skill

C. Rush into a demanding activity without warming up

D. Ignore the movement task and do only an unrelated game

2. [Play] Dribble a ball (by foot) and kick it to a partner at a distance of: What useful learning material or support is listed?

A. a soft, lightweight ball and enough clear space

B. heavy unsafe equipment in a crowded space

C. a slippery or obstructed practice area

D. a sharp object placed on the sports ground

3. [Play] Dribble a ball (by foot) and kick it to a partner at a distance of: Which action should come first?

A. Set up a safe activity space using a soft, lightweight ball and enough clear space.

B. Ignore the main task and do something unrelated.

C. Skip all practice and guess the result.

D. Finish before looking at the instructions.

4. [Play] Dribble a ball (by foot) and kick it to a partner at a distance of: Which setting does this grade use?

A. a topic unrelated to the current class

B. an unrelated imagined city

C. only a future space colony

D. movement strategies and health awareness

5. [Play] Dribble a ball (by foot) and kick it to a partner at a distance of: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. a response that does not show the lesson skill

6. [Challenge] Dribble a ball (by foot) and kick it to a partner at a distance of: Which action comes after the opening step?

A. Practise the skill slowly: Dribble a ball (by foot) and kick it to a partner at a distance of about five metres. Put.

B. Only watch others without trying

C. Skip to marking before learning

D. Change to an unrelated lesson immediately

7. [Challenge] Dribble a ball (by foot) and kick it to a partner at a distance of: Which practice completes the three lesson stages?

A. Give a guess without trying the activity

B. Practise at a short distance; check your direction and try again with feedback.

C. Leave the task unfinished without explaining

D. Stop after reading the title

8. [Challenge] Dribble a ball (by foot) and kick it to a partner at a distance of: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. accurate controlled ball movement

C. an unrelated example that does not test the skill

D. a random answer with no supporting detail

9. [Challenge] Dribble a ball (by foot) and kick it to a partner at a distance of: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

C. Ignore the teacher’s safety instructions.

D. Take unnecessary risks to finish first.

10. [Challenge] Dribble a ball (by foot) and kick it to a partner at a distance of: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Practise at a short distance; check your direction and try again with feedback.

C. Complete a different lesson instead

D. Avoid the stated task and its materials

11. [Challenge] Dribble a ball (by foot) and kick it to a partner at a distance of: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] Dribble a ball (by foot) and kick it to a partner at a distance of: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can avoid answering questions

C. Whether you can finish without showing your work

D. Whether your work demonstrates accurate controlled ball movement.

13. [Challenge] Dribble a ball (by foot) and kick it to a partner at a distance of: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Make up results instead of practising

14. [Challenge] Dribble a ball (by foot) and kick it to a partner at a distance of: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Change answers randomly without a reason

C. Revisit the steps and strengthen accurate controlled ball movement.

D. Skip a difficult part without asking for help

15. [Challenge] Dribble a ball (by foot) and kick it to a partner at a distance of: Which choice would show responsible use of today’s skill?

A. Apply the lesson about dribble a ball (by foot) and kick it to a partner at a distance of about five metres. put to a suitable real-life situation.

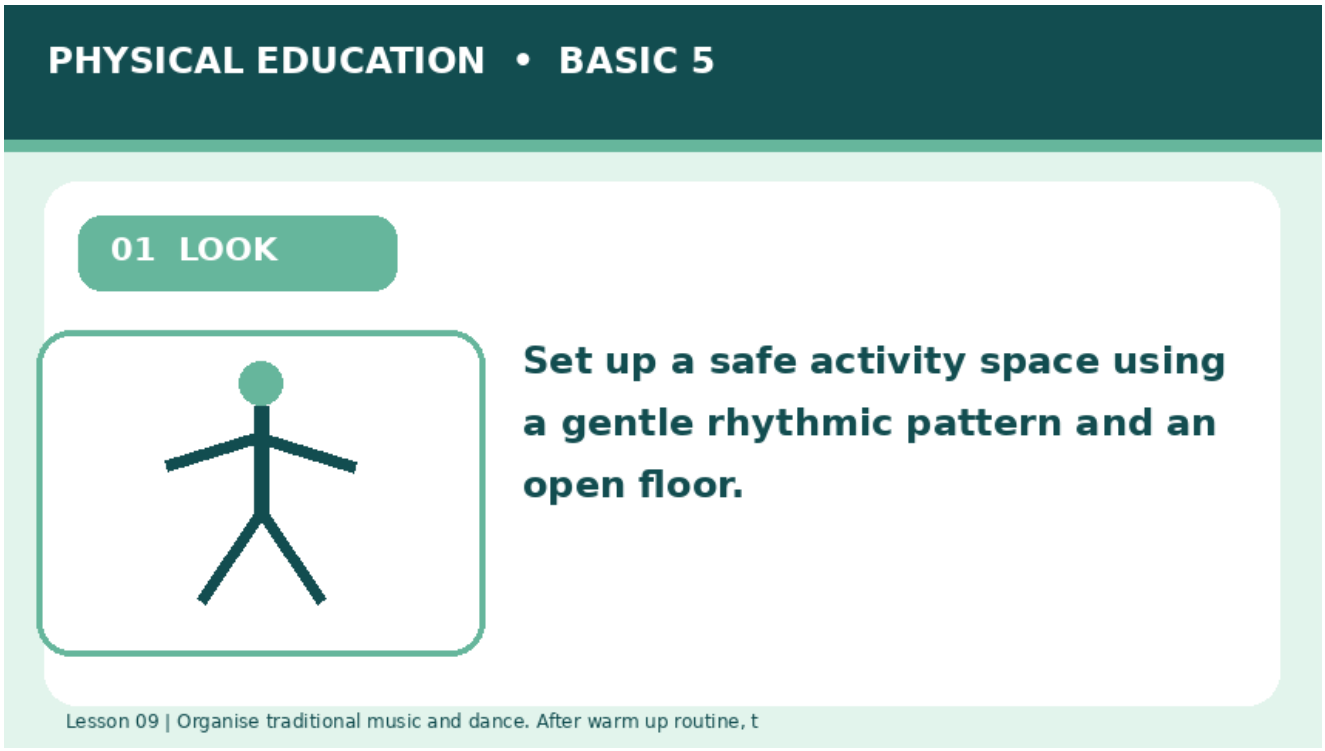

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Claim expertise without trying the skill

LESSON 09: Organise traditional music and dance. After warm up routine, the

Goal: Organise traditional music and dance. After warm up routine, the teacher organise traditional music and dance for

Learn it

Rhythm helps a group coordinate movements in time. Listening and careful spacing support safe group practice.

Useful material: a gentle rhythmic pattern and an open floor

Do it in three steps

1. Set up a safe activity space using a gentle rhythmic pattern and an open floor.

2. Practise the skill slowly: Organise traditional music and dance. After warm up routine, the teacher organise traditional music and dance for.

3. Copy a short movement phrase, then make a safe variation with a partner.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid collisions or uncomfortable movements.

Try this: Copy a short movement phrase, then make a safe variation with a partner.

Show your learning: coordinated steps and respectful space. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 09: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Organise traditional music and dance. After warm up routine, the: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Rush into a demanding activity without warming up

C. Organise traditional music and dance. After warm up routine, the teacher organise traditional music and dance for

D. Ignore the movement task and do only an unrelated game

2. [Play] Organise traditional music and dance. After warm up routine, the: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a gentle rhythmic pattern and an open floor

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Organise traditional music and dance. After warm up routine, the: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using a gentle rhythmic pattern and an open floor.

C. Ignore the main task and do something unrelated.

D. Finish before looking at the instructions.

4. [Play] Organise traditional music and dance. After warm up routine, the: Which setting does this grade use?

A. movement strategies and health awareness

B. a topic unrelated to the current class

C. an unrelated imagined city

D. only a future space colony

5. [Play] Organise traditional music and dance. After warm up routine, the: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. a response that does not show the lesson skill

6. [Challenge] Organise traditional music and dance. After warm up routine, the: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Practise the skill slowly: Organise traditional music and dance. After warm up routine, the teacher organise traditional music and dance for.

C. Only watch others without trying

D. Skip to marking before learning

7. [Challenge] Organise traditional music and dance. After warm up routine, the: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Copy a short movement phrase, then make a safe variation with a partner.

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] Organise traditional music and dance. After warm up routine, the: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. a random answer with no supporting detail

C. an unrelated example that does not test the skill

D. coordinated steps and respectful space

9. [Challenge] Organise traditional music and dance. After warm up routine, the: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid collisions or uncomfortable movements.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] Organise traditional music and dance. After warm up routine, the: Which classroom activity helps apply the lesson?

A. Copy another learner’s response without trying

B. Avoid the stated task and its materials

C. Copy a short movement phrase, then make a safe variation with a partner.

D. Complete a different lesson instead

11. [Challenge] Organise traditional music and dance. After warm up routine, the: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Learning means only guessing and never checking

C. Rhythm helps a group coordinate movements in time. Listening and careful spacing support safe group practice.

D. The topic can be completed without observing or practising

12. [Challenge] Organise traditional music and dance. After warm up routine, the: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can avoid answering questions

C. Whether you can ignore the agreed task

D. Whether your work demonstrates coordinated steps and respectful space.

13. [Challenge] Organise traditional music and dance. After warm up routine, the: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Stop immediately without reflection

C. Make up results instead of practising

D. Repeat the same error without checking feedback

14. [Challenge] Organise traditional music and dance. After warm up routine, the: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Ignore all comments and leave the task incomplete

C. Change answers randomly without a reason

D. Revisit the steps and strengthen coordinated steps and respectful space.

15. [Challenge] Organise traditional music and dance. After warm up routine, the: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

B. Apply the lesson about organise traditional music and dance. after warm up routine, the teacher organise traditional music and dance for to a suitable real-life situation.

C. Claim expertise without trying the skill

D. Avoid explaining how the skill could be used

LESSON 10: The differences in applying and receiving force when jumping for

Goal: Explain the differences in applying and receiving force when jumping for height and distance.

Learn it

A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

Useful material: chalk-marked standing space and a soft, clear landing area

Do it in three steps

1. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

2. Practise the skill slowly: Explain the differences in applying and receiving force when jumping for height and distance.

3. Practise take-off, landing, then describe which landing felt more balanced.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

Try this: Practise take-off, landing, then describe which landing felt more balanced.

Show your learning: controlled take-off and safe landing. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 10: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The differences in applying and receiving force when jumping for: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Explain the differences in applying and receiving force when jumping for height and distance.

C. Practise unsafe tricks without learning the basic skill

D. Ignore the movement task and do only an unrelated game

2. [Play] The differences in applying and receiving force when jumping for: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. chalk-marked standing space and a soft, clear landing area

D. a slippery or obstructed practice area

3. [Play] The differences in applying and receiving force when jumping for: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Set up a safe activity space using chalk-marked standing space and a soft, clear landing area.

D. Finish before looking at the instructions.

4. [Play] The differences in applying and receiving force when jumping for: Which setting does this grade use?

A. a topic unrelated to the current class

B. movement strategies and health awareness

C. only a future space colony

D. an unrelated imagined city

5. [Play] The differences in applying and receiving force when jumping for: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. a response that does not show the lesson skill

C. an unrelated picture with no explanation

D. an unsupported claim with no classroom practice

6. [Challenge] The differences in applying and receiving force when jumping for: Which action comes after the opening step?

A. Only watch others without trying

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Explain the differences in applying and receiving force when jumping for height and distance.

D. Skip to marking before learning

7. [Challenge] The differences in applying and receiving force when jumping for: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Practise take-off, landing, then describe which landing felt more balanced.

D. Give a guess without trying the activity

8. [Challenge] The differences in applying and receiving force when jumping for: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. controlled take-off and safe landing

C. a random answer with no supporting detail

D. an opinion without observation or practice

9. [Challenge] The differences in applying and receiving force when jumping for: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Ignore the teacher’s safety instructions.

C. Take unnecessary risks to finish first.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Avoid high jumps or hard surfaces.

10. [Challenge] The differences in applying and receiving force when jumping for: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Copy another learner’s response without trying

C. Practise take-off, landing, then describe which landing felt more balanced.

D. Avoid the stated task and its materials

11. [Challenge] The differences in applying and receiving force when jumping for: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. A controlled jump begins with a balanced stance and ends with knees bending gently on landing.

12. [Challenge] The differences in applying and receiving force when jumping for: What should a partner help you check?

A. Whether your work demonstrates controlled take-off and safe landing.

B. Whether you can avoid answering questions

C. Whether you can ignore the agreed task

D. Whether you can finish without showing your work

13. [Challenge] The differences in applying and receiving force when jumping for: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Repeat the same error without checking feedback

D. Make up results instead of practising

14. [Challenge] The differences in applying and receiving force when jumping for: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Revisit the steps and strengthen controlled take-off and safe landing.

C. Ignore all comments and leave the task incomplete

D. Change answers randomly without a reason

15. [Challenge] The differences in applying and receiving force when jumping for: Which choice would show responsible use of today’s skill?

A. Apply the lesson about explain the differences in applying and receiving force when jumping for height and distance to a suitable real-life situation.

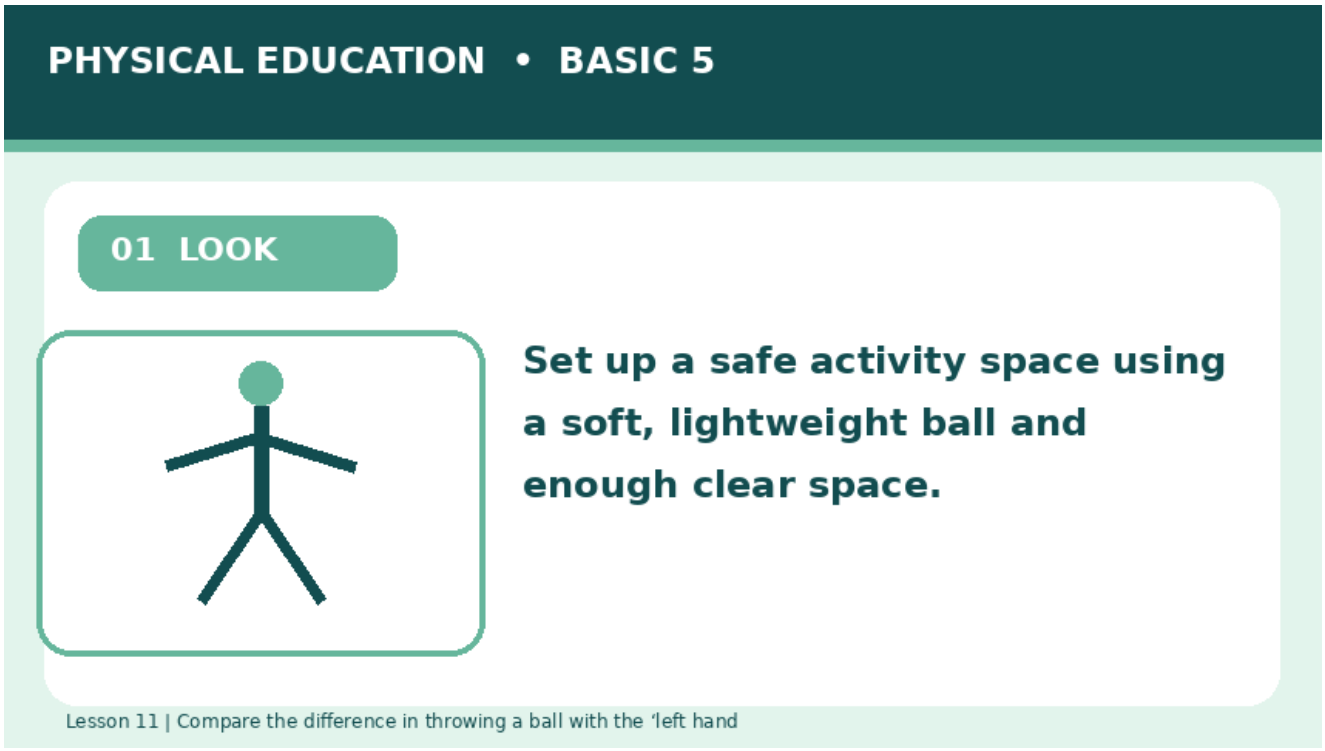

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Avoid explaining how the skill could be used

LESSON 11: Compare the difference in throwing a ball with the ‘left hand and

Goal: Compare the difference in throwing a ball with the ‘left hand and right hand’ and kicking a ball with ‘left foot and right foot for distance’.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Compare the difference in throwing a ball with the ‘left hand and right hand’ and kicking a ball with ‘left foot and right foot for distance’.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 11: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Compare the difference in throwing a ball with the ‘left hand and: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Compare the difference in throwing a ball with the ‘left hand and right hand’ and kicking a ball with ‘left foot and right foot for distance’.

C. Ignore the movement task and do only an unrelated game

D. Rush into a demanding activity without warming up

2. [Play] Compare the difference in throwing a ball with the ‘left hand and: What useful learning material or support is listed?

A. a slippery or obstructed practice area

B. a soft, lightweight ball and enough clear space

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Compare the difference in throwing a ball with the ‘left hand and: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Set up a safe activity space using a soft, lightweight ball and enough clear space.

D. Skip all practice and guess the result.

4. [Play] Compare the difference in throwing a ball with the ‘left hand and: Which setting does this grade use?

A. a topic unrelated to the current class

B. an unrelated imagined city

C. only a future space colony

D. movement strategies and health awareness

5. [Play] Compare the difference in throwing a ball with the ‘left hand and: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. a response that does not show the lesson skill

6. [Challenge] Compare the difference in throwing a ball with the ‘left hand and: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Only watch others without trying

C. Skip to marking before learning

D. Practise the skill slowly: Compare the difference in throwing a ball with the ‘left hand and right hand’ and kicking a ball with ‘left foot and right foot for distance’.

7. [Challenge] Compare the difference in throwing a ball with the ‘left hand and: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Practise at a short distance; check your direction and try again with feedback.

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] Compare the difference in throwing a ball with the ‘left hand and: What counts as good evidence of learning here?

A. a random answer with no supporting detail

B. an unrelated example that does not test the skill

C. accurate controlled ball movement

D. an opinion without observation or practice

9. [Challenge] Compare the difference in throwing a ball with the ‘left hand and: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Do the activity without considering other people.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Compare the difference in throwing a ball with the ‘left hand and: Which classroom activity helps apply the lesson?

A. Practise at a short distance; check your direction and try again with feedback.

B. Copy another learner’s response without trying

C. Complete a different lesson instead

D. Avoid the stated task and its materials

11. [Challenge] Compare the difference in throwing a ball with the ‘left hand and: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

C. Learning means only guessing and never checking

D. The topic can be completed without observing or practising

12. [Challenge] Compare the difference in throwing a ball with the ‘left hand and: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] Compare the difference in throwing a ball with the ‘left hand and: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Repeat the same error without checking feedback

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Make up results instead of practising

14. [Challenge] Compare the difference in throwing a ball with the ‘left hand and: How should a learner improve after feedback?

A. Revisit the steps and strengthen accurate controlled ball movement.

B. Change answers randomly without a reason

C. Ignore all comments and leave the task incomplete

D. Skip a difficult part without asking for help

15. [Challenge] Compare the difference in throwing a ball with the ‘left hand and: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

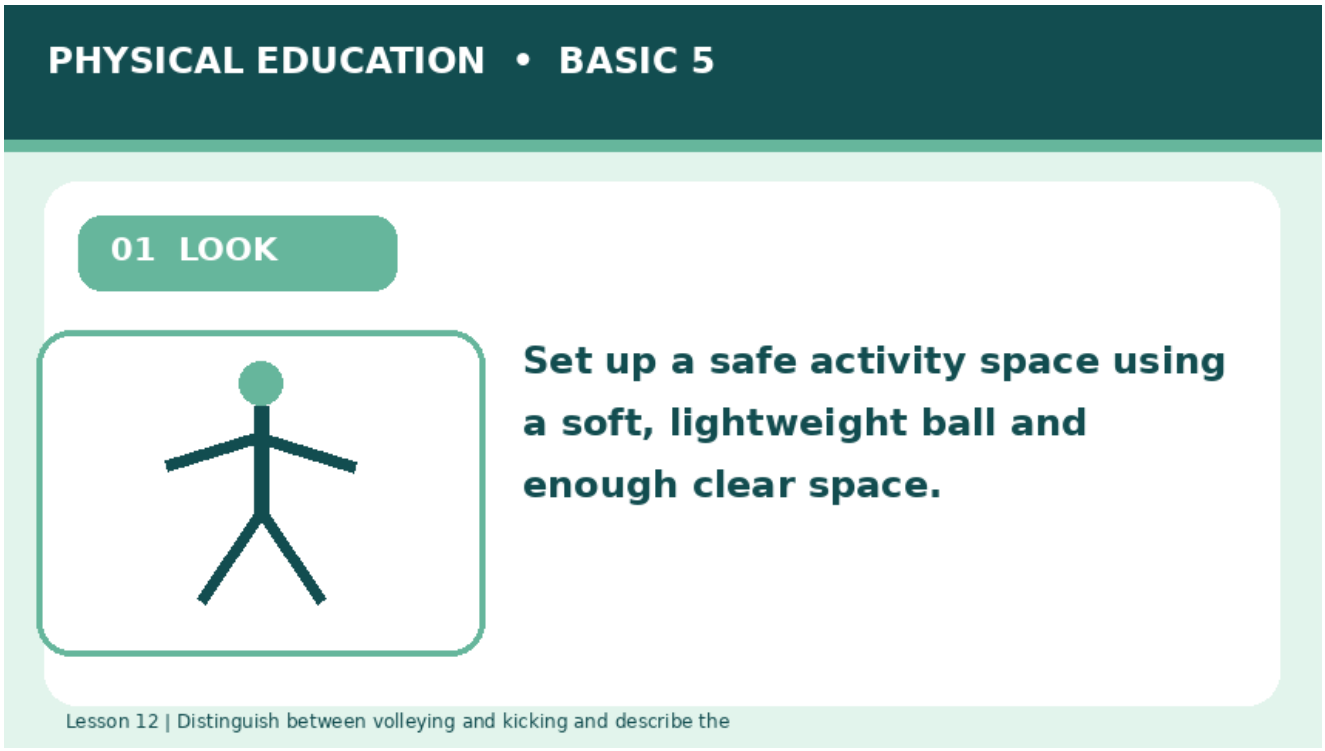

B. Apply the lesson about compare the difference in throwing a ball with the ‘left hand and right hand’ and kicking a ball with ‘left foot and right foot for distance’ to a suitable real-life situation.

C. Avoid explaining how the skill could be used

D. Claim expertise without trying the skill

LESSON 12: Distinguish between volleying and kicking and describe the

Goal: Distinguish between volleying and kicking and describe the similarities and differences. Volleying is when a ball is strike before it touches the ground.

Learn it

Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

Useful material: a soft, lightweight ball and enough clear space

Do it in three steps

1. Set up a safe activity space using a soft, lightweight ball and enough clear space.

2. Practise the skill slowly: Distinguish between volleying and kicking and describe the similarities and differences. Volleying is when a ball is strike before it touches the ground.

3. Practise at a short distance; check your direction and try again with feedback.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

Try this: Practise at a short distance; check your direction and try again with feedback.

Show your learning: accurate controlled ball movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 12: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Distinguish between volleying and kicking and describe the: What is this lesson mainly about?

A. Distinguish between volleying and kicking and describe the similarities and differences. Volleying is when a ball is strike before it touches the ground.

B. Ignore the movement task and do only an unrelated game

C. Rush into a demanding activity without warming up

D. Practise unsafe tricks without learning the basic skill

2. [Play] Distinguish between volleying and kicking and describe the: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a soft, lightweight ball and enough clear space

C. a slippery or obstructed practice area

D. a sharp object placed on the sports ground

3. [Play] Distinguish between volleying and kicking and describe the: Which action should come first?

A. Skip all practice and guess the result.

B. Ignore the main task and do something unrelated.

C. Set up a safe activity space using a soft, lightweight ball and enough clear space.

D. Finish before looking at the instructions.

4. [Play] Distinguish between volleying and kicking and describe the: Which setting does this grade use?

A. a topic unrelated to the current class

B. an unrelated imagined city

C. movement strategies and health awareness

D. only a future space colony

5. [Play] Distinguish between volleying and kicking and describe the: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. a demonstrated movement or fitness task with self-assessment

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] Distinguish between volleying and kicking and describe the: Which action comes after the opening step?

A. Skip to marking before learning

B. Practise the skill slowly: Distinguish between volleying and kicking and describe the similarities and differences. Volleying is when a ball is strike before it touches the ground.

C. Change to an unrelated lesson immediately

D. Only watch others without trying

7. [Challenge] Distinguish between volleying and kicking and describe the: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Stop after reading the title

C. Give a guess without trying the activity

D. Practise at a short distance; check your direction and try again with feedback.

8. [Challenge] Distinguish between volleying and kicking and describe the: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. accurate controlled ball movement

D. a random answer with no supporting detail

9. [Challenge] Distinguish between volleying and kicking and describe the: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Never throw towards a person’s face.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Distinguish between volleying and kicking and describe the: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Avoid the stated task and its materials

C. Practise at a short distance; check your direction and try again with feedback.

D. Copy another learner’s response without trying

11. [Challenge] Distinguish between volleying and kicking and describe the: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. The lesson has no connection to life or skills

C. Learning means only guessing and never checking

D. Eyes, hands or feet work together to control the ball. Practise slowly before adding movement or a partner.

12. [Challenge] Distinguish between volleying and kicking and describe the: What should a partner help you check?

A. Whether your work demonstrates accurate controlled ball movement.

B. Whether you can avoid answering questions

C. Whether you can ignore the agreed task

D. Whether you can finish without showing your work

13. [Challenge] Distinguish between volleying and kicking and describe the: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Make up results instead of practising

14. [Challenge] Distinguish between volleying and kicking and describe the: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Revisit the steps and strengthen accurate controlled ball movement.

C. Change answers randomly without a reason

D. Skip a difficult part without asking for help

15. [Challenge] Distinguish between volleying and kicking and describe the: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

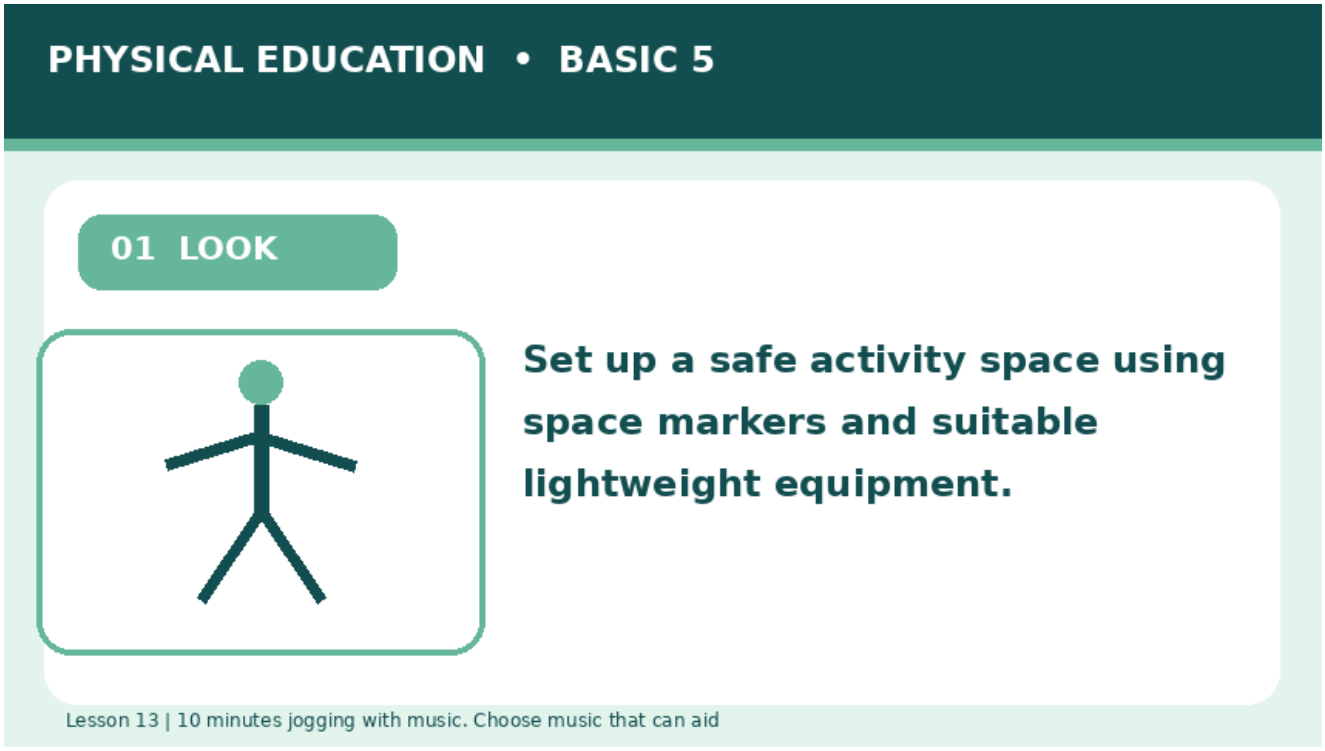

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Apply the lesson about distinguish between volleying and kicking and describe the similarities and differences. volleying is when a ball is strike before it touches the ground to a suitable real-life situation.

LESSON 13: 10 minutes jogging with music. Choose music that can aid

Goal: Perform 10 minutes jogging with music. Choose music that can aid

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Perform 10 minutes jogging with music. Choose music that can aid.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 13: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] 10 minutes jogging with music. Choose music that can aid: What is this lesson mainly about?

A. Perform 10 minutes jogging with music. Choose music that can aid

B. Ignore the movement task and do only an unrelated game

C. Rush into a demanding activity without warming up

D. Practise unsafe tricks without learning the basic skill

2. [Play] 10 minutes jogging with music. Choose music that can aid: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. heavy unsafe equipment in a crowded space

C. a slippery or obstructed practice area

D. a sharp object placed on the sports ground

3. [Play] 10 minutes jogging with music. Choose music that can aid: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Skip all practice and guess the result.

D. Set up a safe activity space using space markers and suitable lightweight equipment.

4. [Play] 10 minutes jogging with music. Choose music that can aid: Which setting does this grade use?

A. an unrelated imagined city

B. a topic unrelated to the current class

C. movement strategies and health awareness

D. only a future space colony

5. [Play] 10 minutes jogging with music. Choose music that can aid: What should learners produce or demonstrate?

A. an unsupported claim with no classroom practice

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. a response that does not show the lesson skill

6. [Challenge] 10 minutes jogging with music. Choose music that can aid: Which action comes after the opening step?

A. Only watch others without trying

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Perform 10 minutes jogging with music. Choose music that can aid.

D. Skip to marking before learning

7. [Challenge] 10 minutes jogging with music. Choose music that can aid: Which practice completes the three lesson stages?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Leave the task unfinished without explaining

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] 10 minutes jogging with music. Choose music that can aid: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. careful, safe movement

C. an unrelated example that does not test the skill

D. a random answer with no supporting detail

9. [Challenge] 10 minutes jogging with music. Choose music that can aid: Which safety or respect rule fits this lesson?

A. Take unnecessary risks to finish first.

B. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

C. Do the activity without considering other people.

D. Ignore the teacher’s safety instructions.

10. [Challenge] 10 minutes jogging with music. Choose music that can aid: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Avoid the stated task and its materials

C. Observe a demonstration, practise slowly, then reflect on one improvement.

D. Copy another learner’s response without trying

11. [Challenge] 10 minutes jogging with music. Choose music that can aid: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

C. The lesson has no connection to life or skills

D. The topic can be completed without observing or practising

12. [Challenge] 10 minutes jogging with music. Choose music that can aid: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether your work demonstrates careful, safe movement.

C. Whether you can avoid answering questions

D. Whether you can ignore the agreed task

13. [Challenge] 10 minutes jogging with music. Choose music that can aid: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Make up results instead of practising

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Repeat the same error without checking feedback

14. [Challenge] 10 minutes jogging with music. Choose music that can aid: How should a learner improve after feedback?

A. Ignore all comments and leave the task incomplete

B. Revisit the steps and strengthen careful, safe movement.

C. Change answers randomly without a reason

D. Skip a difficult part without asking for help

15. [Challenge] 10 minutes jogging with music. Choose music that can aid: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

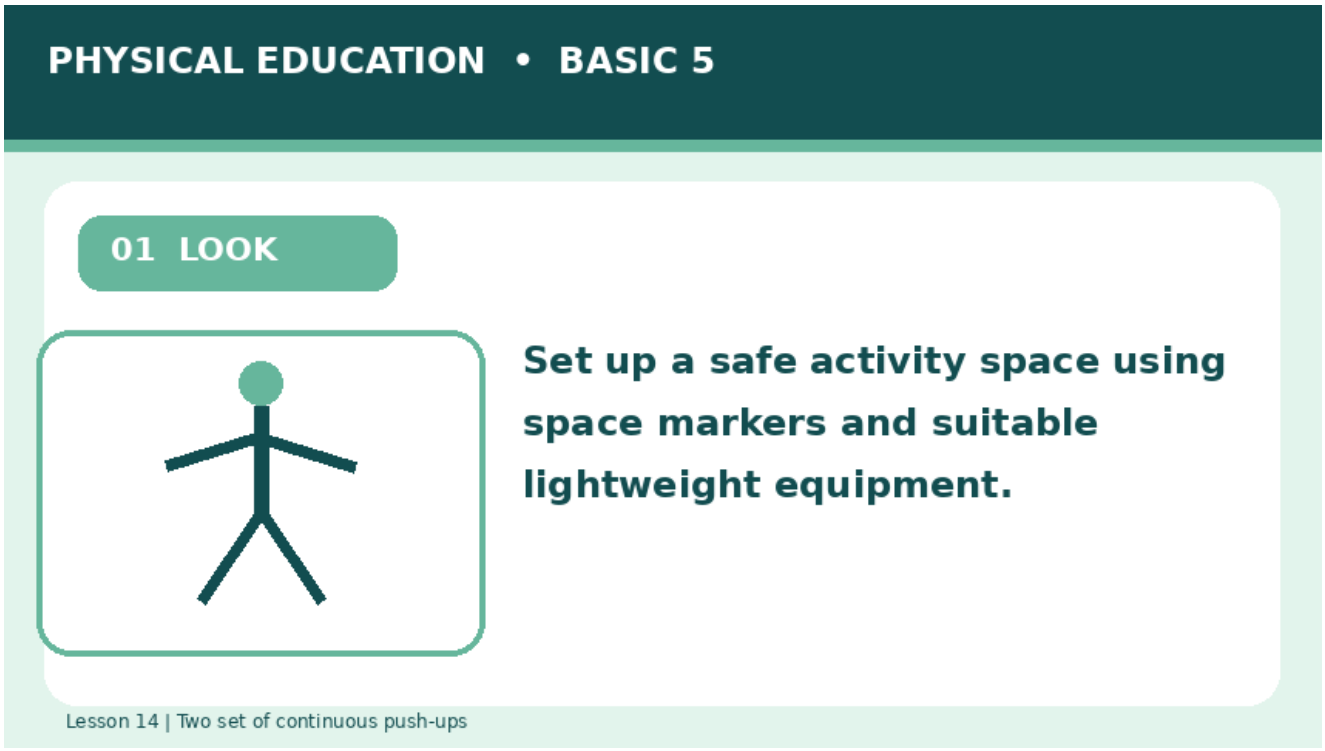

B. Apply the lesson about perform 10 minutes jogging with music. choose music that can aid to a suitable real-life situation.

C. Avoid explaining how the skill could be used

D. Claim expertise without trying the skill

LESSON 14: Two set of continuous push-ups

Goal: Perform two set of continuous push-ups.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Perform two set of continuous push-ups.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 14: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Two set of continuous push-ups: What is this lesson mainly about?

A. Perform two set of continuous push-ups.

B. Ignore the movement task and do only an unrelated game

C. Rush into a demanding activity without warming up

D. Practise unsafe tricks without learning the basic skill

2. [Play] Two set of continuous push-ups: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. heavy unsafe equipment in a crowded space

C. a sharp object placed on the sports ground

D. a slippery or obstructed practice area

3. [Play] Two set of continuous push-ups: Which action should come first?

A. Set up a safe activity space using space markers and suitable lightweight equipment.

B. Ignore the main task and do something unrelated.

C. Finish before looking at the instructions.

D. Skip all practice and guess the result.

4. [Play] Two set of continuous push-ups: Which setting does this grade use?

A. only a future space colony

B. movement strategies and health awareness

C. an unrelated imagined city

D. a topic unrelated to the current class

5. [Play] Two set of continuous push-ups: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unsupported claim with no classroom practice

C. a demonstrated movement or fitness task with self-assessment

D. an unrelated picture with no explanation

6. [Challenge] Two set of continuous push-ups: Which action comes after the opening step?

A. Only watch others without trying

B. Change to an unrelated lesson immediately

C. Practise the skill slowly: Perform two set of continuous push-ups.

D. Skip to marking before learning

7. [Challenge] Two set of continuous push-ups: Which practice completes the three lesson stages?

A. Leave the task unfinished without explaining

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] Two set of continuous push-ups: What counts as good evidence of learning here?

A. an opinion without observation or practice

B. a random answer with no supporting detail

C. careful, safe movement

D. an unrelated example that does not test the skill

9. [Challenge] Two set of continuous push-ups: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

B. Ignore the teacher’s safety instructions.

C. Do the activity without considering other people.

D. Take unnecessary risks to finish first.

10. [Challenge] Two set of continuous push-ups: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] Two set of continuous push-ups: Which explanation best supports this lesson?

A. The topic can be completed without observing or practising

B. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

C. The lesson has no connection to life or skills

D. Learning means only guessing and never checking

12. [Challenge] Two set of continuous push-ups: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether your work demonstrates careful, safe movement.

C. Whether you can finish without showing your work

D. Whether you can ignore the agreed task

13. [Challenge] Two set of continuous push-ups: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] Two set of continuous push-ups: How should a learner improve after feedback?

A. Revisit the steps and strengthen careful, safe movement.

B. Skip a difficult part without asking for help

C. Change answers randomly without a reason

D. Ignore all comments and leave the task incomplete

15. [Challenge] Two set of continuous push-ups: Which choice would show responsible use of today’s skill?

A. Apply the lesson about perform two set of continuous push-ups to a suitable real-life situation.

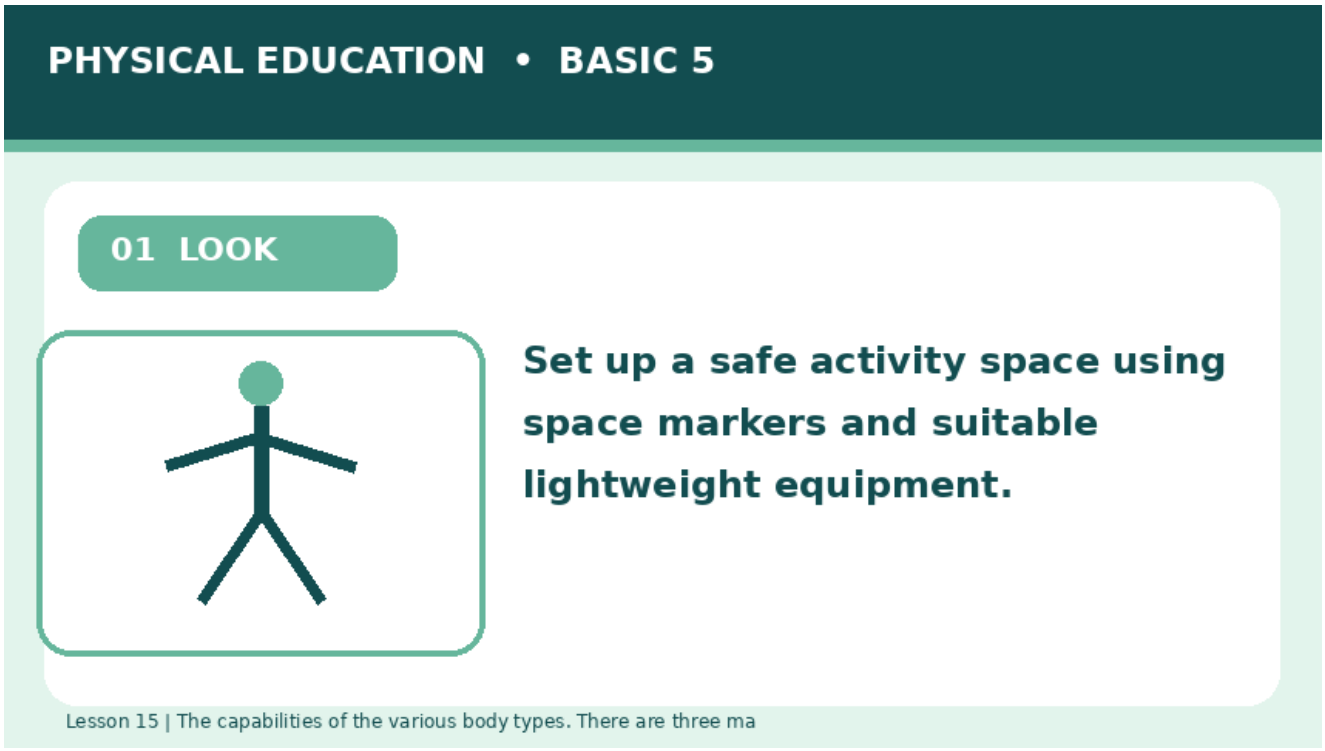

B. Avoid explaining how the skill could be used

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 15: The capabilities of the various body types. There are three main

Goal: Identify the capabilities of the various body types. There are three main body types: Ectomorph, Endomorph and Mesomorph.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Identify the capabilities of the various body types. There are three main body types: Ectomorph, Endomorph and Mesomorph.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 15: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The capabilities of the various body types. There are three main: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Practise unsafe tricks without learning the basic skill

C. Ignore the movement task and do only an unrelated game

D. Identify the capabilities of the various body types. There are three main body types: Ectomorph, Endomorph and Mesomorph.

2. [Play] The capabilities of the various body types. There are three main: What useful learning material or support is listed?

A. heavy unsafe equipment in a crowded space

B. a sharp object placed on the sports ground

C. space markers and suitable lightweight equipment

D. a slippery or obstructed practice area

3. [Play] The capabilities of the various body types. There are three main: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Set up a safe activity space using space markers and suitable lightweight equipment.

C. Skip all practice and guess the result.

D. Finish before looking at the instructions.

4. [Play] The capabilities of the various body types. There are three main: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. movement strategies and health awareness

D. an unrelated imagined city

5. [Play] The capabilities of the various body types. There are three main: What should learners produce or demonstrate?

A. a demonstrated movement or fitness task with self-assessment

B. an unsupported claim with no classroom practice

C. a response that does not show the lesson skill

D. an unrelated picture with no explanation

6. [Challenge] The capabilities of the various body types. There are three main: Which action comes after the opening step?

A. Skip to marking before learning

B. Only watch others without trying

C. Practise the skill slowly: Identify the capabilities of the various body types. There are three main body types: Ectomorph, Endomorph and Mesomorph.

D. Change to an unrelated lesson immediately

7. [Challenge] The capabilities of the various body types. There are three main: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] The capabilities of the various body types. There are three main: What counts as good evidence of learning here?

A. careful, safe movement

B. a random answer with no supporting detail

C. an unrelated example that does not test the skill

D. an opinion without observation or practice

9. [Challenge] The capabilities of the various body types. There are three main: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Do the activity without considering other people.

10. [Challenge] The capabilities of the various body types. There are three main: Which classroom activity helps apply the lesson?

A. Complete a different lesson instead

B. Observe a demonstration, practise slowly, then reflect on one improvement.

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] The capabilities of the various body types. There are three main: Which explanation best supports this lesson?

A. The lesson has no connection to life or skills

B. Learning means only guessing and never checking

C. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

D. The topic can be completed without observing or practising

12. [Challenge] The capabilities of the various body types. There are three main: What should a partner help you check?

A. Whether you can finish without showing your work

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether your work demonstrates careful, safe movement.

13. [Challenge] The capabilities of the various body types. There are three main: Which follow-up deepens the learning?

A. Repeat the same error without checking feedback

B. Stop immediately without reflection

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Make up results instead of practising

14. [Challenge] The capabilities of the various body types. There are three main: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Revisit the steps and strengthen careful, safe movement.

C. Ignore all comments and leave the task incomplete

D. Skip a difficult part without asking for help

15. [Challenge] The capabilities of the various body types. There are three main: Which choice would show responsible use of today’s skill?

A. Avoid explaining how the skill could be used

B. Apply the lesson about identify the capabilities of the various body types. there are three main body types: ectomorph, endomorph and mesomorph to a suitable real-life situation.

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 16: Monitor the intensity of one’s heart rate during physical activity

Goal: Monitor the intensity of one’s heart rate during physical activity.

Learn it

Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

Useful material: a clock or timer and drinking water

Do it in three steps

1. Set up a safe activity space using a clock or timer and drinking water.

2. Practise the skill slowly: Monitor the intensity of one’s heart rate during physical activity.

3. Try a gentle activity, check how you feel, and talk about an appropriate rest.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

Try this: Try a gentle activity, check how you feel, and talk about an appropriate rest.

Show your learning: a safe personal activity plan. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 16: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Monitor the intensity of one’s heart rate during physical activity: What is this lesson mainly about?

A. Ignore the movement task and do only an unrelated game

B. Practise unsafe tricks without learning the basic skill

C. Rush into a demanding activity without warming up

D. Monitor the intensity of one’s heart rate during physical activity.

2. [Play] Monitor the intensity of one’s heart rate during physical activity: What useful learning material or support is listed?

A. a sharp object placed on the sports ground

B. heavy unsafe equipment in a crowded space

C. a slippery or obstructed practice area

D. a clock or timer and drinking water

3. [Play] Monitor the intensity of one’s heart rate during physical activity: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Skip all practice and guess the result.

D. Set up a safe activity space using a clock or timer and drinking water.

4. [Play] Monitor the intensity of one’s heart rate during physical activity: Which setting does this grade use?

A. only a future space colony

B. a topic unrelated to the current class

C. movement strategies and health awareness

D. an unrelated imagined city

5. [Play] Monitor the intensity of one’s heart rate during physical activity: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. an unsupported claim with no classroom practice

6. [Challenge] Monitor the intensity of one’s heart rate during physical activity: Which action comes after the opening step?

A. Practise the skill slowly: Monitor the intensity of one’s heart rate during physical activity.

B. Only watch others without trying

C. Skip to marking before learning

D. Change to an unrelated lesson immediately

7. [Challenge] Monitor the intensity of one’s heart rate during physical activity: Which practice completes the three lesson stages?

A. Try a gentle activity, check how you feel, and talk about an appropriate rest.

B. Leave the task unfinished without explaining

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] Monitor the intensity of one’s heart rate during physical activity: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. an opinion without observation or practice

C. a random answer with no supporting detail

D. a safe personal activity plan

9. [Challenge] Monitor the intensity of one’s heart rate during physical activity: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Do the activity without considering other people.

D. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

10. [Challenge] Monitor the intensity of one’s heart rate during physical activity: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Try a gentle activity, check how you feel, and talk about an appropriate rest.

C. Copy another learner’s response without trying

D. Complete a different lesson instead

11. [Challenge] Monitor the intensity of one’s heart rate during physical activity: Which explanation best supports this lesson?

A. Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

B. Learning means only guessing and never checking

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] Monitor the intensity of one’s heart rate during physical activity: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether you can finish without showing your work

D. Whether your work demonstrates a safe personal activity plan.

13. [Challenge] Monitor the intensity of one’s heart rate during physical activity: Which follow-up deepens the learning?

A. Try a gentler or harder safe version and explain how you controlled your movement.

B. Repeat the same error without checking feedback

C. Stop immediately without reflection

D. Make up results instead of practising

14. [Challenge] Monitor the intensity of one’s heart rate during physical activity: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Revisit the steps and strengthen a safe personal activity plan.

15. [Challenge] Monitor the intensity of one’s heart rate during physical activity: Which choice would show responsible use of today’s skill?

A. Apply the lesson about monitor the intensity of one’s heart rate during physical activity to a suitable real-life situation.

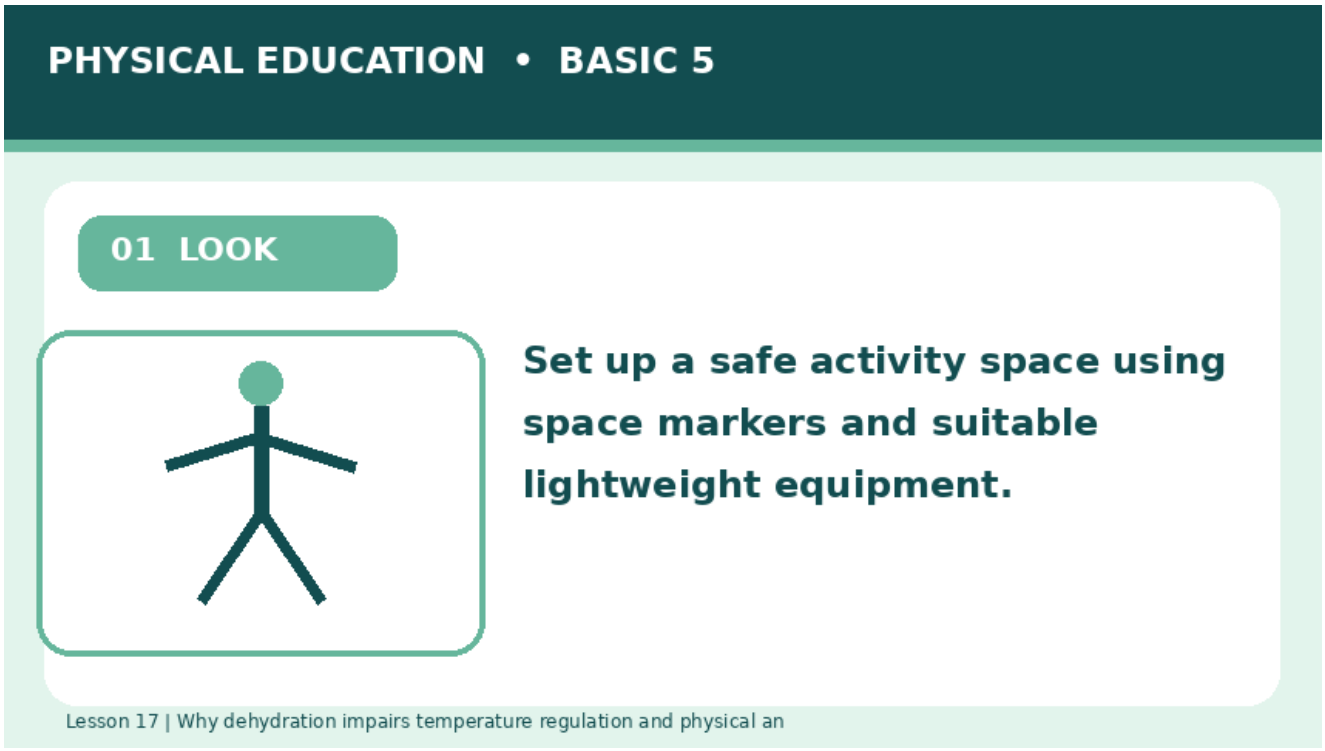

B. Claim expertise without trying the skill

C. Use the topic to mislead others

D. Avoid explaining how the skill could be used

LESSON 17: Why dehydration impairs temperature regulation and physical and

Goal: Explain why dehydration impairs temperature regulation and physical and mental performance. The body is made of 75% water. Water lubricates our joints and

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Explain why dehydration impairs temperature regulation and physical and mental performance. The body is made of 75% water. Water lubricates our joints and.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 17: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Why dehydration impairs temperature regulation and physical and: What is this lesson mainly about?

A. Explain why dehydration impairs temperature regulation and physical and mental performance. The body is made of 75% water. Water lubricates our joints and

B. Ignore the movement task and do only an unrelated game

C. Practise unsafe tricks without learning the basic skill

D. Rush into a demanding activity without warming up

2. [Play] Why dehydration impairs temperature regulation and physical and: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Why dehydration impairs temperature regulation and physical and: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Finish before looking at the instructions.

C. Set up a safe activity space using space markers and suitable lightweight equipment.

D. Skip all practice and guess the result.

4. [Play] Why dehydration impairs temperature regulation and physical and: Which setting does this grade use?

A. an unrelated imagined city

B. movement strategies and health awareness

C. only a future space colony

D. a topic unrelated to the current class

5. [Play] Why dehydration impairs temperature regulation and physical and: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. an unrelated picture with no explanation

C. a demonstrated movement or fitness task with self-assessment

D. an unsupported claim with no classroom practice

6. [Challenge] Why dehydration impairs temperature regulation and physical and: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Only watch others without trying

C. Skip to marking before learning

D. Practise the skill slowly: Explain why dehydration impairs temperature regulation and physical and mental performance. The body is made of 75% water. Water lubricates our joints and.

7. [Challenge] Why dehydration impairs temperature regulation and physical and: Which practice completes the three lesson stages?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Leave the task unfinished without explaining

C. Give a guess without trying the activity

D. Stop after reading the title

8. [Challenge] Why dehydration impairs temperature regulation and physical and: What counts as good evidence of learning here?

A. careful, safe movement

B. an opinion without observation or practice

C. a random answer with no supporting detail

D. an unrelated example that does not test the skill

9. [Challenge] Why dehydration impairs temperature regulation and physical and: Which safety or respect rule fits this lesson?

A. Ignore the teacher’s safety instructions.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

D. Do the activity without considering other people.

10. [Challenge] Why dehydration impairs temperature regulation and physical and: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Complete a different lesson instead

C. Copy another learner’s response without trying

D. Avoid the stated task and its materials

11. [Challenge] Why dehydration impairs temperature regulation and physical and: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

C. The topic can be completed without observing or practising

D. The lesson has no connection to life or skills

12. [Challenge] Why dehydration impairs temperature regulation and physical and: What should a partner help you check?

A. Whether you can ignore the agreed task

B. Whether you can finish without showing your work

C. Whether your work demonstrates careful, safe movement.

D. Whether you can avoid answering questions

13. [Challenge] Why dehydration impairs temperature regulation and physical and: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Stop immediately without reflection

C. Try a gentler or harder safe version and explain how you controlled your movement.

D. Repeat the same error without checking feedback

14. [Challenge] Why dehydration impairs temperature regulation and physical and: How should a learner improve after feedback?

A. Skip a difficult part without asking for help

B. Ignore all comments and leave the task incomplete

C. Change answers randomly without a reason

D. Revisit the steps and strengthen careful, safe movement.

15. [Challenge] Why dehydration impairs temperature regulation and physical and: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

B. Claim expertise without trying the skill

C. Apply the lesson about explain why dehydration impairs temperature regulation and physical and mental performance. the body is made of 75% water. water lubricates our joints and to a suitable real-life situation.

D. Avoid explaining how the skill could be used

LESSON 18: The role of muscle strength and proper lifting in the prevention of

Goal: Describe the role of muscle strength and proper lifting in the prevention of back injuries.

Learn it

Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

Useful material: space markers and suitable lightweight equipment

Do it in three steps

1. Set up a safe activity space using space markers and suitable lightweight equipment.

2. Practise the skill slowly: Describe the role of muscle strength and proper lifting in the prevention of back injuries.

3. Observe a demonstration, practise slowly, then reflect on one improvement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

Try this: Observe a demonstration, practise slowly, then reflect on one improvement.

Show your learning: careful, safe movement. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 18: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] The role of muscle strength and proper lifting in the prevention of: What is this lesson mainly about?

A. Practise unsafe tricks without learning the basic skill

B. Ignore the movement task and do only an unrelated game

C. Describe the role of muscle strength and proper lifting in the prevention of back injuries.

D. Rush into a demanding activity without warming up

2. [Play] The role of muscle strength and proper lifting in the prevention of: What useful learning material or support is listed?

A. space markers and suitable lightweight equipment

B. a sharp object placed on the sports ground

C. a slippery or obstructed practice area

D. heavy unsafe equipment in a crowded space

3. [Play] The role of muscle strength and proper lifting in the prevention of: Which action should come first?

A. Finish before looking at the instructions.

B. Ignore the main task and do something unrelated.

C. Set up a safe activity space using space markers and suitable lightweight equipment.

D. Skip all practice and guess the result.

4. [Play] The role of muscle strength and proper lifting in the prevention of: Which setting does this grade use?

A. movement strategies and health awareness

B. an unrelated imagined city

C. a topic unrelated to the current class

D. only a future space colony

5. [Play] The role of muscle strength and proper lifting in the prevention of: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. a demonstrated movement or fitness task with self-assessment

C. an unsupported claim with no classroom practice

D. an unrelated picture with no explanation

6. [Challenge] The role of muscle strength and proper lifting in the prevention of: Which action comes after the opening step?

A. Skip to marking before learning

B. Only watch others without trying

C. Change to an unrelated lesson immediately

D. Practise the skill slowly: Describe the role of muscle strength and proper lifting in the prevention of back injuries.

7. [Challenge] The role of muscle strength and proper lifting in the prevention of: Which practice completes the three lesson stages?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Stop after reading the title

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] The role of muscle strength and proper lifting in the prevention of: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. a random answer with no supporting detail

C. careful, safe movement

D. an opinion without observation or practice

9. [Challenge] The role of muscle strength and proper lifting in the prevention of: Which safety or respect rule fits this lesson?

A. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision.

B. Take unnecessary risks to finish first.

C. Ignore the teacher’s safety instructions.

D. Do the activity without considering other people.

10. [Challenge] The role of muscle strength and proper lifting in the prevention of: Which classroom activity helps apply the lesson?

A. Observe a demonstration, practise slowly, then reflect on one improvement.

B. Avoid the stated task and its materials

C. Complete a different lesson instead

D. Copy another learner’s response without trying

11. [Challenge] The role of muscle strength and proper lifting in the prevention of: Which explanation best supports this lesson?

A. Movement can improve coordination and confidence. Learn each skill gradually, communicate and follow safety guidance.

B. The topic can be completed without observing or practising

C. The lesson has no connection to life or skills

D. Learning means only guessing and never checking

12. [Challenge] The role of muscle strength and proper lifting in the prevention of: What should a partner help you check?

A. Whether your work demonstrates careful, safe movement.

B. Whether you can ignore the agreed task

C. Whether you can avoid answering questions

D. Whether you can finish without showing your work

13. [Challenge] The role of muscle strength and proper lifting in the prevention of: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Repeat the same error without checking feedback

D. Make up results instead of practising

14. [Challenge] The role of muscle strength and proper lifting in the prevention of: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Ignore all comments and leave the task incomplete

C. Skip a difficult part without asking for help

D. Revisit the steps and strengthen careful, safe movement.

15. [Challenge] The role of muscle strength and proper lifting in the prevention of: Which choice would show responsible use of today’s skill?

A. Use the topic to mislead others

B. Avoid explaining how the skill could be used

C. Claim expertise without trying the skill

D. Apply the lesson about describe the role of muscle strength and proper lifting in the prevention of back injuries to a suitable real-life situation.

LESSON 19: Participating independently in fitness and skill development

Goal: Participating independently in fitness and skill development activities outside school.

Learn it

Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

Useful material: a clock or timer and drinking water

Do it in three steps

1. Set up a safe activity space using a clock or timer and drinking water.

2. Practise the skill slowly: Participating independently in fitness and skill development activities outside school.

3. Try a gentle activity, check how you feel, and talk about an appropriate rest.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

Try this: Try a gentle activity, check how you feel, and talk about an appropriate rest.

Show your learning: a safe personal activity plan. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 19: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Participating independently in fitness and skill development: What is this lesson mainly about?

A. Rush into a demanding activity without warming up

B. Ignore the movement task and do only an unrelated game

C. Participating independently in fitness and skill development activities outside school.

D. Practise unsafe tricks without learning the basic skill

2. [Play] Participating independently in fitness and skill development: What useful learning material or support is listed?

A. a clock or timer and drinking water

B. a slippery or obstructed practice area

C. a sharp object placed on the sports ground

D. heavy unsafe equipment in a crowded space

3. [Play] Participating independently in fitness and skill development: Which action should come first?

A. Skip all practice and guess the result.

B. Set up a safe activity space using a clock or timer and drinking water.

C. Finish before looking at the instructions.

D. Ignore the main task and do something unrelated.

4. [Play] Participating independently in fitness and skill development: Which setting does this grade use?

A. a topic unrelated to the current class

B. only a future space colony

C. an unrelated imagined city

D. movement strategies and health awareness

5. [Play] Participating independently in fitness and skill development: What should learners produce or demonstrate?

A. a response that does not show the lesson skill

B. a demonstrated movement or fitness task with self-assessment

C. an unsupported claim with no classroom practice

D. an unrelated picture with no explanation

6. [Challenge] Participating independently in fitness and skill development: Which action comes after the opening step?

A. Only watch others without trying

B. Skip to marking before learning

C. Practise the skill slowly: Participating independently in fitness and skill development activities outside school.

D. Change to an unrelated lesson immediately

7. [Challenge] Participating independently in fitness and skill development: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Try a gentle activity, check how you feel, and talk about an appropriate rest.

C. Give a guess without trying the activity

D. Leave the task unfinished without explaining

8. [Challenge] Participating independently in fitness and skill development: What counts as good evidence of learning here?

A. a safe personal activity plan

B. a random answer with no supporting detail

C. an opinion without observation or practice

D. an unrelated example that does not test the skill

9. [Challenge] Participating independently in fitness and skill development: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Stop for pain, dizziness or breathing difficulty.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Participating independently in fitness and skill development: Which classroom activity helps apply the lesson?

A. Avoid the stated task and its materials

B. Try a gentle activity, check how you feel, and talk about an appropriate rest.

C. Complete a different lesson instead

D. Copy another learner’s response without trying

11. [Challenge] Participating independently in fitness and skill development: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. The lesson has no connection to life or skills

C. Being active can strengthen the heart and muscles. Start at a comfortable pace and rest if you feel unwell.

D. The topic can be completed without observing or practising

12. [Challenge] Participating independently in fitness and skill development: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can finish without showing your work

C. Whether your work demonstrates a safe personal activity plan.

D. Whether you can ignore the agreed task

13. [Challenge] Participating independently in fitness and skill development: Which follow-up deepens the learning?

A. Make up results instead of practising

B. Stop immediately without reflection

C. Repeat the same error without checking feedback

D. Try a gentler or harder safe version and explain how you controlled your movement.

14. [Challenge] Participating independently in fitness and skill development: How should a learner improve after feedback?

A. Change answers randomly without a reason

B. Skip a difficult part without asking for help

C. Ignore all comments and leave the task incomplete

D. Revisit the steps and strengthen a safe personal activity plan.

15. [Challenge] Participating independently in fitness and skill development: Which choice would show responsible use of today’s skill?

A. Apply the lesson about participating independently in fitness and skill development activities outside school to a suitable real-life situation.

B. Avoid explaining how the skill could be used

C. Claim expertise without trying the skill

D. Use the topic to mislead others

LESSON 20: Contribute ideas and listen to the ideas of others in cooperative

Goal: Contribute ideas and listen to the ideas of others in cooperative problem-solving activities.

Learn it

Fair play means respecting rules, teammates and opponents. A good team encourages everybody to participate.

Useful material: a small-group game and agreed rules

Do it in three steps

1. Set up a safe activity space using a small-group game and agreed rules.

2. Practise the skill slowly: Contribute ideas and listen to the ideas of others in cooperative problem-solving activities.

3. Practise a short game; show how to encourage someone and resolve a disagreement.

Safety / respect: Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Adjust the game so all learners can take part.

Try this: Practise a short game; show how to encourage someone and resolve a disagreement.

Show your learning: respectful participation. Try a gentler or harder safe version and explain how you controlled your movement.

LESSON 20: Play + Challenge

Circle one answer for each question. Play = 1–5; Challenge = 6–15.

1. [Play] Contribute ideas and listen to the ideas of others in cooperative: What is this lesson mainly about?

A. Contribute ideas and listen to the ideas of others in cooperative problem-solving activities.

B. Rush into a demanding activity without warming up

C. Practise unsafe tricks without learning the basic skill

D. Ignore the movement task and do only an unrelated game

2. [Play] Contribute ideas and listen to the ideas of others in cooperative: What useful learning material or support is listed?

A. a small-group game and agreed rules

B. a sharp object placed on the sports ground

C. heavy unsafe equipment in a crowded space

D. a slippery or obstructed practice area

3. [Play] Contribute ideas and listen to the ideas of others in cooperative: Which action should come first?

A. Ignore the main task and do something unrelated.

B. Skip all practice and guess the result.

C. Set up a safe activity space using a small-group game and agreed rules.

D. Finish before looking at the instructions.

4. [Play] Contribute ideas and listen to the ideas of others in cooperative: Which setting does this grade use?

A. a topic unrelated to the current class

B. an unrelated imagined city

C. movement strategies and health awareness

D. only a future space colony

5. [Play] Contribute ideas and listen to the ideas of others in cooperative: What should learners produce or demonstrate?

A. an unrelated picture with no explanation

B. a demonstrated movement or fitness task with self-assessment

C. an unsupported claim with no classroom practice

D. a response that does not show the lesson skill

6. [Challenge] Contribute ideas and listen to the ideas of others in cooperative: Which action comes after the opening step?

A. Change to an unrelated lesson immediately

B. Practise the skill slowly: Contribute ideas and listen to the ideas of others in cooperative problem-solving activities.

C. Only watch others without trying

D. Skip to marking before learning

7. [Challenge] Contribute ideas and listen to the ideas of others in cooperative: Which practice completes the three lesson stages?

A. Stop after reading the title

B. Leave the task unfinished without explaining

C. Practise a short game; show how to encourage someone and resolve a disagreement.

D. Give a guess without trying the activity

8. [Challenge] Contribute ideas and listen to the ideas of others in cooperative: What counts as good evidence of learning here?

A. an unrelated example that does not test the skill

B. respectful participation

C. an opinion without observation or practice

D. a random answer with no supporting detail

9. [Challenge] Contribute ideas and listen to the ideas of others in cooperative: Which safety or respect rule fits this lesson?

A. Do the activity without considering other people.

B. Take unnecessary risks to finish first.

C. Warm up gently, check that the playing area is free of obstacles, and use equipment with teacher supervision. Adjust the game so all learners can take part.

D. Ignore the teacher’s safety instructions.

10. [Challenge] Contribute ideas and listen to the ideas of others in cooperative: Which classroom activity helps apply the lesson?

A. Practise a short game; show how to encourage someone and resolve a disagreement.

B. Avoid the stated task and its materials

C. Copy another learner’s response without trying

D. Complete a different lesson instead

11. [Challenge] Contribute ideas and listen to the ideas of others in cooperative: Which explanation best supports this lesson?

A. Learning means only guessing and never checking

B. Fair play means respecting rules, teammates and opponents. A good team encourages everybody to participate.

C. The lesson has no connection to life or skills

D. The topic can be completed without observing or practising

12. [Challenge] Contribute ideas and listen to the ideas of others in cooperative: What should a partner help you check?

A. Whether you can avoid answering questions

B. Whether you can ignore the agreed task

C. Whether your work demonstrates respectful participation.

D. Whether you can finish without showing your work

13. [Challenge] Contribute ideas and listen to the ideas of others in cooperative: Which follow-up deepens the learning?

A. Stop immediately without reflection

B. Try a gentler or harder safe version and explain how you controlled your movement.

C. Make up results instead of practising

D. Repeat the same error without checking feedback

14. [Challenge] Contribute ideas and listen to the ideas of others in cooperative: How should a learner improve after feedback?

A. Revisit the steps and strengthen respectful participation.

B. Skip a difficult part without asking for help

C. Change answers randomly without a reason

D. Ignore all comments and leave the task incomplete

15. [Challenge] Contribute ideas and listen to the ideas of others in cooperative: Which choice would show responsible use of today’s skill?

A. Apply the lesson about contribute ideas and listen to the ideas of others in cooperative problem-solving activities to a suitable real-life situation.

B. Avoid explaining how the skill could be used

C. Use the topic to mislead others

D. Claim expertise without trying the skill
